

holidays were provided with
ch a variety of weather that
one was pleased very long at
time. Since snow, wind, and
in Christmas day was the last
appearance of Old Sol who went

WALTON.

Mrs. W. L. Sturgeon spent the holidays with friends in California.

Miss Lulu Edwards spent part of the holidays in Covington, guest of Miss Marie Menefee.

Mrs. C. Spencer, Chambers, of Covington, arrived Friday to visit relatives and friends.

Deputy Postmaster E. F. Pinner was confined to his room part of the holidays by illness.

Mrs. H. C. Diers spent the holidays with her daughter, Mrs. Best, of Paris, Bourbon county.

Mrs. Matie Daubman fell on the ice on her porch, a few days since and broke one of her arms.

Mrs. D. B. Wallace is enjoying a visit to her brother, Dr. J. A. Mottier, and wife, in Indianapolis.

T. M. Vess has opened a grocery store in the property of Mrs. Alice Bosen in South Walton.

C. Emerson Calkins, of Cincinnati, spent the holidays here with his father, J. G. Crisler and family.

Dr. H. C. Black, of Oakville, Illinois, spent the holidays here with his parents, Mr. and Mrs. W. H. Crum.

Leslie Jones, of Durham, North Carolina, was the holiday guest of his parents Dr. and Mrs. A. N. Jones.

The Sunday schools of the Methodist and Christian churches gave a very pleasing entertainment at the latter church.

Mr. and Mrs. Bruce Davidson purchased a beautiful piano of which they made a Christmas present to their daughter Bessie.

J. A. Harris of Gallatin county, spent Tuesday here on business, and was the guest of his uncle Wm. F. Moore and family.

Mr. and Mrs. Jno. L. Vest spent part of the holidays at Independence, the guests of her parents, Mr. and Mrs. W. T. Loomis.

Mrs. John C. Bedinger and little daughter, Mary Amanda, are in Rome, Illinois, visiting her brother, Geo. Hughes and family.

Allen Morris spent part of last week in Gallatin county stripping and delivering his tobacco for which he got 14 cents around.

Fred Miller left Saturday morning for Mishawaka, Ind. to begin his season's work as traveling salesman for a company there.

Misses Glenna Rose Gains of Walton and Marie Menefee of Covington spent the holidays at Walton guests of Miss Alma Mae Steger.

Dr. and Mrs. B. W. Stallard and daughter, of Covington, were holiday guests of Mrs. Stallard's parents, Judge and Mrs. T. P. Curry.

Mrs. Wayne Byland of Louisville, arrived here the first of the week to spend the holidays with her parents Mr. and Mrs. E. P. Northcutt.

Miss Sybil Murt, who has been employed to fill a vacancy in the Jonesville, Owen county schools, left Monday to engage in her duties Tuesday.

John C. Bedinger attended the Democratic banquet ordered Hon. William Jennings Bryan at Louisville, Thursday night, he being an invited guest.

The Double Three, the young ladies club of Walton, entertained with a luncheon Friday evening, having as their guests their gentlemen friends.

William Vest, of the real estate firm of Foster & Vest, Covington, spent several days here the first part of the week, guest of relatives and friends.

Lost-Bar pin, light engraving on face, lost in Walton; also gold band ring with buckle. Lost in Kenton county. Return to Geo. B. Powers, Walton, Ky.

Dr. and Mrs. C. C. Metcalfe and daughter, Miss Mae, have gone to St. Petersburg, Florida, to spend the remainder of the winter on account of Mr. Metcalfe's health.

G. B. Powers sold C. M. Emral's 132 acre farm in Kenton county to N. F. Matthews for \$20,000, and 564 acres belonging to N. F. Matthews to C. M. Emral for \$20,000.

Joel Billiter, age 44, died on the Neumeister farm near town, from consumption of the lungs. He leaves a widow but no children. Burial at Sadieville, Scott county, Monday.

Clifford B. Rouse, fireman on the L. & N. Railroad, transferred service between Louisville and Cincinnati, spent the holidays here with his parents Mr. and Mrs. W. R. Rouse.

E. L. Kelley has been confined to his home most of the past week with a severe attack of influenza.

Dr. Bruce Wallace and Mrs. Keller operated his electric plant during his absence.

Jesse L. Hamilton, the undertaker at Verona, left Tuesday for Chicago on a visit to his brother Dr. H. W. Hamilton.

There will have an operation performed on his nose for a minor trouble.

Rev. Ous Hamilton will hold his regular services at the Walton Baptist church Sunday evening, the morning, "The Bazaar for the Tree" Evening of the year's sermon. R. V. V. at 8 p. m. Sunday school at 10 p. m.

Raymond B. Powers is finally shot in the back by an air gun in the hands of Lawrence Robinson, Thursday night. The injury was not serious. The air gun is a present in the hands of the small boy and ought to be abolished.

Card of Thanks: To our members and friends: We feel very grateful to you for every service rendered and every note of sympathy offered us in the recent illness of Mrs. Hamilton. May the blessings of our Father be with you all.

Mr. and Mrs. Ous Hamilton.

E. M. Yelton has been sick the past week.

Miss Grace Powers is enjoying a very pleasant visit with friends in Covington.

Geo. H. Montgomery, of Napoleon, Gallatin county, was the guest of Judge J. G. Tomlin last Saturday.

Mr. and Mrs. W. T. Loomis, of Independence, spent Saturday here with their daughter, Mrs. John L. Vest and family.

Judge and Mrs. J. G. Tomlin and Miss Nida Dickey spent Saturday and Sunday in Cincinnati with friends and relatives.

Miss Zula Mayhugh, who teaches in the school at Gran, spent the holidays here with her parents, Mr. and Mrs. J. D. Mayhugh.

Mr. and Mrs. Benj. Miller, of Gallatin county, spent part of the past week here the guests of Jesse R. Allphin and family.

John A. Downard and son-in-law, R. F. Davidson, of Covington, spent Monday here, visiting the horse market; they being heavy dealers in tobacco.

Charles Griffith, who takes a great interest in agricultural pursuits, attended the farmers' gathering at the State Agricultural College at Lexington, several days this week.

Thos. J. Hughes, of Cincinnati, spent the holidays here with his mother, Mrs. Sallie Green-Hughes, and left Saturday for Huntington W. Va. to preside over a picnic.

Frank D. Cooke was thrown from his wagon on his farm in Kenton county last Friday by his team of horses, becoming frightened and running into a barn, where he was injured and medical aid summoned and he is now rapidly recovering.

George Archibald Miller, of Oklahoma, arrived here Saturday on a visit to his old home at Boone Springs after an absence of 30 years. He resides 10 miles from a railroad, but says it is a fine country to live in and makes a fine living. Mr. Miller will remain here about a month.

Dr. and Mrs. B. K. Menefee, of Covington, spent Christmas here with friends. Dr. Menefee has opened an office in the Capitol Building, Covington and is enjoying a nice practice, and is well pleased with his new location, though he still has a great affection for Walton and vicinity.

Mr. and Mrs. Oswald Peterson, of Corinne, Utah, arrived here Wednesday on a visit to Mrs. Peterson's father Chas. L. Griffith. They have been on a visit to Mr. Peterson's father at Zion City, Illinois. Mr. Peterson, senior, recently suffered a paralytic stroke and is in very poor health.

Real estate agent, Geo. B. Powers, made the following sales of farms the past week: Charles Rose to W. T. Turner, 80 acres near Bracht for \$1,250; Wm. Mulman to Lee Clements 23 acres for \$1,800; C. M. Emral to Wm. Mulman, 152 acres near Bracht for \$1,800; C. M. Emral to D. P. Riley, 152 acres near Bracht for \$1,250.

The Baker Farm Gate—One of the best and most staunchly made farm gates in use. Over 200 now in use in Boone county. Ask those who have been using them. Price only \$2.50 delivered in any part of Boone or adjoining counties. John Myers is my agent at Bellevue.

H. C. BAKER, Walton, Ky.

Knights of Pythias, elected and installed officers for the ensuing term as follows: Chancellor, Commander Samuel H. McCarty; Vice Commander, Recorder, Prelate, Wm. D. Kenney; Master at Arms, William C. Moxley, Keeper of Records and Seal, Thos. F. Curry; Master of the Lodge, D. O. Rouse; Inside Guard, D. B. Wallace; Outside Guard, H. C. Diers, Trustees, D. B. Wallace and William D. Kenney.

Walton Masonic Lodge elected officers for the ensuing year as follows: Worshipful Master, Ernest W. McElroy; Senior Warden, A. J. Thomas; Junior Warden, Samuel H. McCarty; Secretary, Dr. C. Metcalfe; Treasurer, D. B. Wallace; Senior Deacon, Prof. J. C. Gordon; Junior Deacon, James T. Babin; Tyler, Fred C. Halloway; Stewards, John C. Bedinger and S. D. S. Ranson. The installation will take place Friday night, Jan. 5th.

Mrs. A. L. Allen, age 83, died Wednesday at the home of her nephew, Wm. F. Moore. She had been ill for some time, but the immediate cause of her death was an affection of the heart. She was the widow of John P. Allen who died at Verona several years ago. Mrs. Allen was a woman of the highest christian character, and her kindly disposition endeared her to everybody to whom she was known. The funeral took place Friday at the home of her nephew, Wm. F. Moore, where she had been a life time member. Rev. A. Kirtley Johnson conducted the services.

C. Diers; Right Supporter, Noble Grand, N. T. Welsh; Left Supporter, Noble Grand, N. T. Welsh; Right Supporter, Noble Grand, N. T. Welsh; Left Supporter, Noble Grand, N. T. Welsh.

The Equitable Bank and Trust Company declared a ten per cent dividend, the semi annual payment of five per cent being payable to its stockholders Jan. 1st. The dividend herefore has been eight per cent. The bank is nine years old, and besides paying a semi annual dividend from the start, has also placed ten thousand dollars in the surplus fund, all this the law requires at any time, it being twenty per cent of the capital stock. The bank has \$225,000 deposits, two hundred and twenty-five thousand loans, and nearly \$5,000 undivided profits. Recently the State Bank Examiner went over the books and papers of the Bank in a careful way, and pronounced every department as being in an excellent condition, and complimented the Bank in every particular. With nearly a quarter of a million dollars in loans, there was but one note past due and it was for only seventy-five dollars. The other banks in Boone county are in about the same order, being carefully and prudently managed by good, clean business men who take a pride in their business and value their reputation for honesty and trustworthiness greater than all the money entrusted to their care.

The fourth sale at the Walton Loose Leaf market was held Saturday, Dec. 30th, when about 125,000 pounds of tobacco was sold at an average of 16 cents per pound, the prices ranging from 16.50 to 23.50 per cwt. The buyers gave an opinion that the prices paid were as high as any market in the State considering the quality of tobacco. There was a large attendance of buyers from the four corners of Louisville, Lexington and Cincinnati. One crop sold by Ira Stephens of Kenton county, averaged \$20.32. This crop consisted of about 1500 lbs. and was grown on one acre of ground and brought in the aggregate \$315. It was the Silver Seal type of white burley and was well handled and an exceptionally fine crop. The opinion of J. E. Williams, who represents the R. J. Reynolds Co., is that most of the farmers in this locality need new and better seed as the tobacco offered on the market indicates that the seed has deteriorated and "run out." He says the tobacco is not near so good as that offered on the markets at Lexington, Williamson and Day Right. At the latter two places new seed was introduced a couple of years ago and an improvement in the tobacco was noted immediately. Mr. Williams may make arrangements to get some new seed here.

Mrs. James Haven, who left here a little over a month ago to make her home with her daughter Mrs. Ora Adkins in Covington, died last Sunday at St. Elizabeth Hospital from uremic poison, so induced by a tumor of the kidneys. Mrs. Haven, whose maiden name was Miss Nannie Comp-ton, was born near Richmond, Va., March 29th, 1811, and was 75 years old her last birthday. She had been married three times and left four sets of children. Her first husband was Jas. T. Hurt, whom she married April 5th, 1833, and who died but a few years. The children are as follows: Jas. Hurt, who resides here and is employed by the Q. and O. Railroad as station agent at Richmond; Orlando Hicks, who resides at Oakland, Cal.; Mrs. Ora Adkins, who resides in Covington, and a stepson, Mark H. Haven, who resides at Cleveland, Ohio. The funeral took place Tuesday from the Christian church, of which the deceased was a constant member, for many years. Rev. E. C. Lacey, the pastor, preached a very appropriate discourse over the remains. A telegram had been sent to Cleveland, Ohio, where her husband was residing, his nephew, Bryan Havens, apprising him of his wife's death, but no word was received from him, but just as the pastor invited the relatives and friends to take a last look at the remains a telegram flashed up to the church in which was Mr. Havens and his nephew Mrs. Haven was of a kindly and lovable disposition and her share in kindly motherly heart she adopted a little motherless boy, David Maniel, at the age of six and added him to her already large family, and raised him up to a young man well respected and industrious young man. The remains were laid to rest in the Baptist cemetery to await resurrection morning.

The following letter from A. H. Stephenson, formerly of the Walton precinct, and well known in this locality will prove of interest to the readers. Mr. Stephenson has traveled extensively and at one time was in the Canal zone at the Panama Canal; "Thinking of the lines from this quarter may be of interest to your many readers I shall endeavor to give some idea of this quarter and what Stephenson is doing in learning the weather conditions of the island. I am now at Mineola, Long Island, about forty miles east of New York City. I am employed by the Edwards Manufacturing Company, of Cincinnati, Ohio, who have a contract for the erection of buildings for the U. S. for the housing of living machines, supplies. I arrived here Dec. 7, and expect to be here six weeks. I am working twelve men and will work more as the weather permits. The snow is a foot deep and the thermometer is registering 20 below zero. It is awful cold here, work every day. It is a grand sight to see ten or twelve flying machines in the air at one time, flying over the field, they are working. They fly then all the time that the weather is permissible, training young men to fly, to be used in case of war with any nation. The island is twelve miles wide and 13 miles long. We have to walk about a mile and a half to the aviation field every morning. There are three more buildings, we are working on them. If they get the contract I expect to be here until the close of the summer. I hope they

In over a million homes they know

At some time every woman has had her coffee problem—"bad coffee, medium coffee, coffee that was never twice the same."

A million women have solved the problem by serving Arbuckles' Coffee. Get a package of Arbuckles' Coffee today and see why.

Everyone likes it. Morning after morning a million men praise it for its fine, full flavor. Women depend on it. In all these homes, it helps make breakfast a complete success.

From what a few of these women say:

"I recommend Arbuckles' Coffee to my friends. I buy it all the time because it is better coffee."—Miss B., Mercer, Ky.

"I use Arbuckles' because it is stronger than 35c coffee, and Arbuckles' packages are full 16 oz."—Mrs. V., Coldwater, Kans.

"I have been using Arbuckles' Coffee for years. I think it is the only coffee fit to drink."—Mrs. A. C. W., Lay, Colo.

"We have used Arbuckles' Coffee for ten years, and have not yet found its superior equal."—Miss H., Bessemer, Ala.

BOONE CO. RECORDER

W. L. RIDDELL, Publisher.

Local Happenings.

It was a white Christmas.

Locally it was a very quiet Christmas.

It is now splendid driving from Burlington to Covington.

Born on the night of the 22nd ult. to Supt. Edgar C. Riley and wife, a boy.

W. D. Arnold, of Bellevue, was transacting business in Burlington last Friday.

Dr. Velson is the last one hereabouts who tried to operate his automobile minus gasoline.

Over all in the crib, hogs killed and the hunting and trapping season is closed. What have you to do?

James E. Smith filled his ice-house December 20th, with a fine quality of ice ranging in thickness from 4 1/2 to 6 inches.

The necessary goods for the celebration of the holidays is said to have reached Burlington on time in numerous original packages.

Get those plows in shape ready for use at the earliest possible moment. The farmer who pushes his work is the one who prospers.

The rural mail carriers had a very large consignment of Christmas parcel post packages to deliver immediately preceding the holidays.

Kentucky's collection for motor vehicles for the year ending December 1, amounted to \$151,179.91 on 31,500 automobiles and 1,201 motorcycles.

Benjamin H. Berkshire, of Petersburg, went to a Cincinnati hospital on Thursday before the holidays to be operated on for appendicitis.

B. C. Gaines, who resides out on the Petersburg pike, is now doing his traveling in a handsome six-cylinder Oakland automobile, the latest model.

Judge Sidney Gaines spent several days last week in Louisville attending the State convention of Circuit, Judges and Commonwealth Attorneys.

European peace talk is not worrying the consumers of iron and steel, and the demand for them is greater than at any period in the history of the country.

Mrs. John M. Lassing, of St. Petersburg, Florida, sent her sister, Mrs. Emma Brown, as a Christmas remembrance, a box of luscious oranges and grape fruit.

Quite a number of new subscribers have been added to the Recorder's subscription list the past week, but not nearly so many as we removed therefrom.

The trapping season being closed the local rural carriers are congratulating themselves that snark exhalia will be less frequently encountered in packages they have to handle.

The holiday snow was several inches deeper in Great Britain than it was in this country, and in numerous places on the highways it was drifted to a depth that interrupted travel considerably.

J. T. Northcutt, of the Waterloo neighborhood, who had been in the city several weeks receiving medical treatment, was brought home one day the past week. He is yet in a delicate condition.

C. P. Baker, of Union, made his wife a Christmas present of a five passenger Humphrey touring car, 1917 model. He bought the machine of H. H. Hume, of Union, who took a Ford car as payment.

Having given it a week's rest the Recorder opines they will realize more how they appreciate the weekly visit as it is in the absence of a friend that you place a value upon association.

A large number of Burlington young people attended a dance given by Mr. and Mrs. V. W. Gaines last Wednesday night at their home where a delightful affair.

Sheriff J. C. Cooper and his deputy, Mr. Joseph took Joseph Abbot to the penitentiary at Frankfort this week before the holiday, to serve the ten years term given him at the last session of circuit court.

The first sleigh bells of the season were heard here on the night of the 22d inst. On that day several farm sleighs were seen in town and everywhere they had the same of a winter in those good old days you read about.

Tobacco merchants got a New Year's gift this year from Uncle Sam in the measure that relieves them from paying the \$2.00 tax as every six months, the act repealing the tax having taken effect the first day of January.

The young ladies who operate the canteen at the local telephone exchange had a busy time for several days preceding Christmas. They handled more communication than any previous like occasion.

A very small crowd attended court last Monday.

Stephens Bros. have a new six cylinder Buick touring car.

Joseph Birke, of Bullittsville, was the first subscriber to renew in the new year.

The first day of December lost its governing power towards the last of the month.

The tobacco growers have been given a chance to handle their tobacco the past week.

The Recorder kept open house Monday, and received several callers, who gladdened its heart.

Lost—Leather halter with rope ring at school house or in Burlington. Finder will please return to the Recorder office.

The county board of tax equalizers are in session at the court house, looking over the work done by the assessor last fall.

Edward Borts and Frank Voshell have about the best bred Jersey bull in this county. They are advertising him for service.

For Sale—Several registered Holstein-Friesian bull calves. Pedigrees and prices on application. Hubert Conner, Hebron, Ky.

Our observation is that the man whose dignity needs an automobile as big as a box car is too darn dignified for any use.

How easily and comfortably farmers can get about with their teams when the roads are solid and the roads the past few weeks have given a splendid demonstration.

Owen Smith brought from the city one day last week about a bushel of oysters in the shell, a supply of which he gave some of his friends who relish the delicacy.

John J. Howe, Commonwealth's Attorney in this Judicial District, was elected President of the Commonwealth's Attorneys' Association of the State held in Louisville last week.

If a stop is not put to Vill's gaining of strength it will not be long before the Spaniard will have to flee his country. It now looks like Carenza will never be able to make good.

Mr. Marsh, a very distinguished weather prognosticator, has issued an unpleasant weather program for this month, according to which there will be considerable cold, sleet and snow.

There was not a large crop of turkeys raised in Boone county last year but the prices these birds brought will result in an effort to produce a great deal larger crop in 1917.

Albert Conner, local dealer in leaf tobacco, had in the neighborhood of 8,000 pounds on the loosest leaf as at Walton, last Saturday, and was delighted with the prices he received.

E. L. Helms, one of Petersburg's busiers, was a caller at this office, Monday, and reported his town on the map again. A local coal company had just received a large lot of black diamond.

Livestock has required considerable provender since the middle of December, and, already, some of the farmers fear that the supply they have on hand may be exhausted before grass comes again.

At this distance it looks like little nothing is being gained by keeping Uncle Sam's soldiers in Mexico, and unless the tide is changed Villa will be the boss in this country in the next few months.

After deserting the Russian army, it took a long time for two years to reach Paris, Ky. where he is the guest of relatives. He was arrested on the suspicion of being a German spy and spent some time as a prisoner in Siberia.

Of the 15 miles of road from Burlington to Covington 13 miles of the distance is nearly as smooth as a floor, making a most desirable trip in an automobile, and a condition that will redound greatly to the benefit of Covington merchants.

The output of American mines in 1916 was valued at \$3,000,000,000, according to an estimate submitted to Secretary Lane by the Geological Survey. The greatest profit was in copper, the gross output being about \$300,000,000. The output was 23 per cent above 1915.

On account of ice in the river a portion of Bellevue's Christmas supplies had to be received by the way of Burlington. It is only a matter of time when the goods sold in Bellevue will be hauled by truck from the city through Burlington the natural route.

About 30,000,000 pounds of the Green River tobacco crop has been disposed of at Owensboro during the first month of sales. It is asserted that original estimates of a total of 50,000,000 pounds were excessive. Growers believe that quite a large quantity of the crop will bring \$30 per one hundred pounds later in the season.

Wednesday morning the local court closed a deal with Joel C. Clark, who had a long time been the owner of his tan mill of red known as the Bullittsville and Dry Creek turnpike. Consideration ten thousand dollars.

Donzel Carpenter, who was badly crippled several weeks ago at the school house, is able to go to school again. He has to use crutches.

The Fiscal Court with all the justices present, was in session Tuesday and Wednesday. Tuesday was spent discussing the road problem which was gone over thoroughly. The Muncie pike and the Metchum pike were taken over, on the latter pike the county is to spend \$1,000 in three years.

Richard Stephens is acting as place of J. L. Jones as supervisor of tax. The board of local is complimenting A. A. B. B. highly for his splendid work and most excellently arranged book.

Many Thanks!

Goode & Dunkie

Covington, Ky.

Slip a few Prince Albert

smokes into your system!

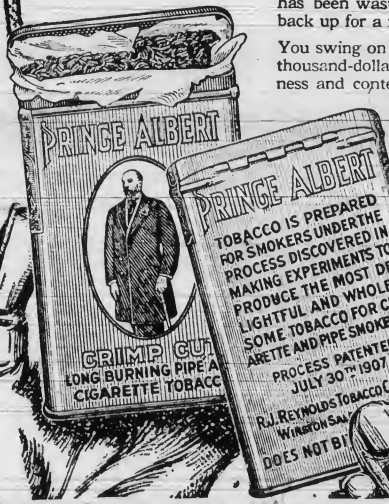

You've heard many an earful about the Prince Albert patented process that cuts out bite and parch and lets you smoke your fill without a comeback! Stake your bank roll that it proves out every hour of the day. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

There's sport smoking a pipe or rolling your own, but you know that you've got to have the right tobacco! We tell you Prince Albert will bang the doors wide open for you to come in on a good time firing up every little so often, without a regret! You'll feel like your smoke past has been wasted and will be sorry you cannot back up for a fresh start.

You swing on this say-so like it was a tip to a thousand-dollar bill! It's worth that in happiness and contentment to you, to every man who knows what can be gotten out of a chummy jimmy pipe or a makin's cigarette with Prince Albert for "packing"!

Moreover, if all men are born free and equal why is it that some heads are crowned with laurel and other heads are called "beasts"?

Prosperity Dwells in and About Ohio.

While every section of the United States is enjoying extraordinary prosperity, a prosperity that should and probably will continue for years in the future, there is not any section of the republic that possesses such elements of permanent prosperity as does the section of the country of which the city of Cincinnati is the center.

In this important and influential section we have a combination of the factors of active and profitable business which no other section can marshal or assemble.

We have extensive agricultural interests, enterprising industries, profitable mines, profitable commerce and ample financial resources.

We have the greatest railway systems of the country, those that connect the lakes with the gulf and the ocean, as well as those which span the continent from the East to the West.

The busiest waterways of the republic are the carriers of the trade and the modern steam highways traverse our territory, providing unsurpassed facilities for land transportation and travel.

Our manufacturers and our merchants can command facilities which connect them directly with our foreign commerce, with our closeness to the center of the population of our own country gives them special advantages in our home market.

The Enquirer deals in no vain or foolish optimism when it asserts that conditions at this time portend a still greater prosperity for the people of Ohio and the states adjacent to this commonwealth.

Business men are about to enter a year that will prove a record breaking one in the number of transactions, as well as in the values and volumes of trade. The masses of the people of this great central zone of the United States possess a purchasing power now which has never been equaled in any nation in its per capita average, and by the close of 1917 it will be even larger than it is at this writing. Hope and confidence by right and by reason, now should dominate the sentiment of our people, and pessimists have no place in the Ohio Valley or in the great Mississippi Valley for the next few years.—Enquirer.

DEVON.

Ben. Bristow, at Erlanger, on business, Saturday.

Mrs. Ambrose Easton spent Sunday with Mrs. Seymour Riley. Wishing the RECORDER and its readers a prosperous New Year.

Edward Black of Big Bone, was a guest at Jas. Bristow's, part of last week.

Eli Carpenter and family were guests of his brother Earl and family at Richmond, Friday.

Mr. Joseph Ewhank and son, Raymond, of Crescent Springs, spent Friday here, guests at Ben. Bristow's.

Messrs. Ollie Dixon, of Richmond, and Jasper Carpenter, of Covington, were guests of C. D. Carpenter recently.

C. D. Carpenter and family had as guests, Friday, Mr. and Mrs. Ben. Cleck and daughter, Miss Grace, of Kensington.

Ben. Bristow purchased of W. J. Shearer, of Erlanger, a fine thoroughbred son of his noted Black Berk shire son.

Mr. and Mrs. C. E. Miller and little daughter, of Big Bone, spent Christmas with their parents, Mr. and Mrs. P. Bristow.

Mr. and Mrs. P. Parry-Dixon and daughter, Miss Mae, were guests of J. B. Dixon and sisters, Misses Jennie and Mary, Saturday.

The young folks enjoyed a merry dance Friday night given by Mr. and Mrs. Walker at Home. The host served a nice lunch.

Mrs. Theodore Gruger and daughters, Misses Mabel and Stella, Sunday with Mr. and Mrs. George Carter, of Scott's Pasture.

The Juniors of the Independent Lodge served an oyster supper at that place Saturday night and 35 members were received into the lodge.

Mr. and Mrs. James Dobbins, of Richmond, were guests of their sister, Mrs. Hogrefe, near Independence, one day during the holidays.

Mr. and Mrs. Will Haycock and sister Miss Henrietta Huseman of Covington, came out and Sunday with their parent, Mr. Joseph Huseman.

Mr. and Mrs. Jas. Dobbins, of Richmond, entertained Mr. and Mrs. J. H. Hogrefe and sister, Miss Virginia Hogrefe from Saturday until Friday.

Mrs. William Fieck and daughters, Misses Emma and Marie, of Keosaupe Springs, were guests of Mrs. C. D. Carpenter and daughter, Thursday.

Clarence Reeter and family had as guests Wednesday, C. D. Carpenter, Mrs. Carpenter and daughter, Mrs. Sarah Reeter.

Arthur Kelly and Stanley Carson left Wednesday for Fla., their objective point being Jacksonville.

B. W. Jones, of Graiz, and Miss Rebecca S. Woods, were married at the court house, Thursday, Rev. Edgar C. Riley officiating. The bride is the daughter of the Methodist minister at Petersburg.

Clara, of Indiana, has been here for a few days, on her way to New Orleans.

There is nothing humanly depressing about it is high prices and the fact that the other way—Dallas, Texas.

OPEN FOR TRAVEL

Dixie Highway Thru Kenton County Pride of Residents Along Route.

Kenton will be the first county in Kentucky to have a paved or concrete road running from one end of the county through to the other, according to W. R. Swan, state director of roads, who has charge of the reconstruction of the Lexington pike between Covington and Erlanger.

This part of Lexington pike is now open for travel after being closed since last September, and residents along the pike proclaim it to be the best ever.

Swan said that there is about one mile more which must be reconstructed with concrete before the pike will be finished to the Boone county highway and that it lies in and on the other side of Erlanger.

About a quarter of a mile of the road is in Erlanger, he said, and of course, the citizens of that town will be expected to see that a road is taken thru the town.

Then, Swan said, as early as possible in the spring, reconstruction of the remaining three-quarters will be started, and when that is finished, Kenton county will be the first to have a concrete road to the Dixie Highway.

Kenton county Judge John T. Ross, accompanied by the commissioners, made a tour of inspection of the newly constructed road, and each said that they considered it an excellent thoroughfare.

According to the contractor, Lewis, Metzel and O'Hearn of Covington, the highway work of this county will be less than that of the ordinary macadam road.

A concrete road, they say, will last for a long time. Where, for instance, they say, is or is to be put between the steel joints, which are placed every 30 feet on the concrete, for expansion and contraction of the concrete caused by the weather.

Most of the residents have ceased calling it the Lexington pike, and refer to it as the Dixie Highway.

Swan said that he has heard people ask residents, "Where do you live?" and they would invariably be "On the Dixie Highway."

The people in that locality Swan said are greatly pleased with the newly constructed pike, and he said they have reason to be, for with the exception of a short distance between Covington and P. Mitchell, they have smooth concrete road to travel on.—Kentucky Post.

BELLEVIEW.

Mrs. Xen Scott entertained the W. M. U. last Thursday.

Mr. and Mrs. Rogers entertained with a party, Thursday night.

Mrs. H. D. Brady spent last Friday with her sister, Mrs. G. W. Ward.

Mr. and Mrs. Jake Cook spent Thursday with Mr. and Mrs. John Deck.

Miss Zella Mayhugh spent the holiday vacation with her parents at Walton.

Mrs. Belle Clure and son, John, spent last Sunday at Henry Clure's.

Mr. and Mrs. Edward Maurer, of Louisville, spent last week here with relatives.

After a week's visit with Mrs. Belle Cason Miss Nora French returned to her home in Indiana.

Lee and Franklin Clure spent the holidays with their brother Wilbur and wife in Indianapolis.

Mr. and Mrs. J. D. McNeely and Rev. Robt. McNeely and wife spent Christmas at E. McNeely's.

Sheldon Flick, of Berea College, enjoyed his vacation with his grandparents Mr. and Mrs. Isaac Flick.

The students who came home for the Christmas holidays have returned to their respective schools.

Rev. C. E. Baker and wife returned Thursday. Mrs. Baker's father and mother accompanied her.

Edwin Kelly desires to express his appreciation and thanks to the Burlington community that remain loyal to him at Christmas with so many nice gifts.

Robt. A. Braly, Jr., and brothers, Joe and Misses Alline, Clure and Laura, Rogers spent New Year's day at Lewis Stephens near Waterloo.

R. W. Rice and wife entertained with a big turkey dinner Christmas day. Those present were Mr. and Mrs. Leslie Sebre, Miss Ruby Ryle, Sheldon Flick, Miss Mabelle Flick and Robert Brady, Jr.

Richard Marshall and Miss Leona Cason were recently married at Independence, Wednesday, Dec. 26th.

Rev. C. E. Baker officiating. The couple are well known here and have the best wishes of all.

The big New Year's ball which was held in the Boone Hotel on Monday evening was a success in every particular. A large crowd of both young and old enjoyed the evening and the excitement.

Coming from Erlanger, Hebron, Bullittsville, in fact the whole county and adjacent country being represented. The music was furnished by the Columbia Trio and it was an all-around success. The affair was the best one of the kind held in Burlington for some time past and from expressions made by most of those attending the next event of a similar character cannot come too soon.

It is all right for folks to tell us not to worry, but why don't they tell the folks we owe not to worry and

If there is anything humanly depressing about it is high prices and the fact that the other way—Dallas, Texas.

HEBRON.

Leon Aylor and wife are participants in a little daughter, Edna. Allen Goodridge moved last week to the farm he purchased just north of town.

Ed Baker and family had several of their relatives and friends at dinner one day last week.

The regular annual congregational meeting will be held next Saturday at the church beginning at 10 o'clock.

Dr. and Mrs. Sayre are now residents of Florence, having moved last Saturday to his mother's. We regret very much to lose them from our vicinity. Our loss will be a gain to Florence.

IDLEWILD.

Mrs. R. B. Grant entertained a number of her friends Thursday with a turkey dinner.

Mr. and Mrs. L. C. Seothorn are now pleasantly settled in their new home, the N. S. Walton place.

Mr. and Mrs. Wilbur Rice spent Sunday near Petersburg with her parents, Mr. and Mrs. Chas. Moore.

Mr. and Mrs. Chester Grant are receiving congratulations over the arrival of a new daughter, Miss Anna Lucille.

A large amount of tobacco was landed from this neighborhood last week to Thompson & Wingate in Petersburg.

Mr. and Mrs. E. O. Norman moved Wednesday from Union and will have charge of the J. S. Asbury farm this year.

There was a meeting of the dairy men from this vicinity at Bullittsville Friday morning. The main object was to secure twenty cents per gallon this year.

After enjoying immensely their vacation Miss Maud Norman Asbury and Mr. Carroll Cropper left Tuesday for Lexington to resume their work in the University of Kentucky.

GUNPOWDER.

Mrs. P. J. Aiken of P. Pleasant neighborhood, visited her mother on Thursday of last week.

Miss Polly Hart of Junction City, spent the holidays with relatives in this neighborhood.

Mr. and Mrs. J. W. Rouse entertained all of their children and grandchildren, Christmas day.

B. A. Rouse and wife entertained several of their friends at dinner on Thursday of last week.

Mrs. Grace Clure was the guest of her parents, Mr. and Mrs. P. P. Neal, Sunday night and Christmas.

On Wednesday of last week, Steve Robbins and family, J. W. Rouse and family, Robert Snyder and family and B. A. Rouse and family broke bread with Albert Robbins and wife.

A few days ago this writer called on J. W. Utz who had a stroke of paralysis about two weeks ago. While he is not suffering any pain he is confined to his room and his condition has not improved very much.

The Christmas entertainment at Howell was attended by a large congregation and the little ones deserve great credit for the manner in which they rendered the program. All of the exercises, each member of the Sunday school was treated to a box of candy, while various other gifts were distributed.

C. T. Davis and wife entertained the following guests at dinner New Year's day, J. C. Hankins and wife, Charles Riley and wife, and John H. P. J. Allen and wife, and this scribe and wife. A beautiful dinner was served at the noon hour, consisting of all of the delicacies of the season. The guests were entertained with several beautiful selections rendered by Messieurs Riley and Allen on the piano.

FLICKERTOWN.

Benjamin Akin has completed his barn.

E. A. Grant has a Poland China male hog for sale.

Owen Utz of Newport visited J. W. White, last Sunday.

Miss Leona Smith entertained with a party New Year's night.

Mrs. C. J. Hensley visited her parents at Addyston, Sunday, and Monday.

Miss Lucretia Hensley visited her relatives on East Benl road, last week.

Camm White* entertained the young folks with a dance Saturday night.

Mrs. Len Ruth and children, of Lawrenceburg, visited at James Snyder's, Sunday.

Lucian Ryle and daughter, Ora, of Greenburg, Ind., visited relatives here last week.

J. W. White and family visited in Locust Grove and Hathaway neighborhoods last Thursday and Friday.

Louie Messmer and wife, of Cleveland, Ohio, and Miss Lena Messmer, of Newport, visited at E. A. Grant's several days last week.

Kentucky's thirteen Democratic electors, who, on November 7th, carried the State in the name of Woodrow Wilson and Thomas R. Marshall, will meet in Frankfort next Monday and formally cast their votes for the two great Democratic leaders. It will be with a certain amount of pride that the Kentucky electors cast their votes for President Wilson and Vice President Marshall, for in a large measure it is to their credit that the State rolled up the large vote in the history of a presidential election and the Democratic majority was the greatest.

FLORENCE.

Mr. and Mrs. Joe Whitson are the proud parents of a boy.

Mrs. J. H. Grant had as her guest Monday her mother, Miss Carrie Clark of Covington, who was the guest of Mrs. Nettie Corbin last week.

Mrs. Arminia Pearson is the guest of her daughter, Mrs. Eli Surface, of Mt. Zion.

Miss Genetta Clark, of Cincinnati, spent Saturday night and Sunday with Miss Ruby Corbin.

Miss Lorena Hafer, of Hebron, was the guest of Mrs. Mary Fulton several days last week.

Mrs. Ben Norheut had as her guest Friday Mr. and Mrs. Elmer Glacken and son, of Bluffwood.

Mrs. Jennie Wilhoit and sons, Charles and Harry, spent several days last week with Mrs. Fred Utz.

Mrs. Jesse Cook and daughter, Janice, of Erlanger, were guests of Mrs. J. R. Whitson, one day last week.

Miss Sarah Norheut spent several days the past week with Mr. and Mrs. Robert Robinson of Kensington.

Chas. Bradford has returned to Louisville after spending the holidays with his parents Mr. and Mrs. Will Bradford.

Clay Caselman and wife, of East Bend, were guests of Dr. T. T. Caselman and family, Saturday and Sunday.

Miss Sadie Snyder has returned to her school at Richmond after spending the holidays with her mother, Mrs. Ben Snyder.

Mrs. Roy Seniors and daughter, Viola, of Reading, O., spent several days last week with her parents, Mr. and Mrs. Joe Baxter.

Mr. and Mrs. Ben Norheut entertained Sunday, Mr. and Mrs. Lenni Farmer and sons, Kenneth and Russell, and Mr. and Mrs. B. W. Dulaney, of Cincinnati.

Mr. and Mrs. John D. Mitchell and son, Wilford, Mr. and Mrs. Wm. Points and children, and Mrs. Lucas, of Erlanger, were the guests of Mr. Lucas, of Banklick, Sunday.

Mr. and Mrs. Mildred Edkins entertained several of her friends with a watch party Sunday evening. Music and games were enjoyed by all after which a delightful lunch was served.

Not a bell was rung in Burlington to announce the departure of the old and the coming of the new year, neither were there any watch parties. It did not use to be thus.

The local K. of P. lodge had a big soup last Saturday night which was enjoyed by several members of neighboring lodges.

Program of Literary Society. The Boone Literary and Improvement League will hold its next session on Friday night of this week at the home of Miss Elizabeth Rogers. The program will consist of an issue of the Flashlight gotten out by the members of the society.

Dr. O. S. Driscoll, who is employed at the State Penitentiary Station, Lexington, came home to spend the holidays but had not got the wing when he was wired from Lexington that his presence was needed in the lower part of the State, to see on foot work to rid a county of a disease that had appeared among the livestock.

Not being needed at home longer was a sore disappointment to the doctor, but he accepted his grip and hastened to the locality to which duty called.

FORTY YEARS AGO TODAY

Items Taken From The Recorder of January 4, 1877.

Jonas Clure, who resides on the East bend road about eight miles from this place, has discovered a coal mine on his farm. The coal looks like a good article.

The jury who tried Press Webster for the killing of Alexander Miller in Walton was composed of the following: W. T. Aylor, John H. Bruce, Cy Cowen, Noah Clure, M. R. W. White, Joe Brown, Cy Bruce, J. M. Cloud, G. T. Gaines, H. W. Riley, Richard and White. The verdict was not guilty.

Mrs. G. W. Weaver, of Gunpowder died from effects of burns received from her clothing catching fire.

A very bright meteor was seen last Thursday night.

Stock water is becoming an item. J. C. Jenkins sold to a gentleman in Aurora 19 cattle that averaged 1200 pounds.

The Supreme court of Florida has ordered a recount of the vote cast for President.

All good Democrats and honest Republicans were requested to meet at the court house in Burlington, Jan. 1st, to select delegates to State convention.

Dr. J. A. Muntz, of Cincinnati, spent the Xmas holidays with his son, Prof. J. Harlan Muntz, and wife.

Howard Kirkpatrick spent the Christmas holidays with his sister, Mrs. W. R. Davrainville, in Newport.

Atty. Benj. Riley ate turkey and otherwise celebrated the holidays with his parents over at Independence.

FUR COATS AND EARRINGS AGAIN

Combination Once More With Us, and Human Nature Responds to Call.

SMOOTH PELTRIES PREFERRED

Prevailing Fur Coats Have Less Flee Than Last Year, Unless They Are Cut—Three Quarter Length Muffs Are Small and Simple.

New York.—As far back as one can look into the annals of American fashions, the possession of a seal-skin coat was accounted supreme happiness. The woman who had such a garment, linked with a pair of diamond earrings, either strutted in her vanity or tried to look unconscious of the envy of her neighbors.

Other times, other wishes. Three decades have passed since the seal-skin coat was a desirable possession, and the diamond earrings swinging from a long loop that went through a pierced hole in the ear speedily sank into that blackness of barbarism from which it had sprung.

The fur coat and the diamond earring are with us again, and again human nature responds to the same old call. They are not in the shape in which they prevailed for so many decades among our best families. Looking back on the pierced ear with its pendant tangle, we have a shudder of horror to think that enlightened and Christian nations should have really permitted their women to retain this bit of savagery without bitter protest.

Our mothers had their ears pierced as children, and possibly we did, too. If we were born before the barbarism was abolished.

There are thousands of us now who bear those scars. We cover them up with tals of hair or, better still, with ornaments that clasp over the ear, just to hide the ravages of an earlier epoch.

We have not given up the barbaric bangles; the world is too young to ask that denial of women. The elimination of colored stones, cheap and precious, may come as civic life

This evening gown of black velvet has shoulder straps of ermine, also a fringe of this expensive peltry at the hem. There is a diplomat's sash of it that goes across the chest and hangs to the knees.

presses itself more insistently into the social scale and women will do as men have done in giving up all that is ornamental and resisting the lure of the barbaric.

Elemental and Primitive.

After all, we are elemental and primitive in our clothes. We may change the symptoms, but the deep-seated disease is there. What woman is there who doesn't want to wear peltry? Those companions of the Paleolithic in Europe probably received massive peltry as marriage gifts.

Men have always been hunters of game, and women have always been wearers of skins. Therefore, how can we expect to change primitive instinct merely because we have changed our behavior? And then, there is nothing else that keeps one as warm as peltry, one may argue. This reasoning, however, has little to do with the fact.

There are women as far south as the boundary line of Florida who are buying fur coats that reach to the knees, and there are women in India who still gird their loins with the skins of beasts. Logic and reasoning are not lighted the wearing of peltry; it is the absolute expression of primordial instinct.

The skins of the animals are not the same; they differ as the warm epochs differ. It was quite easy for a woman of the stone age to invent

PLANS FOR FARM BUILDINGS

Landscape Architect of Iowa State College Has Unique Scheme for Locating Structures.

Just as in a game of checkers, if, in your farmstead planning, you take a little time to look before you move, it's going to save a lot of regrets and money later on, advises R. J. Pearce, landscape architect with the agricultural extension department at Iowa state college. Mr. Pearce has a unique scheme of laying out plans for locating new farm buildings.

In planning full or winter buildings, he says, make a plan of your farmstead; measure up the existing buildings, fences, drives, tanks and silos and locate them on a plan drawn to scale, 20 feet on the ground now represented by one inch on paper.

Next, cut out of pasteboard the plan of the buildings you want to build, drawn to scale. Place these on the plan of the present buildings and move them about until their location satisfies your conditions as well as possible. Try different locations for the buildings; ask yourself questions and always locate with a definite reason in mind.

It is remarkable how many mistakes can be remedied in this manner before they are made. Locating on a plan also gives a bird's-eye view of the whole place.

TREATMENT FOR NAIL WOUND

Take No Chances, as Lockjaw or Permanent Lameness May Result—Advice of An Expert.

It is better to be safe than sorry! When a horse steps on a nail take no chances. Remove the nail as soon as possible and thoroughly cleanse the wound. When a horse limps investigate the cause. This is the advice of David Gray, assistant in animal husbandry in the Kansas state agricultural college.

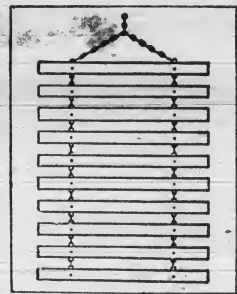

"The removal of the nail can easily be accomplished with an ordinary claw hammer, a small block of wood being used as a fulcrum over which to pry," says Mr. Gray. "If the nail is not too large a pair of pliers is suitable for this work."

"If not cared for immediately the wound may cause lockjaw or permanent lameness. For cleansing the wound a syringe and warm water may be used if care is taken to cleanse thoroughly. The best method is to apply liberally any coal-tar product, such as creolin, as it is effective in breaking up the infection. If a nail wound is given immediate and careful attention the life of a horse is usually safe."

LITTER CARRIER IS USEFUL

Invaluable for Cleaning Stable That Has Wide Door and Level Floor—Dumps Itself.

The cut shown below illustrates a very simple device of more merit than one could imagine. The slats are 1 by 4 inches, bolted to the chain with 8-by-8-inch bolts. The first slat behind the cover is 2 by 4 to maintain spread and bored for the chain. A light log chain about 16½ feet long is

Self-Dumping Litter Carrier.

provided for a carrier of this size, 5 feet wide by 6 feet long.

This carrier is easy to load by hand, holds a big load, and dumps automatically by reversing force the carrier rolling until it is bottom-side up. When not in use it can be rolled up and made to occupy but little space. It is invaluable for cleaning a stable that has a wide door and level floor.

LEAVES FOR ENRICHING SOIL

Put Them in Obscure Corner and Let Them Rot—Afford Good Protection From Frost.

Do not burn the leaves. Put them into a waste corner and let them rot for use in potting plants and enriching soils for outdoor planting. Nothing makes safer protection from frost. A foot of forest leaves will protect the soil from freezing in our severest winters and enable us to get in some early crops in the year. A few old boards or brush will keep them from blowing away.

GOOD WHITEWASH FOR TREES

Lime, Salt, Tallow and Water Make Excellent Solution for Protection Against Bugs.

A good whitewash for trees is made of 30 pounds lime, five pounds salt, four pounds tallow, stirring the tallow in while the lime is hot. Add enough water to make the wash white. It is a better protection against auburns and insects than whitewash to which the tallow has not been added.

STYLES FOR WINTER

MANY NEW IDEAS SEEN IN THE PRESENT MODES.

The One-Piece Dress and Coat, Lower Boots and Trained Ball Gowns Are Distinguishing Features That Will Attract Women.

Winter modes are well established. We shall see deviations and adaptations of them, but little now till the buyers have made their midwinter voyage to Paris for spring styles.

There are so many new ideas in the present modes that women will not tire of them soon. Indeed, it has been a constant struggle to judge from looking on, to get used to the present long and slender contours decreed by Paris dressmakers and milliners.

I have heard women speak with bitterness of the expensiveness of winter shoes, "and they do not show half as much this winter," and complain that the top coat was not half so practical and smart as the tailored frock coat. But when it comes to evening gowns without exception every woman just gasps and says, "My dear, they are perfectly lovely."

There seems to be no objection to the trains, because "they're not the kind that are in the way," and the ankles manage to be in evidence because of the movability of the hem. One sees less of the fox animal scarf this winter; the predilection for fur sets is obvious.

Sets of fur combined with some fabric have always been the vogue of "elegantes" in Paris. Now the idea is being taken up here. The result is great individuality, for the scarfs or capes must harmonize with the dress with which they are worn. Most of them are of the shoulder-cape variety; this is good in that being worn without any other outside garment they are plenty warm enough, except for the shivery sort of person and in very cold weather.

Another peculiarity in winter modes is the reappearance of the long fur cape. It may or may not have a slit for the hand. Often these capes are shaped so they extend out of the sides enough to form something that resembles a sleeve—enough to partly cover the arm.

In the long fur coats and wraps the collar is almost invariably made of a contrasting fur. The trimming hem behind this year, if there is one, is rather deep, 9 or 12 inches, flat in appearance, where last year the hem band was generally narrow and round in appearance.

Many are contours on evening gowns are often arranged so there is a startling air of undress, for the lower part of the skirt, full and draped, is attached at the hip line, while the upper part clings to the figure. This gives it a startling air of being a lounging gown—odd for a ballroom. But one soon grows accustomed to new contours.—New York Herald.

USEFUL AND DAINTY CUSHION

Can Be Made From Holland or Linen, and Needs Only a Rose for Decoration.

Very effective and useful cushions can be made from holland or linen, and all that is needed in the way of decoration is simply a single rose with one or two leaves attached.

Grey linen looks very beautiful with a rose worked in delicate pink shades; the heart of the rose should be deeper than the outside petals.

The rose is simply worked with satin stitch in Port Lustre, so that it can be easily washed as well as being decorative.

A Useful Cushion.

native; or a rose cut from good cretonne and appliqued on will have an excellent effect.

First make a bag for the cushion in talico the size you wish it to be, then fill with vegetable down, real down or feathers. The linen for the case should be embroidered before it is made up; when made, put it over the cushion, sew up the end and edge all round with cord, and either put a tassel at each corner or else arrange the cord in loops.

Though so very simple, the cushion is in exquisite taste, yet is not too fine to use for the wear and tear of every day life.

Bits of Real Lace.

Embroidery of mesh threads and touches of real lace, such as venise, bragues and cluny, are used in trimmings. Bells, snakes and other motifs are embroidered in mesh and a row or a regular wave of mesh, a row of unusual beauty. Embroiderment can be used in a great variety of ways to give a new look to the lace.

THE BEST MAN WINS

By SUSAN E. CLAGETT.

"You have heard of the place paved with good intentions, Pauline, dear. I am afraid many bricks are laid to my credit, for my intentions are always good but fail of accomplishment. I mean to write, but somehow never do. This time you must forgive me, for I am most unhappy. And my unhappiness came from out of a clear sky. Since then I have sounded the depths. Father is obstinate. Mother sides with him.

"It is nothing but pig-headed obstinacy in father. Anyone looking at Howard would know he is a gentleman. He certainly is good to look at, and, of course, I think the sun rises and sets in him. But father will not listen when I tell him we are engaged. He merely says: 'When you are a man, Jane, you can marry him as soon as he asks you, but so long as I live a make-believe one shall never have you.'

"July 10th—I thought my father had reached you but have just found it in my portfolio. When I wrote a month ago, I thought myself encompassed by misery, but my feelings were as nothing to what they have been the past few days.

"Father told me I must break off my engagement; that I should not see Howard again. I started. He merely said: 'Jane, put on your hat and take a drive with your mother and me.' That was all.

"I told myself I wouldn't. But I had never disobeyed father in my life and we started on that drive. It was a long one. It took us three days to reach this place, a little farm at the end of nowhere, thirty miles from the nearest railroad station! There is no post office, no telephone, no car!

"July 20th—Pauline, dear, it is a comfort to chat with you, even if my letter has to wait forever and forever to reach the office. I do get so hungry for home news. Mother has written once, but not a word from dad, which shows plainly that I am still in disgrace. Today Peter told me he might go to the station for mail. If he didn't, he thought Dan Isham would take my letters. Whoever is Dan Isham? I haven't seen a man, except Peter, since father left me here. I wonder if he is as old and wrinkled as Peter."

"July 21st—He came before I had finished my letter. Just an ordinary, farmer sort of person. He has nice eyes. I saw that, although he turned them away at once. I wonder what he thought of me?

"August 10th—I am seeing a good deal of Dan Isham. He lives on the next place, wherever that is. He isn't a bit like Howard, but he knows where to find the loveliest wood flowers, and this morning showed me the cutest little open-mouthed baby birds; mocking birds, he said they were.

"August 24th—Dan came this morning and asked me to walk to King's Creek with him. I don't know what got into me, but I felt I must talk of Howard. I told of our engagement, and how determined father is that it shall be broken off, but that I was determined to marry him when I came of age.

"And when will that be? he asked. Your appearance this morning suggests nothing so much as that of a pretty spoiled child of twelve."

"Spoiled child? I gasped. I could not control my voice so I turned my back on him. As I did so I caught sight of something that turned me cold with fright. Coming toward us with lowered head was a great black bull. With a shuddering sob I caught hold of Dan and hid my face against his shoulder.

"Why, child? Then the low mutter of that awful animal made him turn suddenly. Will you believe me, Pauline, Dan Isham laughed, but he didn't let me go—He put his hand under my chin and made me look at him. Why he said in my eyes I do not know. What I saw in his made me again hide my face against that old, faded blue shirt. Even through my fear I was glad Howard had told Howard Chandler I should not marry him.

"I did not mind Dan's laughing, there was such comfort in feeling his arms about me, but for property's sake I tried to slip from them, when he said:

"Jane, that steer is one of Peter's ox team, and is as gentle as a lamb. Truly I am thankful he put in an appearance just now, for I have been wondering ever since you began talking of Chandler, how long I would have to wait before you found out you loved me instead. For you do love me. There is no question about my feeling. ... You? I surrendered the first time I saw you."

"When we at last reached the house where should we find but father, and he shook Dan's hand as if he had known him all his life. It seems Dan had studied law in the office and had been associated more or less with dad ever since. I don't know why I had never met him. It just happened so, I suppose.

"Of course Dan didn't rest until he had told father about our love. When he finished, dad looked at us with a twinkle in his eyes that made me suspicious, but he said very solemnly: 'You can have her, Dan. You are a man after my own heart.'

"I wonder, Pauline, I wonder! Do you think dad could have said this in mid-winter when he left me thirty miles from a post office?"

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pressed steel frame—every supporting part a forging or pressed steel—Republic Torbenston Internal Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

LENGTHENING OUR DAYS.

How hard it is to escape the shackles of tradition is shown by the continuing force of what is known as the Psalmist's span of life. Nearly 3,000 years ago David sang that "the days of our years are three score years and ten," and to this day a multitude of men and women have come to think of that age as the normal limit of life, says Pittsburgh Dispatch. Burial services reflect it and the tendency has been that when people near seventy, many, brooding on the Psalmist's words, become depressed, lose hope and interest in living and let themselves down into a state of premature senility that hastens their end. Three score and ten may have seemed a round old age 20 centuries ago, considering medical and sanitary knowledge and conditions of living then. In this age of progress and civilization we still have to urge "save the babies" compulsion and are only just beginning to recognize that it is easier to prevent diseases than to try to cure them, the men and women who, like David, reached the Psalmist's span in those days, must have had rugged constitutions. But to assume that with all our gain in science, in improved living and popular education we have not succeeded in lengthening our days a particle is a libel on all progress. Longevity statistics, in fact, prove that we have, that today the span of life has been stretched very far beyond David's limit. On an average human life, outside the war, is lengthened 15 years within this generation.

A medical man in a communication to a newspaper of New York city advances the theory that a considerable number of cases diagnosed as infantile paralysis may be due to the eating of spoiled food and are merely cases of ptomaine poisoning. This, of course, applies only to the congested districts of the great city. It is stated that several cases of illness occurring in the East side of the city reported as ptomaine poisoning were found on investigation by health commission authorities to be due to the eating of "sour grass" soup. Sour grass is a species of sorrel which is rich in the poison known as oxalic acid. This soup is said to be a common dish in some of the East side restaurants. Chemical analysis of the finished soup showed about ten grains of oxalic acid to the pint. The sorrel grows in abundance through the Atlantic states and the middle West. It has a dainty little yellow flower and its shamrock-shaped leaves are of a bright attractive green.

Dr. Arthur Holmes of State college tells our Pennsylvania teachers that 375,000 unmarried women of their profession in the United States are inefficient and contented, and that the percentage of those who are happy is at least as high as in the case of those who are set in families, says Philadelphia Ledger. To stand in loco parentis to a schoolroom is not to realize completely the natural instinct and its satisfaction; but the teaching career, if it has its frequent discouragement, and its often overpowering weariness, has likewise its own peculiar compensations, and all of the little scholars are not indifferent or ungrateful. If they do not in the active hours rise up to bless the instructor and the instruction, there comes repeatedly in after years a strong sense of gratitude to those who in childhood wrought with exemplary patience for their good.

In order to be a strong man one does not have to shout or scuffle or use rough language; nor need he abuse people, or defy them, or stand in their way. He can be a strong man by being quiet and modest and saying nothing, but he must not make himself conspicuous, or exploit himself in any way. A strong man reveals himself only when there is something to do, when courage, is needed and self-sacrifice is demanded. It is necessary to make these distinctions in order that the fussy fellows who want to monopolize everything may be properly classified and, if need be, ignored.

The news that the Caudin canaries are being closely guarded to circumvent a suspected plot to poison the Caudin's winter food supply is a reminder that in these modern days the can opener is quite as important as the carving knife.

That minister who said the modern dances reminded him of a "snake rattle" may have had the unfortunate to start a new dance, all that is necessary being a striking name not used heretofore.

BOONE FISCAL COURT

Transacts Considerable Business
A: Its January Session—
Pauper Practice Awarded.

Following is a synopsis of the business transacted by the Fiscal Court at its January term. County Judge Cason presiding and all the justices of the peace present:

The following sheep claims were allowed:

Earl Walton	\$12.00
Jerry C. Conrad	\$5.00
Tomlin Simpson	\$2.00
R. E. Moore	\$6.00
Robert C. Zinger	\$10.00

R. A. Steel allowed \$5 for basket for Tom Hewitt's child.

Scott Chambers allowed \$10 for coal furnished Maggie Moxley. T. F. Curley allowed \$1.50 for merchandise furnished same.

Maggie Moxley allowed \$3.00 a month for living expenses.

Jno. C. Hollinger allowed \$3 for furnishing sign boards at Lexington gate on Lexington pike.

W. A. Bullock allowed \$5 each for furnishing coffins for Miss Anna Hill, Henry S. Pernel and Mrs. Susan Hill.

Officers of November election made the usual allowance.

The pauper practice for the year 1917 was awarded as follows, each door named to receive \$25 therefor:

Bullittsville—H. H. Hays	1.00
Florence—J. H. Grant	1.00
Constance—A. A. Murat	1.00
Petersburg—J. M. Grant	1.00
Bellevue—J. A. Richmond	1.00
Hamilton—R. E. Ryle	1.00
Verona—J. E. McCormick	1.00
Walton—G. C. Rankins	1.00
Beaver—R. E. Ryle	1.00
Union—O. E. Senior	1.00
Carlton—L. E. Carlyle	1.00

Pauper practice in Burlington precinct and the county infirmaries and jail not awarded. E. J. Aylor was appointed a committee to take the matter up with physicians and report at the next term.

The several doctors in the county were ordered paid the pauper practice for the 1916 pauper practice.

The county election commissioners were allowed as follows for services rendered in 1916:

B. B. Allphin	4.00
G. W. Edwards	2.00
R. E. Edwards	2.00
J. M. Eddins	2.00
W. D. Cropper	\$6.00

The county board of education provided for school purposes for the year 1917 which estimates amounts to \$16,000, and it will take the full tax rate of 10 cents and 10 mills to produce said amount, and on motion and second and carried, it is ordered by the court that there be and there is now levied on all taxable property in Boone county for school purposes 20 cents on each \$100 of taxable property in Boone county, Ky. Said estimate is as follows:

Teachers' Salaries	\$9,000
Incident, Coal, etc.	4,000
Repairs and Construction	3,000
Hebron and Limaburg pike 1/4 mile	1,000

The court to expend on said road \$1,000 in the next three years.

The Mineola and Anderson Perry pike taken over by the county.

F. H. Rouse, superintendent of the county infirmaries filed his report showing that said institution cared for an average of 205 inmates the past year at a cost of \$10,300. E. H. Rouse was reappointed superintendent for this year.

County Road Engineer ordered to pay the Lexington and Lexington turnpike company \$2,815.75 balance due on said road.

Ordered that the \$200,000 road bond be issued in denominations of \$500 each and to draw 100 per cent payable semi-annually on the first day of January and July of each year. The last of said bonds will be mature in 1935. Said bonds will be sold according to further orders of the court.

County Judge and County Attorney are appointed a committee to sell the county bonds No. 1 to No. 50, after advertising same. The bonds are to be sold for not less than par and accrued interest.

LEXINGTON, KY.

Recognized all Over the World
As the Greatest Loose Leaf
Tobacco Market.

Lexington is recognized all over the world as the greatest loose leaf tobacco market in the world. The number of houses, points sold on their breaks in a year and the prices paid by the manufacturers for the leaf all bear evidence of this fact.

Every year millions of pounds of tobacco are sold in Lexington for millions of dollars, and all of this money goes almost directly to the farmer in cash. A large proportion of it goes into the pockets of Fayette county residents. With in the past few years Lexington has developed one of the highest industries in Kentucky—the loose leaf floor system of disposing of tobacco. There is no question that the farmers have been very materially benefited by the change from the old systems of selling it to a manufacturer's representative, who has been selling it hanging in the barn, and when he had no basis of comparison with other crops grown in his neighborhood, or in pooling it, as was done in the past.

This season's crop is one of the very best grown in many years. One prominent tobacco man said it was the best he has ever seen such a crop was produced. There is very little difference in the average from that of last year. If anything, the yield is a little greater this season than last. However, not enough of it has been marketed yet to form a basis of comparison.

The most noticeable feature of this year's market as compared to last is the predominance of the smoking grades. Last season there was a large quantity of the leaf, consequently top prices reached figures considerably in advance of those being received now. On the other hand, there is an abundance of low grades which are sold at a lower price than usual, and it was not at all unusual to find baskets selling as low as \$1.00 a hundred. Many of the low grades last year were sold for less than \$1.00 a hundred on the local market.

The reason given for this surprising condition is that the leaf is done by the students for which they are paid at fair rates. The total enrollment last year was 110,000. Of this number more than half earned the greater part of their expenses while attending school. In this way was more than forty thousand dollars, exclusive of earnings in vacation time.

The record of any previous year by \$8,000, according to the report of Treasurer T. J. Osborne. Both boys and girls are doing the labor which is provided by the institution.

The greater number of students are engaged in work on the college farm and dairy. The next largest number waited on tables in the college dining halls.

Some of the highest grades in the college are in the garden, orchards, and dairies. In school buildings and dormitories, worked in the laundry, bakery, woodwork department, printing, bookbinding and hospital.

The extreme regret of President William H. Frost has been that the college is not in a position to give greater aid to students who are inclined to earn their education.

That a student's aid fund about seven thousand dollars was loaned to deserving students with interest.

No student was given more than \$10 during the school year. Because of the student labor, board has been furnished students at a cost of \$1.35 a week, which is lower than any other place in the country.

The result of the plan—but wholesome fare provided, was that the students gained as a whole more than two tons in weight during the year—Ex.

Telephones in Bad Condition.

Some of the lines in the Farmington Telephone system in this county are in a deplorable condition, they having been neglected for nearly a complete reconstruction is necessary. The telephone has come to stay and it is a valuable adjunct to a farmer's life, as it keeps him in close touch with his neighbors and the world for miles around. In many instances a single message is worth to a person all the telephones in his residence cost, he would, the lines and boxes are kept in proper condition, they prove an \$2.00 investment instead of a pleasure.

A useful company, where the lines are on a community for repairs it is in many instances neglected, and that is the trouble with many of the farmers' lines in this county, verifying the old saying "what is everybody's business is nobody's business."

Dead and wounded in the European war number 5,000,000 and the national debt on the nations involved has been increased \$100,000,000,000. The greatest public in Washington.

WHAT HAPPENED.

Graphic Description of Baseball Game Not Written by Jack Ryder.

It was the ninth inning, two were out and Woodrow Wilson's team had the field.

Charles Hughes' aggregation of financiers were at bat.

The score was 0 to 0.

Little Woody was pitching. Secretary Tumulty was behind the plate.

Over on first William J. Bryan was holding down the sack. He wanted to "pitch," but they wouldn't allow him.

Field Captain Vance McCormack played second and third, scooping up all the shortstop plays in "them paws."

The infield and outfield were on the toes.

With Charlie on first, running for Teddy, and the pride of the team, Little Boy New York at bat, in front of a crowd of spectators and the opposition determined.

New York met the first ball pitched with a stiff slug to the right field, where a pretty simple Charlie moved to second and the Republican party rooted hard.

New Jersey' former Wilson's stepped to the rubber. Woody looked him over with a squint in his eye.

He beat out an infield bunt. Woody nudged the play. It was his only error in the game.

Empire Snuff Sammie took a pinch of snuff and looked wise.

Old Man Hoosier Indiana—knob from the tail—hoisted to the plate.

"One ball," yelled Uncle Sammie.

"Two balls," came the cry.

"Strike one"—and the Wilson bunch snarled.

Woody teetered his legs in a S-curve shape and heaved to Smack! The sphere missed the unspiced glove of First Baseman Bryan by inches. It went to right field for a three-base hit.

Charlie, Little Boy New York and New Jersey scored.

A moment later Hoosier was caught out of the box by Tumulty. It was a pretty throw.

Charlie's roots reeked the air with their yips. The 1st inning was 10 to 1 in favor of the Blue team. The score was 3 to 0 for Hughes.

Picher Hughes entered the box with a confident air. Teddy sat on the side lines whispering what things to him.

North Dakota took three balls and then a confident strike on the side lines whispering what things to him.

Second, New Mexico doubled to right, but the ball was waiting at third for the Dakota kid when he arrived.

Charlie passed Buckeye Ohio with not so much as a wink of the eye. Old Buck was a dangerous man and a dangerous pitcher.

Teek Texas stepped to the rubber. New Mexico and Ohio moved up a base on a passed ball.

Teddy took a look at the score. Charlie adjusted his whiskers. The game proceeded.

After two vain attempts to swat the sphere, Charlie knifed home. Two were out and a runner on third and second.

Utah dropped a short single back of center, knocking a score. Teddy threw dirt at Pennsylvania for missing the play.

The bases were full.

And then Old Bill California came to bat. Bill was another one of Wilson's players whom Charlie had tried hard to sign. He wanted him in the final game.

"One strike," said Empire Sammie.

"Two strikes," cried he.

Replicans started leaving the stadium. Old Bill snarled to collect their winnings.

Several ambitious reporters telephoned their respective papers, telling of the defeat of Wilson's team. They meant to scoop the opposition.

Crack! And the little ball took flight for right field, soaring higher and higher as it went.

Over the fence it scampered and swatted a Bull Moose sign on the outside.

New Mexico, Ohio, Utah and old Bill California scampering across the rubber.

The game was won 4 to 3—Palmyra, Mo. Gazette.

New Half Dollars.

The new silver fifty cent piece went into circulation last week when Wallace Rice, assistant cashier of the Boone County Bank, began paying them out.

He received an assignment of that coin from the U. S. Treasury at Cincinnati, from the reverse side of the new coin (half dollar) the figure of Liberty, the folds of her garment being the stars and stripes. She carries branches of laurel and oak leaves in her right and military glory. On the obverse side appears an eagle perched high on a crag. A pine sapling, next to it, the early American spirit, also is shown.

Good Weather for Growers.

The growers had good weather all last week in which they planted their tobacco in the hands. Many made good use of their opportunity. Local buyers received many orders for the crop. It was put in the hands of the growers. In most cases, the crop was put in the hands of the growers.

WALTON.

Henderson Rouse of Crittenden, was a visitor to friends here Sunday.

Lost-Gold tie clasp in Walton. Return to owner J. C. Miller, Walton, Ky.

Misses Anna Mayne and Agnes Haley, of Covington, spent the past week here with friends.

G. E. Carroll delivered his tobacco crop at Covington last week, selling to Hite & Hennessy.

Mrs. Henry C. Diers returned Saturday from a very pleasant visit to her daughter, Mrs. Charles Best at Paris.

Mrs. E. P. Northcutt enjoyed a pleasant visit to her daughter Mrs. Wayne Ryland at Louisville the past week.

Rev. Ous Hamilton spent the past week at the bedside of his wife who is very ill at the home of her aunt at Bardonia.

A. B. Tompkins, who travels for a Cincinnati saddlery house, has been home this week on account of a severe attack of laryngitis.

Mr. and Mrs. T. P. Hambers are spending a couple of weeks in Covington the guests of their son, Prof. C. Spencer Chambers and wife.

Dr. E. K. Menefee of Covington, spent Friday here with his many friends. Mrs. Menefee has been quite ill the past week but is now some better.

Mr. and Mrs. Albert N. Pennington and J. J. Pennington of Cincinnati spent Saturday and Sunday here with their parents.

Mr. and Mrs. E. P. Pennington and S. L. Edwards who have been confined to his home the past year with paralysis had a serious attack Sunday and he has been in a precarious condition ever since.

Minnie Robinson of near Napoleon, Gallatin county, delivered part of his tobacco crop at the Walton loose leaf warehouse last Friday for the Wednesday's sale.

J. W. Houson, supt. of bridge and carpenter work on the L. & N. Railroad, has been at home several days this week on account of being quite ill with stomach trouble.

Mr. and Mrs. G. E. Carroll, entertained at dinner New Year's day. Mr. and Mrs. Will Stafford and S. Howard, Mr. and Mrs. George Hammer, Mr. and Mrs. Daniel Hoffman.

Walton Masonic Lodge conferred the Master Mason's degree on Holton Craig at the regular meeting last Friday night. The lodge is having work at every meeting and has a petition for next meeting.

Oswald E. Peterson who was here on a visit to his father-in-law, C. L. Griffith, left last week for Arion, Ohio, to take up some contracting work. He will remain here for a longer visit to his father.

Mrs. L. P. Vallandigham was taken to Cincinnati last Thursday and entered a hospital for treatment for gall stones. She has been very ill and it will be some time before she will be able to return home.

The heavy wind storm of last Friday wrecked the frame work of the new residence of G. E. Carroll on his farm in Kenton county. The frame work had just been erected and had not been sufficiently braced.

Dr. H. C. Cram and sisters Misses Eula and Fay spent part of the past week with Mr. and Mrs. Chas. H. Young near Folsom, Grant county. Miss Eula returned to Lexington the first of the week where she is employed in a millinery store.

Samuel Spradlin of Falmouth, bought the farm of Miss Amanda Ackman last Saturday. It contains about 100 acres and is situated in Kenton county, near Walton. Mr. Spradlin expects to move to the farm about March 1st, and he is greatly welcomed to this community.

Dr. W. W. Evans who has been in the hospital at Cincinnati for treatment sufficiently recovered to be able to come to Walton and is making his home for the present at the residence of Mrs. Mary Fields, and we are glad to say is constantly improving.

The Baker Farm near Walton, one of the best and most suitably located farm gates in use. Over 200 now in use in Boone county. Use those who have been using them. Price only \$350 delivered. Write to Boone or adjoining counties John Myers is my agent at Bellevue.

H. C. BAKER, Walton, Ky.

Albert Comer, of Burlington, who is deputy sheriff, has been handling considerable tobacco on the loose to market, with very satisfactory results, and was here last Saturday with a large contingent for the market. Mr. Comer has contributed largely to the success of this market and his efforts are appreciated by the management.

Died—Mrs. Henry Haney, Jan. 3, at the home of her daughter, Mrs. John F. Haney, in Walton. Mrs. Haney was 87 years of age. The funeral took place Friday at the Wilmington Baptist church. Rev. E. C. Lacy of the Christian church, officiating. The funeral was held at a time when the weather was very cold, and many excellent quality of goods were on hand.

Chas. L. Griffith attended the State Agricultural College at Lexington last week and brought home a number of things which he is now selling at a bargain. He is also selling a number of things which he is now selling at a bargain.

Dr. J. F. Daugherty spent part of the week at his old home in Pendleton county, being called there by some of his old patients who retain the opinion that he is "the only doctor" and want his services. Dr. Daugherty succeeded Dr. B. K. Menefee in his practice at Walton, and is doing nicely, as he has made an excellent impression on the public generally.

The stockholders of the Walton Bank and Trust Co., held their annual meeting last Tuesday and elected the following officers for the current year: Directors—Wm. H. Schour, J. D. Mayhugh, F. M. Clerk, Geo. W. Ransler, J. C. Gordon, Chas. W. Ransler, Robert C. Green, E. K. Stephens, President and Cashier, Robt. C. Green; Vice President, J. D. Mayhugh; Assistant Cashier, E. Steel West; Attorney, Charles Strother. The bank is in an excellent condition and is doing a fine business. A dividend of five per cent for the past six months was declared, the annual dividend being ten per cent for several years past.

Married—Robert Leslie Jones of Walton to Miss Mary Brown of Lexington, Dec. 30th, at the residence of the bride's father, Rev. R. B. Bush of the Presbyterian church. The groom is the son of Dr. Ann Mrs. A. N. Jones of Walton, and the bride is the daughter of Mr. and Mrs. Durham, North Carolina, superintendent of the installation of a dust collecting and humidity apparatus in one of the large plants of the American Tobacco Co. He is an excellent young gentleman and has a host of friends here.

The bride is the daughter of Mrs. Lydia Brown of Shaysburg, and is a very charming and talented young lady. Mr. and Mrs. Jones came to Walton on a short visit and then left for Durham to make their home for the present.

Mrs. Virginia Goodridge spent Sunday with Mr. Ed. Sefton. Mrs. Arch Corbin, of Erlanger, spent Thursday with Mrs. Julius Corbin.

Mr. and Mrs. Millerbrandt were guests of Mr. Emma Freeman Sunday.

Miss Pearl Markshrey was the guest of Miss Emma Schybold last Wednesday.

Mrs. Mike Cahill and daughter, Minnie, spent last Thursday with Mrs. Jerry Conrad.

Clark Houston, of Falmouth, has returned to his home after a visit with Mrs. Mary Fulton.

Meiman had his guest Saturday and Sunday. Miss Lillie Stephens.

Miss Viva Carpenter has returned after a visit with several of her relatives and friends in Richmond.

Mr. and Mrs. Perry Barlow and daughter, Rosie, of Gumpower, were guests of Mr. and Mrs. John Benham Sunday.

Mr. and Mrs. Lawrence Long and son, of Covington, were the guests of Ben Long and family Saturday and Sunday.

B. B. Hume and wife, of Covington, were guests of his mother, yesterday.

Mrs. Corinne Riley, of Covington, is the guest of her son, E. C. Riley, and family.

Sheriff Cropper has a bum ankle again, and it is with considerable trouble that he gets about.

Milton Riley, who is attending school in Cincinnati, was the guest of his brother, E. C. Riley, Sunday.

Mrs. P. E. Cason has gone to Rockdale Sanatorium, near Cincinnati, for treatment for a lung trouble.

It turns out that only two convicts lost their lives by the fire in the penitentiary at Frankfort, Monday night. Several were burned considerably.

On an inside page is a very nice view of a portion of the Burlington and Florence pike. The picture was taken by Mr. Ross, the State road man, and sent to the department at Frankfort.

The weather last week was very favorable for stripping tobacco, much of which work was done, resulting in a rush in its delivery, and each of the buyers in the county has received a large quantity.

In the last few months Miss Julia Dinmore, of Bellevue neighborhood, has added many improvements to her residence. Which is a commodious building in which she has had the material in which not be duplicated as to quality.

B. B. Hume has sold in the last few days a one-ton Republic Auto Truck to each Leslie Stephenson of Hebron, and R. E. Moore, at Heaver. He sells these trucks as follows:

1 Ton \$1,000.00
1 1/2 Ton \$1,250.00
Two Ton \$1,500.00

SWEEP BY FLAMES

Fire Destroys The Cellhouse at Frankfort Penitentiary—Many Lives Lost.

Frankfort, Jan. 5th.—A number of inmates of the Kentucky State Penitentiary tonight were trapped in Cellhouse "A" when fire swept the ancient structure.

How many perished was not known at midnight, for the prison and city fire departments had been unable to pierce the mantle of flame which surrounded Walks 11 and 12, where the luckless ones were held.

Prison authorities estimated the number of dead as high as 30. Members of the prison department, and scores of volunteers from the nearly 800 convicts liberated by the fire, worked feverishly to check the flames, so they might penetrate to the doom of walks. They were guided in their work by the desperate, stricken cries of their imprisoned mates.

Governor Stanley arrived at the scene early and directed the rescue attempts. He called for volunteers to help him break through the wall of fire, and a half hundred men sprang to his aid.

But instead of following him they wrested a heavy beam from his hands and overpowering him, led him away from the flames. Warden Phyllin remained in charge until there seemed practically no hope of reaching the men.

Late tonight the Warden was unable to tell how many of his charges might have fled.

After the first alarm was given from Cell House "A" the guard and trustees marshaled the inmates of this cellhouse—and led them into the flames in order.

They were unable to prevent confusion spreading, however, when it became known some of the men were trapped in the upper walks.

Carelessness on the part of those in charge of Walks 11 and 12 is given as the reason for the men there being left behind. When the alarm was given the walks—all were opened except these two.

In the extreme top of the cellhouse, in the excitement of the guards, were unable to find the keys to these walks, and as the building they went out of the bottom instead of the top, as they usually go.

After it was seen Cellhouse "A" was doomed, attention was directed to saving Cellhouse "B", which adjoins, and which houses about 600 prisoners. Arrangements were made for emptying the cellhouse quietly in case of danger and to dynamite the walls if the flames spread too rapidly.

The prisoners were kept in their walks, the doors were hampered in their efforts because of lack of electric light. The dim lantern light added to the confusion.

The flames started about 10 o'clock. An outside guard saw flames shooting from a ventilator and gave the alarm. Investigation disclosed the fire was caused by defective wiring.

Cellhouse "A", which is practically destroyed, was the oldest prison west of the Allegheny Mountains, having been erected in 1792. It was a stone and frame building, and accommodated about 800 prisoners.

All the prisoners in Cellhouse "A" were negroes and those in Cellhouse "B" are whites.

FARM LOAN BANKS.

Washington, Jan. 7.—The Federal Farm Loan Board has taken up the organization of the twelve banks. This regard as even more important in its influence on the future of the farm borrowers of the nation than the work just completed. This task is the appointment of the men who will manage the twelve banks.

Great pressure is being exerted on members of the board to appoint men with "backing" men of "influence" in both parties, especially the Democratic party, since three of the members are Democrats and two Republicans.

There are sixty directors—to be appointed by the board, five for each of the twelve banks. These are given as principal plums in the future of the managing officers of the land banks and receive good salaries.

In addition to these directors there will be for each bank a treasurer and a vice president who will be the managing officers of the land banks and receive good salaries.

There will be for each bank a Federal Farm Loan Board would have anywhere from 150 to 200 to it.

It may be stated without qualification that these jobs will not be handed out as political plums, but only consideration will be that of the merit and ability of the men.

There is no division of opinion among the members of the board as to the whole future of the farm loan system, said one member of the board today.

The Federal Farm Loan Board today, depends on the personal land banks are really nothing but a great system of farm loan companies. To be sure, the members of the board will furnish a few millions to start with, but the government's money will soon be returned to it, and then the whole system will be self-sustaining and will be run by the farmers themselves.

Dividend Notice.

The Covington and Lexington Turnpike Company has declared an additional dividend (in liquidation) of Five and 52 dollars (\$5.52) per share, payable to stock holders of this date, on demand, at the office of The Covington Savings Bank and Trust Company, N. E. Cor. 6th Street and Madison Avenue, Covington, Kentucky.

Your certificate must be presented. The Cov. & Lex. Turnpike Road Co., BY JOHN P. ERNST, President.

Col. Roosevelt's jaw has got to going again.

Mr. and Mrs. Dudley Blyth entertained the young people last Thursday night with a dance.

The weather this week has been delightful, but what is in store for later on keeps people guessing.

Just as soon as the roads get soft the heavy hauling in this county began—but then what are the roads.

Joseph Graves, of Francesville, has many friends in this neighborhood, who sympathize with him in the loss of his wife.

Last Thursday night lightning flashed, thunder roared and the rain poured. The night's weather program was that of a night in the month of May.

Persons who desire to operate the telephone switch-board at Waterloo the coming year are required to send to Lewis Cline by the 20th inst., a seal bid stating the amount for which they will do the work.

Nineteen hundred and sixteen was a year that has been characterized by the most partial justice to this latest and greatest twelve months in the country's history, writes the reviewer of Bradstreet.

The Recorder is in receipt of the Midwinter edition of the Los Angeles California Times, which is truly a remarkable issue. It is a beauty in every particular, and gives its State and especially the southern part thereof a magnificent write-up.

Married at the residence of Rev. P. H. Duncan, Latonia, Ky., Thursday, Jan. 4, 1917, Mr. Geo. Moore, daughter of R. B. Moore, of Beaver Lick, Ky., and Mr. Pennington, of Sherman, Ky. Mr. and Mrs. Pennington will make their home at Sherman, Grant county, Ky.

The trappers of the county brought into town court day the furs of coons, polecats, muskrats, weasels, possums and mink and found ready sale for them. The mink furs seem to be the greatest in demand and they therefore brought the most money.—Owensboro News-Herald.

The county board of equalization was in session all last week and gave the assessor's book a close examination, the boards work resulting in addition to the assessor's total of \$29,267. The board adjourned to meet again next Monday to hear from those whose assessments were raised.

Last week the Recorder published a clipping from another paper in which it was stated that only two Presidents died in office—Harrison and Taylor, when in fact Lincoln, Garfield and McKinley also died in office. Some reader of the Recorder called it attention to the error.

Jerry Dempsey, Jr., of Hume, was a caller at this office last Saturday. Mr. Dempsey's mission to Burlington that day was very important one, and when he left town he had in his possession a license authorizing his marriage to Mary Josephine Madden, the accomplished daughter of Richard Madden and wife, of Hume neighborhood. Mr. Dempsey is a very popular young man and his wife has the best wishes of the Recorder.

The following items are from a Louisville exchange:

Mrs. W. B. Carroll was host last night at a theater party at Keith's in honor of her guest, Miss Shirley Tolin, of Burlington, Ky.

Mr. and Mrs. E. G. Cooper kept open house New Year's day in honor of their guests, Mr. and Mrs. E. M. Gaines, of Milwaukee.

Mr. and Mrs. Cropper were hosts Monday night at a party at Keith's in honor of Mr. and Mrs. Gaines, who returned last night to Milwaukee.

On Friday evening, next, January 12, 1917, the Boone Literary Society and Improvement Club will hold an open session at the court house, which will begin promptly at 7:30 p. m. A good program will be prepared and presented at that time. We will have with us Mrs. Pattie Revell Deal of Arkansas; Mrs. Deal has kindly consented to sing for us, so we can consider that instead of the three Lyceum numbers promised, we are giving four. We extend a hearty invitation to everybody to meet with us on that occasion and enjoy the evening. No admission fee will be charged.

MRS. C. C. HUGHES, Chairman Programme Com.

FORTY YEARS AGO TODAY

This has been one of the severest winters experienced in this climate for many years. Since the cold weather commenced there has been no cessation of the frigid temperature. For the past six weeks farmers have done but little more than feed and look after their stock. The river at New Orleans is frozen over, and the largest area ever known in the United States is covered with snow.

Two hogheads of new Boone county tobacco sold on the Cincinnati market last week, one at \$1.60 and the other at eight dollars and sixty-five cents per hundred.

Some families in Rising Sun who had snow thrown into their cisterns to increase the supply of water, have been badly fooled. The snow absorbed the water, and then froze up solid.

Brain 11, to \$12 ton; butter 13 to 20 cents pound; cheese 11 cents; coffee 18 to 30 cents; eggs 32 cents; flour 7 to \$8; corn 14 to 16 cents; hay 10 to \$11; potatoes \$1.20 barrel; chickens three dollars per dozen; shoulders three dollars 9 cents; lard 105 cents; salt \$3.50 barrel; sugar 14 cents; salted seed \$2 bushel; clover 145 cents pound; cattle \$1.75; milk cows 20 to \$65; veal calves six dollars and fifty cents; hogs \$6.50; sheep 15 cents pound.

The assessor commenced his labors yesterday.

Sleighs have been flitting thru the county for many days.

At Pope's on Middle creek the thermometer registered at twenty-four degrees below zero last Tuesday morning.

Christmas day Robert Moser near Petersburg, was 31 years old.

Excepting one or two miles between Lawrenceburg and North Bend the Ohio river is blocked from Cincinnati to Louisville.

One day last week the infant child of Mr. and Mrs. Asa Cason narrowly escaped death from burning. The child was alone in the room when a spark from the fire fell in the cradle. When the father entered the room the child was nearly suffocated by the smoke. He carried her out and took some time to revive her.

The sheriff was allowed 538 delinquent tithes for 1816.

Geo. W. Baker and W. W. Garner were authorized to sell the Big Bone Springs on the following terms: They may contract with a party or parties for not less than \$100, the cash to be paid not longer than one year, the lessee having only the privilege to dig for bones on the land; the digging not to interfere with the Springs on the land nor with the veins nor drain nor with the course of the creek.

Geo. W. Sleet qualified as sheriff and executed bond with J. C. Hughes, S. C. Johnson and B. Johnson as sureties. T. W. Finch was appointed deputy sheriff.

Jas. Rogers and George Walton have lost about \$1,800 worth of hogs of cholera.

John O. Campbell moved today from Big Bone Springs to Liberty Station, Carroll county.

Mrs. Trickett, daughter of Rev. John Underhill died in Ill. last week.

Marriage licenses—Bon H. Ryle and Anna Calvert, Robt. Bachelor and Mary Nevins, Arthur Davis and Capitola Crisler, Jesse Corwin and Fannie Swenham, G. W. Holder and Eliza Fullmore, W. L. Johnson and Elizabeth Stephens, Taylor Itley and America Baker, A. Boyer and Mary F. Conner, Jas. Cross and Irene Waite.

Who Is to Blame?

Who is to blame for the high cost of living? The producers? The retailers? The consumers? The government? The question is given through the papers. Now don't let the papers get the quotations from the city of commerce? Now don't let the law makers give commerce the power to lower or raise prices? Now if a president or congressman, a representative and a commerce own stock in railroads, stockyards, wheat and corn, and other staples, and if the prices would bring them larger profits on their stock, would they not be tempted to raise prices? If a government set the market prices what will an investigation in high cost of living amount to? If you will merge and make a world of popularity and lose your freedom what have you gained? Our Congressmen a while back asked what I thought of preparedness, and as I had not thought much on national affairs I did not give a definite answer, but as he put me to thinking, I will answer me first, and then the Recorder. If preparedness is to increase the army for the purpose of defending our country against other nations, I am in favor of it, but if preparedness is to increase the army for the purpose of subduing a free people and try to force us under king rule, I am not in favor of it.

Road Bonds on the market.

In this issue is carried an advertisement of the sale of 50 of the road bonds the first of which have been put upon the market. These bonds will be sold from time to time as the money is needed for the road work in the county. For persons who have surplus money these bonds figure a good investment. They are exempt from taxation, draw a 4 per cent, and the only attention they require is to pay January 1 and July 1 of each year when the owners will be expected to clip the interest coupons and send them or payment Easy, isn't it?

Sheriffs Sale For Taxes.

Notice is hereby given that I or my deputy will, on Monday, February 19, 1917, it being a county court day, between the hours of 10 o'clock a. m. and 2 o'clock p. m., at the Court House door, in the town of Burlington, Boone county, Kentucky, expose to public sale for cash in hand, the following described property, or so much thereof as may be necessary to pay State, County and School taxes due thereon and unpaid for the year 1916, and the interest, penalty and cost thereon.

For a complete description, I refer to Assessor's book for assessment of 1915, at County Clerk's office. W. D. CROPPER, Sheriff of Boone County, Ky.

85 acres on good pike near Lamasburg, 2 good dwellings.
Several small farms.

RILEY & RILEY, Burlington, Ky.

The New Tax Law Of Kentucky

Laws are naturally couched in technical language and their actual meaning is sometimes obscure to the general reader.

The proposed changes in the tax laws, denuded of legal phraseology, may be explained as follows:

Property will be classified and the taxation of each class so levied as to secure a fair assessment and put a stop to hiding and evasion.

Assessments will be equalized: not by counties, but according to individual ownership and put an end to the practice of taxing the same tax-payer to pay the taxes of his neighbors.

The state tax will be levied on each \$100 of assessed value at a rate of one percent.

Local taxes will be levied on the assessed value of property in each town or city and will be paid by the owner.

State taxes, which all taxes are levied on, will be levied on the assessed value of property, except bank deposits, which may be paid, then they will be levied on the deposits themselves at a rate of one percent on each \$100.

County, town and school taxes will be levied on the assessed value of property and will be paid by the owner.

Intangible personal property, including bonds, notes, cash in bank and mortgages, will be classified and taxed according to counties, towns and school districts, but the new law contemplates the collection of so much more revenue from sources, not now contributing a fair share, the deficit in local revenues will not only be compensated for, but justify a reduction in local tax rates.

Mortgages running over three years will pay a registration tax in addition to the long-time loans of foreign corporations, who would otherwise escape taxation.

Various franchise taxes, including manufacturing, mining, and other taxes, will be levied on the assessed value of property.

Manufacture in stores and warehouses, including distilled and malted spirits, will continue to be taxed for both state and local purposes as at present.

Corporations will be taxed the same as individuals on the same classes of property owned, and, in addition, on their franchises based on their published statements, whereas the property of individuals is merely "estimated" by assessors.

Banks will continue to be assessed as at present on the assessed value of their capital stock, surplus and undivided profits, for both state and local purposes, and the proposed tax on bank deposits will doubtless be paid by the banks in preference to discharging their customers' liability, the effect of which will be an increase in the present bank taxes, but as this will get more money in circulation, the banks and people will both be benefited.

Local assessors and supervisors will be continued as at present, but the State Board of Equalization, Board of Valuation and Assessment and the taxing privileges of the different counties will be distributed with all questions of state taxation be delegated to a department of the State Tax Commission, which will have power to enforce the law. Under the new system, state officials should be able to perform can hardly be expected to acquire the knowledge and experience during their brief terms of office.

Local assessors will be required to secure the best results for the state, as well as for the state, the purpose of such a commission is to secure in comparison with the old system, which will be a collection of the revenue, which now runs over 10 per cent, obviously excessive.

The new system will equalize the assessment of all classes of property and by actual equalization distribute the burden in such a manner as to require every individual and corporation to pay taxes proportionate to the value of his property and the privileges of citizenship in Kentucky.

The new law is authorized by the Legislature of the constitution, which was adopted by the General Assembly in 1912 and 1914 and twice ratified by the people in 1913 and 1915.

The Legislature of 1916 adopted a resolution calling for the appointment of a State Tax Commission to investigate the question of taxation in this and other states and report thereon to the Legislature.

The membership of the Tax Commission is composed of the following:

Gov. E. H. Glenn, of Paducah,
J. M. Brown, of Louisville,
A. J. Oliver, of Louisville,
J. H. Huffer, of Louisville,
J. P. Gardner, of Louisville,
Geo. L. Dickett, of Louisville,
and E. H. Huffer, of Louisville.

The result of their labors has been a bill, which has been passed by the Legislature, and which will be submitted to the people at the next election.

The Governor is willing to call a special session of the Legislature to consider the measure, and seeks the approval of the people.

Every taxpayer should write to the Governor and his Representative and let them know that prompt action on the tax law is desired.

GUINEA FOWL VALUABLE ON EVERY FARM

GAINING FAVOR ON ACCOUNT OF FLAVOR.

Every farmer should keep a few guinea fowls, in the opinion of W. A. Lippincott, professor of poultry husbandry in the Kansas state agricultural college. Not only do they make themselves valuable as watch birds against hawks, but, because of their wild game flavor, they are coming into favor as food.

Formerly hawks and eagles were the only wild game birds, but now, on account of the increasing demand for wild game, they are being raised in large numbers. The guinea fowl makes an acceptable substitute and is highly valued for its flavor.

The guinea fowl is a very hardy bird, and is well adapted to the conditions of the farm. It is a good layer and its eggs are highly valued for their flavor.

Guinea fowls are also valuable as watch birds against hawks and other predators. They are very alert and will sound the alarm if danger is near.

Guinea fowls are also valuable as a source of food. They are very hardy and can withstand the cold of winter. Their meat is highly valued for its flavor.

Guinea fowls are also valuable as a source of income. They are very hardy and can withstand the cold of winter. Their meat is highly valued for its flavor.

Guinea fowls are also valuable as a source of income. They are very hardy and can withstand the cold of winter. Their meat is highly valued for its flavor.

Guinea fowls are also valuable as a source of income. They are very hardy and can withstand the cold of winter. Their meat is highly valued for its flavor.

THE HUSBAND HUNTER

By ERNEST A. YOUNG.

"Heart's content, is found to be in husband hunting," proclaimed Charles Darton the cynic.

"What do you know about it? You never had a heart to smash," bawled Billy Temple.

Bert Temple, the host and presiding genius at only a smoke-talk in the cozy bachelor quarters, picked up his ears for his friends were getting on a subject which had acquired a new interest for him.

He had lately discovered that he had a heart, and he was inclined to feel a bit lonely over it.

"You are wrong, Billy," Charles asserted, "for it was a woman's pithy that bleached my hair years ago."

"Story—old brand romance," an unheeded draw with a wave of his fat hands.

I told to see any romance about the process of getting stuck at a time of life when a decent young chap of a mildly temperamental thinks he is in love for the only possible time, and the girl plays up the delusion until she finds what a boob he is and then lets him drop.

"That is substance," continued the cynic, "was what happened. I was the boob and Miss Doris Ward was the perditional maiden, and it happened eight years ago, when I was twenty-two. Charlie over it if you find it humorous, because I see the joke now as plainly as you do. I also have Miss Doris Ward comes to Dumfries for a winter of sport—husband hunting."

They laughed at the story, of course—all except their host. He had been poking the fire and he dropped the poker as if it had burned his fingers.

The party broke up and no note was taken of anything unusual in Temple's manner.

Charles, the cynic, filled eight years ago by Doris Ward, mumbled the best as the door shut out the last of his guests.

It was the first time a blackbird to the scenes of Bert Temple. Twenty-five minutes ago the memory of Doris Ward's career was thrilling through his soul, as he had listened to that voice the evening before. Sure enough, at the ripe age of thirty-six he had fallen head over head at first sight. Although they had been barely two hours in each other's society he had as good as told her she was "the wonderful woman," and that he was prepared to close up a marriage contract for the earliest date that could be fixed upon compatible with the conventions.

Now Temple felt sick, dizzy, bewildered. "I was the boob and Miss Doris Ward was the perditional maiden," were the words that he had listened to that evening before. Sure enough, at the ripe age of thirty-six he had fallen head over head at first sight. Although they had been barely two hours in each other's society he had as good as told her she was "the wonderful woman," and that he was prepared to close up a marriage contract for the earliest date that could be fixed upon compatible with the conventions.

Now Temple felt sick, dizzy, bewildered. "I was the boob and Miss Doris Ward was the perditional maiden," were the words that he had listened to that evening before. Sure enough, at the ripe age of thirty-six he had fallen head over head at first sight. Although they had been barely two hours in each other's society he had as good as told her she was "the wonderful woman," and that he was prepared to close up a marriage contract for the earliest date that could be fixed upon compatible with the conventions.

HEBRON.

Rumor has it that W. R. Garrett has sold out his grocery. Frank Hoesman, Jr., and wife were guests of her parents, Sunday.

Mrs. Emma Schiars and daughter, of Norwood, were guests of relatives here Saturday and Sunday.

Misses Mary Conner and Gladys Regenbogen spent from Friday until Sunday with friends in Cincinnati.

For the coming year Sunday school will be in the afternoon instead of morning as it was the past year. All are invited to attend.

A good size crowd attended the annual meeting at the church Saturday. A nice lunch was served at the noon hour and in the afternoon the following officers were elected: Elder, W. L. B. Rouse; Deacons, Frank Hoesman, Sr., and Edgar Graves; Trustees, Chas. Anderson; Chorister, C. C. Hafer; Asst. Chorister, P. C. Hafer; Sunday school Supt., Harold C. Hafer; Asst. Supt., R. M. McGilgus; Secretary, Gladys Regenbogen; Treasurer, Albert Gekker.

Hebron Lodge F. and A. M. held its annual election of officers, the 27th of Dec. 1914, as follows: Worshipful Master, H. W. Rouse; Senior Warden, Oliver Kottmyer; Junior Warden, W. B. Graves; Sec'y., A. J. Neumarch; Treasurer, W. W. Goodridge; Senior Deacon, Stanley Parsons; Junior Deacon, Robert McGilgus; Tyler, C. C. Hafer; Stewards, Stanley Graves and Geo. Kottmyer. The officers elected were installed.

RABBIT HASH.

Paul Damarath, our ferryman, is sick with a severe attack of tonsillitis.

Mrs. E. L. Stephens and Miss Stella Stephens were shopping in Cincinnati, Saturday.

Morris Rice is running the ferry at present, during the sickness of the regular ferryman.

Rev. McNulty preached at East Bond Baptist church Saturday and Sunday, and at K. of P. Hall Saturday night.

Several of our citizens attended court at Burlington, Monday, in the case of the commonwealth vs. Miss Katie Craig.

E. M. Hodge and Lewis Craig sold their crops of tobacco on the loose leaf market at Carrollton last week and received good prices.

Lewis L. and W. J. Stephens have bought 92 acres of land on the East Bond and Burlington road from their Uncle Solon Stephens.

Congressman A. B. Rouse has introduced a bill in Congress to increase the pension of Mr. Eljah Hodges to \$40 per month. Mr. Hodges is a deserving old soldier and it is hoped that the law will give great satisfaction to his many friends.

BIG BONE.

Rev. Hall Sundayed with H. F. Jones and family.

Mrs. Russ, Mrs. Polk Hamilton's mother, is very feeble.

Miss Cora Rich spent Sunday with friends at Beaver.

Tom Stahleck and wife are proud parents of a baby girl.

Omer Black and family spent Sunday with his father, Morgan Black, near Beaver.

Lester Moore and wife spent a few days of the week with relatives in the city.

Mr. and Mrs. Andrew Walton entertained several of their children and grandchildren, Sunday.

Mrs. Addie Burrows has gone to Covington for stay with her relatives, Mr. and Mrs. Ed. Low.

The Ladies' Missionary Society of the M. B. church met with Mrs. L. Jones and daughter, Thursday.

Ed. Black, of Union neighborhood, is helping his uncle, Tom Black, with his tobacco stripping.

Ross Carroll expects to move soon, to the farm which he has purchased from his father in Mudlick neighborhood.

Word received from St. Elizabeth Hospital is to the effect that Mrs. Lambrey is in a very serious condition, with little hope for her recovery.

C. K. Wood has purchased a Ford auto for the pleasure of his family. Mr. Wood got the machine from the B. B. Boone Automobile Company, Covington.

The Modern Woodmen and their members are holding a picnic on the grounds of the club, near the creek, to be held on the 30th of the month. The picnic will be a very successful one, and the count of the high water. The lodge will meet Friday, Jan. 2nd.

The hard rain Thursday night caused the creek to be higher than they have been before for 30 years. The pike from Big Bone to Mr. Locum place was impassable for a while, but is being repaired by the banisters of the bridge on the pike. The Juniors, who had remained at the hall until the next morning.

HUMB.

Mrs. and Mrs. Will Smith are visiting relatives in Cincinnati.

Mrs. Anna Allen was the guest of the writer and family Thursday.

Tom Hood gave the young people a dated Thursday night. Hood will move near Beaver soon.

John Binder and John Flannell attended the Walton house last market Saturday.

Mrs. O. Carpenter and son, Finzell, here returned to their home in Cincinnati after a pleasant visit with her parents.

Mr. and Mrs. Richard Schwenke and little son returned home the first of the week. Mr. Schwenke will move back to his farm in the spring.

Mr. and Mrs. T. B. Roberts went to the city, Wednesday, and purchased a new piano of which they made a present to their daughter Jennie Ruthe.

Dr. O. C. Henry, of Minerva, Ky., was looking after his farm interests here the first of the week.

Miss Mary Eggleston spent Saturday night and Sunday at Misses Amanda Kuons and Sadie Rima.

Mrs. Carl Bradford and little son of Hebron, called on Misses Mary Frances and Emma Goodridge, Saturday afternoon.

Mrs. C. D. Scythorn and daughter, Miss Della, called on Leon Aylor and wife, near Hebron, Wednesday afternoon.

FEED COW IN WINTER

Important That Milk Flow be Kept Up in Cold Weather.

Zairymen Who Gets Best Results Feeds Clover, Alfalfa or Cowpea Hay for Roughness—Include Corn in Ration.

(By C. H. ECKLES, Missouri College of Agriculture.)

The best results with milk cows demands that the milk flow be kept up during the winter as well as during the remainder of the year. A herd that is allowed to drop in this particular when winter comes, not only lowers its profit at that time, but is hard to bring back when winter is over. Reports received by the dairy department of the Missouri agricultural experiment station show that average cows in the best-managed herds of the state often produce two or three times as much butter during the year as does the average dairy cow of the state. This difference results largely from the fact that these herds continue high in their milk production during the winter.

A good milk flow results largely from careful feeding, although shelter and other phases of management are also important. The man who is getting poor results is usually feeding timothy hay, corn fodder, and corn, and perhaps not enough even of these. The man who is getting good results is feeding that such a ration will not enable a cow to produce milk enough to make it profitable. It is not necessary to buy large quantities of expensive feed to make a good ration, as it can all be grown on the farm. If the proper ration is not at hand, however, it will usually pay to buy something suitable, or possibly trade some of the feeds on hand for others which will give better results.

Man Who Gets Results: The man who gets good results with cows feeds clover, alfalfa, or cowpea hay for the roughness, takes care that the cows have plenty of it, and if he has some corn fodder, feeds some

Fine Guernsey Cow.

of this in addition during the day. If hay of this class is fed, it is all right to feed a considerable quantity of corn for grain.

The feeds which are generally fed in this section may be divided into two classes. The first includes those lacking in protein. They are used mainly to produce fat and do not have protein enough for milk production. In this class we have corn, corn fodder, timothy hay, straw, millet and sorghum. The second class of feeds includes those which contain more protein. In this class we have clover, cowpea and alfalfa hay, bran, oats, cottonseed and linseed meal. A good daily ration will include feeds from both of these classes and it is impossible to make a suitable ration by feeding those in the first class only.

A good ration for a cow producing from 24 to 25 pounds of milk per day, would be all she would eat of clover or cowpea hay and for grain from five to six pounds corn, and from three to five pounds bran or oats. Another fairly good ration for an ordinary cow is all she will eat of alfalfa or cowpea hay and eight to twelve pounds of corn. Still another would be clover hay, as before, corn six to nine pounds, and cottonseed meal, two pounds per day. These rations will be improved in every case by feeding corn silage.

CLOVER AND ALFALFA FEEDS

Farmer With Supply of Those Two Crops Has Sure Thing in Dairy Part of His Industry.

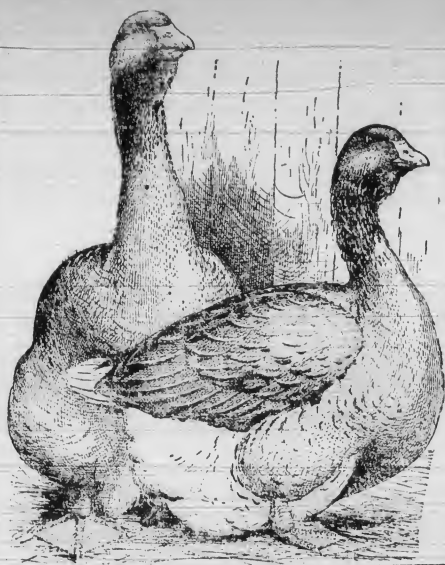

The farmer with dairy cows who has a supply of clover or alfalfa has a sure thing in the dairy part of his industry. The winter months are the best time to have a supply of these feeds, and take good care of his cows in winter. A daily ration of one-half bushel of alfalfa and the same amount of clover hay and about 30 pounds of corn silage, along with such grain feed as he can make with his own farm milk; about ten pounds daily in three feeds per day will be sufficient.

GOOD SEEDBED IS ESSENTIAL

Every Small Depression in Field Must Be Filled Up and Ridges Lowered For Best Results.

A good seedbed is necessary for a proper reception of the bluestem seed. It is best to provide one, even if it is at the expense of time, which is also a factor when the season is late. Every small depression in the bluestem field must be filled up, the ridges made low, all of which can be done admirably well by the use of harrow and disk. To sow bluestem and get best results, the seed should be made the ground like an onion bed.

POPULAR AND COMMON BREEDS OF GEESE

TOULOUSE IS GIANT OF GOOSE FAMILY.

The Toulouse is the giant of the goose family. It is a native of France. Its ordinary weight is from 15 to 20 pounds, but it is not uncommon to find specimens weighing from 25 to 30 pounds. This is the typical gray goose, but Toulouse and related breeds are white. It is said by those who have had experience with this breed that young geese require the best care from 15 to 25 days, when older they may live from 25 to 40.

The Embury is a popular breed in some places. The body of the birds is snowy white, the legs and bills yellow. They have a typical long formation. In size it is the same as standard for the Toulouse, though it is said a smaller number of Embury reach this standard than of Toulouse.

FEEDING WILL DOUBLE EGGS

Average Hen in Missouri Lays Sixty-Three Eggs Annually—Scantly Fed Hen Is Poor Investment.

(By H. L. Kempter, Missouri College of Agriculture.)

According to the United States census, Missouri's 21,000,000 hens lay 111,000,000 dozen eggs annually. If this is true, the average hen lays about 63 eggs a year. This is a poor record. One reason why hens are not more productive is because usually they are half fed. It is false economy to expect them to pick their living from the leavings of other stock. Many farmers admit that they feed their hens nothing during the summer. In so doing, they are saving feed but losing money.

A productive hen requires from 70 to 80 pounds of feed a year. If she gets only 40 to 50 pounds, she will simply satisfy her body requirements. She will not lay eggs. The scantly fed hen is a poor investment, as it is only the liberally fed hen that will give the profit.

Farmer should keep dry and feed, such as a mixture of bran, clover and cornmeal, in hoppers before the hens at all times. Either sour milk or butter milk should be given as a drink. Crushed limestone or oyster shell should be before the hens all the time. If hens should go to roost with full crops.

KILL CHICKENS FOR MARKET

To Prevent Food Remaining in Crop and Intestines Fowls Should Be Starved 24 Hours.

The chickens must be starved 24 hours before killing. This will prevent the food remaining in the crop and intestines, which decomposes and spoils the flavor.

Several hours after the last feed allow the chickens what water they wish to drink. They should then have a complete fast until they are killed.

ENCOURAGE HENS TO CACKLE

See That Fowls Are Given Proper Food and Water and They Will Increase Egg Production.

Do the hens cackle? Eggs are worth 10 cents a dozen, or 13 cents a dozen. You get them when the hens are well fed and watered. If you do not feed them well, they will not cackle. See that they get the egg-producing feeds and they will cackle.

The Embury when well-bred, properly fed and prepared makes a class that sells well on the market. It is said that many breeders in this country have not given much attention to true quality.

There are two varieties of Chinese geese, brown and white. This breed has different characteristics from the others mentioned. The birds stand erect and have longer and slenderer necks than the others. The Brown Chinese have at the base of the bill a peculiar dark-colored knob. The Brown is considered the most profitable of all the geese. The standard weight for the gender is 15 pounds, geese 12 pounds. The female is said to lay from 10 to 30 eggs, sometimes more. A large per cent of the eggs are generally fertile.

SELECT HENS WITH RECORDS

Mate Them With Cockerels of Good Laying Strains and Hatch From Them—Progress Slow.

The hen as we have her today has been developed very rapidly as an egg producer. The jungle fowl from which our laying hens have been developed probably laid about two dozen eggs a year at most. Perhaps many only raised one brood. Hens of anything like good type and breeding today may average 100 eggs a year. There are, however, 200 egg hens and a few that have made records much higher, but these high records are by no means common.

It is said that a high average for a pullet is 150 eggs a year, for a hen 100. But we must remember that, like, like cows, have their own individuality and it is not easy to find a flock of high producers. The way to increase the production of eggs is to select pullets or hens with high records, mate them with cockerels from good laying strains and hatch from them. Even then, the progress must be slow, for there is apt to be a large per cent that will be poor producers. But this is the only safe way to raise hens that lay a large number of eggs a year.

SELECTION OF BEST LAYERS

Look for Full, Well-Developed Breast and Crop—This Gives Assurance of Strength.

The selection of the best-laying hens may be made in several ways. If you know that the mother hens were good egg producers and the pullets have the same formation of the body it may be reasonable to expect that the pullets will also be fine egg producers. There is, however, one almost certain sign that may be used in selecting laying hens. Look for a full, well-developed breast and crop, showing a large pocket in which to carry the food supply. This gives assurance of strength and vigor, and the ability to consume a sufficient amount of food to sustain the body and produce the eggs.

FATTEN POULTRY IN CRATES

Special Ration of Cornmeal, Middlings, Bran, and Buttermilk Adds Weight and Flavor.

To fatten poultry put them into a crate, keep them for a day without food, then give them a special ration of one-quarter cornmeal, three parts middlings and one part bran, with buttermilk enough to make a mixture about as thin as pumpkin water. During the 10 to 14 days they are fed this ration they gain from 15 to 25 per cent in weight and much more than that in flavor.

LIVE STOCK

WINTER CARE OF EWE FLOCK

Of Great Importance in Insuring Lamb Crop in Spring—Feed Clover or Alfalfa Hay.

The winter care of the flock is important to insure a lamb crop to be harvested in the spring. Ewes in good condition need not be fed grain until about a month before lambing, when they should gradually be accustomed to it. Ewes in this or poor condition should receive from one-fourth to one-half pound of grain daily. Corn alone is not the best grain ration. A ration of six parts corn, three parts wheat bran, and one part flaxseed oil cake, by weight, has proved very satisfactory. A ration of corn, oats, and bran, equal parts by weight, can also be recommended.

The sheep should receive as much clover or alfalfa hay as they will eat.

Sheep in Winter Quarters.

The amount of hay eaten can be cut down by the use of corn silage or corn stover. Two pounds of clean, sweet corn silage can be used to replace about one pound of hay. Well cured corn stover is also relished by the ewes. Ordinarily, there is little danger of the sheep eating too much of it, if the hay is fed once a day. The greatest danger of corn stover comes from making it the exclusive feed. Clean salt and water should be kept before the flock. Sheep should always have a dry, well bedded floor to lie on. —Ohio State Bulletin.

FEEDING SWINE OR VERMIN?

Coal-Tar Solution as Dip or Spray Is Recommended for Treatment—Some Other Remedies.

It has been estimated that a 150-pound hog has 32,000 drops of blood. If the hog is supporting 1,000 lice and each louse takes one drop of blood per day, what per cent of the hog's blood will be lost daily, and who will pay the bill?

Using a coal-tar solution (1 per cent) as a dip or a spray, is recommended for treatment, but there are other mixtures equally effective. These are: 1, equal parts kerosene and machine oil mixed together and applied with an oil can, brush or swab; 2, crude oil (thinned with kerosene if too thick) applied with a brush or as a spray; 3, kerosene oil applied to the backs of the hogs slowly works over the greater part of the hog's body, but should be applied to the ears and both flanks.

CORN AND LIVE STOCK FARM

Former Produces More Feed Per Acre Than Any Other Crop for Cattle Except Alfalfa.

Corn and live stock farming go hand in hand. The great corn-growing sections are also the great live stock sections. Corn produces more feed per acre than any other crop except alfalfa. It should be fed with alfalfa as these two feeds make a balanced ration.

Stock relish corn and corn fodder whether cured in the field or in the silo. This grain is unequaled in beef and pork production. The meat produced from it is of a firm consistency.

SCIENCE IN FEEDING CATTLE

Farmer Who Sells Half-Grown Feeders for Someone Else to "Finish" Is Losing Money.

The cattleman who fattens his animals "from birth to block" has a much better chance of satisfactory returns than he who sells half-grown feeders for someone else to "finish" or market. The latter turns over to the blockyard man the feeders, and the railroads carry a large share of the profits which might have been his.

BEES WINTER IN SNOW

Chaff House of Some Kind Is Strongly Recommended.

Nothing Better in Line of Hives When Used in Connection With Sawdust Cushions Over the Top of the Brood Chamber.

(By P. G. HERMAN.)

If the beekeeper tries to winter bees on the summer stands, in any form of a hive or other than a chaff or double-walled hive, it is my opinion that he will lose more in the value of bees than the extra expense he would be at in making chaff hives of some kind.

I think that some sort of hive that could be used for summer advantage should be used. This thing of having outside winter cases to set over the hives is decidedly a disadvantage in many ways.

When winter is over they cannot be used about the injury during the summer to any advantage whatever, but the beekeeper must have a house or some other place provided for them to keep them from the weather, or they will be warped and weatherbeaten and will last but a few years.

Hence, the construction of a summer and winter chaff hive certainly overcomes many of these objections. After years of experience with chaff hives used in connection with sawdust cushions over the top of the brood chamber, I have become convinced that there is nothing better along the line of hives for wintering bees on the summer stands than this.

Winter on Summer Stands.
I winter my bees on the summer stands with very little loss. They have plenty of good stores—plenty of young bees, and properly packed. I believe in late brood rearing, so that the hives will be full of young bees at the beginning of the winter. At least this is my plan, and my bees survive nicely.

With too small an entrance in a damp climate, you will be sure to have moldy combs, and more than the proper

Honey Bee.

amount of dead bees. The trouble becomes aggravated in the course of the winter by the clogging of the entrance with dead bees.

During heavy storms in winter it frequently happens that hives are entirely buried in snow. While the snow is light and porous, air will penetrate it and reach the entrances of the hives, but should the snow become crusty or ice form at the entrance the bees would be in danger of suffocation.

It is well to have all hives facing southward, so the sun can shine on the entrance of the hives and keep them free from ice.

After a heavy fall of snow we always sweep in front of the hives, leaving the snow banked around the other three sides, as it will do no harm there, but will help keep off prevailing winds.

SAVING BEST GARDEN SEEDS

Select Strains of Grains and Vegetables Especially Adapted to Soil in Which Grown.

Save some of the best garden seeds each year. There is no reason why certain strains of seeds should not have select strains of grains and vegetables especially adapted to the particular soil in which they are grown, says the Farmer. There may be something in changing seed occasionally, and we should all be on the lookout for the best of the new things that are coming into native year by year, but we are sure that it is fully as important to be on the lookout for the things that are proving best adapted to each particular soil and location and saving the seeds to continue the strain. As a people we have something to learn of the Europeans in this particular. We allow many things to go to waste that are looked after and made to add to the family store on other lands.

CORN CRIBS OF STEEL WIRE

Becoming Popular in Western States Because of Durability—Much Cheaper Than Wood.

Rats destroy much corn in badly-built cribs. The crib should be set on stout posts capped with tin, with movable steps. A crib of this kind is rat and mouse-proof if the proper care is exercised in removing the steps when not in use.

Steel pun cribs are coming into use in the western corn states. These cribs are made of two-inch mesh steel wire and are ventilated, and are stronger and cheaper than wood. The wire comes in rolls ready to put up. A crib to hold 800 bushels is a convenient size.

GOOD ROADS

RAISE FUNDS FOR HIGHWAYS

Important Saving Effectuated by Issuing Good-Road Bonds on Deferred Retirement Plan.

(From the United States Department of Agriculture.)

People of a county intending to raise funds for highway improvement would do well to consider the advantages to them of the deferred serial plan over the ordinary sinking fund plan of retiring long-term bonds. Under the serial plan, a certain amount of bonds is retired each year and the bonds so retired cease to be an interest charge on the community. Under the sinking fund plan none of the bonds is retireable until the end of a definite period, and the entire sum raised bears interest for the entire life of the bond. The county, therefore, pays interest on the money so borrowed and in addition sets aside each year as a sinking fund an amount sufficient to retire all the bonds when they become due. The sinking fund is deposited with banks and earns some interest. This interest ordinarily is only three per cent, whereas the county has to pay five or six per cent to its bondholders. The serial plan is a much cheaper method of raising money for road improvement, even when the sinking fund earns interest as high as four per cent, and in the opinion of the road specialists of the department should be utilized whenever it is possible to market serial bonds.

In a study of the road bond issues of several counties, J. E. Penney, banker and M. O. Eldridge of the division of road economics, office of public roads and rural engineering, found that the serial plan, if it had been adopted by several counties, would have saved the taxpayers in one county \$154,230, in another county \$80,702, and in a third county \$65,347 over the plan with a sinking fund bearing interest at three per cent. With a sinking fund earning four per cent, the saving would have run as high as \$72,288 in one of these counties. These conclusions appear in the recently published Department Bulletin 233, Economic Surveys of County Highway Improvement.

The following concrete examples are taken from this bulletin:

"In Dallas County, Ala., the bonds amounted to \$350,000, payable in 30 years at five per cent. Assuming the sinking fund to bear three per cent interest, as set forth in the chapter on Dallas county, the total financial burden to the county for interest and the liquidation of the bonds during the 30-year period will be \$745,702.80. An equal amount of bonds at the same rate of interest, if issued under the deferred serial bond method, with the first bonds payable six years from the date of issuance and an equal amount payable each year hereafter for 24 years, would cost the county at the end of 30 years \$465,000, or a difference, as compared with the sinking fund method, of \$80,702. If four per cent could be realized on the sinking fund instead of three per cent, the saving for the deferred serial plan over the sinking fund plan would still be \$17,216.

"Underhill county, Mississippi, which issued \$500,000 of five and five and one-half per cent bonds, adopted the deferred serial bond method, with the first payment coming 11 years from the date of issue and the last payment 25 years. If the county had issued the bonds on the 5-25-year basis the cost would have been \$906,575, as compared with the cost of the bonds adopted of \$724,232, or a difference of \$182,347.

"In the case of a small issue the advantage of the serial plan is illustrated in Dinwiddie County, Virginia. This county issued \$105,000 of five and six per cent bonds, payable in 30 years, but the bonds are coming due after 20 years. Assuming that they will be retired at the end of 25 years on the sinking fund plan, with interest on the sinking fund at four per cent, the total cost would be \$218,934, whereas if they had adopted the 5-25-year serial method the cost would be \$201,100, or a difference of \$17,834.

REMOVE STUMPS FROM FIELD

They Take Up Valuable Room and Make Work More Difficult for Both Man and Animal.

If you have stumps in your fields that you have been plowing round for years, determine to get them out of the way this winter. They make it harder for man and animal working in the field, and take up valuable room.

Work for Hired Man.

The hired man who is worth anything prefers to work where the business is well planned and definitely worked out.

Methods in Disrepute.

Stirred, haphazard, general farming is in disrepute. It is a set, definite and specialized effort has come to stay.

Spending \$300,000,000.

The 48 states are now spending \$300,000,000 a year on good roads.

BEST PAYING RATIONS

Interesting Experiment Conducted by Ohio Station.

Pullets Producing Largest Number of Eggs Were Furnished Most Expensive Feed—Careful Accounts Are Important.

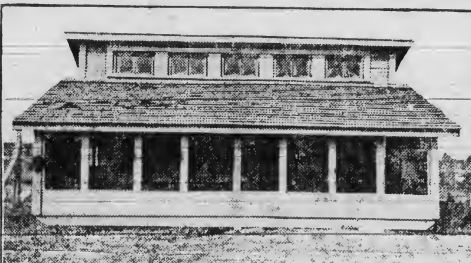

The number of eggs laid during the feeding of a ration is not always an index to the value of the ration. The best-paying ration should be sought. That is a ration which will give the most profit on the number of eggs laid. An experiment conducted by the Ohio station illustrates this point:

In the experiment, three lots of 25 pullets each, of Single Comb White Leghorns, were used. These pullets were housed in half of a colony house 10 by 12 feet in size, this space being allotted to each group. The hens were again confined to the houses from April 1 to June 7, in order to permit the grass to grow and get some growth. When the snow was on the ground, the hens were confined to the houses. At

other times, each lot had access to a yard.

Lot 1 received a ration of shelled corn, ground corn, eight parts, and meat scraps, five parts. Lot 2 received a ration of shelled corn, ground corn, seven parts; bran, three parts, and meat scraps, five parts. Lot 3 had shelled corn, one part, wheat, four parts, with one part of oats, and a mash composed of ground corn, three parts; bran, four parts; middlings, four parts; oil meal, one part, and meat scraps, two parts. Each lot had access to grit, oyster shell and charcoal. Lot 1 produced 1553 eggs, Lot 2, 1818, and Lot 3, 2018 eggs per hen, at a cost of \$73, \$54 and 104 cents per dozen, respectively. The profit from Lot 1 was \$2.06, from Lot 2, \$2.15, and from Lot 3, \$1.98 for each hen in the respective groups. The ration for Lot 3 not only cost more but was more trouble to prepare. If we looked at the number of eggs only, it might seem that 2018 eggs were far better than 1859 or 1898, but the profit is what we are after—the most money with the least trouble. The farmer needs especially to look to his profits this year of high-priced grain. Careful accounts are the only means of determining the cost of eggs per dozen, and the best-paying ration.

IDEAL CHICKEN HOUSE FOR FARM FLOCK

POULTRY HOUSE FINDS FAVOR IN KANSAS.

There are as many types of chicken houses as there are of poultry raisers, and but few of these houses approach the ideal, asserts N. L. Harris, superintendent of the poultry plant, Kansas Agricultural college.

"The ideal chicken house should be at least 20 feet long and 18 feet wide," says Mr. Harris. "The height should be such as will be convenient to the operator—about nine feet in front and not less than four feet at the back.

"With a house of these dimensions, there will be no frozen combs, even in severe winter weather. Frozen combs usually result from keeping poultry in small houses where good ventilation is a difficult matter.

"There is no question that cement is the best floor for poultry houses,

since such a floor is sanitary, vermin proof, and easily cleaned."

The manner of lighting and ventilating a poultry house is always important. In the opinion of Mr. Harris, the best plan is in a poultry house to raise the temperature in the day and permit rapid radiation at night. The resulting wide variation of day and night temperatures is always injurious to the health of the fowls.

Probably the best means of providing adequate light and ventilation is to have two windows in the south side of the building with a cloth curtain between. During stormy days, while the curtain is closed, the windows will provide sufficient light and the curtains will allow sufficient ventilation without permitting drafts.

DEVELOP OOCYTES FOR EGGS

No Hen Lives Long Enough to Produce More Than Small Percentage of Undeveloped Eggs.

Automatically every normal hen would appear to be fitted to become a good layer. Certain it is that no hen lives long enough, or remains in condition long enough, to develop all, or more than a small percentage, of the undeveloped eggs on her ovary. In counts made at Maine experiment station from 914 to 3,065 oocytes (undeveloped eggs) were found in the ovaries of some 15 hens examined, and only those visible to the unaided eye were counted. Three hens showed better than 1,000 oocytes each; five showed better than 1,500 undeveloped eggs each; five better than 2,000 each; and one yielded a count of 3,065 undeveloped eggs.

In the investigations it was shown that the number of oocytes visible on the ovary bore no definite or constant relation to the actually realized egg production of the specimen.

Apparently actual egg production depends upon many things besides ordinary characteristics and anatomical differences. It is easy to understand that influences which affect the individual specimen may play a very large part in producing conditions favorable to maturing the undeveloped eggs of the ovary, and the actual laying of same. Apparently, from an anatomical standpoint, almost every hen is a thousand-egger or better.

It remains for us to develop and obtain the egg. Of course, many oocytes never develop and mature. Hens which have made a record of 1,000 eggs in their lifetime are still rare birds.

FEEDING CORN TO CHICKENS

Wasteful Practice Where Fowls Are Confined and Not Given Greens, Charcoal and Lime.

Feeding corn to fowls of no particular breed shut up in small spaces will not get much more than 75 per cent of the stock, bred by a breeder who knows his business. If given a chance, will make good use of food feed. Chickens need variety. Feed them a variety of grains—corn, clover, alfalfa, peas, and so on, and it is necessary to combine them with fresh meat when in season. Keep them plenty warm and dry.

Do not forget to keep them well supplied with water.

PROPER CARE OF COCKERELS

Young Fowls Will Need Plenty of Right Kind of Food and Shelter for Best Development.

Those who have good cockerels needed for breeding birds in their own flocks will see to it that they are properly cared for. The young cockerels will need plenty of the right kind of food and the proper shelter and protection so they may develop into good birds.

The mistake is sometimes made of not keeping enough cockerels for the number of hens needed on the farm. As a result of this, farm flocks sometimes produce too small a per cent of fertile eggs. This means considerable loss for the infertile egg unused in incubation is almost if not a complete loss.

It is not easy to tell the kind of birds young cockerels will make, at least while they are quite young. It is necessary generally to keep the birds till their type, plumage and general individuality can be ascertained. The best is none too good and no one should afford to keep any cockerels. Should none of your birds be suitable, get a couple of all and let good cockerels to breed up your flock. This will be economical in the end.

MILK IN FEEDING CHICKENS

Will Greatly Increase Egg Production—Carbohydrates Do Not Offset Necessity of Protein.

The use of milk in feeding chickens will greatly increase egg production. The hen never lays an egg until all the ingredients necessary for the complete development of a chick are present.

Since the egg contains protein as well as carbohydrates, any amount of carbohydrates fed in the form of grain will not offset the necessity of protein. Milk given to the birds, either as a drink or in the mash, will greatly increase egg production.

DUST-BATHS ARE NECESSARY

Laying Hens Are Enabled to Rid Themselves of Vermin and Remove Dirt and Scales.

Laying hens need to dust themselves at least once a week. A good number of eggs during the winter. It is a necessity for them. If they are not dusted, they are enabled to rid themselves of mites, lice and other pests and dirt from the skin.

Burlington K. of P. Lodge has work in the first and second degrees next Saturday night. The lodge will have work at every meeting for at least a month and the members should not fail to attend.

Crushed stone shipped from High Bridge will be used for repairing the Burlington and Florence pike. Anybody can see where the fiscal court is doing the proper thing in preparing to take a stitch in time.

The short list of delinquent taxpayers advertised this week show that the sheriff has made a close collection of the taxes, an indication that the county is in a thrifty condition and that the farmers are pretty well supplied with money.

Wallace Rice, assistant cashier of the Boone County Deposit Bank, rode the K. of P. goat at the regular dance at the Erlanger lodge last Saturday night. Burlington lodge appears to be enjoying a boom this winter, there having been several initiations.

Understand that the citizens of Florence and vicinity want the Covington and Lexington pike made a concrete road from the county line to the town of Florence, in case Kenton county constructs a concrete road bed from Erlanger to the Boone and Kenton line.

Mr. Marsh, the Ohio weather prognosticator, has predicted: many ups and downs—some good and some bad, for the year 1917, but the following is one of the wonders he surely overlooked: C. L. McMahon, director of public safety of Lorain—has asked to have his salary of \$1200 cut in half, as he says his services are not worth over \$600 a year.

Class Yough that good natured and enterprising resident of Lima brought a four horse team over to Burlington, Tuesday morning and hitched it to one of the county's graders and cleaned the snow off of the pike from Burlington to Florence. If others would follow Mr. Yough's example, not only this case of helping the road movement in any way possible, a great work could be accomplished in this county. All who have the pike should appreciate Mr. Yough's thoughtfulness and generosity.

Argentina's grain harvest this year will be one of the poorest the country ever has seen, due to injury by drought and locusts. Consular reports received Thursday said the amount of grain available for export this year will total not more than 1,000,000 tons. Normally 2,500,000 tons are exported. The rainfall this year has been the smallest in a generation. Pasture lands have failed to support the country's cattle and thousands of head are dying. The Argentine Department of Agriculture has just obtained from railway special rates so that cattle may be transported from the territory where some pastures still exist. Cereal prices in the republic are the highest ever known.

S. EDWARDS

One of The County's Best Citizens Passes Away at His Home in Walton.

Special to Recorder.

While the many friends of S. L. Edwards anticipated his death, it was with a pang of regret that they learned of his demise Friday shortly after the noon hour at his home here in Walton. About two years ago he was stricken with paralysis and has been in failing health ever since. He was one of nature's noblemen and he had not an enemy on earth. None knew him but was his friend. He always spoke kindly to everyone and consequently all were his friends. His life was the same in business as it was in social life; he never deserted a friend nor magnified an enemy. Kind and charitable to all he might have gathered more of the worldly goods had he been less charitable. Samuel Lycourges Edwards was born in Walton, Ky., in 1814, sixty-three years ago, and was the son of Dr. and Mrs. R. A. Edwards. His father was a physician for many years here and had an extensive practice. S. L. Edwards married Miss Nora Pettit of East Liverpool, Ohio, to which union was born five children, three living, Mrs. A. R. Edwards, Mrs. C. C. Metcalf and Miss Lovenia Edwards. Those dead are Mrs. Mabel Curley, wife of E. E. Curley, of Arizona, and Miss Lulu, who died in Arizona from consumption a number of years ago. She was nursed by her sister Mrs. Curley, who contracted the disease and also died in that state a short time after her sister. At the outbreak of the Civil War Mr. Edwards enlisted in the 15th army joining Company C, 15th Regiment, Ohio Infantry. His first enlistment was June 4, 1862, and he served as a private and corporal until the end of the war. After the war he secured a position as express messenger for Adams Express Co. on the steamers plying between Cincinnati and Louisville, afterwards being transferred to the railroads in the same capacity. About 1880 he married a partnership with T. E. Curley in the hardware business, purchasing the interests of the firm of Sumler & Biers. He afterwards formed a partnership with B. L. Johnson, who died afterward. He then formed a partnership with W. H. Metcalf, who withdrew from the firm. His brother A. M. Edwards then bought an interest in the firm which was known as Edwards Bros., and they conducted the business for a number of years. His brother then sold his interest and Mr. Edwards took his son Ralph in the firm which is now known as S. L. Edwards & Son, the present firm. He was an ardent Republican and was postmaster here for twenty years during the Republican administration. He was a respected and valued member of the Knights of Pythias, Odd-Fellows and Masonic Lodges. He was also a member of the Methodist church. The funeral took place last Sunday at two o'clock from the Baptist church under the auspices of those lodges to which he belonged and to which he had been a member since his death.

Rev. Jos. B. Harris of the Scott Street, Covington, M. E. church, delivered a beautiful tribute to the memory of the departed, Rev. W. B. Garriot, the pastor of the church here, assisted in the service, Mrs. R. O. Hughes rendered the beautiful vocal solo "Sweet Peace, the Gift of God's Love" and "Lead Me On, Holy Home" was very feelingly and beautifully rendered by Mr. and Mrs. Geo. J. Grubbs. The other music was rendered by the choir from special selections appropriate to the occasion. The church was filled with the esteem with which Mr. Edwards was held by all. The Odd-Fellows and Masons rendered their beautiful service to the dead and the remains were then taken to the Baptist cemetery where the Odd-Fellows sang their service and Rev. Garriot offered the closing prayer. John Allison, the Covington undertaker, who was in charge of the funeral, was very efficient and his services were appreciated by the very many beautiful floral tributes, and handsome designs from the orders to which he belonged.

W. F. Bradford, secretary of the milk producers' association was a caller at this office Monday morning. He has been very active in the interest of the milk producers for several weeks, and expressed the opinion Monday that it would not be many days before the dealers in Cincinnati and Covington would sign the agreement desired by the milk association. Mr. Bradford made arrangements with the creamery at Burlington to handle the milk of the producers in the county who are affected by the embargo. The association had placed upon milk. The milk producers will carry their milk without the resort to any unlawful acts.

The Y. W. A. of the Big Bone Baptist church will give an oyster supper at Grange Hall school house Friday night, Jan. 18, 1917. Everybody invited.

Mrs. A. B. Henaker and Mrs. C. C. Hughes entertained the Five Hundred Club last Monday afternoon and evening, when a most delightful time was had by all the guests.

A very large area of country is covered by snow to the depth of several inches. The snow line is trending unusually far south. It is to be strictly hoped that the snow will disappear without the assistance of rain.

Sheriffs Sale for Taxes.

Notice is hereby given that I, my deputy will, on Monday, February 5th, 1917, it being a county court day, between the hours of 10 o'clock a. m. and 2 o'clock p. m., at the Court House door, in the town of Burlington, Boone county, Kentucky, expose to public sale for cash in hand, the following described property, or so much thereof as may be necessary to pay State, County and School taxes due thereon and unpaid for the year 1916, and the interest, penalty and cost thereon.

For a complete description of property see Assessor's book for assessment of 1915, at County Clerk's office, W. D. CROPPER, Sheriff of Boone County, Ky.

OLD MOTHER EARTH

Is Covered With a Carpet of The Beautiful to The Depth Of 10 or 12 Inches.

Wednesday night of last week the temperature took a tumble, going down to 12. Thursday a very disagreeable wind prevailed, the temperature ranging below freezing all day, some snow being added to the light fall of Wednesday night. Friday and Saturday snow to the depth of five or six inches fell, and Saturday night a combination of the beautiful increased its depth to fourteen inches. Sunday dawned bright and clear the temperature ranging from 1 to 12 degrees below zero in this county. Sunday night was not so cold as Saturday night, but Monday morning brought an ugly wind and a considerable snow fall, the temperature was about 10 above.

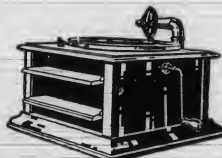

The rural mail carriers began leaving their troubles Monday, while the carrier between Burlington and Erlanger stuck to his Henry, although he could haul the mail. He left his horse and return trip that evening he hung up about a mile out from Burlington, and had to telephone for help. When Jack Eddis went out in a sled and brought in the drive, and the mail, the machine being left by the side of the road.

Tuesday morning several men and a scraper were put to work cleaning the snow off of the Burlington and Florence pike to make travel better and, at the same time render the snow less injurious to the road bed.

Died in Brooklyn, N. Y.

Miss Helen G. Crider, daughter of William T. and Lucy M. Crider, of 681 East Fifth street, died this morning at the home of her parents. She was a teacher in a private school in Newark, and had been in poor health for some time past. The immediate cause of death was the result. She was the granddaughter of Dr. A. C. Gaines, former president of St. Lawrence University. Miss Crider graduated from that institution two years ago with high honors. She was a member of All Souls Church, Brooklyn, and of the Kappa Kappa Gamma college fraternity. She was a graduate of Kenyon College, High School and a member of the Aerea Society. She was a young lady of many accomplishments and had a host of friends.

Shed bills have been heard in every direction the past few days with the exception of the south. Not broken the silence as frequently as before the snow and cold was over. The Henry is in trouble. It is strictly hoped it is in business and very often it is in trouble.

ENLIGHTENMENT

By EDNA SAWYER.

Barbara Wharton knew from the first that there was not the slightest excuse for it. The second time she had not him she had known of his marriage, yet to the extremely reserved, cautious little girl there was something dangerously attractive in Jerome Towne's keen eyes and smiling lips. She yielded to his requests for her time whenever he could make an opportunity to visit the town, and treasured the notes, penned in a tiny, almost feminine hand, that reached her frequently, carefully guarding them as her first "affair" from parents and neighbors.

Time and again she pondered upon the emotion that would follow discovery of the infidelity. As one wholly unaccustomed she pictured the resultant anger of the "sister," the pride of all the neighborhood, and the sting of the "sister's" words, all of which she felt she would have to endure to her father's side, whose family dishonored upon years of self-satisfied esteem.

Because her mother was a mother there was no need to tell her. She knew of several midnight strolls in which the city man had joined her, and she knew of her mother's handkerchiefs, the dancing eyes and rapidly crimsoning cheeks when, fearing need of information as to his new business, Mr. Towne had on several occasions sought their home. Barbara had at first been hearty in her avowed admiration of the girl, but when she saw her mother's face, she saw the gradual disappearance of the frank countenance.

A note, written the day before, fallen from its envelope, caught Mrs. Wharton's eye as she rummaged in her sewing table, and she picked it up, disclosing the city man's handwriting. She read the delicate lines twice through.

"Dearest of girls—I'm sorry; I can't see you today. But I will bring you this, and tomorrow I shall meet you at the station and take you up to the city with me for the day. We'll see a matinee and have dinner at Colver's. Can you, will you manage it? Remember, I shall be waiting. Hope fully, J. T."

Mrs. Wharton dropped her sewing, crumpled the little note in her fingers and started out, down the winding road. Somehow, Barbara seemed very old, very capable, all at once—was there nothing to be done? One couldn't order a twenty-two-year-old daughter to stay at home. And then Mr. Wharton's tall, square frame came into view as he moved about his rose bushes, and mother caught her breath with a little gasp. She formed a plan.

"You don't mind if I go up to the city on the noon train, mother?"

Barbara was wiping glasses after breakfast the next morning and she didn't look up as she made the query. "I'd like to match the ribbon for my dress, and—oh—I want to go to mother."

"If you think best, dear," Mrs. Wharton tried to catch Barbara's eyes, and failed. Barbara went through into the dining room and returned, slowly, and her mother put up a quick hand and brushed something from her cheek.

"Mother! Why, there's something the matter! You're sick?" Two strong arms whisked the little gray-haired woman to the light. "Mother, what is it?"

"Nothing that I can't tell you some other time, dear." Mother sighed softly. "There's no need worry about me."

"You'll tell me this minute."

"When you come back, dear." Her mother hesitated an instant to gather courage. "I—I can't say your trip. Go and have a good time."

"No, sir," Barbara seized her off on the broad window ledge and laid her shoes with a determined snarl, and mother relaxed instantly. "Not one inch do I stir unless you tell me!"

Her mother stilled a nervous soul with a smile and said, "I'll tell you the words: 'It's daddy.' She whispered fluently with a backward glance of terror lest the walls should hear. "Daddy!" Barbara's bewilderment transmuted her face.

"It's—daddy, how can I make you understand such a little girl. He's growing tired of me, Barbara. He's—"

"Mother!" The bewilderment had changed to reproach.

"I think he is interested in some body else, dear." Mrs. Wharton flushed bravely with a snarl.

"It can't be mother! You're nuts, father. Why not our daddy, mother?"

"What does it mean, dear? When a man with a wife seeks the company of another woman why is younger and prettier? What can it mean except—that the mother's heart wants to express her emotion, but her words were mysteriously tried, and she spoke with telling awkwardness. You can't understand, except the woman who sees the man who she shared her life drifting from her, driven by a thoughtless girl."

"Poor, dear mother! I'll talk to daddy, you leave him to me! But now—oh, mother! I don't go down to the station, for—oh—somebody's got to be there!" And Barbara was gone, halfless, breathless.

Mr. Wharton stood, understandingly, over his wife's head, and as minutes later, Barbara rushed into the kitchen with flaming cheeks and flung a trembling line about each, they knew the manner of Jerome Towne's departure.

DAIRY

PROFITS IN DAIRY BUSINESS

Unfortunate That Farmers Can Make Living Even When They Are Losing Money on Herd.

It is unfortunate for dairy farmers that they cannot always tell how much they are making or losing with-out a great deal of study and investigation. It is also unfortunate that they are losing money on their herd. If it were possible to immediately determine the profits and losses in the dairy business farmers would not continue to lose money when they think they are making a little. Men who care only for a living are usually satisfied if they get it some way or other, and such men are slow to realize what they are losing by maintaining an unprofitable herd of cattle.

The remedy for the situation is to charge up the products of the farm to the cows who are eating the products. Test every cow and know what she can do, breed to a perfect dairy bull and improve the herd and then dispense with the losses. There is no mystery about how a man can lose money on the dairy business and still make a living. He does not make the living from dairying.

URGE REGULARITY WITH COW

Does Her Best Only When Milked at Equal and Stated Periods of About Twelve Hours.

The cow can do her best only when milked at equal and regular daily periods of about twelve hours each the year around. The full supply of milk in the udder ready to be drawn out before milking time comes, but some of it is produced by the glands during the operation of milking. The udder, however, is usually filled and the cow becomes accustomed to this, but if the operation of milking is delayed and glands cease to secrete milk, they will then be stimulated to great activity during the process of milking. This injures the glands and produces a decrease in the milk flow.

SOURCE OF DELICIOUS MILK

Under Ordinary Conditions Only Dirty, Diseased Product Is Obtained From Family Cow.

(By PERCY WERNER, JR., Missouri College of Agriculture.)

The family cow should be a constant source of clean, pure and delicious milk. Such may be the case, if a few precautions are taken. It is frequently observed, however, that under the conditions surrounding the family cow only dirty, diseased milk can be produced.

A cow may be suffering from tuberculosis, the worst disease to which she is subject, and still show no signs of it to the proud owner. For the sake

Cows and Calves Thrive on Abundant Pasture.

of the children who drink the milk a qualified veterinarian should be called upon to inspect and test each cow every year.

With the assurance of a healthy cow, she should be housed in a clean, well lighted shed and provided with a roomy stall in which to exercise. The milk should be drawn into a clean, milk pail and kept cool until consumed.

Milk sour and spoils because of the bacteria which enter it with dirt from the cow and from pails not thoroughly washed. Keeping these bacteria out of the milk and preventing their growth by keeping the milk cool, are easy and efficient means of procuring the best of milk from the family cow, provided she is free from disease.

DAIRY NOTES

Gentle cows are the result of training and kindness.

Mottled butter is due largely to uneven distribution of salt.

The dairy farmer raises more grain and better grain and gets a higher price than anybody.

Dairy cows that freshen in the fall should receive some extra feed six to eight weeks previous to calving.

The best cows are never cheap and seldom for sale.

Test your cows for yield and butterfat. You may be surprised to learn that some are only losers while others are profitable winners.

When a cow becomes accustomed to being fed and milked at a certain time, she becomes restless and uneasy when the hours are changed.

DAIRY

FACTS

POINTS OF GOOD DAIRY COW

Animal Is Machine to Manufacture Largest Amount of Milk From Food Consumed—Her Make-Up.

(By R. H. WILLIAMS, Department of Animal Husbandry, University of Wisconsin.)

The dairy cow is a machine to manufacture the largest amount of milk from the food consumed. It has been found that the cows which make the most efficient milk machines are those with special dairy points. The dairy cow should be medium to large in size and show considerable angularity in outline. She should be feminine in appearance, have a rather long neck, smooth shoulders, prominent backbone, with open ribs, and a nice silky coat of hair with a low, pliable skin. All

Head of Contented Cow.

good dairy cows have a large barrel and a large capacity udder. The udder should be attached high behind and extend well up toward the belly. The width of the udder should be as great as possible. One should look carefully for the mammary development in the dairy cow. This consists of large veins, which extend along the abdomen from the udder towards the front flanks. The veins should be large, crooked, branching out, extending well towards the front legs and entering the body through large holes called milk wells. Such a cow should pay her way and produce the largest amount of milk from a given quantity of food.

ATTENTION TO CALVING COW

Animal Requires More Care During Cool Weather Than in Summer—Box Stall Is Urged.

More care is required by the calving cow during the cooler weather than is needed during the summer months. Says L. S. Gillette, acting head of the dairy husbandry department at Iowa State college, "Lack of comfortable quarters at this period has a direct bearing on the milk flow of the period following. The main things to be considered are the health and comfort of the cow and calf, which are closely related. A large, cozy box stall is probably the best place for the cow at this time. Very light feed is needed and the water given should not be too cold. Assistance should be given the calf at parturition if necessary and due precautions taken to prevent her from retaining her afterbirth. If it is retained it may be removed, thereby preventing inflammation and other complications following calving."

FIGHT AGAINST IMPURE MILK

Only Way to Prevent Use of Dirty Cans Is by Careful Inspection by the Creameries.

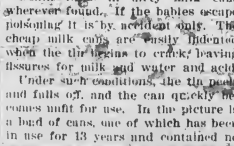

Deaths in dirty milk cans wherever found. If the babies occupy lowly can be in accident safe. The cheap milk cans are easily identified when the dirt begins to crack, leaving fissures for milk and water and acid. Under such conditions, the tin pails and milk cans, and the can quickly become a bad of cans, one of which has been in use for 13 years and contained no

Cowards To the Rear.

J. Campbell Cantrell did a splendid service for his party when he called a halt on its program of shedding the proposed investigation of the alleged "leak" of the President's peace note and until the House on its proposition to invest the Rules Committee with ample authority to proceed with the investigation of the alleged "leak" of the President's peace note.

The course of the majority of the Rules Committee in its decision to table this inquiry is not explainable on any grounds except its intelligence or courage. Wood's action in moving for an investigation, based on the charges of an unknown letter writer, may have been commendable. Lawson's melodramatic impeachment of men high in Congress and the Cabinet and refusing to identify them by name undoubtedly was contemptible. But eyes cannot be shut to corrupt conditions at Washington. The majority of men like Lawson and Wood are open to them. It is not an exaggeration to say that there is no man in the majority of the committee who voted to table this investigation who has not good reason to believe that there is ample evidence to justify the charges suggested by the allegations of Lawson and Wood.

The minority of the Rules Committee may have been playing politics in supporting the resolution or an investigation, but that is certainly no reason why the majority should have played worse politics by playing into their hands. Politics or no politics the majority laid themselves open to the charge of cowardice on a charge, they may be assured, which has been widely made. But the House, thanks to the timely intervention of Mr. Cantrell, has refused to acquiesce in their timidity. It has overridden their decision and sent the matter back to them with authority to make a real investigation and virtual instructions to make it. Let them see to it that they make it.

As for such chronic blatherers as Lawson, they are of small significance, one way or another. Lawson has made before the committee grave charges against unnamed men in official life at Washington. He refuses to name them. He should be forced to name them and substantiate his charges or take the consequences. But the real duty now before Congress is to go to the bottom of this business and find out what fire there is beneath the smoke in which such charges as these are bathed.

What is a real duty in which both the cowards and the politicians should be sent to the rear.

—Courier-Journal.

As Others See Kentucky.

The Kentucky dressmaker named Hackett might be able to cut 'em out.—Memphis Commercial Appeal.

A few days ago in Kentucky Miss Edna Siev was married to Mr. William Lee, and it occurs to us that the wedding must have been a rather frosty affair.—New Orleans States.

It seems that a Kentucky mob was so pleased with its success at a lynching that it turned around and lynched an unfriendly critic. There would be a great mortality on our staff of musical critics, if every artist who murdered music at our afternoon concerts were subjected to such tactics.—Boston Advertiser.

Kentucky boasts of a 97-year-old citizen who has all his hair on fall of his teeth. Those possessions, however, don't count for much in these days of the high cost of living.—St. Paul Dispatch.

In Tennessee and Kentucky gallies have struck against giving one person the right to legislate for the whole population, the move seems reasonable. An occasional passing possession seems to be a long-term want.—Brooklyn Eagle.

Kentuckians, according to the Courier-Journal, has named a yes to the name Jackrabbits because it has long ears.—Columbus, Ga., Enquirer-Sun.

Kentucky newspapers are urging the State with good reason, that Mammoth Cave should be taken over by the Government as a national park. The cave—the most wonderful in the world—has been under private ownership since its discovery. It has been exploited by sightseers are practically ruined by grasping concessionaires. Scientists have been forbidden to do research in the cave is prohibited by the private owners. This vast subterranean area was created by nature and belongs to the whole people, and Congress should take action at once early date to make it easily accessible to all who care to go to see it.—Springfield, Illinois Record.

In Kentucky, one of the last outposts of that romantic heroism which used to be the chief glory of Kentucky, they seem about to have a physical referendum on who was elected Governor.—Milwaukee Journal.

Paris, Ky., has proved a healthy place for one undertaker. He has been in business there for a period of twenty years, and he claims the record for his native State. He believes he has something on every other undertaker in the United States. He is a native of service. It is likely that he holds the national record. Seventy-four years is a pretty good life span for a man who has been in one continuous service in any line of activity is unusual. Which is Paris to be congratulated upon the mark of distinction it has placed upon a successful thing.

It is evidently a congenial place for undertakers, at least for one. Whether it is as sublimely as Paris, where undertakers are the last service is a matter subject to proof. Rochester Democrat-Chronicle.

We Can Make Immediate Deliveries.

Mrs. Hattie A. Adam of Chester, West Virginia, is spending a few weeks here with her sister, Mrs. S. L. Edwards.

Mrs. W. M. Britt of Centerville, Penn., arrived here last week and is the guest of her brother John C. Pedinger at his home.

Everett K. Stephens who has been confined to his home the last two weeks, was able to be at his place of business this week.

Mrs. E. P. McDermis and daughter, Miss Evelyn, of Covington, spent Saturday here with her sister Mrs. J. Wm. Houston.

W. B. Graham and Jos. Satewell of Warsaw, were here Monday en route home with several new Buick autos for which Mr. Satewell is agent.

Root, W. Jones, our popular druggist, left last Wednesday for Louisville to spend a couple of weeks visiting his brother Dr. R. M. Jones.

George L. Miller and grandson, Comer Carroll, of Big Lake, Springs, spent Saturday here with friends, and attended the session of the tobacco market.

Mrs. John Johnson has returned from a visit to her father, J. R. Callahan, at Hillsboro, Indiana, her brother Hayden Callahan at Evanson, Ohio, and her sister Mrs. W. Van Winkle at Circleville, Ohio.

Mrs. Mattie V. Dugman, who is spending a couple of weeks at Dry Ridge with her sister, Mrs. J. D. Renaker spent Saturday here. Her aim recently broken by a fall, is much improved and will soon be well.

Mrs. John B. Johnson has returned home from a visit to her father J. R. Callahan at Hillsboro, Ind., her brother Hayden Callahan at Evanson, Ohio, and her sister Mrs. W. Van Winkle at Circleville, Ohio.

Work on the Methodist parsonage will begin shortly as most of the material has been placed on the ground and Contractor N. J. Olson states that as soon as weather conditions permit he will hurry the erection of the building.

Chas. T. Best, of Paris, Bourbon county, spent from Saturday until Monday here arranging to sell his property here as he expects to make Paris his permanent home as he is doing business there and is much pleased with his business relations.

John S. Steers of Dry Ridge, spent last Wednesday here with his many friends. Mr. Steers is the agent of several life insurance companies and was here for the purpose of paying to Mrs. D. M. Bagby a \$1000 policy of the life of her late husband.

John R. Feagan of Brookville, Bracken county, was here Sunday and Monday looking at several farms with a view to buying and moving here. Mr. Feagan is a prominent horse man, and is a first class man that we would be glad to have in this community.

Geo. C. Powers, a real estate man, sold to John W. Conrad, of Chas. T. Best property in the subdivision of Walton, consisting of a new two story dwelling, barn and two lots for \$2000. Mr. Powers also sold to Henry C. Diers to Mr. Conrad an adjoining lot, for \$150.

Wesley Dixon who officiated as special express in the pick-up between Walton and Cincinnati, was stricken with paralysis while in Hoffman's meat store in Cincinnati last Wednesday. His advanced years are against him, but it is believed he will recover.

S. M. Biltner, of Williams-town, who is the manager of the lowest leaf market in the place, spent Saturday here on the market and was well pleased and pronounced it as good as any in the State. Mr. Biltner reports that he is doing as much business as last year and expects to sell fully 2,000,000 pounds this year.

Mrs. Jane Whitcomb, who resided here many years, died at her home at Covington, Boone county, Jan. 17th, aged 88 years, her death being caused by old age. The funeral took place Friday from her late home. Her sons, Frank and Robert made Walton their home for a long time, and with one son at Orlando, Florida, survive her.

Card of Thanks.—We desire to express our most heartfelt gratitude to all for the kind words, sympathy and condolence in the illness and death of our dearly beloved husband and father, Mr. J. Edwards. We treasure these expressions of good friendship more than we can express in words, nor can we always remember them.

Mrs. S. L. Edwards and Children, Thos. Merchant, of Sparta, and Miss Mabel Colston of Walton, were united in the bonds of holy wedlock at the residence of the officiating minister, Rev. H. Runyan at Latonia, last Wednesday in the presence of a few friends. The groom is the business manager of the Western Union Telegraph Company, at Sparta, and the bride is the pretty daughter of Mr. and Mrs. Jarvey Colston.

Boone County's Mrs. Producers Association had a meeting at an opera house last Saturday and adopted measures toward helping the dairywomen in their struggle with the Cincinnati dealers. They want an unfair advantage over the milk producers. Every milk producer should identify himself with this organization and stand for its interests as it means protection and remunerative prices.

W. Tilden Dudgeon recently appointed Postmaster at Walton, has resigned as a member of the town council last Wednesday of which he was the chairman and consequently mayor of the town.

His resignation became necessary in order to qualify as postmaster. Raymond Renaker was elected chairman of the board, and L. P. Vallandigham was recommended for appointment to fill the vacancy on the board. County Judge P. E. Cason having the power to appoint.

The sale of tobacco at the Walton loose leaf market last Saturday was well attended and about 150,000 pounds were sold at an average of \$16.00. Over a million pounds of tobacco have been sold on this market in the nine sales held at this warehouse this season, and the average of over fifteen cents per pound it is expected that this year as there is more tobacco on hand ready for the market and each sales day the floor is filled to its capacity. The market appears to be getting better with more spirited bidding and better prices prevailing. The tobacco is being handled more expeditiously and everything is going along smoothly as the men in charge who had very little experience in the matter are getting more accustomed to the routine and are therefore able to dispatch the business with more promptness.

Hon. J. G. Tomlin has just issued from the press of R. D. Stabler, a very interesting address relating to the establishment of a sanatorium for the treatment of tuberculosis in the seventh district comprising a number of counties in Kentucky which deserves the earnest consideration of every thinking citizen. Judge Tomlin is the President of this district and is giving his time and energies to this very worthy object for the suppression of this disease. His efforts will result in the establishment of a sanatorium which will mean much to the public at large in the saving of human life, suffering and wealth that can hardly be computed. The great percentage of deaths from tuberculosis has awakened the public to a realization that some effort must be made to control the disease and educate the people to methods that will prevent its fatal ravages and this pamphlet deals in facts and figures so thoroughly convincing that it is believed some prompt action will be taken. Anybody can procure a copy of this address by applying to Judge Tomlin.

Card of Thanks.—A "card of thanks" usually expresses gratitude for services rendered in sickness and sorrow, in helping bury our dead from our sight. But this "card of thanks" is of a different kind. It is a testimonial from Covington telling me of the kind deed of the neighbors to our parents, Mr. and Mrs. T. J. Davis, who live among you. The neighbors saw that these folks were getting old and that it would be more or less risky for them to accomplish a task which they were about to do, and they came in and did it for them. It was to me absolutely unique. It makes the value of our farm more, and let us say to the good people that we appreciate it with all our hearts. The Dear Lord's blessing on you. Yours in Jesus Christ, Rev. and Mrs. B. H. Payne, Richmond, Ohio.

When Buying Seed

It is well to look to a house that puts quality above price. Did you ever stop to think that 25c on a bushel of seed amounts to only 6 to 10c per acre.

You surely can not afford to sow inferior seed for a difference of 6 to 10c per acre when the results may mean 6 to 10 dollars to you, to say nothing of having your farm infested with obnoxious weeds and filth.

High Purity & Germinating Test

is our constant aim, and judging from the way our old customers come back each year and many new ones that are so well pleased and we believe are succeeding.

We Give You Test on Every Tag

showing what is required by the New Kentucky Seed Law and if you write for samples we can give same on samples.

Our Prices Are Low

and a post card will prove it to you.

Just let us know what you are interested in and

TROOPS ORDERED HOME.

More Than 25,000 Will Return From Mexican Border.

More than 25,000 national guard men now on the Mexican border have been designated by Major Gen. Pustan for return home and muster out of the Federal service under the order issued by the War Department.

All these organizations will be started homeward as soon as transportation facilities can be provided. Their departure will leave between 45,000 and 50,000 men of the guard still in the Federal service doing border patrol.

Major Douglas MacArthur, department commander, expressed the opinion that it will be two weeks before the troops are at their home stations. It required sixteen days to send the troops to military organizations that were returned from the border.

War Department officials continue to withhold comment on reports that the movement of Gen. Pershing's regulars out of Mexico soon will be under way and the statement announcing the guardsmen designated for relief does not cover the withdrawal of the troops.

The understanding has been how ever that with the return of the expedition in Mexico and readjustment of the border patrol all of the State troops gradually would be sent home.

The Department's statement said: "Gen. Pustan has selected these organizations chiefly in accordance with the rule of returning first those troops longest in service on the border. To some extent, however, this rule cannot be followed without unequal weakening of the border guard and the departures from it are so regulated that the strength of the organizations selected is 25,243."

THE USEFUL SPENDTHRIFT.

The Man Who "Blows In" Big Sums Keeps Money in Circulation.

A fool and his money is soon parted. That's right.

The best thing that can happen to a fool's money is to get into the pockets of a wise man. So long as the fool's money is in circulation, it is doing good. It is doing good when it is in the pockets of a wise man. It is doing good when it is in the pockets of a wise man. It is doing good when it is in the pockets of a wise man.

When a spendthrift eats \$2 worth of turkey, he gets four times the money doesn't go down his throat. Bless you, no; because it goes to the hotel man, who scatters those 800 quints to the four winds.

I hear the thoughtless sinner when they read about some fellow's giving a monkey dance at Newport. But I ask you, if getting rid of his money as fast as possible is not the very best thing a monkey-dinner promoter could do with it.

When a man or woman has not the sense to spend money wisely, why, the sooner and faster it goes the better for the rest of the world.

The worst thing anybody can do with money is to lock it up. Wise ones make their cash work harder than any slave lashed on a cotton plantation.

Even a slave had time to sleep, but a sensible man, no matter whether he have \$10 or \$10,000,000, keeps it on the treadmill all day and all night and every day of every year.

Hence your spendthrift when he orders \$50 worth of wine for a dinner, plus \$1,000 worth of flowers and banquets, the whole bill for a tip is doing what? Merely transferring his cash from one treadmill where it is not needed to a second, different one where it is needed.

So instead of reviling these lavish spenders say to them as the Governor remarked to ex-Bark Commissioner Smith, "Bless you!"—Philadelphia Ledger.

BEES ARE GREAT TRAVELERS

To Collect a Pound of Clover Honey Insect Must Get Material From 62,000 Blossoms.

The bee is famed for industry, but to show how much work the bee really does a naturalist says that to collect a pound of clover honey the bees must deplete 62,000 clover blossoms.

The flowers must be visited by 375,000 bees, or, in other words, to collect his pound of honey one bee must make 375,000 trips to and from the hive.

As bees are known to fly for miles in their quest of suitable fields of operation, it is clear that a single ounce of honey represents millions of miles of travel.

Wheat Will Be Scarce.

This country will be so bare of wheat by next summer that high prices will prevail even if the farmers raise a bumper crop," declares the Manufacturers' Record.

"The farmers will thus have an opportunity to continue to get such prices as they have not had in the past, even if they produce a crop smaller than the record crop of 1915. Every bushel they produce will be needed."

Shouldn't we wonder that they should be so much in the world's short-crop predicament? Winter wheat may be harvested during the spring months and with application of fertilizer will be a bumper crop in the spring.

Indications are that the country's increased demand for wheat will be met by the increased yield and resulting lower prices.

WINTER QUARTERS FOR SOWS

Necessary That Animal Have Suitable Shelter, Proper Amount of Exercise and Good Feed.

(By R. L. THOMPSON, Associate in Animal Husbandry, South Dakota State College.)

If the sow is to be properly cared for during the winter months it is necessary that she have suitable shelter, a proper amount of exercise and that she be fed not only liberally but upon feeds that furnish the necessary nutrients required by the pregnant sow.

Suitable shelter can be supplied by hoghouses of various types and the style of house used will depend upon the conditions existing upon any certain farm. Whatever kind of house is used it should be well ventilated, dry and well lighted. Portable houses may be used advantageously part of

Healthy Sow and Litter.

the year, but at farrowing time a well-planned and well-built permanent structure is needed.

Personally, I prefer a house of the semicircular type of roof and one of sufficient width for two rows of pens with a feed alley between them. The length will depend upon the number of sows that are to be housed in it. The pitch of the roof should be such that the sun's rays will fall upon the north row of pens during the middle of the day. Of course this type of house should always face the south. In a building of this sort it is much easier to care for the sows than it is when small individual houses are used. Especially is this true at the farrowing time as one man can properly look after a much larger number of sows than when they are scattered about in a number of different small houses.

DOCTOR SHEEP WITH WORMS

Drenching With Copper Sulphate Is Recommended by Animal Husbandmen at Ohio Station.

Stomach worms and tapeworms, which cause enormous losses to sheep raisers each year, may be treated satisfactorily by drenching with copper sulphate, according to animal husbandmen at the Ohio experiment station. Digestive disturbances, malnutrition and general weakness are symptoms of these pests in sheep.

For 8 to 20 hours before treatment the sheep are fasted. They are then drenched with a bottle or with a rubber tube and funnel. Two fluid ounces of a solution made by dissolving an ounce of copper sulphate (blue vitriol) in two quarts of water is sufficient for a yearling, while a two-year-old sheep requires three fluid ounces.

CLOVER AND ALFALFA VALUE

Roughage Used in Feeding Tests With Lambs at the Ohio Experiment Station.

When both roughages were of equal quantity, clover and alfalfa had about equal values for fattening lambs in feeding tests at the Ohio experiment station.

Alfalfa hay is harvested in better condition than clover, and commands a higher price on the market. The results of these feeding tests justify a warning to farmers not to overvalue alfalfa to the extent of feeding an inferior grade of this hay when good clover may be had at a lower price.—Ohio Experiment Station.

DO NOT MIND COLD WEATHER

Exercise Is Essential to Ewes and Cows—Lambs—Provide Plenty of Clean Fresh Water.

Sheep do not mind cold when they are active and the best way to keep them warm is to keep them active.

Feed them a good ration of clean hay and keep them in a clean, dry place.

Provide plenty of clean fresh water for them to drink. Give them exercise.

AVERAGE LABOR FOR HORSES

Horse on Grain Farm Works Three Hours a Day—Different on Diversified Crop Farm.

On the grain farm the heaviest work for the horses comes in April, May, August, September and October. The rest of the time there is practically nothing for the horses to do. But enough horses have to be kept during the year to take care of the work during those busy months. When averaged up, the horse on the grain farm only works three hours a day. These figures were secured in an investigation by the Minnesota experiment station, under the direction of Thomas Cooper, now director of the North Dakota experiment station.

In this same investigation it was found that when the crops are diversified, the horse labor is better distributed. There is less work for the horses in the seasons that are the busiest on the all-grain farm, and therefore less work for the horses when there is no work for the horses on the all-grain farm.

WINTER WORK FOR STALLION

No Reason Why He Should Not Be Worked Like Any Other Horse—Give Reasonable Exercise.

It is a mistake to keep a stallion idle during the fall and winter. Though this is often done there is no reason why he should not be worked like any other horse. If this is not possible he should at least be given the opportunity of taking a reasonable amount of exercise. Also the stallion should be about the same as the rest of the horses.

Feed about one pound of good hay for every 100 pounds of weight and in addition to this, give enough grain, equal parts of corn, bran and oats, to keep the animal in good flesh, but not too fat. If this he does he will be more efficient during the breeding season than would be the case were he kept in breeding condition all through the year.

DRINKING WATER FOR STOCK

Automatic Device, Invented by Indiana Man, Insures Full Supply and Saves All Waste.

An ingenious contrivance for use in watering troughs has been invented by an Indiana man. It consists of an automatic device for filling the trough as fast as the water is depleted by animals drinking it. The pipe through which the water is supplied is fitted with a spring valve.

An angled arm is pivoted in the bottom of the tank near this pipe, with the lower end of the arm resting on the valve and the upper end terminating in a wooden ball, which opens to the source of the water. The principle of this appliance will be grasped at once.

As Float Sinks Valve Opens.

When the water is at a certain height in the trough the ball will sink to such a position that the arm will keep the valve on the supply pipe closed.

As the water is depleted by stock drinking, the ball sinks with it and the arm on the valve rises, admitting fresh water. This device insures always a full supply of fresh water for the animals drinking it.

The waste water that runs over when the trough is filled from a running source, grasped at once.

FEW SUGGESTIONS ON HORSE

Pedigree Has Considerable Weight—Keeping Animal's Skin Clean Is Essential to Health.

While pedigree does not make the horse it does contribute much to his value. It is to be taken into consideration.

Keep the horse's skin clean and free from dirt. This will help to keep him healthy.

If a horse's back is stiff it is a sign of trouble. It is a sign of trouble.

Keep the horse's feet clean and free from dirt. This will help to keep him healthy.

KEEP FEED YARD DRY

Cattle Cannot Thrive When Confined in Muddy Lot.

Where Farmer Keeps Stock Comfortable and Satisfied He Has Done Much To Secure Gains From Feed He Has Used.

Not all soil becomes deep with mud during the winter season, but much clay soil does, and a larger section of the country is not sand. There is a saying that the best corn land is mud when wet. It naturally follows that the average feedlot is rather muddy whenever there is moisture enough to make it such.

It is also a safe bet that cattle are not doing their best when confined in a muddy lot. We are learning more and more that it pays to get away from the mud, both for our own comfort and for the comfort of our stock, for if you will make stock comfortable and satisfied you have done much to secure the gains that should be secured from the feed that is used. Keeping out of the mud means keeping the stock comfortable and satisfied.

Farmer and feeder living in one of the best sections of Illinois, four years ago, tried the experiment of paving a portion of his feedlot. He found the paved portion of his lot so satisfactory that he was getting the material on the ground to pave the rest of it.

He keeps the manure cleaned up from his paved yard, hauling dirt to the field each week if the field will

Concrete Feed Yard.

permit hauling upon it, but if not he cleans into a pile in one corner of the lot. His sheds are also paved and are kept bedded with straw. He is still enthusiastic over his paved feedlot, claiming that he secures enough extra gain each feeding season to pay for the cost of paving. He usually feeds from two to five loads of cattle each winter. "My cattle do just as well one week as another," he says, "while those feeding in dirt lots complain that it takes all the feed to keep even during the times when their lots are half knee deep in mud." As we progress we realize more and more that the mud tax is a heavy one, whether it be in the road, in our own doorway or in our feedlot.—Successful Farming.

RIGHT TREATMENT FOR ROUP

Use Good Sharp Ax and Then Bury Carcasses Deeply or Burn Them—Several Forms of Aliments.

The best way to cure roup among poultry is to use a good sharp ax and then bury the carcasses deeply or burn them. Roup may take several forms, appearing at first like a severe cold. Use enough permanganate of potash in the drinking water to give it a rich wine color. Disinfect the yards and houses with a 5 per cent solution of carbolic acid.

Individual treatment should be the same as for colds or catarrh. Press the nostrils together with the thumb and forefinger and apply pressure between the nostrils and eyes to loosen the discharge. Then plunge the head into a two per cent solution of permanganate of potash for 20 to 30 seconds. This treatment should be continued twice daily until all symptoms disappear.

PLACE FOR ALL IMPLEMENTS

Tools Should Be in Shed During Winter—Exposure to Elements Causes Rust and Decay.

From now on till next spring most of the implements of cultivation will not be used, nor will be plowshares. The place for them, and for all implements not in use every day, is under the shed. Why? What does a man work for? Implements cost money. Exposure to the elements causes them to rust, warp and decay.

What they are gone more work must be done to get more money to buy more implements, when just a little work and a little care at the right time would have made them last a year or two or three longer.

STOCK INJURE CORNFIELDS

Best to Take Stalks Off and Feed Them to Stock on Dry Land—Do Harm in Tramping.

Cattle will do much more harm tramping around the cornfield when it is wet in the fall of the year, eating the stalks that are left there, than all the good they will get from the stalks.

Better take the stalks all off and feed them where this injury will not be done to the soft earth.

MANURE AS A TOP DRESSING

It Greatly Stimulates Growth of Wheat and Assists to Prevent Winter Killing.

(By M. F. MILLER, Missouri College of Agriculture.)

Every year sees a greater number of Missouri farmers using manure as a top dressing on wheat. There is considerable evidence to show where wheat is grown in a rotation, manure can very often be applied to better advantage as a top dressing on this crop than as an application before corn. There are two principal advantages of this practice. The first one is that it greatly stimulates the growth of the wheat and helps to prevent winter killing with a resultant increase in yield. The second one is that since the wheat and since manure aids very greatly in securing a stand of these crops when used as a top dressing with the wheat, this alone may be sufficient reason for its application. As a matter of fact the top dressing of wheat with manure almost insures a stand of corn, this alone may be sufficient reason for its application. As a matter of fact the top dressing of wheat with manure almost insures a stand of corn, this alone may be sufficient reason for its application. As a matter of fact the top dressing of wheat with manure almost insures a stand of corn, this alone may be sufficient reason for its application.

BEGIN POULTRY LICE FIGHT

Effective Powder Can Be Made at Home by Using Cresol, Carbolic Acid and Gasoline.

A very good lice powder for use on poultry may be made at home from ingredients that, when bought separately, will cost little as compared with the expense of commercial lice powder made of the same or similar materials. One of the best of these home-made powders is prepared by mixing one pint of cresol, or the same quantity of strong, crude carbolic acid, with three pints of gasoline. To this is added, while stirring, just enough plaster of paris to take up the liquid. It will take about ten pounds of plaster for the amounts of cresol and gasoline given. Larger or small amounts may be prepared by increasing or decreasing the three ingredients proportionately.

After making this powder it should be kept in a well-covered receptacle to keep it from losing strength. The best way to apply the powder is to put it into a sifting box made by punching numerous small holes into a tin can, and holding the bird by the feet, head downward, sift the powder well into the fluff.

SAW-TOOTHED GRAIN BEETLE

Insect Infests Almost Everything of Vegetable Nature, Such as Cereals, Nuts and Seeds.

(By A. A. GIRAUDET.)

A minute, flattened, chocolate-brown beetle, with the margins of its thorax roughened with toothlike projections, if found abundant in groceries or other edible substances, may be assumed to be the saw-toothed grain beetle. The slender adult is not more than a tenth of an inch long. The pupa is white, and is occasionally enclosed within a delicate cocoon composed largely of

Saw-Toothed Grain Beetle. a—Adult; b—Pupa; c—Larva.

particles of the food substance. From five to seven generations of this species may be developed within a single year, the number depending, as usual, upon the temperature and upon the supply of food. The beetles infest almost everything of a vegetable nature used as human food, including preserved fruits and various cereals, bread, oats, seeds, red pepper, yeast, spices, sugar, flour and also tobacco and snuff. This beetle is generally distributed in North America as well as other countries, South America, Europe and Asia.

PROFITABLE FEED FOR HOGS

Nourishing Slop Made of Linseed Meal Is Cheaper Than Bran—Has Big Fertilizing Value.

Linseed meal makes a most nourishing and profitable slop for hogs of all ages, and it is cheaper than bran these days; but don't feed it too freely. It is concentrated stuff.

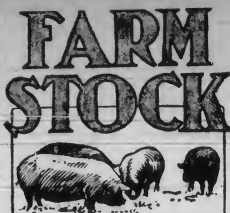

Every pound of it fed on your farm has a fertilizing value of at least 50 per cent of its cost, aside from its food value.

WATCH CLOSE FOR BLACKLEG

Disease May Be Prevented by Vaccine Treatment—Keep Sharp Lookout for Its Appearance.

Prevent blackleg with vaccine. Keep a sharp lookout for the appearance of this disease in your herd or your neighbors' herds and give the treatment quickly.

Your druggist can get the vaccine if he does not carry it in stock.

HOGS DIFFICULT TO CONTROL

When Animal Once Acquires Habit of Getting Out of Pasture He Is Hard to Restrain.

When a hog once gets the habit of getting out of its yard, pasture or whatever its inclosure may be, it is one of the most difficult animals to control. You can stop a branchy horse or cow if you build a fence high enough, but a hog goes through. If there is no hole in the fence it makes one, of course. If the fence was so tight at first that the hog could not get through, it won't bother you the second and forty-ninth time.

Insufficient or irregular feeding, or failing to supply something which the animals crave in the feed makes hogs restless and ready to take the first chance of exploring the outside world in hopes of finding what they failed to find in their troughs.

It saves time and patience to keep them contented and at home.

TREATING HOGS WITH WORMS

Prescription Given for Pig Weighing About 100 Pounds—Give Salt, Sulphur and Charcoal.

To expel worms from hogs the following prescription is right for a pig weighing about 100 pounds: Santonin, five grains; calomel, two grains; arsenic, two grains; sodium bicarbonate, one dram. Keep the hog off feed for about 12 hours and give the dose in a slop of middlings. The evening of the same day give a mash of wheat bran. This will flush the bowels. Gather all worms and burn them.

Worms often are the forerunner of disease.

If a hog or pig has a big appetite and thriftless condition, with dry dead hair, it is a good indication of the presence of worms.

Salt and sulphur and charcoal should be kept in every pigpen and pig yard so the pigs can help themselves.

This is a corrective and a preventive of worms.

COLTS RESPOND TO FEEDING

Size of Animal Determined First Winter After Weaning—Aim to Build Up Big Frame.

No farm animal will pay more for abundant feeding than the colt. The first winter after weaning, the ultimate size of the colt is largely determined. We understand that the French Percheron breeders feed as much as ten pounds daily of bran and oats to their weanling colts.

The object of feeding the weanling colt is to induce the formation of a big frame, with heavy muscling. Our aim is not fat. Therefore, we prefer to feed some bran, oil meal, and oats in connection with corn. For this reason, also, we prefer a good quality of clover or alfalfa hay to timothy hay.

In connection with timothy or corn stover, we would feed a mixture of five parts of corn, three parts of oats, three parts of bran, and two parts of oil meal.

Well-Fed Colts.

meal; while in connection with good clover or alfalfa hay, we would make the mixture five parts of corn, three parts of oats, two parts of bran, and one part of oil meal.

To a colt of draft ancestry, designed for market, we would feed at least five pounds of such a mixture the first winter, and as the winter wears on, we might increase to seven or even ten pounds.—Wallace's Farmer.

FEEDING ALFALFA TO SWINE

Some Arrangement Ought to Be Made to Prevent Hogs From Dragging Hay Around Underfoot.

In feeding alfalfa hay to hogs some arrangement must be provided to prevent them wasting the feed by dragging it around underfoot. A rack with ends hinged up solid and sides made with upright two-by-four bars enough apart for the hog to pull the hay through will prevent waste. It should be made light enough so it can be easily moved by hand to avoid having the hogs always eat at the same place. Quite a broad bottom will be necessary as the rack will get tipped over too often for the owner's serenity of mind.

Each real home should be an illustration of society so managed that the best and most efficient citizens may be given to the community.

Order, contentment, hospitality, goodness have been called the house blessings.

SEASONABLE GOOD THINGS.

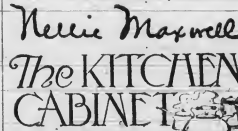

We like occasionally to revert to the old-fashioned dishes which in our father's day were good.

Nantucket Buns.—Scald a pint of milk, add four tablespoonfuls of butter and when cool enough a cupful of home-made yeast, a teaspoonful of salt and four to make a batter. Let rise overnight. In the morning add two eggs, well beaten, one and a half cupfuls of sugar, a handful of currants and flour to mold. Cover, let rise and bake in buns; when light bake in a moderate oven.

Boiled Cider Pie.—Allow five tablespoonfuls of rich strung boiled cider, five tablespoonfuls of grated apple sugar and boil. Beat two eggs, pour the strup over them, return to cook until the eggs are smooth. Add one-half cupful of raisins, a half a nutmeg, and a pinch of cinnamon. Line a pie plate with rich crust, put in the mixture, dot with bits of butter and cover with a meringue.

Colonial Quinces.—Pare and halve the quinces, removing the cores. Boil these in cider to cover until tender, then strain. For five pounds of quinces take a quart of molasses, one pound of brown sugar and the strained cider, add two whites of eggs and put over the heat to boil, remove the scum, continue to boil until clear, then cool, put in the quinces and cook until tender. If not enough sugar is left to cover them when put into the jar, add more cider. Orange or green sugar may be added for flavor if desired.

Breaded Breast of Lamb.—Trim and wipe the meat with a damp cloth. Put it in a kettle with an onion stuck with six cloves, one teaspoonful of salt, one dozen pepper corns, half a cupful of dried carrot and a bunch of sweet herbs. Cover with boiling water and let simmer until the bones will slip out of the meat. Lift carefully from the kettle, remove the bones, put a weight upon the meat and set it aside to get cold. Trim into shape, dip in egg and crumbs and fry brown in deep fat. The stock will make a delicious soup.

Home Economics stands for that simplicity in material surroundings which will free the spirit for the more important and permanent interests of the home and society.

SEASONABLE DISHES.

For reasons of economy the average family is substituting more milk and cheese in the family diet.

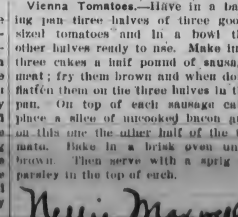

Pittsburgh Potatoes.—Cook a quart of potato cubes with a small amount of onion until the potatoes begin to get tender, then add a half a can of red peppers (sweet Spanish peppers), cut in small pieces and cook five minutes longer. Drain and put into a baking dish. In a saucepan put two tablespoonfuls of butter and when bubbling hot add two tablespoonfuls of flour, a teaspoonful of salt and a pint of milk, cook until smooth; add a half pound of grated cheese, pour over the potatoes and bake until brown in the oven.

Rice Baked With Cheese.—Cook a cupful of rice in three parts of water with a tablespoonful of salt. Add the well-washed rice slowly to the salted water, so it will not stop boiling. When tender, drain and cover the bottom of a baking dish with a layer of rice, sprinkle with grated cheese and a dash of red pepper. Add milk to half fill the dish, cover with crumbs and bake until the milk is absorbed and the crumbs are brown.

Dip potatoes in cornmeal, before French frying them and have a pleasant change from the ordinary fried potatoes.

How to Cook Jack Rabbits.—Prepare the rabbits by cutting them into serving-sized pieces, roll in seasoned flour and steam in an air-tight cooking dish for a half hour. Then add a half cupful of finely cut salt pork, and a cupful of boiling water for each rabbit. Cook lightly and put into the oven and bake in a moderate oven three or four hours.

Vienna Tomatoes.—Have in a baking pan three halves of three good-sized tomatoes and in a bowl the half pounds ready to use. Make into three cakes a half pound of sausage meat, fry them brown and when done flatten them on the three halves in the pan. On top of each sausage cake place a slice of unsliced bacon and on this one the other half of the tomato. Bake in a brisk oven until brown. Then serve with a sprig of parsley in the top of each.

We Can Make Immediate Deliveries.

REPUBLIC MOTOR TRUCK CO.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck—converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pressed steel frame—every supporting part a forging or pressed steel—Republic Torbenston Internal Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

WHY WORRY?

Leave it to the old boys of science, they of the square spectacles and ear-muffs, and this world will be pulled through its rather precarious existence, says Topeka State Journal. Some time ago somebody who needed the money wrote an alarmist article for a magazine, stating that in a very short time, in fact, within 8,000,000 or 9,000,000 years, the earth's food supply would be entirely exhausted. This set all the scientists going like gyroscopes, and in the dizzy whirl of investigation some very interesting things came to light. It was up to the scientists to find something for the people to eat 8,000,000 or 9,000,000 years hence. It was not wholly a new problem. Scientists long ago evolved the scheme of saving up timber into breakfast food and said that a man could go forth with a buckskin and get enough sawdust out of a fence rail to keep himself and his family supplied for some time. One learned scientist thinks that he has solved the problem for all time. He says that the nut trees could, in a pinch, supply food for the entire world. This knotty question has become a nutty question, and one which has apparently solved. Those who are on earth now should be of good cheer; they will not have to starve 8,000,000 years hence.

The New York state department of health has issued a bulletin announcing that "Kissing on the mouth, especially children, should be discouraged." Usually antiskissing injunctions are treated as if intended to abridge the delights of courtship. Viewed from this angle they suggest levity and receive little attention from the public. Here is an admonition pitched in a different key. Children—particularly young children—are more sensitive than older people to the assaults of various bacterial enemies of health. This is the chief reason of the large mortality among the young. They should be protected from the risks of exposure to promiscuous osculation. A great many people who love children and do not relish the abandonment of the practice of "kissing the little dears" are considerate enough to kiss them on their foreheads instead of their mouths, and this is a wise compromise.

Reports from Berlin indicate that the German government has already appointed a special imperial commission to take charge of Germany's business during the transition period between war and peace. Regardless of the outcome of the war, this shows that Germany is determined that German industry and business shall lose nothing by a swift upturning of the order of things as established by the warfare period. The nation which is best prepared to guide its business safely through this time of readjustment will, in the long run, be the most prosperous nation.

The wounded Canadian private who killed and wounded a number of the enemy and then captured 62 single-handed might have been organized into a battalion had it not been that his name inadvertently escaped notice in his multitudinous deed. The stories coming from the front must make the great American press agent turn green with envy.

A motorless monoplane, to be shot into the air from a catapult and reach the height of 12 miles, is the latest idea. In the future the earth will be used merely as a way station by the ambitious investigators and experimenters into aerial, subterranean and subsea travel.

The railroads of the United States used 6,200,000 tons of anthracite last year, but even knowing that you probably would not be able to figure out how much the price of coal would be reduced if all locomotives should burn oil.

Some of the western newspapers can't seem to get over their old, frontier-day recklessness. One of them advises an anxious inquirer that "it is perfectly safe to get married on Saturday or any other day."

The ideal husband has been found at last in California, in fact, a number of him, since university coeds there have been taking imaginary spouses upon whom to practice their domestic science course.

Patrons of the more or less legitimate drama express the belief that better plays will be given in future. It is difficult to see how improvement could be avoided.

C. P. CALVERT DEAD

Was Born in Burlington Seventy-Two Years Ago—Prominent Cincinnati Druggist.

Was a Son of Willis Calvert and Half Brother of the Late James W. Calvert.

(Saturday's Enquirer.) Cyrus P. Calvert, pioneer wholesale druggist and chemist, and former President of National Wholesale Druggists' Association, died last night in his apartments in the Verona Building, Walnut Hills. Mr. Calvert's health had been declining steadily the last year and he was confined to his room since December 26. He was 72 years of age.

Mr. Calvert was born in Burlington, Ky. He was a friend of chemist and author, who is said to have found inspiration for "String-on-the-Pike" in their acquaintance. Mr. Calvert was engaged actively in the wholesale drug and chemical business in Cincinnati for the last 30 years. He was President and Treasurer of the Cincinnati and Chemical Company, 38 West Third street, until his health necessitated a year ago.

He was elected Mayor of Hartsville in 1902 and held the office one term. He was a resident of that suburb for 25 years, removing to Walnut Hills two years ago. He was also President of the National Wholesale Druggists' Association in 1905.

Mr. and Mrs. Calvert celebrated their golden wedding in 1915.

Surviving Mr. Calvert are his widow, two daughters, Mrs. John L. Morris, Walnut Hills, and Mrs. Judith L. Moore, Hartsville, and a son, Arthur L. Calvert, Clinton.

Funeral services will be held in the apartments at the Verona at 9 o'clock Monday morning. They will be conducted by Rev. J. B. Haggin, pastor of the First Christian church, Covington. Burial will be in Spring Grove cemetery.

BUYERS OF TOBACCO

Held Not Liable For Persuading Growers to Break Contract.

Owensboro, Ky., Jan. 24.—Early this season W. Whitely, a tobacco buyer, of Owensboro, contracted with the farmers of Spencer and Warrick counties, Ind., for about 800,000 pounds of tobacco. At that time the growers thought they had "made a bargain" but were not many days before the tobacco market opened and the prices began to jump.

Then it was that other buyers began to rise through the Southern Indiana counties and offered the farmers higher prices for their tobacco. Mr. Whitely heard of this and immediately left Booneville, Ind., against William Baggett, Doolman, Brown & Co., seeking restraining them from interfering with his contract.

The cases were heard at Booneville and Rockport, argument being made at Rockport. In the latter case, the court held in favor of the defendants, who were liable in damages for the breach of their contracts. The action of the defendants in inducing their farmers to break their obligations was not actionable, as they did not constitute a ground for not continuing the action on the part of the defendants toward the farmers had been shown.

Price of Paper Still Climbing.

Seven hundred papers in the United States suspended in the last month, owing to the high price of print. Paper manufacturers are charging but 25 per cent of the cost of the business in the next twelve months.

Sift Your Ashes.

Winchester.—While cleaning out the ashes from a fire-place which had been in constant use for many years Miss Lelia Croston, of the county, found a large nugget of pure gold. It weighed ten pennyweights and is said by jewelers to be large enough to make a handsome gold watch. Years ago a watch belonging to Miss Croston's grandfather disappeared and was believed to have been stolen. Miss Croston, now Mrs. Hayden Clement, a few years ago, lost a valuable ring. Jewelers say, however, that the nugget contains more gold than either of both of the lost articles.

HIGHWAY ENGINEERING

Short Course to Be Held at The University of Kentucky, Feb. 5-10, 1917.

Under the auspices of the College of Civil Engineering and the State Department of Public Roads, the fourth annual Short Course in Highway Engineering will be held at the University of Kentucky, under the direction of the Highway Engineering Department of the institution.

The purpose of the Road School will be not to turn out finished engineers but through a lecture course of the things considered today to be the best practice in this line of work, to instruct and invite the cooperation of Highway and county Road Engineers, Inspectors and Contractors, as well as County Judges, members of the Fiscal Courts and specially appointed Road Commissioners. All subjects will be open to general discussion after the various lectures, so that different views of all classes of road building may be heard.

The lectures will be delivered by Senior Highway Engineers of the United States Office of Public Roads, and by the State Road Engineers of Kentucky and by the Professors from the institution.

EVERY TOWN HAS THEM

In Fact It Takes All These and Then Some To Keep A Town Going.

Every town has one store where the loafers congregate to regulate the affairs of the universe. Every town has a horrible exam-ple. He gets drunk, won't work, but his wife supports him and loves him with a dog-like fidelity that no decent man can ever hope to receive.

Every town has one skinkin' who discounts notes, buys up land, dresses like a tramp and won't get his wife to leave him.

Every town has a bad boy that all parents hold in horror and all boys love.

Every town has its champion liar, who lies for practice when he can't find anything else to do about.

Every town has its famous tongue-walker, who is so proud to make trouble as sparks are to fly upward.

Every town has a man who knows all about the Entomological Society and the Government at Washington, but don't know how to make a dollar a day.

Every town has a village attorney who will challenge any statement you may make and prove it's not so.

OWEN COUNTY HISTORY

Revived Through "Forty Years Ago" Column In The Recorder.

(Owenton News-Herald.) Under the title, "Forty Years Ago," the Boone County Recorder has been digging up some interesting bits of ancient news. In a recent issue we find the following:

Richard Shack, who not long since, was sentenced in the Owen criminal court to be hanged next Friday for the murder of his father-in-law, was granted an appeal by the Court of Appeals, and the execution is off.

This will serve to bring back to memory among our older inhabitants the stirring events surrounding the trials and execution of one Dick Shack something over 40 years ago. Shack was hanged on the site of Mr. Lynn Vance's feed barn. He was convicted of murdering his father-in-law, a Mr. Vance, who was the old log school house. The school stood near the foot-hills above the Vance bottom. Shack was discovered. Parish turned up missing, and circumstances pointed strongly to Shack as the guilty man.

Previous to the Parish tragedy and the burning of a school house, a peddler, supposed to have been in the neighborhood in the same neighborhood.

When Shack was being tried for the murder of his father-in-law, efforts were made to connect him with the disappearance also of the peddler.

On the trial he strongly denied complicity in either of these tragedies. During the time of the trial, the Simmons gang was operating in the area of the county near the Scott county line. Just beyond the border of the county ground and still within an old double-decker two-story log house safely enclosed in a Simon's Inn. Tradition says that more than one man spent his last night on earth in this old inn.

Every effort was made to save the day of execution. The day was finally saved by the fact that he was forgotten by his friends enough to remember it. The day before, lightning struck, and a downpour of rain continued through the day.

Rumors were thick that Shack would be hanged by his friends after he should ascend the scaffold.

These rumors coupled with a curious desire to see the hanging brought thousands of people to Owenton.

Women, carrying infants in their arms, stood for hours in the rain. The highway leading to Graz was a mud road, and the sight of drenched and bedraggled women and children were a sight to make the heart sick.

CASON HAD A BIG SALE

Bidding Was Brisk and Fancy Prices Prevailed Although The Weather Was Bad

Notwithstanding the very ugly weather last Saturday afternoon a large crowd attended the sale of Carl Cason, who had a large stock of everything brought fancy prices. Two hogs that would weigh about 250 lbs. each brought \$70; milk cows brought \$18 and \$20; an eight year old mare brought \$100; in the end \$125 a bushel of corn was bid.

Other things sold accordingly. W. Sandford was the auctioneer.

Aged Sisters Die.

Bedford, Ky., Jan. 28.—Two sisters, each more than 80 years old, had lived together for more than 40 years and had been inseparable companions during that time. They were both dead today.

The two women were Mrs. Margaret McLean and Mrs. Margaret McLean, nee McLean. They were both of the same family.

Dat's How Hot Hell Is.

A colored brother was expounding the gospel to his flock and after vividly describing the pangs of the damned, concluded the service with the following: "Brethren, I have been asked how hot hell is, and I would say dat if you took all de wood in New York State, and all de coal in Pennsylvania and piled em all—in a heap, an' poured on dat all de oil in de world, and set dat on fire, and den took a man out of hell, he would freeze to death. Dat's how hot hell is.—Exchange

106 BUSHEL CORN

Grown By Bartholmew County, Ind., Man, Winner in Contest at Purdue.

Fred Suhre, of Bartholmew county, is the champion amateur corn grower of Indiana. Out of about 100 contestants in the various corn trials in Indiana, he has won at Purdue University Mr. Suhre was the only man in the state who raised an average of 100 bushels to the acre. Mr. Suhre's average yield for the five acres was 106 bushels to the acre. In addition to winning the honor of having the highest average yield in the state, he was awarded a gold medal by the Indiana Corn Growers' Association. Gold medals are given each year to farmers who average 100 bushels of corn to the acre, and this year Mr. Suhre was the only man in the State who received such a decoration.—Lawrenceburg Press.

AMERICAN LEGION DISBANDED.

Activity Ends Because Government Won't Recognize It.

(New York Tribune.) The American Legion, which was incorporated in March, 1915, to discover and organize the men capable of giving and willing to give specialized services to the Government in the event of war, has been disbanded.

John E. Hausman, Secretary of the organization, "because we have been unable to obtain governmental recognition. Don't ask me why we couldn't get it. I haven't the slightest idea. I have made countless trips to Washington for that purpose, and although army and navy men favored our plan, I could get no satisfaction from the Secretary of War."

With governmental recognition was the organization's work. It was trained in some particular work that would render it valuable for military service. Without it, however, the organization had no use. It is purely patriotic, and I can conceive of no reason why our work should be halted."

FOR WOMEN MOTORISTS.

A Good Driver Never Need Use The Emergency Brake.

Woman's Home Companion.

The good driver of a motor car never applies the brakes, swiftly except in an emergency. When drawing off at a street side, she shuts off ignition early and allows momentum to carry the car to the stopping place, using the service brake gradually. The good driver never uses the emergency brake, except in an emergency.

A good driver never uses the emergency brake, because she never avoids the emergency. She sees and avoids the emergency before it arrives. The poor driver rushes in to trouble and depends upon quick action in grabbing the emergency lever to save his skin.

One accident has followed a full attempt to find the seldom used emergency lever in a hurry.

The good driver rounds sharp corners to the right and sharp over extremely rapid changes of road or hits unexpected "bumps" or "mounds" with clutch disengaged to save the rear axle and drive shaft.

The good driver uses the wheel with the latest possible modern from under the foot and back so gradually that she feels no jolts or jolts of the fact in turning a sharp curve commences to be stretched the 30 ft. before it is half way around.

BOONE'S TOBACCO CROP

Will Be a Big Source of Revenue to The Farmers This Year,

As Well as To the Speculators and Warehouse Men.

The tobacco crop in Boone county will amount to about 3,000,000 lbs. It will bring on the loose leaf market about 18 cents per pound, \$540,000. Of this amount the growers will receive 12 cents per pound, \$360,000. The speculators will receive four cents per pound, or \$120,000. They will pay the loose leaf houses about 30 cents per 100 pounds, or \$180,000, leaving a balance of \$180,000 in the hands of the speculators. A good subject for the Knocker's Klub to handle.

KENTUCKY HAPPENINGS

Clipped From Our Exchanges From All Parts of The State.

Greensburg.—Drue Caven, an aged citizen, died at his home, three miles from Greensburg, of pneumonia, after an illness of a few days. Mr. Caven was a farmer and gardener, who, for his home use, had on his farm at least one species of every kind of vegetable and fruit tree which grows in this country. Mr. Caven leaves his wife, Mrs. Mary Caven, and a daughter, Miss Gary Caven, both of whom have been invalid for years; five sons, farmers of this county; one sister, Mrs. Reuben Sutton, of Bluff, Mo., and a brother, Milton Caven, of Summersville.

Georgetown.—Mr. and Mrs. Wm. Thomas, Jr., and little daughter, prominent social workers, escaped death. They were returning in their machine to their home and when crossing the Frankfort and Cincinnati railroad tracks at the edge of Georgetown, when a train turned the high trestle bridge over the tracks. Retaining his presence of mind, Mr. Thomas swerved the machine in the direction in which the train was going. The car was caught in the pivot and dragged for sixty feet. The engineer stopped the train and assisted the occupants from the badly damaged machine.

Hartsville.—C. F. Hickerson, of Mackville, had a narrow escape from death in the high waters of grapevine creek. He was on his way to Duganville and after crossing the bridge over the creek, he found the water on the other side too high to permit him to proceed. He was tempted to turn around. The water was over an embankment where the water was ten feet high, but swam to a big sycamore tree and Hickerson caught a limb with one hand while he cut the horse loose with the other. He was able to swim the young man who was with him to the shore. He was rescued after an afternoon of being in the water. Hickerson, who lives a quarter of a mile away, heard his shouts and improvised a skiff, paddled thru the surging waters and brought him to safety.

Frankfort.—Candidates for county offices, particularly that of Sheriff, are getting ready to admit, not to say promise, to their constituents that they will pay good news to those who vote for them. They can do this without violating the provisions of the Corrupt Practices Act. Many candidates for Sheriff have been inquiring of Attorney General Logan whether or not they can do this. A prospective deputy runs along with legal Gen. Logan as the referee, and he has come to the conclusion that it is all right. The law is not violated by the appointment of a deputy, but the law is violated by the appointment of a deputy who is not a resident of the county.

The personality of the deputy is not a consideration. The law is not violated by the appointment of a deputy who is not a resident of the county.

Somebody May Be from Missouri According to the report of Sheriff Cooper, the county was raided during the year 1915, 200 persons were taken into custody. The Sheriff's report includes the School Fund and Road and Bridge Fund.

One of our boys is that when a man is sick, he is very weak and his body is a great deal weaker than when he is healthy.

WALTON.

Prof. C. Spencer Chambers of Covington, was a visitor here last Friday.

Walter T. Renaker of Verona, spent Saturday here with his many friends.

Geo. B. Powers has been on the sick list the past couple of days with a severe cold.

David Haley, of Covington, Deputy State Game Warden, spent part of last week here with friends.

Mrs. Fannie Adams of Covington, spent part of the week here with her brothers G. M. and Jas. B. Allen.

Harry Dahling of Oregon, O., spent part of the past week here the guest of Mr. and Mrs. George W. Ransler.

Mr. and Mrs. W. T. Loomis of Independence, spent Sunday here with their daughter Mrs. Jno. L. Vest and family.

Miss Mary Vallandigham of Owenton, spent the week here the guest of Misses L. A. and Kariam Brookings Tompkins.

E. K. Stephens who has been confined to his home the past two weeks was able to be out at his place of business this week.

Richard Waterfield and Miss Camille of Fort Wayne, Ind., were the guests of Judge and Mrs. J. G. Tomlin last Sunday.

Jas. K. Jones who has been seriously ill with heart affection is some better. Dr. O. Dixon of Richmond is caring for him as nurse.

Misses Anna and Agnes Hickey and Miss Jessie Hickey of Covington, were guests at the Hotel Phoenix last Saturday and Sunday.

Daniel W. Bedinger who is a fireman on the Big Four running between Cincinnati and Indiana points, spent part of the past week here with home folks.

Dr. and Mrs. J. Elmer Conoley and two children and Mr. and Mrs. Harry Beets of Latonia, were the guests of Mr. and Mrs. Raymond Renaker last Sunday.

Rev. T. C. Crume of Latonia, spent on Tuesday with members of the Baptist church for whom he held a very satisfactory protracted meeting last year.

Dr. C. C. Metcalfe who is spending the winter at St. Petersburg, Florida, writes that he has greatly improved under the influence of the sunshine and balmy weather.

W. S. Wayland bought the farm of his late brother Richard Wayland at the public sale near Sherman, Grant county, last Wednesday, paying \$12 per acre for 111 acres.

Dr. W. W. Evans who recently returned from Cincinnati where he had been taking treatment has greatly improved, and expects to go to California in a couple of weeks.

Mrs. Mary J. Nelson bought the cottage and ground of John Berry on Church street last week for \$325 and has taken possession. Mr. Berry intends moving to Covington.

Mr. and Mrs. W. H. Young of Kenton county, spent last Monday here visiting his sister Mrs. L. P. Vallandigham who has been quite ill in Cincinnati and had just returned home.

Henry N. Rouse, venerable brother of our esteemed citizen W. R. Rouse, died at his home at Butler, Pendleton county, Jan. 22, in his 80th year, leaving a wife and four children.

Dr. J. P. Daugherty spent part of the week at Portland, Pendleton county attending some of his former patients who feel that he can minister to their wants better than any other physician.

The Walton Social Club entertained last Friday night with a dance at the opera house, in which quite a number from a distance participated and a most enjoyable evening was spent by all.

Mrs. L. P. Vallandigham who has been in a Cincinnati hospital for several weeks undergoing treatment for gall stones, was able to return home the first of the week and is now on the road to recovery.

Roy D. Stamler spent from Saturday until Monday at Falmouth on business in connection with the moving picture show "The Duncan" at Falmouth, having an offer to dispose of the business to local parties.

W. C. Jones of Knoxville, Tenn., representing the Inter-State Commerce Commission of Washington, D. C., was here last week obtaining information as to real estate values along the line of the L. & N. Railroad for the purpose of enabling the commission to formulate values of that particular railroad.

John R. Feagan of Brookville, Bracken county, bought the Orin Percival farm from the heirs last week. The farm covers 51 acres and is situated in Kenton county, near Walton, and the consideration is \$70 per acre, a total of \$3,570, in addition to a \$2,000 cash payment to the heirs.

Rev. Olin Hamilton spent the week at Louisville attending the bedside of the wife who recently underwent a surgical operation and she is now improving to such a degree that it is believed she will be able to return home here next week.

Henry Berkeley of Dry Ridge, spent Saturday here in company with his brother-in-law Dr. Hamrick of near Richmond, and discussed a nice lot of tobacco on the loose leaf market. Mr. Berkeley deals extensively in this line and the public find him a very satisfactory man to do business with.

WANTED—Sub-agent in each precinct in Boone county for **BUICK AUTOMOBILES**. An attractive proposition for reliable party in each of these localities, who intends buying a machine and who will devote a little time to the line.

Don't Wait. Write to Day.

ROBT. W. JONES, General Agent for Boone County, WALTON, KY.

MEN LOST

In European War Equals One-Fourth The Population of The United States.

Washington, D. C.—Latest estimates of losses during the war in Europe show 22,500,000 men killed, wounded or taken prisoners on both sides. That is a population nearly one-fourth that of the United States and one-half that of France.

The central powers are said to have lost more than 4,000,000, while Russia has been the heaviest loser on the allied side.

The central powers have shown a lower financial outlay as well as less loss in naval and merchant ships.

Germany has lost nearly all her African colonies, covering more than 1,000,000 square miles and has taken about 100,000 square miles in Europe, 15,000 of which are in Russia.

Personal Mention

Miss Sallie Rogers spent Sunday with friends at Walton.

The little daughter of Prof. and Mrs. Muntz has been quite ill for several days.

Mrs. R. S. Crisler visited her daughter, Mrs. Eugene Long, at McVille, Sunday.

Stephen Gaines, of Petersburg precinct, was a business visitor to Burlington, Tuesday.

Mrs. H. W. Shearer, of Newport, is the guest of her parents, Mr. and Mrs. F. A. Hall.

A. B. Renaker, wife and little daughter, Mary Louise, visited relatives at Dry Ridge, last Sunday.

P. G. Cropper, of Louisville, was the guest of his mother and brother, Sheriff W. D. Cropper, last Monday.

Mr. and Mrs. Owen Smith entertained quite a number of relatives at their home on the Burlington and Bellevue pike, last Sunday.

Thos. Craddock and family, of Union neighborhood, spent Saturday night and Sunday with their father, Wm. Craddock and wife, out on the Petersburg pike.

Who'll Donate the Other Ten?

Two dollars donated by two men, has been received at this office for the Belgian Relief Fund. Any other person who desires to donate any money for that fund can send the same to the Recorder and so soon as \$12 have been received it will be forwarded to the Literary Digest, New York, which has received \$38,000 for the fund.

Milk Producers Will Meet.

Alonso Beemon requests the Recorder to announce that the milk producers of Boone county will hold a meeting in the court house in Burlington next Saturday afternoon at 2 o'clock. All who are interested are requested to attend.

Twenty-one common school pupils took the examination for graduation last Friday and Saturday. How many passed is not known as the papers have not been graded. It is known however that Miss Bernice Grant made 100 in arithmetic.

According to John Bentler, of Erlanger, the railroad is responsible for the coal shortage in this yard. He has had two car loads on tracks at Latonia for some time.

A very large load of tobacco grown in Grange Hall neighborhood passed thru Burlington early Wednesday morning enroute to Bellevue.

Chas. Moore, colored, who lives on Owen Smith's farm, killed a spreading adder, last Friday. It was very lively and full of fight.

The sun shown, the breeze was balmy, the birds sang glibly yesterday morning, creating a spring-like feeling in the industrious farmers.

Kedrah White Sweetnam, widow of the late T. L. Sweetnam, of Florence, died Jan. 28, Intermont of Florence yesterday at 2 p. m.

Sheriff Cropper's list of real estate sales advertised for last Monday have grown less in number but still only a few remain.

The weather the past few days is calculated to advance the fruit buds and place them in danger of cold weather later on.

The condition of the river ought to be away with the shortage of coal especially along the river.

A few such days as Tuesday and Wednesday, will make the grass begin to get green.

When Buying Seed

It is well to look to a house that puts quality above price. Did you ever stop to think that 25c on a bushel of seed amounts to only 6 to 10c per acre.

You surely can not afford to sow inferior seed for a difference of 6 to 10c per acre when the results may mean 6 to 10 dollars to you, to say nothing of having your farm infested with obnoxious weeds and filth.

High Purity & Germinating Test

is our constant aim, and judging from the way our old customers come back each year and many new ones that are so well pleased and we believe are succeeding.

We Give You Test on Every Tag

showing what is required by the New Kentucky Seed Law and if you write for samples we can give same on samples.

Our Prices Are Low

and a post card will prove it to you.

Just let us know what you are interested in and we can supply you. We have fine Alfalfa from the Northwest, Fancy Illinois, Indiana and Ohio Grown and Timothy and Clover, Ky. Blue Grass from Central Kentucky, Red Top from Illinois, Alsike from Wisconsin. In fact we buy our seed where it grows best and most vigorous. Let us quote YOU.

Don't Forget to order four pounds of

Golden Blend Coffee for \$1.00.

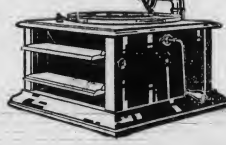

COVINGTON, KENTUCKY.

P. S.—If You Want a REAL Cream Separator Let Us Show You the DeLaval "NUF SED"

Columbia Grafonola

THE BEST PRODUCTIONS MADE.

YOU DON'T HAVE TO PAY ALL DOWN. JUST A FEW DOLLARS TO PROVE YOUR SINCERITY.

Northcutt Mercantile Company

WALTON, KENTUCKY.

A Splendid Showing.

A few days since the Recorder was shown by Thomas Rice an itemized statement of what he sold off of the farm handled by him in 1916. A strict and careful account was beyond the \$2,000 mark, showing that Mr. Rice had taken advantage of the high prices paid for farm produce by putting on the market drier and milder articles. It was a year calculated to encourage the young man.

Louis Phelps, of Taylorsport, was in Monday and ordered this printed for a sale on the 18th inst.

Owensboro, Jan. 28.—Announcement was made today that the building of 50 miles of roads and the resurfacing of 16 miles of roads at a cost of \$550,000. Of the remaining \$200,000 the state department estimates the use of about \$100,000 in the reconstruction of pikes running out of Owensboro. This will leave about \$100,000 for the extension of interest county seat roads in Daviess county.

The Martin Ladson Art Society of Petersburg, will have a pie sale Saturday, February 3d, at Mrs. Anna Stanley's.

HORSES PIGS and CATTLE

WINTER HOUSES FOR SHEEP

Especially Important That Feet and Fleece Be Kept Dry—Ventilation Must Be Ample.

Contrary to general opinion, sheep as well as any other class of farm animals require clean, dry shelter. It is especially important that the feet and fleeces be kept dry if their quarters are dry and clean the sheep will stand very cold weather without dis-

Sheep in Winter Quarters.

comfort or disease. There must be ample ventilation, for sheep if closely crowded sweat badly and quickly use up the oxygen in the air, but there must be no drafts, as sheep are very subject to colds.

In the ordinary climate the sheep barn may be constructed of one thickness of matched boards. It should be large enough to house the entire flock without crowding. Windows enough to permit lots of sunshine to enter, and clean, dry bedding underfoot are necessities. The lambing pens should be of warmer construction than the general shed.

RINGING HOGS IS EASY TASK

Rope Slipped Over Nose and Back of Large Teeth Will Prove Efficient With Large Animals.

(By R. B. RUSHING.)
I was called the other day to help a neighbor ring some hogs that were giving him some trouble rooting under his fence and getting into his stuff. He had some hogs that were rather heavy, and he considered that he had a great big job to hold them and ring them. He called me and another neighbor to help hold them for him. On arriving he had one tied by the foot (hind foot) and was going to down them and hold them, and then put the rings into their noses. I asked for another rope. I made a slip loop in it, and slipped the loop over the hog's nose back of the large teeth, and tightened the slip loop down on the nose.

When put on the hog will pull back with all its might, and when you go

Manner of Holding Hog.

to put in the ring he will pull the harder, which makes it an easy matter to put the ring in.
We just treated the hogs as described above, and one man can usually hold the largest hog, and it is much less trouble than to get them down and wallow around, and get hot and mad.

FIVE-CALK SHOE FOR HORSES

New Jersey Veterinarian Claims Extra Calks Add 100 Per Cent to Working Value of Animal.

A New Jersey veterinarian, in a recent article in the Journal of the American Veterinary Association, called attention to the five-calk shoe, a shoe with five calks instead of the customary three. The two extra calks are placed, one on the middle of each side of the shoe. It is claimed that these two extra calks prevent the undue side strain on the foot which so often causes lameness with the five-calk shoe. The New Jersey veterinarian making the suggestion, claims that this shoe adds 100 per cent to the working value of horses, and he closes his article with the following:
"If anyone gives just the rough shoe, having but three calks, one after another, to be used, or will anyone offer a shoe, subjecting to the use of two extra calks, the horse will be

The DAIRY

FEED ROOTS TO DAIRY COWS

Where Silage Is Not Available Farmer Is Warranted in Using Them—Best Winter Ration.

(By R. S. HULSE, University of Illinois.)
There are two general conditions that seem to warrant the use of roots for dairy cows. One is where silage is not available for winter use, and the other is for special feeding. I have Holstein cows which have con-

Splendid Dairy Type.

sumed about 100 pounds of roots daily in addition to corn feed. For ordinary use in the winter ration 50 pounds daily would be about the amount to figure on.

In this section it costs considerably more to produce nutrients in the form of roots than in the form of corn silage, and feeding trials indicate that the dry matter in silage is fully as valuable for milk production.

GRAIN MIXTURE FOR CALVES

Experience Teaches That Two Parts of Corn and One Part of Oats Is Satisfactory.

Calves are usually fed whole milk for two or three weeks, then gradually changed to skim milk. About the time of changing, begin to feed a little grain, but do not think that it is necessary to use all meal or any other high-priced feed, high in protein, or fat, or both. Experience shows that a mixture of two parts of corn and one part of oats, by weight, gives as good results as oil meal and ready-mixed calf meals often purchased at much higher prices. Bran is not especially good for the young calf because it is too laxative.

The grain mixture should be fed immediately after the milk, and neither should be fed too liberally or scantily may result.

SAVES MUCH OF COW'S FEED

Pail Fastened Around Animal's Neck by Means of Strap Prevents Slobbering or Scattering.

In feeding a cow from a pail more or less is lost. By fastening the pail to the cow, so the order that a nose-bag is put onto horses, she cannot get her head from the pail—it can-

Pail Saves Much Feed.

not be upset, nor can the feed be scattered or slobbered. Here a hole in each side of the pail and fasten the halter in such a way as to prevent accident.

WATER OF BIG IMPORTANCE

Cows Must Have Access to It in Winter So They Can Drink All That They May Desire.

Water is fully as important to the dairy cow as feed during the winter. They must have access to it so that they can drink all they want, whether they have it in kalamazoo water basins, or in the yard tanks. Cows giving milk need great quantities of water. Careful experiments have proved that it requires more than five pounds of water for each pound of milk produced by the cow.

Notice to Road Contractors.

Office of the Fiscal Court of Boone County.
Notice is hereby given that the Fiscal Court of Boone County will be received up to 10 o'clock a. m., February 20, 1917, when they will be publicly opened and read, for the construction and improvement of the following county roads:

The Burlington and Petersburg Road, 2.00 miles. The work proposed to be done involves approximately 838 cubic yards gravel, 4300 cubic yards napped stone, 56 cubic yards 1-2-4 concrete for bridge abutments. Bids may be submitted in sections of one mile.

Burlington and Bellevue Road, 1.57 miles. The work proposed to be done involves approximately 3190 cubic yards crushed or napped stone, 120 cubic yards gravel, 125 cubic yards earth excavation. Bids may be submitted in sections of one mile.

Walton and Verona Road, 4.68 miles. 300 cubic yards crushed or napped stone, 125 cubic yards earth excavation. Bids may be submitted in sections of one mile.

The Petersburg and Bellevue River Road, 2.50 miles. The work proposed to be done involves approximately 2880 cubic yards gravel, 100 cubic yards earth excavation, 1200 cubic yards shaping road bed and ditching, 115 cubic yards 1-2-4 concrete for bridges.

Reinforcing steel, 200 feet 12-inch corrugated culvert pipe, 50 feet 15-inch corrugated culvert pipe. Bids may be submitted in sections of one mile.

The Frogtown Road, 2.76 miles. The work proposed to be done involves approximately 3011 cubic yards crushed stone, measured loose, 4141 cubic yards earth excavation, 200 lineal feet 12-inch corrugated culvert pipe, 60 lineal feet 15-inch corrugated culvert pipe.

10 lineal feet 18-inch corrugated culvert pipe, 40 lineal feet 1-2-4 inch corrugated culvert pipe, 1481 feet clear span steel 1 beam bridge, 24 feet clear span steel 1 beam bridge, 1481 feet clear span steel 1 beam bridge.

2800 pounds bridge steel, 200 F. B. M. flooring, 100 cubic yards stone masonry. Bids may be submitted in sections of one mile.

Halfway Road from Gunpowder Creek to Waterloo and Rabbit Hash Pike, 3.72 miles. The work proposed to be done involves approximately 3528 cubic yards earth excavation to widen roadbed, 2013 cubic yards napped stone, 193 cubic yards stone culvert masonry, 2002 square yards shaping roadbed and ditching. Bids may be made in sections of one mile.

Anderson's Ferry Pike to Price Pike, 2.41 miles. The work proposed to be done involves approximately 2913 cubic yards crushed stone, 1450 cubic yards borrow to make fills, 305 cubic yards earth excavation to widen road bed, 18312 clear span steel 1 beam bridge, 1481 clear span steel 1 beam bridge, 1527 clear span steel 1 beam bridge, 1527 clear span steel 1 beam bridge, 1527 clear span steel 1 beam bridge, 1527 clear span steel 1 beam bridge.

170 pounds bridge steel, 170 cubic yards stone masonry, 200 F. B. M. flooring, 64 lineal feet 12-inch corrugated culvert pipe, 64 lineal feet 18-inch corrugated culvert pipe, 41 lineal feet 24-inch corrugated culvert pipe. Bids may be submitted in sections of one mile.

Bullittsville and Francesville Road from George McGlasson's gate to Francesville and Hebron Road, 0.26 miles. The work proposed to be done involves approximately 2008 cubic yards earth excavation, 750 cubic yards crushed stone, 19321 clear span steel 1 beam bridge, 5000 lb. bridge steel, 46 cu. yds. stone masonry, 1500 F. B. M. flooring, 70 cu. yds. stone culvert masonry, 56 lin. ft. 12 inch corrugated culvert pipe, 48 lin. ft. 18 inch corrugated culvert pipe.

Joe Fisher road from Verona and South Fork pike to Gallatin county line, 2.24 miles. The work proposed to be done involves approximately: 5008 cu. yds. earth excavation, 1914 cu. yds. napped stone, 114 cu. yds. stone culvert masonry, 18321 clear span steel 1 beam bridge, 2300 lbs. bridge steel, 36 cu. yds. stone masonry, 1500 F. B. M. flooring, 70 cu. yds. stone culvert masonry, 56 lin. ft. 12 inch corrugated culvert pipe, 48 lin. ft. 18 inch corrugated culvert pipe.

Ryle and South Fork Road from Gallatin county line to Beaver and South Fork pike, a distance of 1.97 miles. The work proposed to be done involves approximately: 1028 cu. yds. earth excavation, 492 cu. yds. napped stone, 18321 clear span steel 1 beam bridge, 2300 lbs. bridge steel, 36 cu. yds. stone masonry, 1500 F. B. M. flooring, 70 cu. yds. stone culvert masonry, 56 lin. ft. 12 inch corrugated culvert pipe, 48 lin. ft. 18 inch corrugated culvert pipe.

Bids must be for work done in accordance with approved plans and specifications approved by the Fiscal Court and the County Road Engineer, on file at the County Clerk's Office in Burlington, Mo. County.

The Fiscal Court of Boone County expressly reserves the right to reject any or all bids.

Each bid must be accompanied by cash or certified check for 5 per cent of the bid, which will be held until the execution of the contract.

Sealed bids must be submitted in accordance with the following: Bids will be received up to 10 o'clock a. m., February 20, 1917, when they will be publicly opened and read, for the construction and improvement of the following county roads:

The Burlington and Petersburg Road, 2.00 miles. The work proposed to be done involves approximately 838 cubic yards gravel, 4300 cubic yards napped stone, 56 cubic yards 1-2-4 concrete for bridge abutments. Bids may be submitted in sections of one mile.

Burlington and Bellevue Road, 1.57 miles. The work proposed to be done involves approximately 3190 cubic yards crushed or napped stone, 120 cubic yards gravel, 125 cubic yards earth excavation. Bids may be submitted in sections of one mile.

Walton and Verona Road, 4.68 miles. 300 cubic yards crushed or napped stone, 125 cubic yards earth excavation. Bids may be submitted in sections of one mile.

The Petersburg and Bellevue River Road, 2.50 miles. The work proposed to be done involves approximately 2880 cubic yards gravel, 100 cubic yards earth excavation, 1200 cubic yards shaping road bed and ditching, 115 cubic yards 1-2-4 concrete for bridges.

required to furnish a bond equal to the amount of the proposal for the faithful performance of the work in accordance with aforesaid plans and specifications.
All work to be done under the direction and supervision of the County Road Engineer.
By order of the Fiscal Court of Boone County.
W. R. ROGERS,
County Clerk of Boone County.

"Cured"

Mrs. Jay McGee, of Stephenville, Texas, writes: "For nine (9) years, I suffered with womanly trouble. I had terrible headaches, and pains in my back, etc. It seemed as if I would die, I suffered so. At last, I decided to try Cardui, the woman's tonic, and it helped me right away. The full treatment not only helped me, but it cured me."

TAKE

Cardui

The Woman's Tonic

Cardui helps women in time of greatest need, because it contains ingredients which act specifically, yet gently, on the weakened womanly organs. So, if you feel discouraged, blue, out-of-sorts, unable to do your household work, on account of your condition, stop worrying and give Cardui a trial. It has helped thousands of women—why not you? Try Cardui. E-71

Bethlehem's Bid on Shells for the United States Navy

To the American People:
The Secretary of the Navy has awarded contracts amounting to over \$3,000,000 to a British bidder for 14 and 16-inch projectiles for the Navy because of very much lower prices offered by the English bidders.

We know nothing of the basis upon which the British bids were made, but the public is entitled to know the facts upon which we ourselves bid for this work.

Two years ago we took contracts to make 4,200 14-inch shells at a price of \$1,515,000. Up to now not a single shell has been accepted by the Government, although we have expended, in wages, materials, etc., on these orders \$522,881, and we have not received a SINGLE DOLLAR on these contracts.

In addition, a literal interpretation of the contract made us liable for penalties amounting to \$678,016.

In the light of our experience, and having no other basis, we bid for 16-inch shells approximately the same rate per pound as that which the Navy Department actually awarded a 14-inch shell contract one year ago.

Local Happenings.

Bad colds and coughs are quite numerous among our citizens.

The Busy Bees held a delightful session at Mrs. A. Croner's one day the past week.

The hens got busy last week and reduced the price of eggs from 50 to 36 cents per dozen.

Judge Gaines will hold his next term of court at Williamson, beginning next Monday.

The many friends of J. C. Revill will be glad to know that he is getting through the winter nicely.

With hogs selling at 12 cents per pound, on foot some will have to eat greens next spring without jowl.

Owing to the high cost of living, visiting and entertaining will have to be cut out—especially at meal time.

Carl Cason was at this office Monday and expressed himself as delighted with the sale he had last Saturday afternoon.

The first examination of this year for Common School Graduation was held at the court house last Friday and Saturday.

Twenty-one years ago today the headless body of Pearl Bryan was discovered in a field near Ft. Thomas, Campbell county.

It seems that you can buy no more with one of those new half dollars or quarters than you can with one of the old ones.

It will be about as hard for a speculator to buy a crop of tobacco next year as it would be for an auto to run without gasoline.

High prices seems to be having its effect on the prospective candidates for county offices—the shorter the campaign the less it takes.

For Sale—Black horse 12 years old, No. 1 worker, good single line, perfectly safe for women and children to drive. Fred Morris, Burlington, Ky.

Clover Leaf Creamery was a very popular resort with a large number of milk producers during the strike that ended last Saturday in a victory for the dairymen.

Six public sales of personal property advertised in this issue of the Recorder. The farmers can attend salesy way of diversion while they can not engage in farm work.

There was a mistake in the date of the sale advertisement of C. S. and Walter York as it appeared last week. The correct date is Saturday, February 12th, as appears this week.

Indications are that there will be several bids for the reconstruction work to be done on the Covington and Lexington turnpike in this county. It will be a water bound road, the metal to be fourteen feet wide.

Cyrus Calvert, who died in Cincinnati, one day last week, was a native of Burlington, a son of Willis Calvert, and a half-brother of the late James W. Calvert, who practiced law many years ago in Burlington.

According to the indictments returned by a federal grand jury in Cincinnati, last week, it appears that the prevailing price for votes was one dollar each at the election held last November. Several of the city officials were indicted for paying votes.

Corn sold for the highest price ever known in this section last Wednesday at the sale of Mrs. R. Wayland, of near Sherman, the price paid being as high as \$2.75 a barrel. This was the first time without interest. So far as can be learned this is the highest price ever paid for the cereal here.—Grant County News.

Frank Walton and Sherman Burham are preparing to put in operation a large dairy on the farm in Bellevue precinct owned and occupied by the former's father, John J. Walton, at the time of his death. The farm is splendid grass land and very productive of any and all kind of crops, and with those two hustling young men behind the enterprise there is no doubt of its success.

Very little fall plowing was done in this county last fall and farmers will get busy at that work as soon as conditions are favorable. It may be that the high prices for tobacco this year have revealed this winter will stimulate a desire on the part of the growers for an increased acreage this year, causing large acreage preparation for crops this year. Get busy, as soon as you can with the plow.

The farmer who put away his plow in good time last year was through with them last year and will find himself much better prepared to begin his spring work of breaking and preparing his land than with his neighbor who houses his farm implements in the house corners from year to year, but it can be said to the credit of Boone county farmers that they take better care of their implements than many of their predecessors did.

State News.

A rare sight was witnessed in Paris yesterday, when three steels of tobacco, probably containing around 200 lbs., of tobacco each, were delivered to the Bourbon Tobacco Warehouse, on South Main street. The tobacco was hauled from the Bunker Hill neighborhood, way back near the Montgomery-co. line.—Paris Kentuckian-Citizen.

C. D. Mathe-ws, one of Logan county's good farmers and venerable Confederate veterans, and "pig," as he called them, on the Auburn market last Monday morning, which brought him the nice sum of \$15.00. Let the good work go on, and may every body vie with each other to see who can raise the most hogs and get the best prices for them.—Auburn Standard.

F. L. Arnold, of near Goforth, delivered his crop of tobacco, consisting of 3,755 lbs., to Ridgeway, and Day Friday last. He sold the crop in the barn at \$20 per hundred. This tobacco is of the pepper variety, and was raised on two acres of land near his barn. Mr. Arnold had about 75 heads of stable manure on the ground and he considers \$75 pretty good return on two acres. He states that this is the highest price he ever received for the weed. He raised ten acres of tobacco two years ago that did not bring him as much as the tobacco raised on two acres this year. He also states that this crop was the easiest one that he ever cultivated in his life. The "sweet" was hardly broken on him in its cultivation. This crop was set about 11 inches apart and was cut the latter part of August.

Mr. Arnold has no secret in raising this kind of tobacco, but the main thing is the land, which is the most essential thing. He says that sweet clover and alfalfa will do the work that puts "cracks" in your pockets.

Mr. Arnold has one of the nicest country homes on the pike—between here and Williamson, and he and his good family are among our cleverest citizens.—Falmouth Outlook.

Helen G. Crisler, Friends of Helen G. Crisler, 15, were greatly shocked to hear of her sudden death at her home in Brooklyn, on the night of Friday, Dec. 28, during the Christmas holidays. Miss Crisler had not been well since her last year in college, in consequence of excessive strain and overstudy. After graduation she had been constantly employed in and around New York and at the time of her death was a teacher in the Newark N. J. Seminary.

Miss Crisler has been well known to all Laureateans for several years. Her father, William Crisler, 47, was a nephew of Doctor A. G. Gaines former president of the University. She herself was a charter member of the Gaines Literary Society, a member of Kappa Kappa Gamma and of various other college societies. She was a native of Erasmus Hall High School in Brooklyn, whose principal, Doctor Walter B. Gunnison, 75, died just 10 days before his pupil, Miss Crisler, was to have been married in June to William R. Gans, also of the class of 1915.

Helen Crisler was a girl of unusual beauty of person and sweetness of spirit. She was, always, despite uncertain health, full of the joy of life—always was or the leading spirit of her group.

Ambitious, eager, remarkably efficient, she took part in many activities, and no one ever served the Hill News more faithfully as a correspondent and a writer of special articles. She also wrote for the Brooklyn Eagle and other New York papers, writing an ever ready and skillful pen. As a student she took high rank, graduating with honors in English, and was especially excellent in Greek—a study which she loved. Never, perhaps, did she appear to greater advantage than when in 1912, she played the part of Helena in the open-air presentation of Midsummer Night's Dream. None who saw her on that occasion can ever forget her beautiful beauty and her charm. Her untimely death is deplored by a multitude of friends.—The Hill News, Canton, N. Y.

Tobacco Crop Short.

The Burley tobacco crop this year will fall short of the estimate. E. T. Roberts, of Henderson, who is being backed for tobacco commission with headquarters at Louisville, surmised yesterday. Instead of a bumper crop of 25,000,000 to 300,000,000 lbs., he says the crop will be nearer 225,000,000 pounds or less.

Since the annual consumption demand for Burley tobacco is about 300,000,000, this year's crop will fall to supply the demand. Mr. Roberts said, "The result is that buyers are running over one another in the hotheaded market to supply their needs," he declared.

The finish will see some class prices," he said. Prices on low grades are only those of last year and the tendency is for higher prices to climb.

HARD TO FIT.

A 300 pound man stood gazing longly at the nice things displayed in a hardware store for a marked down sale. A friend stopped to inquire if he was thinking of buying shirts or ties. The man said, "I'm thinking of buying a hat. The only thing that fits me ready made is a handkerchief."

DAIRY FACTS

KICKING COW EASILY CURED

Three Different Methods Suggested for Treatment of Unruly Animal by Kansas Expert.

(By LESLIE ROSS, Kansas Experiment Station.)

Care and patience will do much to cure the kicking cow. The kicking cow is easily cured by the proper methods. To cure the offending animal take a rope with a loop in one end of it or a trunk strap and pass it around the body of the cow. Draw it tight. The cow usually will jump a little at first, but when she finds she cannot get out of the rope she will stand—and cannot kick.

This method once in a while causes the cow to give bloody milk. If this happens place the rope or strap behind the udder and draw it up in the same manner. With some cows this cannot be done because of the shape of the udder. Another method is to hobble the cow by passing the rope around each leg behind the udder, and tying just above the hocks. This is, however, rather dangerous for the man tying the rope. After the preventive measure has been repeated a few times the cow will stand readily to be milked.

WARTS MAY BE TROUBLESOME

They May Be Entirely Removed by Smearing Them Thickly With Undiluted Olive Oil.

Warts on the teats are often troublesome in milking, besides adding to the danger of increasing the possibility of contaminating the milk through infectious material which may be found on them. They may be greatly benefited or entirely removed by smearing them thickly with pure olive oil.

If they are large, and still persist despite this treatment, they may be cut off with a sharp pair of scissors, and the spot touched with a stick of caustic potash.

They may be oiled now, and the caustic potash treatment repeated as often as necessary to prevent their renewed growth.

HOLSTEIN BREED IS FAVORED

They Are Best Able to Rough It Where Roughage Is Plenty and Grain Feeds Are Scarce.

Every dairy breed of cows has certain advantages and for this reason no "best breed" can be named because conditions vary even in the same state. But for a region where roughness is

High Producing Holstein.

plenty and where grain feeds are liable to be scarce Holsteins are preferred because they are best able of all the dairy breeds to "rough it."

In localities where hay is costly and fodder scarce the smaller dairy breeds would be preferable to the Holstein.

DAIRY NOTES

Poor cows are never clean.

No dairy was ever too clean.

The cows should have a chance to go to shelter now when they naturally seek it.

A thorough chilling now will disqualify a herd for profit during the whole winter.

The breeding bull always represents half the value of the breeding power of the herd if it is desired to grow calves for the dairy.

Calves intended for the dairy should not be made fat, as you wish, and they should not be allowed to become stunted. They should be thrifty and growing all the time.

A good price for a superior bull is money well invested. The difference between the price of a strictly high-class sire and an inferior one is made up in the first lot of calves.

It is hard to make some men realize the great influence of a good, pure-bred sire in a herd. The sire is more than half the herd. If he is right he will better thickets from his good better trees.

PRIDE IN COLTS AND HORSES

Farmer Can Well Afford to Feed and Care for Young Animals to Attract Buyers.

(By W. L. BLIZZARD, Department of Animal Husbandry, Oklahoma A. and M. College, Stillwater.)

Every farmer should have a pride in the colts and horses he raises. If the packer and breeder can afford to pay fancy prices for flashy geldings largely for advertising purposes, the farmer can well afford to feed and care for his young colts in such a way that they will be attractive to these buyers.

In fact, every farmer should be ambitious, not only to raise the best crops, but also to produce the best teams in the neighborhood, they will

Splendid Farm Team.

attract a great deal of attention. The farmer's son would certainly become deeply interested in a fine team of purebred mares and the colts they raise. It would stimulate him and encourage him to put forth his best efforts for their care and management. The boy who is proud of his stock on the farm and who may raise and develop a colt good enough to win at one of the local fairs is not nearly so likely to leave the farm.

FEED CATTLE FOR SHIPMENT

Pennsylvania Experiment Station Recommends Water Be Withheld Before Shipping.

In preparing cattle for shipment considerable attention should be given to feeding so as to lower the shrinkage as much as possible. The Pennsylvania State college agricultural experiment station recommends that water be withheld from animals before shipping and that they be fed timothy hay and whole oats to prevent bloatness during shipping. Under such treatment cattle will arrive at the market in a more attractive appearance and will take on a much heavier "fill."

REDUCE FERTILITY OF FARM

Raising of Grade Steers Is Easier Than Growing Grain—Less Care for the Farmer.

It is known that grain-raising reduces the fertility of the farm in a much greater degree than the raising of stock.

The raising of grade steers is easier work, and less care for the average farmer now that reliable farm labor is becoming so difficult to obtain.

HE IS PROGRESSIVE FARMER

Man Breeding Purebred Stock Is the One With Best Surroundings and Farm Buildings.

The man who has gone into the breeding of purebred live stock is the man with the best surroundings, the best buildings on his farm; he keeps his farm in the best condition—in fact it is something which tends to develop him.

USING ANTICHOLOERA SERUM

Vaccination of Hogs and Proper Care Will Prevent Disease—Chance For More Money.

Hog cholera is absolutely preventable. The use of the anticholera serum, vaccinating the hogs—and proper care with the work.

With this hoodoo removed there ought to be much more money in hogs than ever before.

1886

1916

Thirty Years In The Business.

There is not a farmer in this community who should not have a bank account. If you have bills to pay, whether they be large or small, your check will pay them and you always have the right change. It would be a pleasure to have your name on our books. You know how to farm to the best advantage. Farming is your business. We know how to handle money to the best advantage. Banking is our business. Come in and we will talk over farming and banking and perhaps it will prove to our mutual benefit. The best chairs in our bank is not too good for any honest tiller of the soil.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

PETERSBURG.

The river is receding.
Col. G. C. Grady is visiting in Erlanger.
O. S. Watts was very ill of grippe last week.
The new Baptist church building is under roof.
Quite a number here are afflicted with grippe.
Grandmother Helm, widow of Andy Helms, is very ill.
Miss Ethel Rector is visiting her sister Mrs. Frank Perkins in Aurora.
William Duke, of Aurora, was mauling with friends here Saturday.
E. L. Grant and H. E. Arnold and wife were business callers here Saturday.
Owen Allen and Robert Nixon attended the Jackson horse sale Lawrenceburg, Saturday.
Miss Louella Bailey, of Richmond, Ind., is here visiting her aunt, Mrs. Sadie Hurd.
Miss Cordie Early and Mae Whiting were guests of Theresa McWeathy, Friday evening.
J. M. Botts and son finished recasting the school house with new benches Saturday.
John Geisler, who got his collar bone broken a couple of weeks ago, is getting along nicely.
Hoodie Allen, of Hebron, was down last Saturday collecting cream for the city creamery.
Earl Walton and Kenneth Rector attended the telephone meeting at Waterloo last Thursday.
J. M. Botts has completed an up-to-date shop on his lot, and is ready to do all kinds of carpenter's work.
Perry Rector, who is feeding cattle at the Lawrenceburg distillery, spent last Saturday with home folks.
C. K. Witham has sold between 50 and 100 tons of hay since the first of the year at twelve dollars per ton.
Egbert Nichols, of Latonia, was here last Saturday and made a final settlement and distribution of his father's estate.
Hubert Walton and wife received their furniture from the city, last week, and will soon be settling in their own chimney corner.
Perry Bruce has rented New Scott's farm on the Burlington and Bellevue pike near the Commissary. He and his family will move to it in a few days.
Eugene Berkshire, of Bowling Green, is here receiving the stock of dry goods and groceries he and J. B. Berkshire purchased of the heirs of the late J. W. Berkshire.
Miss Agnes Thompson has been ill the past week with grippe.
Mr. and Mrs. Dudley Blyth and family spent Sunday at J. M. Botts.
Raymond Witham and sister Miss Evelyn, and Miss Kitty Kelly were Sunday guests of Miss Ormal Klopff.
Dr. Clifford Terrill, of San Francisco, spent Sunday with his aunt, Mrs. B. H. Berkshire, and family, enroute to New York.
"The Land on the Heart's Desire" will be presented at Kratz Hall, Petersburg, Feb. 10 (Saturday). It is a classical drama built upon the superstition of the Irish folk and is full of beauty and weirdness. Supplementing this is "Sue's Bean to Dinner" and other interesting numbers. The proceeds of this entertainment are to supplement the building fund of the Christian church. All who are interested and wish to see the play should call on the secretary, Mr. J. B. Berkshire, at his residence, 1015 E. 1st St., Petersburg, Ky.
The Epworth League and its guests spent a very pleasant evening at the home of its president, Miss Ruth Snyder, Friday night. There were several interesting contests, and games were played. The young people especially enjoyed the music. Miss Sadie Hurd rendered a very pretty solo and during the evening selections were played on the Victrola. Everyone enjoyed the evening very much, thanks to Mrs. Mae Wining the Supt. of the recreation department of the League.

GUNPOWDER.

Geo. Smith was hauling coal and feed from Erlanger last week.
There was rather a small congregation at Hopeful last Sunday.
E. L. Rouse went to Covington on business on Wednesday of last week.
Wilford Mitchell subbed for J. P. Tanner on his mail route last Saturday.
The mud roads are in a bad condition and if the drag was applied it would be of great advantage.
Geo. Bradford and Bert Cloré killed their hogs last week and that line of work is now completed in this neck of the woods.
L. L. Tanner and sons, Lloyd and Fitzhugh hauled their crop of tobacco to Walton last week and delivered it to the loose leaf market at that place.
Messdames Mary Zimmerman, R. E. Tanner, Lizzie Bartlett and Mr. Noah Zimmerman and family and Mrs. Lella Allen were guests of this writer and wife on Friday of last week.
J. H. Tanner and daughter, who were called to Camden, Ohio, on account of the illness of Mrs. Quick, returned the first of last week and report her condition as somewhat improved.

FRANCESVILLE.

Frank Estes spent Sunday with Raymond Goodridge.
Miss Sadie Kiehn was shopping in Cincinnati Saturday.

HEBRON.

Mr. and Mrs. James Kelly, who reside below Burlington, spent Tuesday at Mrs. Aylor's.
The Ladies' Missionary Society will meet with Mrs. Etta Cragler, Tuesday afternoon, Feb. 4th.
The many friends of Mrs. Harvey Tanner were sorry to hear of her death last Saturday afternoon. She was the daughter of the late Washington Craven and Mrs. Mary Craven her husband, mother, on brother, George, and three sisters, Mrs. Mike Dyer, of Louisville, Mrs. Edward Aylor, of Cincinnati, and Mrs. W. A. Bullock and two daughters, Misses Maud and Marion. She was a member of the Burlington Baptist church and was well liked by all who knew her. The funeral services were held at the home of Mrs. Aylor, at 4 o'clock at Hebron church. Sympathy goes out from all to the grief-stricken family.

Saturday warm enough for a spring day, rained that night. Sunday was a bright, pleasant day; rained that night. Monday (last) cloudy, clear. The snow melted, but for Monday night failed to arrive. Tuesday cloudy and somewhat cooler.

GRANGE HALL.

Mrs. E. C. Presser, who has been very ill is much improved.
Chas. Smith has rented from P. P. Neal for the coming year.
Mrs. Bert Cloré visited her parents at this place last Friday.
Mrs. Joseph Green and son spent last Sunday at S. H. Marshall's.

HANDY OFFICE FOR FARMER

Room in Farm Home Should Be Considered Necessity Rather Than Luxury—Ideal Make Up.

If you are planning to build a farm home, make it complete by including in your plans space for an office. Such a room in the farm home should be considered more as a necessity than as a luxury.

The business farmer should have a place in which to look over and take care of his mail, file his business documents, to keep his agricultural papers and books, and to receive his business callers. Every farm home is supplied with a room in which to receive social guests; why not one for business guests?

The farm office should have an outside entrance, plenty of light, and an inside entrance. By all means, it should be cheerful and never allowed to take on a serious appearance from an overdone or furniture, pictures, or plants. The ideal farm office is furnished with a certain degree of a filing case rather than a toll-top desk and pigeon holes. The tendency to stick things away is thus, to a certain degree, overcome. It also contains a sectional bookcase, strong, comfortable chairs, a typewriter and place for hanging coats and hats.

Men bent on business deal will reach an agreement easier and more quickly in a private place where interruptions are not necessary, where references and papers are at one's elbow, and where a business atmosphere pervades the surroundings.

More Proof of

European Poverty.

The strained economic condition in which all Europe finds itself is reflected in the order by the French Government, effective February 15, restricting meals in restaurants and public eating places. France followed in the footsteps of Germany, Great Britain and Italy, all of which long ago interdicted extravagance of any kind in the use and consumption of food products.

Drastic as are the requirements of the order, it is reported that the restriction has been taken in good part by dealers and the public, all alike exhibiting a patriotic attitude toward stern national necessity. No resentment has been shown by proprietors of cafes and eating places against that portion of the order requiring them to submit bills of fare for luncheon and dinner at 12 and 5 p. m., respectively, to the police authorities, and the public has mildly acquiesced in the measure that a meal shall consist of four small courses. An idea of the scope of the restriction is gained when it is known that instead of 60 or 70 items on a bill of fare the number is now limited to a maximum of nine.

Food shortage in Europe already dire and menacing to prolongation of the war, will increase with the onset of a peace will not quickly terminate the condition. The peasantry of Europe has been swamped up in the maw of war, and large, fertile sections have been so ravaged by the contending hostile forces that it will take years to restore them to productivity. What the women and war prisoners are able to produce from the soil is totally inadequate to the needs of any of the nations involved in the struggle, as shown by the rigid orders in each for the conservation of food supplies.

Suppose for a moment that this country were to institute a firm embargo on shipment of foodstuffs to Europe, or imagine that a ruthless undersea warfare were to be inaugurated against all shipping—a warfare that would really be effective against commerce—and you can form a picture of the destitution and famine that would certainly follow in Europe.

There will be peace in Europe before many months. It will probably not be a peace based upon compelled victory, but a peace compelled by attrition of men, money, munitions, and, above all else, food.—Enquirer.

An Educated Girl.

(From Good Citizenship.)
A girl's education is incomplete unless she has learned—

To sew.
To cook.
To mend.
To be gentle.
To dress neatly.
To keep a secret.
To avoid idleness.
To be self-reliant.
To darn stockings.
To respect old age.
To make good bread.
To keep a home tidy.
To make home happy.
To control her temper.
To be above gossiping.
To take care of the sick.
To take care of the baby.
To sweep down the cobwebs.
To take plenty of active exercise.
To be a woman, a woman under all circumstances.

Some of the farmers in this county are getting upon the annual lamb campaign.

Ground Hog day comes on Friday this year. What are you going to do about it?

Born, on the 21st ult., at McMillan, Ohio, a son—Robert Stanton.

At the month of the new year is in and out.

Unbroken Prosperity in Sight.

(Cincinnati Enquirer.)

Notwithstanding a lessening in orders from Europe for munitions of war, the bank clearings of the larger cities of the U. S. show that there has been no diminution in the volume of business that is being done. It demonstrates that we are doing a great domestic business, and that there is no reason to fear a serious depression at the conclusion of the war.

The report made by the American Industrial Commission of its survey of industrial and business conditions in France contains great encouragement for American manufacturers and exporters. While the detailed findings of the commission have not been made public, enough has been disclosed to show that this country will have a large share in the rebuilding of French industry.

The industrial condition in which France, as well as the remainder of Europe, will be after the war is shown by the statistics of the American Industrial Commission. In one section of France alone, in one section of the country, the war has destroyed, these establishments have demolished, machinery, tools, raw material and building material. Restoration of these factories will unquestionably involve the use of American capital and probably of much American material. The French Republic shows a disposition to accept the aid of this country, which was well evidenced by the fact that the American Commission went to France at the special invitation of the French Trade Commission.

Inquiry revealed that in the past week from Russia for steel products other than munitions of war, the demand was increasing. It is taking a forward look and indicating a plan that with the termination of the war there will follow enormous demand for American material and supplies from the land of the Czar.

It must be taken into account that the efficiency of labor in Europe will be seriously affected as a result of the war. What women workers at the present time are carrying on the work of the mills and shops after a fashion, they cannot be depended upon to do diversified manufacturing in competition with this or any other nation that has not been drained to the very dregs by war.

Much of the work being done by women in Great Britain, Germany and France is of a temporary nature. Their employment was made necessary by the removal of male workers to the front, and not for any economic reason. They will be gradually returning after the war by returning soldiers. It is altogether likely that this form of labor will be less efficient and certainly much scarcer than before the war. The competition of European with American manufacturing does not threaten seriously at this time. It will require many months, perhaps years, for Europe to retrain herself to work in manufacturing and commerce. Every condition points to continued prosperity. The great advantages of which the United States is the beneficiary of the war are the ground and the prospect of an extremely extensive spring planting, indicate that with proper weathering there will be a harvest in 1917 of unprecedented proportions. Danger of inflation in any line of industry appears to have been averted, and unless the United States is drawn into foreign complications there will be years of unexampled prosperity following the war that will cause the present period to pale into insignificance.

WHY TRAINS RUN

LATE IN WINTER.

The Cincinnati Post has been trying to find out just why it is that trains arrive late in winter, and sees no excuse for it. Country people have been accustomed to overlook poor winter-time service from the railways, but our own work is slowing up accordingly. This should not be the case with the railways. The Post says:

"Every time we have a spell of cold weather in this country the railroad system seems to go to pieces."

"All travelers know the fact, and most of them speak violently about it, that in cold snap no train that runs the miles will arrive on time. When the mercury begins to drop the trains begin to lag. The slower it drops the later they come."

"There seems to be some mathematical rule about it. Every degree of lower temperature takes off so much of train efficiency that that will be an hour late on a temperature of 12 above and two hours late on a temperature of zero and a late at 21 below."

Railroad men say there are two causes. In cold weather the locomotives will not start steam to haul the trains and heat them too. And in cold weather switches at stations and junction points freeze up. And must be played out before a train can go ahead.

"I doubt this explains why trains are late. It doesn't explain why railroads don't have locomotives that will start on a temperature of 12 above and two hours late on a temperature of zero and a late at 21 below."

Switzerland, the south island of New Zealand operate railroads in worse weather than we usually have and do not mind it. Without our automobile messengers of late trains.

"It isn't necessary to have frozen switches. It isn't necessary to have such long trains that have to be pulled in and out of the station."

Candidates for county office are announcing in many counties in this State. The will be candidates for county office are exercising their right in not an

The KITCHEN CABINET

Do not be troubled because you have no great virtue. God made a million spears of grass when he made one tree. The earth is fringed and carpeted not with forests but with grasses. Only your amount of little virtues and common-sense and you need not mourn because you are neither a hero nor saint!—Henry Ward Beecher.

AUSTRIAN RECIPES.

For occasions it is pleasant to depart from the usual and enjoy some of the dishes that our cousins across the water use daily.

Austrian Dessert Coffee.—Mix one regular strong drip coffee, add a long sugar and cream while hot, then set away to cool. Place on ice, and when cold serve in cups with a teaspoonful of vanilla ice cream in each cup.

Coffee Cup.—To a pint of strong coffee, strain through a fine cloth, add a third of a teaspoonful of almond flavoring and heat to the boiling point in a double boiler. Add two beaten egg yolks, two tablespoonfuls of cream and two tablespoonfuls of sugar. Stir until it thickens to a custard, remove and cool, pour into a serving pitcher with a pint of sweetened, ice-cold whipped cream, a quart bottle of charged water and a pint of shaved ice. Serve by placing in tall glasses some shaved ice, then some of the coffee, then some of the custard, remove water, and on top of this the cream, and cool, pour into a serving pitcher with a pint of sweetened, ice-cold whipped cream, a quart bottle of charged water and a pint of shaved ice.

Fried Chicken.—Prepare a chicken as for frying, marinate for three hours in lemon juice and olive oil with herbs to season. Drain and place each piece in beaten egg, well seasoned with salt and pepper, then in crumbs; fry in deep fat. Drain and place on a serving platter and pour around it sauce made of half a pint each of milk, chicken or veal stock, thickened with the yolk of egg, seasoned with parsley and lemon juice and mixed with a dozen mushrooms quartered.

Chocolate Schnitten.—Melt and strain one-fourth of a pound of butter and add, one at a time, four eggs, beating thoroughly as each egg is added. Add a half cupful of sugar to the butter and eggs, then add a half pound of softened chocolate, chopped nuts, almonds and currants to taste, then a cupful of sifted flour. Bake in a shallow greased pan in a slow oven until done.

Celery. In short lengths filled with highly seasoned cream cheese is a dainty relish to add to any menu.

Neenie Maxwell
THE KITCHEN CABINET

O helples body of hickory tree,
What do I burn in burning thee?
Summers of sun, winters of snow,
Springs full of sap's resistless flow,
Or string of beads of hickory tree,
How dare I burn all these in thee?
—Helen Hunt Jackson.

MORE GOOD DISHES.

Dishes as nutritious food are not well appreciated; they have more heat units than beef and cost much less.

Oatmeal Date Cookies.—Mix two cupfuls of oatmeal, a cupful of butter, a cupful of brown sugar, a half cupful of water and a teaspoonful of soda; flour to make a soft dough. Roll out as thin as possible and cut with a cookie cutter. Put two cookies together with this filling before baking.

One pound of dates, chopped, two tablespoonfuls of sugar and a little hot water to mix, but do not cook. The oatmeal if browned in the oven will make much more appetizing cookies.

Date Waffles.—Mix a pint of milk, two tablespoonfuls of baking powder, a half-teaspoonful of salt, two tablespoonfuls of melted butter and a cupful and a fourth of milk. Stir in three tablespoonfuls of cornmeal and the stiffly beaten whites of two eggs, and a cupful of chopped dates. Spread with honey when serving.

Potato Salad.—Boil eight potatoes in their skins, putting them into boiling salted water. Cook until they may be easily pierced with a fork, peel and cut into dice while hot. Add three tablespoonfuls of ground onion and two tablespoonfuls of chopped dates. Make a French dressing in the proportion of three of oil and one of vinegar, (using tarragon vinegar), season with salt and pepper. Pour a liberal quantity of the dressing over the potatoes and after mixing well let stand a few hours to absorb the dressing. This salad is better made the day before using.

Chestnut Salad.—Shell and blanch the nuts, boil until tender, drain and peel. Add an equal quantity of chopped celery and some bits of pimento; mix all together with the mayonnaise dressing. Old-fashioned tarts are always a dainty enjoyed by all and they may be made from leftover pastry.

Tomato Salad.—A thick slice of tomato placed on lettuce, or top of such salad, finely chopped celery and green pepper with a minced almond or two. Serve with a rich salad dressing or with mayonnaise.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. Katie B. Rice, of Georgetown, spent the week here with friends.

Judge J. G. Tomlin has been confined to his home several days the past week with lagniappe.

Thomas Northern left last week for Marion, Ohio, where he has secured a position on the Erie Railroad.

H. L. Vallandigham of Owenton who has charge of the school at Erlington, spent Saturday here with friends.

Geo. B. Powers, the real estate man, has been confined to his home these past weeks with a severe attack of grippe.

Mr. and Mrs. Albert S. Pennington of Cincinnati, spent Saturday and Sunday with their parents Mr. and Mrs. E. P. Pennington on the farm.

Bonj. Norman, of Latonia, spent Sunday here looking after some of his property interests here and speaks of moving here in the spring.

Mr. and Mrs. John W. Conrad have moved from near Beaver Lick to the Charles Best property in South Walton. Mr. Conrad recently purchased.

Bruce Wallace who attends the Ohio Mechanics Institute at Cincinnati, has been unable to attend school the past week on account of a severe cold.

Mrs. Hattie A. Adams, who has been here several weeks, the guest of her sister, Mrs. S. L. Edwards, has returned to her home in Westchester, West Virginia.

Wm. Martin and E. B. Sayers, of Dry Ridge, Grant county, spent Tuesday here. Mr. Martin looks over several farms with a view to making a purchase.

Many of the young people enjoyed the fine skating on the ponds during the past week. The thermometer registered eight degrees below zero here Monday morning.

Mrs. Ous Hamilton, who returned from Louisville last week where she had been undergoing treatment in a hospital, is daily improving with every prospect of complete recovery.

Mrs. Nicholas Sanning who has been in Louisville at the bedside of her sister Mrs. Mollie H. Sanning who has been very ill, returned home here last week. Mrs. H. Sanning being convalescent.

Dr. Nichols of Hiram, Ohio, is to lecture at the Walton Christian church Monday evening, Feb. 18, subject, "Salvation." Dr. Nichols is well known with the reputation of being an excellent speaker.

Prof. A. Limberg, of Big Bone Springs, who had been in a city hospital for several weeks, undergoing treatment for an internal trouble, spent Tuesday at this place with friends. He was on his way to his home.

Mr. and Mrs. Chas. Colston bought a lot in South Walton from Robt. W. Jones for \$125, and three lots adjoining from John C. Eddinger for \$250, and will begin the erection of a neat cottage on the premises as soon as the weather will permit.

Roy D. Standler while at Falmouth last week sold his moving picture show "The Duncan" at that place to Ernest Woodhead for \$500 as he was unable to give the business there his attention and properly look after his interests here.

Misses Isabel and Marjiam Brookling, Tompkins, entertained with "500" party Wednesday evening at the residence of their parents Mr. and Mrs. A. B. Tompkins in honor of their guest, Miss Mary Vallandigham. Nice refreshments were served and a very pleasant evening was enjoyed by all.

On account of the zero weather freezing the sap in the tobacco, thereby rendering its condition too dry to handle, it is absolutely necessary to postpone Wednesday's loose leaf sale at Walton until the next regular sales day, at which time there will be a very large lot of tobacco offered, and buyers will be numerous.

Miss Kate Brittenhelm, aged 81 years, died at the residence of her niece, Mrs. Wm. Ransler, in Walton, Monday morning. From old age. Miss Brittenhelm formerly resided in Covington, but for the past couple of years has made her home with Mr. and Mrs. Ransler. She was a good woman and a consistent member of the German Lutheran church. The funeral took place Wednesday, and will be held at the residence of the Baptist cemetery after appropriate religious services.

Thursday night the train on the L. & N. depot pulled into the depot the noise of the train frightened the horse belonging to Alex. Finner, causing it to break loose from the hitching post and run away. When it crossed the short street leading to the center of the town the animal was so frightened that it dashed through the front door of the residence of Mr. Robinson, breaking the glass and wrecking the door, and giving Mr. Robinson and his family a real fright. The horse's front foot from the vehicle and ran home to the farm a couple of miles from town.

The thirteenth sale of tobacco on the Walton Loose Leaf market last Saturday was well attended despite the very cold and disagreeable weather. 153,000 pounds were sold at an average of \$15.87, and the market was considered very good for the quality of tobacco offered. This makes nearly seventeen hundred thousand pounds of tobacco sold on this market in the fifteen years since Dec. 20, 1894, and is now expected that two and a half million pounds will be marketed here during the season which will not

extend much over three months. The business of this community has been greatly stimulated by the loose leaf market, and considerable preparation is being made locally for an extensive acreage of tobacco, and several crops have been contracted for at 12 cents per pound for next fall delivery. There is nothing particular to base high prices for the coming crop except there is a general report of a shortage that will require another crop year under favorable conditions to supply, and with the labor proposition as it is now no very large crop can be raised if the farmers wisely look after the cultivation of other crops, which is essentially necessary, and which can be easily recognized with the selling at one dollar per bushel and all other feed stuffs in the same proportion. Raise enough to eat by all means, and then as much tobacco as you can properly handle, as there will be more profitable results in this than making it tobacco.

Resolutions of Respect.

Every community is influenced by the leaders who live among its people.

Some lives are far reaching among the citizenship of their associates. Just as the light and genial rays of the sun produce the foliage, blossoms, and perfume about our home, just so with the smiles and morning greetings of the subject of these resolutions in character, genuine worth and true merit on the life of Doctor Daniel M. Bagley.

Of all men in time of distress and affliction the doctors presence is the most desired. The weather was never too cold, the torrent of rain too severe, the night too dark for this servant of humanity to refuse a call for administering to the suffering without regard to class, rich or poor. He was never known to say no to those needing his services. "In storm he was oak and rock, in sunshine he was vine and flower."

In business relations as well as attractions, his judgment was sought and accepted as sound, safe and sane, and worthy to be followed.

In view of these facts: Therefore be it resolved:

First, That the Walton Bank and Trust Company has lost a wise adviser, safe counselor and faithful friend.

Second, That the community has lost a foremost citizen, an accommodating neighbor, a genuine yoke fellow in all laudable enterprises.

Third, That his church has lost a true servant, a devoted brother and a lovely Christian character.

Fourth, That his wife lost a courteous, devoted, genuine companion and an ideal husband; his children a wise guardian, a faithful parent and a tender father.

Fifth, That we extend our sympathy and condolence to his widow and children in their saddest bereavement and commend them to the God who is all-wise, too wise to err and too good to be unkind.

Sixth, That a copy of these resolutions be published in the Boone County Recorder, the Walton Advocate, and a copy be spread upon the Walton Bank and Trust Company's Mimeo, and a copy be sent to the family.

Done by order of the Board of Directors of Walton Bank & Trust Company, this Feb. 2, 1917.

Committee—Chas. Rensler, J. C. Jordan.

There were several bids for building the Free Road, but the contract had not been awarded Wednesday at noon.

The court held a two days session. Several road builders from a distance attended Tuesday's session of the Fiscal court.

The people along the East Ford road between Burlington and Waterloo will get busy now and soon have their part of the pike money subscribed.

The question has been asked "Will Dr. Grant move from Florence to Burlington so he can look after his business in the Burlington precinct?"

The pupils of the High School could not be kept comfortable during the severe weather the past week.

Since the milk strike was inaugurated Weber's express truck has made very few trips to Burlington.

Some coal bins in Burlington are being replenished with 30 cents a bushel coal.

Mr. Jump, who has the contract for building the R. H. and H. Pike runs in town Tuesday.

John Conrad has bought of H. B. Hume of Covington, a Republic truck.

Uncle Sam is getting ready to start his last year of his term.

The temperature has got back to normal.

Next Wednesday is St. Valentine's day.

It begins to look and feel like rain.

Prevention of Colds.

(Indianapolis News.)

There are a great many folks in Indianapolis today with colds and others with grip, tonsillitis and kindred diseases, who had they exercised a modicum of preventive caution, need not have suffered with the discomfort and absence from business. There are few diseases so insidious in their attack as colds and their consequences. We tramp around on a wet day, sans over-shoes, and the soles of our shoes become thoroughly saturated with the moisture. We do not reach our feet the feet at least feel the effect of the clammy soles. We go home and sit around in our damp shoes. The next morning we begin to sniffle and we are ready for the cure, instead of the preventive. Yet a hot footbath the night before might have sent the blood coursing through our feet and ward off the attack. We sit in a warm house in the evening, and on Sunday. If we have need for something in the garage or on the porch we rush out.

By sufficing in a hat or a hat. The cold air gives the system a shock and its resistance is low, we very likely have given a good start to our cold. We hustle around for an hour or so being various errands and get the blood flowing rapidly to the remotest parts of the body. Then we stand on a street car and often times a chill is the result. It may be stopped by a good hot bath when we get home, but we get into the house, and the evening meal, feel fairly well—and the cold starts to work.

By taking a moment's thought and care we could avoid many cases of cold and its resultant ills. The extra time it takes to put on a hat, a coat or change damp garments is insignificant compared to the days of discomfort we must suffer to pay for the moment's indiscretion. Often, too, we imagine that we can cure our ills by homely remedies. Frequently a call on the doctor when a cold is in its incipency will mean a quicker cure than is possible by resorting to home treatment.

Doctors tell us that many serious diseases may result from a neglected cold or a throat affection. Among these are rheumatism, tuberculosis, heart trouble and Bright's disease. The medical profession more and more is becoming interested in preventive measures. We can help the movement along by using common sense, by remembering that we can not violate a law of health unless we pay the penalty. Get plenty of fresh air. Wear warm clothing outside the house and office than we do inside. Don't stand for long in a draft. Sleep with the bedroom windows up, but in doing so be sure that there is no draft to smite the back of the neck while you sleep.

It Will Be War.

Reports come from Berlin that Germany does not intend to modify her unrestricted submarine warfare on account of the action of the United States in terminating diplomatic relations with her.

Those reports are doubtless true and should surprise nobody. The President in his address announcing to the Senate this severance of relations appeared to cling to the hope that Germany would not persist in her policy to such an extreme as to make it necessary for us to go to war with her, but that even the President must have felt, was a forlorn hope. Germany's note announcing her return to her policy of "rightfulness" left no room for doubt on that point. That, with the speeches of the German Chancellor made it absolutely clear that the German government in deciding on this course had counted—all the costs, that they deemed it as offering Germany's last and only chance to defeat her enemies, and that she had, as her Chancellor expressed it, "staked everything" on her return to it.

She cannot carry out this programme and at the same time observe the canons of international law in dealing with such American ships and citizens as she may find in the zones of her operations, and she does not propose to let anything in the way in heaven or hell interfere with the execution of her programme.

We should bear that in mind and prepare, as we doubt we are preparing to act accordingly.

It turns out that the sinking of the Lusitania was justifiable under the laws of nations. But it is only a question of a short time before other cases will arise which will make it necessary for the President again to go to Congress for authority to protect our ships with more forcible measures than protests and nonintercourse.

What has become of the old-fashioned music teacher who gave instructions in violin and guitar and never heard of the ukulele?

In the world's extremity it discovers that wild oats have no nutritive value, except perhaps as food for thought.

One trouble about an accurate war map is that it becomes obsolete within a week.

When Buying Seed

It is well to look to a house that puts quality above price. Did you ever stop to think that 25c on a bushel of seed amounts to only 6 to 10c per acre.

You surely can not afford to sow inferior seed for a difference of 6 to 10c per acre when the results may mean 6 to 10 dollars to you, to say nothing of having your farm infested with obnoxious weeds and filth.

High Purity & Germinating Test

is our constant aim, and judging from the way our old customers come back each year and many new ones that are so well pleased and we believe are succeeding.

We Give You Test on Every Tag

showing what is required by the New Kentucky Seed Law and if you write for samples we can give same on samples.

Our Prices Are Low

and a post card will prove it to you

Just let us know what you are interested in and we can supply you. We have line. Alfalfa from the Northwest, Fancy Illinois, Indiana and Ohio Grown and Timothy and Clover. Ky. Blue Grass from Central Kentucky, Red Top from Illinois, Alsike from Wisconsin. In fact we buy our seed where it grows best and most vigorous. Let us quote YOU.

"War is Hell."

Both sides sick of war and the fight goes on, and will go on for some time to come. War isn't come from right thinking people. Crime comes from the degeneracy of mind and was crime and nothing else. There is not one of the so-called heartless Europe that has enough common sense to lend a truck patch of an acre of ground. No supremacy is ever gained by murder. God may hold a man's tent his home, but his certainty would not protect him in final. The home of another. Somebody is right and somebody is wrong in the European struggle. Both can't be right. We are sorry for the poor devils who stand in the trenches. They are mostly artificial, wooden arms, cork legs and wire fastened ribs. Nothing

of the real man left except perhaps one eye and half a nose sewed on with catgut. Ward painters may daub their brushes in gold leaf and smear on a lot of old stuff about "War being just the sparks that fly from the devil as progress beats out a better civilization." Such stuff is all bull—War is murder, theft, arson rape—it is hell. America should protect herself sufficiently to repel any invasion, and when the time comes for peace, we should demand a peace that will last forever, and the violator of its terms should share a worse fate than the murderer for price.

Falmouth Outlook

Laws Favored by Mo. Farmers.

The Missouri State Board of Agriculture recently asked its crops correspondents to express their views as to needed legislation. The replies show the greatest demand for changes in the present road laws. Ninety farmers place this subject first. Second in order is the request for a pure seed law, of correspondents answering to this effect. Sixty mention the need of a dog law. Thirty-nine are of the opinion that the school law, especially those relating to rural schools, should be amended. That there is need for some system of farm credits under state control is the opinion of 33. Better protection for the quail, or "Bob Whitem", is asked by 32 farmers, many of whom suggest a closed season of from three to 10 years. Another suggestion on this subject is to limit the number of birds that may be killed by any one hunter during the open season. Next in order of suggestions for farm legislation comes some provision for farm organization, a bureau of marketing, supply of the county agent law, pure feed law. Other suggestions mentioned are better fertilizer inspection regulations, changes in revenue laws, a law making plain what constitutes a legal fence, a law requiring hedges to be cut and maintained at turns or intersections of roads to be removed.

Queer Result of Hog's Bite.

Last October Claud Poe of the Abigail neighborhood, was bitten in the calf of his leg by a hog, the injury resulting in a sore place which has been his trouble and pain. Mr. Poe had a physician dress the limb, but it began to form a knot like a boil where it had been bitten by the hog. One day last week he suggested to a friend who had called to see him that he believed that the inflamed part had reached a "ripe" stage and ought to be opened. His friend, making examination agreed with him, and in less than five minutes the "boil" punctured, and a vigorous pressure with the hands on each side brought forth a hog tusk which had been left by the hog when it bit Mr. Poe last fall. The injury is now healing nicely and Mr. Poe will soon have the free use of his limb. For a while it was feared blood poisoning would set in, but all danger from that source is now passed.—Mt. Olive Tribune-Democrat.

Rule.

(Leslie's.)

The history of the world is full of repetitions. It tells the tale of the strong who would rule and the weak who would ruin. It tells of despotism that oppressed the people and ere overthrown, and of republics that were the throes of revolution and dying at the behest of the mob. It tells of kings are heard from those who fear for their future, and bear in mind Macaulay's startling prediction in 1837 that our Constitution will sail and "no anchor," and that they would come in the United States when distress would make the laborer mutinous and discontented, and incline him to listen with eagerness to agitators who will tell him that it is a monstrous iniquity that one man should have a million while another cannot get a full meal.

The famous historian warned us that when society had entered on this downward progress, no civilization or liberty must be lost. It is not too early to say that a strong hand is needed to suppress the tendencies of those who would confiscate property rights and exile the successful from our land.

Great nations must solve great problems. Power means responsibility. We have had our wars and we will have others. We may be facing serious complications now. Preparedness is the only way of apprehension, for the nation feels the need of a larger army, a stronger navy and shipping necessary to extend our power and to suppress the evil tendencies of the times. We don't believe it.

The people can be trusted to rule, but they must be educated for leaders and refuse to trust legislation to disturbers, demagogues, ranters and rioters.

Who Am I?

The following is copied from a sign in Rock Island Arsenal:

I am more powerful than the combined armies of the world.

I am more deadly than bullets, and I have wrecked more homes than the mightiest of sieges.

I steal in the U. S. alone over \$300,000,000 each year.

I spare no time and find my victims among the rich and poor alike; the young and the old; the strong and the weak; widows and orphans know me.

I massacre thousands upon thousands of wage earners in a year.

I lurk in noxious places, and do most of my work secretly. You are warned against me but heed not my warnings.

I am restless. I am everywhere in the home, on the street, in the factory, at railroad crossings and on this sea.

I bring sickness, degradation and death, and yet few seek to avoid me.

I destroy, crush and maim. I give nothing, but take all.

I am your worst enemy.

I am CAMELEONISM.

INAUGURATION DAY AT THE CAPITAL

Old Fashioned Democracy to Characterize Ceremonies.

BIG PYROTECHNICAL DISPLAY

President Wilson is the first Democrat to Succeed Himself Since the Days of Andrew Jackson—Mrs. Wilson and Mrs. Marshall to Accompany Husband in Inaugural Parade.

By FRANK B. LORD.

Washington is rapidly completing its preparations for the second inauguration of Woodrow Wilson as president of the United States. The occasion will present the first instance of a Democratic president succeeding himself in the White House since the days of Andrew Jackson. This is one of the reasons why exceptional efforts are being put forth to make the ceremonies befitting and impressive and at the same time characterized by genuine old fashioned Jeffersonian democracy.

President Wilson has notified the inaugural committee that he does not favor the customary inaugural ball, and accordingly that feature will be eliminated. Instead on the evening following his induction into office there will be presented on the famous White Lot, directly south of the executive mansion, a beautiful pyrotechnic display designed in itself to teach a lesson in patriotism.

Inaugural Takes Place March 5. Owing to the fact that March 4 falls upon Sunday the ceremonial inaugural of President Wilson will take place on the following day. In order that there may be no lapse of time during which the country might be without an executive head the official oath of office will be administered to President Wilson in private at the White House at noon Sunday, March 4, by Chief Justice White of the supreme court of the United States. Three times before in the history of this country March 4 has fallen on Sunday—in 1821, at the beginning of Monroe's second term; in 1877, when Hayes became president. The formal ceremonies will occur on Monday.

Starting from the White House at 11 o'clock, escorted in carriages by a congressional committee, of which Senator Overman of North Carolina is chairman, the president will proceed to the capitol. For the first time in the history of this country the wife of the president-elect will accompany him on the trip. Mrs. Thomas R. Marshall, wife of the vice president-elect, will also ride in the carriage with her husband. The president will take the oath of office and deliver his inaugural address from the huge platform erected on the plaza at the east front of the capitol.

Pageant to Be Spectacular. At the conclusion of the president's address the great spectacular pageant, which the people of Washington have devoted nearly three months in preparing, will start from the capitol and proceed down Pennsylvania avenue to Fifteenth street and through the grand Court of Honor erected in front of the White House. From the presidential stand in the center of the court Mr. Wilson and Mrs. Wilson, together with their wives and members of the cabinet and their wives, the diplomatic corps and prominent officials, will view the parade.

Under the direction of Colonel Robert N. Ingher, chairman of the citizens committee of Washington, the people of the national capital have put forth every effort to make the Wilson inaugural procession not only a grand march of triumph, but a pageant which shall be educational and illustrative of the progress and development of the country. Major General Hugh L. Scott, chief of staff of the army, will be grand marshal. Thousands of United States' blue-jackets and marines and as many soldiers as can be spared from the border will be in line, as well as the middle boys from Annapolis and the cadets from West Point.

"Uncle Sam at Work." Washingtonians are so adept in making preparations for presidential inaugurations that nothing has been overlooked in providing for the accommodation, comfort and entertainment of thousands of visitors. In addition to the inaugural ceremonies, with the interesting pageant, arrangements have been made for the exhibit during the inaugural week of "Uncle Sam at Work." This exhibit will show the activities of the various departments and bureaus of the government. The treasury department will show how paper money and postage stamps are manufactured at the bureau of engraving and printing and gold and silver coins are made at the mints. There will be an interesting display of counterfeit and counterfeiters by the secret service, and the bureau of life insurance will be shown by the exact manner which now includes the life saving service.

The museum of the dead letter in iron, with its fossils of the mails, will be a feature of the display of the post-office department; the war department will present an intensely interesting exhibit, including methods of national defense, and the navy department will show models of our precious dreadnaughts, battleships and submarines.

DAIRY TALK

OBJECTION TO BLOODY MILK

More Distasteful on Account of Appearance Than as Menace to Health—Causes for It.

Bloody milk is more objectionable, perhaps, as a matter of appearance than as a menace to health. Hemorrhages may occur within the udder as a direct result of a bruise caused by rapid motion, by a bad position while the cow is lying down, by the tread of a cow in an adjoining stall, or because of the breaking of a tiny blood vessel or the escape of red corpuscles through thin vessel walls. Heavy feeding may also produce bloody milk.

The remedy is careful milking and light feeding with laxative foods and repeated small doses of mild purgatives. The trouble is often given a heavy flow of milk and under heavy feed, improvement follows a marked reduction of the ration. A change of stall may give good results. If it allows a cow to obtain a better position and avoid uneven pressure on the udder while lying down. Cows with long, heavy udders should be driven slowly and should not be driven over high sills.

SPECIFIC GRAVITY OF MILK

That of Cream Will Necessarily Vary With Amount of Butterfat Present, Says Expert.

A correspondent wants to know the specific gravity of white milk, skim milk and cream. Dr. Charles K. Francis of the experiment station department of chemistry at Oklahoma A. and M. college answers as follows:

The specific gravity of whole milk at 60 degrees Fahrenheit varies from 1.027 to 1.035, and skim milk 9 per cent solids 1.036. The specific gravity of cream will necessarily vary with the amount of butterfat present. 10 per cent cream will have a specific gravity of 1.024. If it contains 20 per cent, the specific gravity will be 1.0094, and for 30 per cent it will be 0.9974.

PUREBRED SIRE IS VALUABLE

Experimental Proof Secured Showing His Exact Value on Scrub Cows—Keep Up Record.

Use good sires, for the sire is half the herd. This is an old and generally accepted theory of breeding, but now, for the first time, experimental proof has been secured showing the exact value of the purebred dairy sire on scrub cows.

Fifteen scrub cows were used in the experiment and these were bred to purebred bulls of three breeds—Holstein, Guernsey and Jersey.

Daughters of all but one of the bulls showed an increase in production over

Young Jerseys.

their dams. The one exception proves the necessity of selecting only purebred bulls.

In the case of the Holstein cross, the heifers increased on the average 71 per cent in milk and 42 per cent in butterfat production over their dams, and the other breeds showed a corresponding increase.

In selecting a dairy bull, study the blood lines in the pedigree and the records made by his dam and both grand dams.

Keep production records of your cows and cull out the poor producers. The facts brought up by this experiment may be taken as a definite indication of the great value of good sires in live stock breeding in general.

DAIRY NOTES

Never add warm cream to the cool.

Keep the separator and its surroundings clean.

More silos mean more stock—and more fertile soil.

In caring for milk, cleanliness and cold are two great essentials.

Low temperature and cleanliness are two factors that largely control quality in cream.

It isn't alone the amount of product a cow gives but also the cost of producing it, that determines the value.

Dairy farming may well include the raising of dairy stock, hogs and poultry in connection with the marketing of butterfat.

Wash water used in the dairy should be approximately the same temperature as the buttermilk, or within two degrees of it.

Public Sale

I will sell at public auction on the Mir Beemon place, two miles west of Union, near the Burlington and Big Bone road, on

Saturday, February 10th, 1917

the following property:

- 2 No. 1 Milk Cows, one to be fresh in March and the other in April.
- 3 good Wagon Horses, 2 3-year-olds and 1 5-year-old.
- 1 Brood Sow, will farrow in March.
- 100 bushels, more or less of Corn.
- About 5 tons mixed Hay.
- 1 Road Wagon, good as new.
- 2 sets Double Harness.
- 2 Riding Saddles.
- 1 good Buggy and set of Harness.
- 1 Mowing Machine.
- 2 Double Shovel Plows.
- 1 Single Shovel Plow.
- 1 Breaking Plow, 1 Acme Harrow.
- 1 Grind Stone.
- 1 Sharpless Cream Separator No. 2.
- 2 Shot Guns.
- Howe, Shanks and Forks.
- Some Meat and Lard.
- 10 or 12 bushels Irish Potatoes.
- Some Household and Kitchen Furniture.

1 Telephone Box and Stock in the Gunpowder Waterloo Line.

12-acre tract of Land on the Burlington and Big Bone road, joining the lands of G. C. Poulton.

1 20-acre tract of land near the same road, joining the lands of Milton and James Beemon.

Many articles too numerous to mention will be sold.

Terms—Sums of \$5.00 and under, cash; on sums over that amount a credit of 12 months without interest will be given, purchaser to give note with approved security, payable at the Peoples Deposit Bank, Burlington, Ky., except the two tracts of land which must be sold for cash.

The sale will begin at 10 o'clock. C. N. & WALTER YORK.

Public Sale!

I will sell at Public Auction at my place, known as the Mrs. Bungeer Farm or the Casey Homestead, on the Lexington pike, near Dudley Pike, 1 mile below Erlanger, Ky., on

Thursday, February 15th, 1917

The Following Property:

18 Milch Cows, some with calves by their side; 4 2-year old Heifers with calves; 7 Heifers 10 mos. old; Holstein Bull 10 mos. old; good all purpose Horse; good farm Horse; large Draft Horse; 2 Chesterwhite Brood Sows; 6 Dozen Chickens; 4 full blood Black Minorca Roosters; Road Wagon, Butter Wagon, 2-horse Spring Wagon, No. 1 2-horse Sled, Aspinwall Potato Planter with fertilizer attachment, Hayrake, 2-horse Oliver Cultivator, No. 20 Chilled Plow, Double Mole Plow and several other plows, No. 13 Bazzard Cuttingbox in good condition, 120 ft. 8-inch Yankee Belt, one-horse Power Churn, Harness, Dump Cart, Corncripper, Western Hot Blast Heating Stove, Household Goods and various other articles.

TERMS OF SALE.

All sums of \$10 and under, cash; over that amount a credit of 6 months without interest will be given, purchaser to give note with approved security, payable at Citizens Bank, Erlanger, Ky. No property to be removed until above terms are complied with.

Local Happenings.

Sunday was a slacker.

The price of potatoes has made them almost a legal tender.

Fuel is getting distressingly scarce in some of the coal bins about town.

At the clip it started ground hog winter can not go the distance—six weeks.

Frank Maxwell, of Covington, was a guest of Grover Jarrell last Saturday night and Sunday.

Judge Sidney Gaines began the February term of the Grant county circuit court last Monday morning.

As early as 7:50 a. m. last Friday the ground hog had in opportunity to see his shadow in this part of the country.

Because of the brisk wind that prevailed each of the very cold days the past week it was difficult to keep a house comfortable.

J. J. Tanner, who resides one and a half miles out on the Florence pike was a very sick man several days this past week.

A small quantity of water that had accumulated in the carburetor on J. C. Wilcox's machine froze last Saturday afternoon and he had to be towed in.

A single application of a very small quantity of sodium fluoride has been found to destroy completely all stages and all species of lice on poultry.

The Equitable Bank and Trust Co. of Walton, has subscribed for \$6,000 worth of the county's road bonds, and will take \$10,000 more if it can get them.

Galen Kelly was riding on the running board of an auto, last Saturday morning, when he lost his balance and was dumped. He received several bruises.

One of the sons of Alonzo Beaman, who lives near the second Ganpowder creek on the Burlington and Florence pike is recovering from a severe illness.

J. W. Clark, of Walton neighbor hood, went to Florida, last week, leaving home just in time to escape the severe weather that got here shortly after his departure.

Fremont & Gay, of Bourbon-co., Ky., sold part of their crop of Purley at \$120 per hundred. This is said to be the world's record price. Their entire crop averaged \$32.41.

Every man is said to have at least one opportunity to acquire wealth. In the case of a country editor the opportunity comes on the 28th of February every year, except leap year.

The zero weather arrived last Thursday night, following the warm weather of the four preceding warm days. It was a very sudden change in the temperature, about as radical as any for a long time.

Government aid will be expended in Kentucky on an east and west highway, extending from Wickliffe on the west to Highland on the east, and when that project is completed six branch lines will be constructed.

"Pull down your ear, a moment; I want to look down the street," said a man on Main street yesterday to a traveler just ahead of him. The traveler merely folded his ear under his hat and walked unharmed on. He was from Chicago.

Today many of our roads carry a motor traffic far in excess of all classes carried 12 years ago. At the present time there are about 2,500,000 motor vehicles in use on our public roads, or about one motor vehicle for every mile of road.

When Harold and Virgil Gaines started to go home last Sunday evening their machine balked and they had to remain in town over night. By the use of a large quantity of hot water and much elbow grease the auto was induced to go Monday morning.

Gov. Stanley has called the General Assembly to meet in special session on the 14th inst., to consider the proposed new revenue bill which has been prepared by a commission to revise the revenue laws of the State. The law makers will have sixty days in which to consider and pass or reject the proposed new law. No other business can be considered.

Wingate & Thompson, of Petersburg, are selling largely of their purchases of tobacco on the Louisville market where they have been realizing some very fancy prices. They made a considerable purchase early in the season at figures that are allowing them a handsome profit, and at the close of the season they will have enough to insure them another year's living.

Where land in the East is plowed in the spring for alfalfa at least four to six weeks before the moisture which it will retain in its top grows or when there are any clouds or cold weather is in itself an aid to

CORN GROWING.

Early Planting Recommended for Semiarid Regions—Plants Injured Less by Frost and Drouth.

Corn will not grow during cold weather as wheat and oats. Corn planting time is the best time for sowing spring wheat or spring oats. However, according to Farmers' Bulletin 773, when seed of perfect vitality is used, it is remarkable how early in the spring corn can be planted and result in good stands and good yields. Seed of perfect vitality will often germinate in cold or dry soil for several weeks and afterwards germinate and yield well. Irregular stands are sometimes attributed to poor seeds, which are, poorly preserved. Seeds are the cause. Fields are sometimes seen in which seed germinated promptly in moist spots, while in other spots in dry spots until rains came.

Where the seasons are long and moisture plentiful, it is customary to wait until the soil is generally warm. In semiarid regions, however, corn should be planted early. With the soil in proper condition it is generally advisable in semiarid regions, south as well as north, to plant corn before danger from frost is entirely past. Corn planted very early usually makes a slow, tough growth and a month after planting may be smaller and look less promising than that planted later. The early planted corn ripens first, however, and usually produces the larger or the better crop. Because of its slow, tough growth corn planted very early is not so susceptible to frost and drought as corn planted later and growing more rapidly. In a series of years the grain in mature corn secured from early planting will more than make up for any injury from spring frosts. Early corn crops have been produced from plantings frozen off or frozen back when the plants were from a few inches to a foot or more tall. Corn is not often entirely killed by spring frosts, and if some should be injured the loss is much less serious than that from summer drought or from fall frosts.

Early planted corn derives more benefit from the spring moisture supply, because of the earlier start. After summer droughts begin, and may even mature before these droughts become severe. When the growing season is very long and warm, plantings made at about 30-day intervals increase the chances of hitting the season right and raising some good corn.

Early planted corn derives more benefit from the spring moisture supply, because of the earlier start. After summer droughts begin, and may even mature before these droughts become severe. When the growing season is very long and warm, plantings made at about 30-day intervals increase the chances of hitting the season right and raising some good corn.

REAPING A HARVEST

Of Satisfaction Over His Tobacco Law.

Congressman J. Campbell Cantrell is reaping a harvest of satisfaction out of the fact that he drafted the law requiring tobacco manufacturers, warehousemen and dealers to give at stated periods the exact amount of the weed owned by them, as required by others and in their hands. The growers, who are enjoying high prices for their crop, are the ones who are in the forefront of the statistics. He pointed out that over 10,000,000 pounds of tobacco are produced in this country each year, and that the growers who are in the forefront of the statistics are the ones who are in the forefront of the statistics. He pointed out that over 10,000,000 pounds of tobacco are produced in this country each year, and that the growers who are in the forefront of the statistics are the ones who are in the forefront of the statistics.

COLD NIPS FAR SOUTH.
Fears Are Felt for Florida Crops Result of Wintry Blasts.

Atlanta, Ga., Feb. 3.—Even the far South, which usually escapes severe colds, shivered today in real winter weather after a bitter night.

Fears were felt for the Florida fruit and vegetable crops in spite of the precautions taken by growers in burning smudge fires in citrus groves and covering tender vegetables.

Western North Carolina felt the severest cold. Asheville reported a zero temperature at 9 o'clock this morning. At Hot Springs, S. C., eight degrees below zero was registered. During the night, Raleigh reported 9 degrees above zero this morning.

Records for 18 years were broken today at Norfolk, Va., where 9 degrees above zero was registered. Further inland, Richmond reported a temperature of 15 degrees above, the lowest in several years.

Atlanta suffered the coldest weather since 1905, the coldest temperature at 9 o'clock this morning being 2 degrees above zero. Columbia, S. C., reported 4 degrees above zero. In lower this winter Tennessee also suffered low temperatures, a number of our large cities being reported below freezing this morning.

ORCHARD GLEANINGS

TO INSURE GOOD PEAR TREES

Top-Working Is Recommended on Most Desirable Varieties—Grafts Should Be Evenly Distributed.

The first or second crop of fruit will show the quality, some of which may be undesirable. Some varieties are predisposed to cracking, some to softening of the core, while others are knotty, and of poor quality—not as a general thing, but under present conditions.

From the varieties that are most desirable, those showing inferior qualities should be topworked as follows: Scatter the grafts through the tops of the trees, not at each corner of a small branch by itself. The whole taken together will make a full top in a few years.

Select six or eight of the main and folding limbs, and trim off the greater part of its side branches, but if

Bartlett Pear.

the tree is a large one, only part of the top should be removed the first season (the remainder to be taken off the second year), and this part of the tree grafted. In these six or eight limbs there should be five or six grafts each.

Care should be exercised that the grafts are evenly distributed over the top, so that there will be a well-balanced head of the new variety.

MOUNDING IS GOOD PRACTICE

Soil Piled Around Base of Tree Will Keep Mice Away—Work Can Be Done Any Time.

Mounding trees with soil piled about a foot high around the trunk keeps away mice which, during some years, are very destructive. If one does not mound his trees, he should either put wire netting collars around them, or be prepared to tramp down the snow around each tree if there is much vegetation in the orchard.

It is not necessary to do the mounding or banking before the weather becomes fairly cold, but there is no reason why this should not be done at any time during the fall.

One important thing is to scrape away the vegetation that may be close to the trunk, so that the earth that is thrown in by the shovel will rest upon the earth, instead of upon a mat of grass or leaves through which the mice may burrow and thus reach the trunk and gnaw it beneath the mound which you have added.

There have been cases where the short-tailed meadow mice burrowed through the bases of the mounds because there was enough organic matter or vegetation under them to make them loose and vulnerable.

BLACKBERRY IS WELL LIKED
Preferred to Raspberry for Orchard Interplanting Because of Immunity to Crown Gall.

Because of the marked immunity of blackberries to crown gall, which may be transmitted to fruit trees, that crop should be preferred to raspberries for orchard interplanting.

At the Ohio station 65 rows of raspberries, including black, purple, yellow and red varieties, were all infected this year by this disease, while none of the blackberries showed any infection.

MULBERRIES OF MUCH VALUE
Many Birds Prefer Them to Cherries, Raspberries and Other Fruits—Remove Complaint Cause.

Probably the chief value of the mulberry is as a food for the birds. Robins, jays, catbirds and many others prefer it to cherries, raspberries and other fruits which they eat when no mulberries are available.

Plant plenty of mulberries and you will have very little cause for complaint regarding the damage done by birds.

TO OBTAIN COMPETENT HELP
Combination of Orchard and Dairy or Poultry Will Solve Problem—Profit Is Assured.

The small orchard alone will not permit employment of competent help all the year around, but when combined with a dairy or poultry raising, this difficulty is solved. The orchard is a source of income when the fruit is in season, and the dairy or poultry can be kept up during the winter months when the orchard is dormant.

DAIRY

COMPOSITION OF SKIM MILK

Guernsey Milk, Like That of Jersey, Has High Percentage of Protein and Sugar.

Therefore the difference between the percentage of butterfat in Jersey cows' milk and that of Holstein's has been often emphasized.

It has the fact been known that there is considerable difference in protein. Careful analyses made by A. E. Perkins, dairy chemist at the Ohio experimental station, show that milk from Jersey cows has a higher percentage of protein and sugar than Holstein milk. Guernsey milk is quite similar.

English Prize Guernsey.

to that of the Jersey, while Ayrshire milk is intermediate between that of these two breeds and the Holstein.

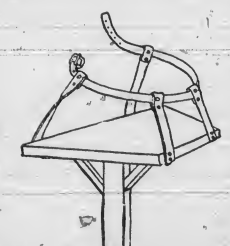

These analyses indicate that the percentage of protein in milk increases with the fat content, but not in proportion. Skim milk from Holstein milk having 2.5 per cent fat contained 3.5 per cent protein, while Jersey milk tested 4.7 per cent fat and 4.1 per cent protein. The variation in the sugar content showed a similar tendency. Thus the fat content of milk offers a practical basis to compute the composition of skim milk derived from it.

RIGHT SPEED FOR SEPARATOR
Often Nearly One-Half of Fat May Be Found in Skim Milk When Machine Is Run Slowly.

As much as 50 per cent variation in the richness of cream may be obtained by variation in speed of operating the separator. If normal speed is 55 turns of the crank per minute, 75 turns will bring rich cream and 25 turns will bring thin cream. A great deal of fat is lost in the skim milk when the speed is rapid. Sometimes nearly one-half of the fat may be found in the skim milk when the separator has been run too slowly. This demonstrates the fact that there is only one speed for economical operation of the separator, and that is the right speed. This speed is indicated on the crank handle.

MILK STOOL IS CONVENIENT
Device Buckled Around Waist of Milker by Means of Straps Is Always Ready for Use.

A very handy stool for use in milking the cows in yard or field may be made as follows: It is merely one-legged stool to which are attached four

A Convenient Stool.

straps connected with a broad strap that is buckled around the waist. The stool is quickly fastened to the milker and is always in a position so one can sit down anywhere. Such a stool with a short leg is also useful in the garden.

CAUSE INDIGESTION IN CALF
Found From Experience That Slight Variation in Temperature Will Bring on Disorder.

Under natural conditions, milk consumed by the young animals is a temperature of 39 degrees Fahrenheit. It is often found by experience that a slight variation from this temperature may cause indigestion. Especially is this true with calves under two months of age.

Bank Your Surplus WITH THE Boone Co. Deposit Bank

(Incorporated)

Burlington, Kentucky.

It combines capital, confidence, consistency and courtesy. The big man with the big roll and the little man with the little roll are alike welcomed. Its doors are open to borrowers and depositors alike. Its purpose is to be a mutual benefit to the community in general and its patrons in particular. It invites you to start a checking account with it.

3 Per Cent Interest Paid on Time Deposits.

WISDOM FROM YOUTHFUL LIPS.

Wisdom drips from youthful lips now and then. He is a rare father who has not felt parental pride rise as his children fresh from school daily pour out a bubbling stream of knowledge newly acquired. Most frequently, perhaps, he is embarrassed by questions which perplex if they do not annoy, for the passing years weave cobwebs around the textbook knowledge of the provider. If father is ashamed by the children's quicker perception, much greater must be the humiliation of the dear teacher who is stumped to silence by a pupil's penetrating philosophy. A California youth of twelve objected to the study of geography, boldly telling his teacher that it was a waste of time, says Omaha Bee. "What's the use," he said, "of studying the map of Europe when nobody knows what it will look like after the war?" The teacher could not answer, nor seek the answer in the stars. Tropics and seers read the signs and remain mute. Map makers idly view the progress of the war and may not venture a guess how the new map will look by and by. The far-fung battle line members from Central Africa.

Dobrujina, from Saloniki to the Soume. The Alps and the Carpathians echo the thunders of artillery, and half a dozen seas are freighted with battleships eager to revise the map. While these agencies of destruction are working overtime what's the use of studying the geography of Europe.

War is a terrible waste of commodities useful in the arts of peace. Do you know how much bleached cotton fiber was employed in the United States during the calendar year 1915 in the manufacture of explosives? The bureau of census has compiled the statistics, and they are impressive. The amount was 121,331,385 pounds, equivalent to 244,000 bales of 500 pounds each, net weight. During the three months ending March 31, 1916, there were consumed in this industry 344,988 bales, and during the three months ending June 30, 1916, 142,725 bales. The increased use of cotton fiber in this industry is striking, the quantity consumed during the first half of 1916 being considerably in excess of the total for 1915.

Why is it that in spite of the precautions against fire the nation's fire loss continues so impressively large year after year? We have done away very largely with many hazards of the past. Why isn't there more obvious compensation in the form of a diminished fire loss? Perhaps it is because of the uprising of new hazards. One of the greatest of these is the carelessness of people addicted to smoking cigarettes.

It is said that in spite of the vast amount and value of the American securities formerly owned in Europe which have been returned to this country since the beginning of the war, there are still a billion dollars of this class of investments in the hands of European holders. Who can blame the owners for hanging on as long as possible to those of their possessions which they deem least likely to undergo depreciation?

That battlefield which is offered for sale in France, with the attractive lure of German and English trenches across it, will make a very profitable investment for the tourist trade after the war if the enterprising owner can only lease a "tink" tractor or two to enable clumsily to and fro over the trenches, carrying carloads of the curious.

Asserting that there were fewer savings accounts in proportion to the population in the United States than in any other country in the world, a St. Louis speaker explained that there were 99 for every 1,000 inhabitants. Next pay day is a good chance to make it an even hundred.

A St. Paul sociologist says domestic infidelity is frequently due to bad teeth, meaning, we suppose, if the old man had teeth good enough to negotiate the bullneck steak the flow of domestic joy would be uninterrupted.

As the war in Europe progresses the annual report of the Smithsonian Institution, giving the scientific advance of the world, becomes thinner with each successive volume.

It is said the French newspapers are condemning the war styles of Paris. And yet we cannot think they are as giddy as the peace styles of the United States.

Now that scientists have shown that baldness is hereditary, it should be comparatively easy to prove that the "front row" habit is also hereditary.

Still, the dye scarcity has not yet become so bad that it is necessary to color strawberry lemonade with strawberry juice.

There is a bumper apple crop this year, and the man who likes pie will probably get more than one slice.

FISCAL COURT NEWS

The Fiscal Court was in session Tuesday with County Judge Canon presiding and all the justices of the peace present.

Following sheep claims were allowed:

Albert Johnson's \$70.
Arthur Stephenson's \$20.

The Union and Hathaway turnpike was turned over to the county, the county to expend \$300 a mile thereon within two years. All the rock on the right of way is to go to the county.

The county is ordered to advertise the delinquent poll-tax lists for sale by precincts and as a whole.

Dr. J. H. Grant was awarded the county infirmary and hospital precinct pauper practices at \$75.

Six bids, as follows, were made for the reconstruction of the Lexington pike, Myers & Harris, of Lexington, being the lowest bidders were awarded the contract.

Wilmore Construction Co., Wilmore, Ky., \$127,881.22.
Phillips, Ellet & Gibb, Lexington, Ky., \$113,340.00.

Pre-man, Robbins & Company, of Knoxville, Tenn., \$108,810.00.
Myers & Harris, Lexington, Ky., \$108,810.00.

F. A. Lewin, of Covington, \$108,810.00.
S. M. Billier, of Williamstown, Grant county, \$10,936.11.

G. W. Sandford, Elmore, Ky., Robert White and W. H. Marshall appeared before the court and asked an appropriation equal to three-fourths of the cost of building a pike down the East Bend road as far as Locust Grove school house or to Waco.

The appropriation was made with the understanding that the citizens would stand the cost of returning the grade on the William Carpenter hill to seven per cent.

This contract for reconstruction of the Lexington pike calls for putting on the road six inches of metal, 12 feet wide and rolling, and feathering the edges so the road completed will be 14 feet of metal. This calls for nearly 100,000 cubic yards of metal.

American Preparedness.

If the test of character is adversity, no less is service a test of patriotism. If the Government of the United States finds itself forced to resort to the armament of arms to establish the rights of Americans to travel the seas unimpeded, it is a test of the loyalty of the great transportation systems, the manufacturing establishments, and the inventive genius of the country to demonstrate their loyalty by prefer of unreserved service to the nation. Coordination of the business and transportation interests of the United States is in a state of unpreparedness. The rate at which ships and munitions can be turned out by American manufacturers and delivered to points desired by American railroads will amaze even the most optimistic.

The Government is already receiving such profits of aid, and they will continue to some so rapidly and numerously that there will be no necessity for commandeering either factory or railroad. It is not at all likely that Congress will find it necessary to confer upon Secretary Daniels authority to take over either factories or transportation lines to be operated under governmental control. No class of citizens will display greater loyalty and loyalty to the Government than the business men of the country, great and small alike.

It was announced months ago by Secretary of War Baker that the card index of the manufacturing and transportation interests of the country was in process of formation for governmental use. Not only has this index been completed, but during the progress of the work, constant assurance was received that men, machinery and all the resources of many establishments would be placed unreservedly in the hands of the Government in case necessity required.

This statement of Secretary Baker was supplemented by that of the President, one of the great steel companies of America, who gave his personal assurance, and on numerous occasions, the all of the enormous resources of that corporation would be placed instantly at the disposal of the Government when needed. Following the severance of diplomatic relations with Germany one of the greatest arms manufacturing companies in the country took similar action. It is certain to follow that scores of hundreds, perhaps thousands of similar manufacturing establishments promptly and unreservedly offer to the Government. This is the promise of a very real and important kind. If war should come the United States would be handicapped to the extent that might have predicted, Enquirer.

Again, it can be argued that even if all the water were diverted from Niagara Falls, the honeycombers who go there wouldn't notice it.

Keep a careful hold on your temper during these hot days, for tempers commonly become explosive in such weather.

The ups and downs of language are further shown by that brand-new emergency word "superaggravation."

Another thing the women should study when at the training camp is first aid to the sunburn.

Have You?

Many careful and economical managers have taken advantage of our Mid-Winter Clearance sale in Men's, Young Men's and Boys' Clothing and have profited. Have You?

Some of our customers, complain of having difficulty in locating us at our new store. The number of our New Building is 605 Madison Avenue, Covington, Ky. 1 square north of 1st location. The second door south of Sixth Street, West Side.

The disagreeable weather often prevents a trip to the city and the shopping must be postponed at the inconvenience of all concerned. We have overcome this difficulty by our superior mail order system. We are always glad to fill your order promptly, giving the same service and using best judgment in selection and price, that we would give a personal solicitation.

KEEPING STATE SECRETS.

(Philadelphia Ledger)

In war time there are numerous important state secrets which must be prevented from leaking out, and they are guarded by various ingenious devices. For instance in British Government offices the writing on important documents is dried by means of roller blotters. These consist of revolving cylinders covered with blotting paper, which are run over with wet ink. The writing is impressed on the cylinder in a confused jumble, impossible to decipher, as would be the case if the ordinary flat blotter were used. In some cases black blotting paper is used to dry official letters, as it is much safer than the pink or white variety.

Important telegrams, if not in code, often have to be guarded from prying eyes by Government officials. For this purpose, they use a simple little invention which consists of a telegraph form prepared with a perforated gummed edge. The message, having been written on the form is folded over and the edges gummed down, as in the case of a letter card, and its contents are hidden until the messenger who carries it to the telegraph office.

Each battle ship carries a book of code signals, which holds the meaning of the little flags which flutter at the masthead, when ships communicate. The code book is of immense importance, and is guarded as carefully as the hands of the enemy. Each volume is heavily weighted with lead in the cover, so that in an emergency it can be thrown into the sea with the certainty that it will sink.

Big Cattle Ranches.

(Seattle Post-Intelligencer.)

The passing of the "range" days in the 10,000-acre cattle ranches, the cowboy and the old "Wild West" has been mourned by writers and poets and long accepted as a fact, but recent events indicate that the cowboys are on the way back and that the old conditions are returning. This encouraging influence is the scarcity in cattle and the exceeding profitable market prices. Cattle have been "short" ever since the small farms crowded out the cattle ranges, and the great ranches. Now some of the small farms are being combined into great ranches again.

This change is particularly evident in Texas and Georgia. A corporation has taken over the holdings of dozens of individual land owners, formed a ranch of 128,000 acres and will make a business of raising beef cattle. Small farmers in various parts of the state who have earned scanty incomes are arranging to pool their holdings in like manner.

In Texas there are now nine cattle ranches that exceed 100,000 acres in extent. The smallest of the great ranches included 2,700 acres, and the largest has 422,000 acres. There is a ranch of 138,000 acres, the ownership being in one hand. The business of Texas cattle raising has been the tick. Protection against this pest is being provided by the operation of dipping vats.

There is no question about the profit of the cattle industry in the present market conditions. The business men of judgment are investing their funds in cattle, and the habit shows some signs of spreading.

SCATTER ALL MANURE

Can Be Distributed in Cultivated Field to Advantage.

If Fertilizers Are Spread in Fields and Plowed Into Soil, They Will No Longer Give Protection to Insect Pests.

(By C. E. SANBORN, Department of Entomology, Oklahoma A. & M. College, Stillwater.)

At this season of the year, farmyard manures and decaying waste can be distributed in the cultivated field to a marked advantage. Fertilizers consisting of manure and decaying straw and hay furnish excellent harboring places for gnats, hogs and flies that not only menace the farm crops, but also live stock and humanity.

If the manure and garbage are scattered in the open fields and plowed into the soil they will no longer give protection to the farm insect pests. The value derived from insecticide production on account of insect loss is fully met by more than pay for the labor. The civic improvement branch about by clean yards and barns will increase the value of the premises. The air will be purer and the disease germs fewer, and the infection to both man and stock reduced to a minimum.

Much has already been discussed relative to the removal of manure and filth for the purpose of lowering the premises of hog cholera. Experts have

Spreading Manure Properly.

clearly demonstrated that cleanliness is one of the best preventives for hog cholera.

Now, if sanitary conditions are honestly sought for a man, a man who lives one life, and this life should be one of practice rather than experiment. There are no grounds for supposing that accumulation of filth and manure can have no effect on the vitality of a human being living in the vicinity of it.

If a man thinks that his obligations are finished when he has washed his face and clothing for his family he is wrong. He should share his intelligence and demonstrate by putting sanitary actions into practice for family health protection. A family well dressed and well fed, but without health, is no particular benefit to a community.

Nearly all the prevalent ills of the body are either directly or indirectly disseminated by the housefly. The fly cannot develop without breeding places. Such places are generally contaminated with disease germs of various kinds. The elimination of the breeding places will rid the country of the flies, and also carry many of the germs which they commonly carry. Scatter the manure.

POINTS IN BUILDING SILOS

Huge Receipts Must Be Airtight, Perpendicular and Free From Corners and Projections.

In selecting and building a silo the following points, fundamental to its success should be kept in mind: To be satisfactory a silo must be airtight, perpendicular and free from corners or projections on the inside. A round silo, therefore, is the best type. The doors must be tight fitting and close together so that a minimum amount of silage must be removed in order to open the door. A continuous door is, therefore, advisable. Build your silo rigid and able to withstand strong winds. Consider it so freezing still be reduced to a minimum.

GIVE MEDICINE TO ANIMALS

Do Not Administer Drugs to Horse Through Nose—Become Familiar With Its Action.

Don't administer medicine to the horse or any other animal, through the nose. Nature never intended that way.

Don't administer any drug to an animal until you are familiar with its action, and exact condition of your patient.

Don't administer medicine on the "gun shot" plan.

MUD HASTENS HAIR SHEDDING

Animal Wanted for Show at Fair Should Be Given Good Thick Wash—Add Disinfectant.

If that old horse or cow you are wanting to show at the fair is not letting loose of her coat of hair, make her a wash of good thick mud. Also put some disinfectant in the water and wash some all cake mud and a few brown laid eggs on the side will help.

POPULAR WINTER COAT

A Cherish reproduction in black satin trimmed with gray fox fur, now being produced as the most popular style of coat. Featuring this model is the laced off which adds to the nobleness of the belt.

WHITE LACE VEIL BECOMING

It Softens the Telltale Marks of Time and Gives Appearance of Youthfulness.

Those women who wish to induce in an all white but find that this type of lingerie is not at all becoming, may be able to induce this fancy by adding a white lace veil to the white hat. When a woman's skin has lost its first freshness and begins to look a little sallow and wrinkled, a white hat seems to bring out all the age in a face. But add a white veil to the hat and a magical change will take place. White lace veils are almost invariably becoming to both old and young. They soften the telltale marks of time and give a semblance of youth to a face that has long since said goodbye to any such pretensions, by which it acquires an added beauty when seen behind a white lace veil. It heightens every good point she may happen to have.

SILK NETS ARE DURABLE

Though Expensive They Wear Longer and Give Better Service Than Tulle.

Silk nets, expensive, of course, but more durable than tulle, come in every color of the rainbow and every shade of the colors. They have less crispness than tulle, but are very lovely and so soft that they allow great fullness of skirt or flounce.

Made over chiffon, they must be held out by crinoline or by a petticoat. If they are to stand out, but many women like fullness without exaggerated drap or silhouette width, and a soft thing with enough satin frankly used on the outer part of the frock to raise the silk from the rank of linings, is often used in place of crinoline. A bit of thin elastic material, introduced on the inside of many of the finest frocks.

White Gloves for Spring.

Women's all white gloves will take longer in spring over those with black stitching and edges, if the process of dyeing is an indication. Three times as many all white are sold as of white with black. The popular glove is the one and two button, practically no long gloves. New York has a glove factory where the highest class goods are turned out. They are scraped at the New York house, cut, sewed, and the various embroidered designs on the back worked.

Cretone Dollies.

Bright color is no disguise to the luncheon table these dolls. Colored cretonne and dollies are replacing the all-white effects that have been fashionable of late. In the department where cretonne is sold one may buy a yard or two of striped cretonne on which are printed figures representing the plate and number of the dinner. A large cretonne, all in match, with a scalloped edge and festoon floral design. The cretonne may be spread on the table as it is, or the dollies and centerpieces cut out and used separately.

An Agreeable Mouth Wash.

A mouth wash which hardens the gums and also acts as a bleach on the teeth. Is two ounces of borax dissolved in a quart of boiling water. Before if gets cold add a teaspoonful of spirits of camphor. Shake well and pour a small quantity on the tongue. If this is used once or twice a day even badly discolored teeth will be greatly improved in a short time.

ROAD BUILDING

COST OF ROADS AND BRIDGES

Construction Expenditures Have Increased Nearly Fourfold in the Past Twelve Years.

(Prepared by the United States Department of Agriculture.)

Expenditures for the construction of roads and bridges in the United States have increased nearly fourfold in the past twelve years, while a greater and greater proportion of the expenditure expended have come to be paid out under state supervision. At the same time there has been a marked decrease in the proportion of contributions to road building in the form of state subsidies recently compiled by the office of Public Roads and Engineering of the United States department of agriculture.

The total length of public roads in the United States outside the limits of incorporated towns and cities was about 2,152,000 miles on January 1, 1916. Of this, about 27,000 miles, or 1.3 per cent, were improved with some form of surfacing. The mileage of surfaced roads has been increasing at the rate of about 16,000 miles a year, and in 1915 approximately one-half of this increase was made under the supervision of state highway departments. In addition these departments supervised the maintenance of nearly 52,000 miles of main and trunk-line roads.

The increase in expenditures for road and bridge work in the United States has been from approximately \$80,000,000 per year in 1904 to about \$282,000,000 in 1915, an increase of more than 250 per cent. The expenditure of state funds during this same period increased from about \$2,500,000 to more than \$35,000,000. In addition, more than \$27,000,000 of local funds was spent under state supervision in 1915, bringing the total road and bridge expenditures managed by the states to \$89,514,320. This amount is greater than the total expenditures for roads and bridges from all sources in 1904.

The growth in importance of the state highway departments has been rapid. The first of these agencies was created in 1891 in New Jersey and now some form of highway department exists in every state except Indiana, South Carolina and Texas. Since their inception these departments have expended in January 1, 1916 an aggregate of \$25,379,825 in state funds for road and bridge construction, maintenance, and administration. They had constructed over 50,000 miles of roads in cooperation with the states. More than 40,000 miles of these roads were surfaced.

The falling off in the value of road work performed by statute and convict labor was from \$210,000,000 in 1904, when the total road expenditures were \$80,000,000, to about \$15,000,000 in 1915 when the total expenditures had grown to \$282,000,000. This was a reduction from 25 per cent of the total in the former year to less than 5 1/2 per cent of the total in 1915.

An increase in the use of better and more expensive types of roads also is shown by the recently compiled statistics. This development has been due in large part to the great increase in automobile traffic. It is estimated that there are now approximately two and a half million automobiles in use on the roads of the country, or one car for every mile of road. This present motor traffic is in excess of traffic of all sorts 12 years ago.

The road and bridge expenditures of the United States averaged only \$28 per mile of rural roads in 1904. In 1905 this average had grown to \$109 per mile. New Jersey led all other states both in 1904 and in 1915, with \$221 and \$175 per mile respectively. Nevada made the lowest expenditure in both years, \$3.72 per mile in 1904 and \$17 per mile in 1915.

GOOD ROADS AND FARM AUTOS

Where Better Highway Spirit Has Brought Results, Greater Farm Prosperity Is in Evidence.

In Georgia, as elsewhere, wherever there is a county with a good roads record; where the good roads spirit has brought permanent results in a thorough, working system for the maintenance of a county's roadways, greater farm prosperity is in evidence, and the automobile and the auto truck are in demand. And under such conditions there will be an increasing demand for them.

A prosperous Georgia farmer said recently that, working on the line of greater farm efficiency, progressive farmers are extending their farming operations.

That science and invention can afford, no matter what the cost.—Atlanta Constitution.

Millions for Arkansas Road.

Road work projected in Arkansas from October 1, 1915, to October 1, 1916, was 1,239 miles in length at an estimated cost of \$5,000,723.87, according to announcement by W. B. Owen, state highway commissioner.

Conserve the Straw.

Don't burn the straw. If anyone tells you that burning it is better in the straw tell him that it isn't so. The fly remains dormant in the first joint of the straw and even burning the stubble doesn't get them all.

The KITCHEN CABINET

The always displeased with what they cook, if they desired to attain to what they did not; for where there is fastidiousness, there is the highest quality.

MILK AS A FOOD.

It is right that we should be reminded of the value of milk in the diet, to use it to replace more expensive foodstuffs and reduce the food bill.

Skim milk has nearly all the food principles left in it with the exception of the fat. What is left has all of the value of whole milk for the tissue building and repair. The removal of the fat has reduced the fuel value of the milk one-half, but it is a cheap food and one which should be more generally used. For example, soups, rice puddings, bread puddings, escalloped dishes of various kinds, as a drink, and to be used in breads, has a valuable place.

Popovers.—Beat two eggs thoroughly, add gradually seven-eighths of a cupful of milk, a cupful of flour, a half teaspoonful of salt, beat all together two minutes with an eggbeater, then add a half teaspoonful of melted butter. If skim milk is used, add a teaspoonful of melted butter.

Sour Milk Biscuits.—Sift together a quart of flour, a teaspoonful each of soda, salt and sugar, cut into the flour two tablespoonfuls each of lard and butter and use a cupful and a half of sour milk; the milk and flour varies somewhat, so that the milk should be added to make a soft dough that can be handled. Bake the biscuits in a hot oven and serve honey or maple syrup.

The amount of milk which each individual should consume daily is estimated at one quart, the amount we do consume is a small glass. If each housewife would double her milk bill in one month, making also use of the milk in her food, she would find she would cut her grocery and meat bill quite noticeably.

Parker House Rolls.—Take a pint of milk, three tablespoonfuls of shortening, a teaspoonful of salt, and one yeast cake dissolved in a fourth of a cupful of water. Combine the ingredients and add them, beating vigorously until no more flour can be added. Over and roll rise until three times its bulk, cutting it down several times with a sharp knife, then roll, cut, spread half with butter, fold and put to rise in a hot oven 20 minutes.

Nellie Maxwell

A house may have had every thought and care expended upon its furnishings and equipment, every device for convenience and comfort, and yet fail to be a home. The home atmosphere is created by the ideals of the family or her who is in charge of the administration and management.—Kline and Conley.

EVERYDAY LUNCHEON DISHES.

When the breakfast is light the noon luncheon should contain one hot nourishing dish. When the breakfast is hearty a lighter luncheon may be served. The noon meal should, when possible, be the children's dinner, as dinner at night is too hearty a meal where children retire very early, as they should.

Onion Soup a la Clermont.

Put one dozen small onions in rings and fry in golden brown in a little olive oil. Remove and add them to two quarts of veal or mutton broth, colored with a little kitchen bouquet. Add salt, pepper and serve with croutons.

Banana and Peanut Salad.—Slice bananas in thin slices, cover with finely ground peanuts and serve on lettuce leaves with mayonnaise.

Pork Chops With Apples.—Put the chops out to cook in two tablespoonfuls of boiling water, turn and leave covered to let the steam escape, then brown and remove to a hot platter. In the hot fat place unpeeled apples that have been pared and sliced, sprinkle with a little sugar and a pinch of spice, brown on both sides and serve around the chops on the platter.

Ham Croquettes.—Slice cold boiled ham very thin. Mix with an equal quantity of cream, cold-baked rice, or mashed potatoes. Bind with a raw egg, shape into croquettes, dip in egg and crumbs and fry in deep fat. Drain on brown paper.

Stuffed Cabbage.—Cut out the stalk end of a cabbage leaving a hollow shell. Tie the cabbage in a cloth to keep it from losing its shape and cook in boiling, salted water until tender. Make a stuffing of bread crumbs or any seasoned meat, fill the drained cabbage, sprinkle with grated cheese and buttered crumbs and brown in a hot oven.

Baked Sausages With Rice.—Purcell a few sausages and place them on top of a dish of boiled rice, put in the oven and bake until the sausages are brown. Serve hot from the dish in which they were baked.

Nellie Maxwell

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pre-steel frame—every supporting part a forging or pressed steel—Republic Torbenston Internal Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750
1 1/2 Ton Truck \$1275. 3 Ton Truck \$2550

County News Items

Interesting Facts Gathered During the Week by Our
 Regular Correspondents.

FRANCESVILLE.

Mr. and Mrs. Harry Kilgore spent one day last week at Manlius Goodridge's.
 Rev. Claunch of Harrodsburg, preached two interesting sermons at Sand Run, Sunday.
 Misses Mary Frances and Emma Goodridge entertained Rev. Claunch and Karl Bradford, Sunday.
 R. S. Wilson and wife, of near Hebron, and Miss Katherine Bates were guests at W. L. Brown's, last Sunday.
 Chas. Anderson, of near Harrison, Ohio, was the Saturday night and Sunday guest of Misses Anna da Koons and Sadie Riman.

BELLEVIEW.

Mamie Jane Delph, daughter of Mr. and Mrs. Asa Delph, died a few days since aged 17 years. She was a very bright and cheerful girl, and her death was a great grief-stricken her parents, four brothers, three sisters and her aged grandmother, Mrs. George Louden. Mamie was loved by all who knew her and it is not understood why the dear one should have been taken at so tender an age, but to the will of Him who doeth all things for the best we bow in humble submission. Sad was the scene at the grave when the bereaved family took the farewell look at the one so dear to their hearts, but as Mamie was a good christian girl, and although she was a member of no church, the assurance that she will exist in the bright beyond is a comfort to the bereaved family. The family have the sympathy of all in their affliction.

Card of Thanks—We desire to thank our neighbors and friends for their kindness during the illness and death of our daughter and sister, Mamie J. Delph; Dr. Carlyle for his services, Rev. R. McNeely for his comforting words at the cemetery, Mr. Steel for his service, and the Red Men and Maggie Kelly for the beautiful floral offerings. The Family.

Lots of ice in the river and boats are not running.
 Lewis Clure and William Presser were Sunday guests at D. S. Rie's.
 Mr. and Mrs. Stanley Clure spent Sunday with Mrs. Anna Clure.
 Sheldon Plick, student of Heron College, has had a severe attack of measles.
 Riley, Oria Phillips and Chas. Maurer were visitors here last Friday.

After a visit with relatives here, W. Rice has returned to his home at North Manchester, Ind.
 W. A. Williamson has returned to his home in Ashland, Kansas.
 Mrs. B. F. Rogers went with him for an extended visit.
 The play which was announced for the 17th has been postponed until Thursday eve, Feb. 22. Everyone come and see will insure you a good time. The success of the entertainment depends wholly upon the proceeds of this play.

FLICKERTOWN.

Alice White has rheumatism. The sick do not improve much.
 Herman Rude will move to Indiana next week.
 Ira Kittle and wife visited Albert Acra, Sunday.
 Leslie Sebree's little boy was quite sick Saturday night.
 Mrs. Laura Sebree called on Mrs. J. W. White one evening last week.
 Mrs. R. W. Rice visited her daughter, Mrs. Leslie Sebree, last Sunday.
 Abra Finn froze his ears coming from Walton, one day last week.
 Miss Emma and Cleve Aylor visited Mr. C. Stephens and family, Sunday.
 Misses Eva and Hazel Akin called on Mrs. Goldie Rice, Friday afternoon.

Charles Shinkle has rented his farm to C. G. Pigg and will have it sold on the 25th.
 James Snyder and wife, Bolivar Shinkle and wife, and Herman Rude and wife, Sunday at Jas. W. White's.
 Fann Bros. and Herman Rude were well pleased with the price they received for their tobacco on the Walton loose leaf market.

BEAVER.

O. W. Cleek has a position with the street car company in Covington.
 W. H. Isabel moved to J. W. Cleek's farm near Walton, last week.
 Mr. and Mrs. Patsy Madden's child is very ill with bronchial pneumonia.

G. W. Osaman attended the funeral and burial of Mrs. Lee Hume at Verona, last Thursday.
 John McCabe moved to Mrs. Sallie (Green) Hulse's farm near Beaver, last week, and will raise a large crop of tobacco.

Wm. Wilson, Peter Kraus and W. C. Johnson filled their ice houses last week with ice 6 to 7 inches thick and as clear as glass.

Mrs. G. W. Osaman spent last week attending the millinery opening in Cincinnati and making purchases for the early spring trade.
 Mrs. Sallie Willis Huey, of Big Bone church neighborhood, is very ill with pneumonia. Dr. R. R. Ryle and Miss Cora Aylor are attending her.

Mrs. Sallie Ann Rust, aged 30 years, died at her daughter's, Mrs. J. P. Hamilton, last Friday afternoon, near Big Bone Springs. Interment at Big Bone Baptist church, Monday, Feb. 11. C. Scott Chambers undertaker.

Chas. McCabe, G. A. Shyback, Harry Bailey and Kruse Johnson attended the funeral and burial of Wm. Devison, last Thursday at the Carr cemetery. Mr. Devison was a Boone county man and a brother of James Jerry John Tom and Andy Devison, and died in Hebron, Colo., Sunday morning, Feb. 5th, aged 35 years.

VERONA.

Some say that most all of the fruit has been killed.
 We learn that a great lot of stock has been frozen to death in the country round about.
 The coal situation here is becoming serious. The weather continues very cold and almost every one is out of fuel.
 Mrs. Julia A. Hume, beloved wife of L. J. Hume, passed away after a long and painful illness at St. Elizabeth Hospital, Covington.
 J. M. Powers, who underwent a surgical operation at a Cincinnati hospital, is getting along nicely and will be brought home this week.

Mrs. W. H. Chapman, 65, who resided a few miles south of this place, died last Sunday morning of pneumonia. She leaves behind a kind husband and eight children and many kind friends, to mourn her death. Funeral today at Concord church of which she was a consistent member. The remains were buried in this family grave yard.

All that physicians and loving hands could do proved unavailing at the remains for her to Sunday guests of Robert Snow. Mrs. Chapman was badly hurt one day the past week by a load of hay overturning and throwing her violently against the ground. Miss Julia Stephens was very hurt Sunday morning. She fell on the ice, striking her head and was unconscious for several hours. At this writing she cannot tell the extent of her injuries.

Mr. Wayne Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.
 R. D. No. 3.
 Barnes is numbered among the sick.
 Smith Goodridge spent last Sunday with relatives at Taylorsport. Manlius Goodridge and son, Raymond, are on a trip to Cincinnati, last Monday.
 Wm. Houze and wife, of Ludlow, spent last Thursday with his sister, Mrs. S. Eggleston.
 Mrs. Ray Botts was called to the bedside of her sister Mrs. Mamie Helms, who is very low at Guilford, Indiana.

Will Kruse and family and Will Reimann spent last Saturday with her parents, Mr. and Mrs. Will York, on Gunpowder.

T. B. Eggleston and son, William, and J. Eggleston attended the horse sale at Union Stock Yards, Cincinnati, last Wednesday, and T. B. bought a fine work mare of which he is very proud.

RICHWOOD.

Miss Stella Dixon is improving. Fudge Rich spent Sunday at A. E. Tanner's.
 Miss Augusta Link has been ill with pneumonia.
 The roads have been rough, of late but not muddy.
 Thomas Carpenter has moved to the Jeff Carpenter farm.

Mr. Hambrick is badly hurt who have been sick, are better. A vicious hog bit Mr. Lee-Clock's Collie dog and it bled to death. Our mail men pulled his mail wagon in two one day the past week.

J. S. Cason our Watkins man, broke down near Hebron, a few days ago.

Mr. and Mrs. C. E. Tanner spent Sunday with Ed. Wright in Kenton.

The pie social given by the pupils of Mt. Zion school, Saturday night, was a success.
 Mr. Hambrick and Theo. Carpenter attended a milk meeting in the city, last Friday.

F. H. Youell delivered two loads of tobacco Monday to the loose leaf house for Sam Hicks.

Mr. and Mrs. Fred Holquist, of Covington, were Saturday and Sunday guests of Robert Snow.

Mr. and Mrs. Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.

Mr. Wayne Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.

Mr. and Mrs. Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.

Mr. and Mrs. Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.

Mr. and Mrs. Rusk secured the contract for the Proctor's building and at this writing it will be a bridge-like pile unless providence provides that the softening of the hearts of all benefitted enough to touch their pocket-book.

BUCKEYE CORNER.

Bryan Alphin has measles. Three of Mrs. Brown's children have measles.
 Lorn, to Louis Stahl and wife, Feb. 5th, an eight pound girl.
 E. Rider and daughter, Miss Edna, went to the city Sunday.

Geo. Burris and family were the guests of G. D. Picher, Sunday.
 Harry Rider, of Elvanger, is visiting at his uncle, Rev. Robinson's, T. B. Miller and Mrs. Elbert Wilson are sick with bronchial trouble.

Geo. Burris shipped to Cincinnati, by truck, Monday, a bunch of hogs.
 Olive Rider and wife, of Point Lick, were guests at E. Rider's, Saturday and Sunday.

Mrs. Roll Robinson and children were guests of Geo. McIntyre, of Hamilton, last Sunday.
 Walter Jones delivered his crop of 1320 pounds of tobacco last Thursday to J. B. Alphin at Walton.

RABBIT HASH.

Charles Robinson, of Big Bone, accompanied by his wife, Monday, Mrs. Bester North, of Aurora, spent a couple of days last week at E. L. Stephens in East Bend.

John L. McKinley, of Scott county, Ind., is very sick at the home of his son-in-law, Dr. Carlyle and expects to live only a short time.

The river is full of ice and all boats have stopped. Very difficult crossing at the ferry, but still running.
 Miss E. H. Aylor returned to her home at Lawrenceburg, Sunday, after a two weeks' visit with her grandparents, Mr. and Mrs. J. J. Stephens.

Mrs. Addie Scott is at Covington this week attending a meeting of the Pythian Sisters, given in honor of the Supreme Chief, Lilly Samuels, of California.

Telfor McCoskey and Mrs. Grover Gardner, of Scottsburg, Ind., accompanied by their uncle, Levi McCoskey, arrived here Sunday to be at the bedside of their father and brother, John McCoskey.

Mamie, oldest daughter, of Mr. and Mrs. Asa Delph, died last Thursday morning in her 18th year of pneumonia, after a short illness. The remains were taken to Bellevue, Saturday, for interment.

WALTON.

Mr. and Mrs. J. H. Hance have bought a fine Hamilton mare as a present for their daughter, Miss Susan Hance.

Jas. Hutton, the venerable father of J. Wm. Hutton, has been quite ill the past week but is now much better.

Mr. and Mrs. Allen have been quite ill with the grippe. Mr. Allen is now able to be about again and was at the garage this week.

W. Smith received information of the serious illness of his son-in-law W. Berry Noel at Sandford, Florida, the first of the week. He has been ill with consumption and his death is expected daily.

CARD OF THANKS—We wish to thank our many friends, including Dr. Rankins, Rev. E. C. Lacy and Undertaker Scott Chambers, for their kindness shown us during the illness of our beloved husband and father, Susan Seavour and Children.

PETERSBURG.

Rev. Wm. Wool proached at the M. E. church Saturday night, last Sunday.

Mr. and Mrs. B. H. Berkley were Sunday guests of Rev. and Mrs. R. C. Carter, who will preach at the Christian church on the second and fourth Sundays of each month.

The funeral of Miss Allie Snyder, daughter of the late William Thornton Snyder, was held at the Christian church Sunday afternoon at 2 p. m. and was very interesting. The body was placed in the vault of Petersburg cemetery.

"The Land of the Heavens" (Snyder) was presented by the Christian church Saturday night to a fairly good sized audience. Several of the numbers were very interesting, especially "Sally's Boat" by Danner, and "Jimmie Saves His Father."

A Week's News

The fruit buds are safe yet.
 Snow has been in sight all this month.

Julie Gaines came down from Williamson to spend Sunday at home.

Bright and cold Sunday. The thermometer was below freezing all day.

Ice eight inches thick could have been obtained on ponds last Monday morning.

The hard freezes this month should make the ground break easy this spring.

Mr. and Mrs. J. J. Stephens, of Walton, were guests of friends in Burlington, yesterday.

The performers in the second number of the Lyceum Course at the court house Saturday night.

Mr. and Mrs. Geo. W. Baker, of Lima, are recovering from a serious illness of several days duration.

An Illinois man has written Cadillac to offer to give him his White Lghorn pullets, that are taking part in the Egg Laying Contest at Lexington.

Miss Laura Frances Riddell returned last Friday evening from Dayton, Ohio, where she spent several weeks with her uncle, W. T. Riddell and wife.

The price of lambs will justify their being given the very best of attention this season. The loss of one or a dozen means the loss of close if not \$100.

James Crawford and Fred Beach, who live on Bert Gaines' farm want to secure a good place to work this year. Apply to them for further particulars. No milking they say.

That bum eye James E. Smith carried a few days last week was the result of a bee's sting. He was taking the little insects—winter supplies when it got in its work just above his optic.

L. A. Tanner called in Monday to renew his allegiance to the Recorder for another year. Judging from his looks the high price of living has not curtailed, in the least, the menu at his home.

The mercury was from 2 to 4 below zero last Monday morning. The sun shone brightly all day but the temperature remained considerably below freezing. The wind changed to the east sharply afternoon.

Thomas Judge, of Union, was among the business visitors to Burlington last Monday. Leap year was a failure as to Mr. Judge and he was very worrying because of the length of time to elapse before another.

William Finn, the High School student who was taken to the hospital several days ago has found that it will be necessary for him to remain in the institution longer than he anticipated, his car trouble being more serious than he thought for.

Charles Shinkle and Jas. H. Snyder, of Batesburg neighborhood, were among the Recorder's Monday visitors. Mr. Shinkle left an advertisement for a large sale on the 25th when this advertisement appears in another column this week.

Clarence Turner, J. S. Cason, Dr. Clifton, L. C. Cleek and others are pushing the construction of the Frog-Union pike across over last Monday and executed the same by securing a check-out to secure the payment by the citizens one-fourth of the cost of the construction of said road.

William Holmes, a dryman, in a card says: "The sale of impure milk is the fault of our citizens. Good milk can be afforded at 10 cents per quart and thirty-two cents per gallon wholesale, and not for less."

The above is a paragraph that appeared in the Cincinnati Daily Commercial fifty years ago last Monday.

Quite a number of private individuals have handed in bids for county road bonds that will be sold on the 20th. The amount of bids in her favor is \$22,000, and the members of the Fiscal Court would be very much gratified if the citizens of the county would take the entire block. These bonds are a most valuable feature that should make them popular with those who have surplus money on hand.

Prof. and Mrs. Muntz and Dorothy Muntz visited John Gilligan and family, of Covington, over Sunday and during the time they called on Mrs. Henry Parsons, who live with their son, and wife, in Cincinnati. The Parsons were formerly citizens of this county and were very popular in this county.

Prof. and Mrs. Muntz and Dorothy Muntz visited John Gilligan and family, of Covington, over Sunday and during the time they called on Mrs. Henry Parsons, who live with their son, and wife, in Cincinnati. The Parsons were formerly citizens of this county and were very popular in this county.

LINES ARE SIMPLE

NEW MODELS HAVE STRAIGHT SILHOUETTE AS FEATURE.

Coats Reach Almost to the Skirt Here—Much Velvet and Satin is Being Used in Latest Street Frocks.

The fashions for 1916 and 1917 are launched and many of the models are extremely simple of line though often fashioned of sumptuous materials. The characteristic feature of the new model is the straight silhouette. Skirts, as a rule, begin on the hips and have belts—often laced very low toward the back, in the manner of certain modern day frocks.

The middle-aged period is apparently inspiring dressmakers more or less with ideas, though in the designs from some well-known sources one catches but a more suspicion of its influence, while other countries so in for closer copies.

Machine Lingerie has always shown a preference for the straight line and at the present time she is using it with artistic effect. Her tailored costumes look simple and have a warm, cozy air about them.

Many have embroidered velvet waistcoats, and extremely smart and simple is the straight collar band slipped inside the vest and waistcoat.

There are costumes, exploited by Madame Lanvin in Jersey and some in burlesque and in thick beige tulle, but one of her most sensational novelties is the daisy jacket, of which there is a variety of models, each one being original in style.

One extremely smart model is rich Russian green, a color by the way, which will be a great favorite. It features at the side and has for its sole trimming some arrows in silk stitches. Another is a soft gray dress, a color which is particularly pretty with the black velvet skirt it accompanies. Two pockets show across the side-slits of the coat, which is hemmed with heavy fur.

As a rule the coat model of the season is long. In his tailored costumes Worth emphasizes the long coats, reaching almost to the hem of the skirt. Some countries favor long redingotes, shaped in at the waist and simply trimmed with fur collar. One such model was in bordeaux velvet trimmed with fur, and the waistline is defined by a black satin belt showing here and there under dull bold embroidery.

A charming street frock intended for dressy afternoon wear is in velvet, in a deep old rose tone, trimmed with narrow bands of skunk. The frock fastens down the front with small material buttons.

Much velvet is being used, likewise satin, and an attractive mixture of fall and burlesque.

A charming model in black charmeuse was edged with chinchilla, and the coat, slightly shaped, showed three flounce-reaching almost to the bottom of the skirt. The coat opened slightly, showing a fourrague reaching to the hips of pinkish cloth, fastened with multi-colored buttons.

GORGEOUS EVENING GOWN

Egypt and its Cleopatra designs will dominate the fashion world to a large extent this winter.

Evening gowns, in particular, will feel the influence of the Egyptian patterns. This gorgeous evening gown, designed by Harry Collins, fashion expert, is in the style of Egyptian creation that will make its bid for popularity.

The body of the gown is made of black chiffon velvet. It is in the robe that the Egyptian tendency makes it self felt. The shoulder straps also are of the Egyptian design.

SMALL FARMS FOR THE EAST

Ranches of 600 Acres or More Not Desirable for Thickly Settled States of Union.

The farm of 300 or more acres devoted to one or two crops, may be best for the great grain-growing and grazing states of the West, but it is not desirable in the thickly settled communities of the middle and eastern states. The tendency in some of the states for the corporation ownership of farmhands to compete with industrial progress in other lines of commercial activity is back of this movement.

With the advent of the large farm worked by hired labor, the farm home disappears, farm life, community interest, churches, schools and rural advancement is lost, says a writer in the Baltimore American. We have in its place a big system which may be profitable from a money point of view, but which will ultimately result in financial loss to the owners, and an injury to the best interests of the community and state. This leads to unrest, and a divided community. The small farm with its quiet, comfortable home and conveniently arranged buildings, cultivated by the owner and his family, makes a live, intelligent, thrifty community. When a man owns his home he takes more interest in his state and nation and becomes a patriot in the best sense of the word.

AVERAGE COST OF PLOWING

Estimated that It Requires Approximately Ten Horse-Power Hours to Turn Acre of Land.

It has been estimated that it requires approximately ten horse-power hours to turn an acre of land. When the team goes at a good speed one show will turn about two acres in ten hours. This will require that the horses travel 175 feet per minute and exert a continuous pull of 375 pounds or 127.5 pounds per horse.

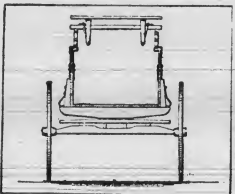

According to statistics compiled by the government horse labor cost 125 cents per hour. At this rate ten hours work will cost \$12.50, which may be said to be the average horse cost of plowing an acre.

The cost of plowing an acre with a tractor depends upon many factors. One must consider the size of the tractor, fuel used, condition of the ground, etc. One example is given in an 816 tractor burning from 15 to 20 gallons of low grade kerosene per day of ten hours, one gallon of lubricating oil, at a cost of \$1.65 for hour's work. Two 14-hp plows, traveling 20 miles a day, plowed 5.66 acres at a cost of 34 cents an acre.

SPRING FOR LUMBER WAGONS

Mighty Uncomfortable to Ride for Any Distance Over Frozen Roads on Ordinary Seat.

Those of us who have ridden miles on lumber wagons over frozen roads know the value of a spring seat. Here is one that is a little different. Charles Frederick Hinkley, an Illinois inventor, recently being granted a patent on it. There are springs at each side

Spring Seat for Wagon.

to fit over the edge of the top box as in other spring seats, but there are cross-bars on top of these springs. Rocker arms are hung beneath the seat, on the cross-bars between the springs. Depending hangers, rigid with the seat, are pivotally supported at their lower ends of the rocker arms, each of said rocker arms being mounted on the cross-bars to one side of and against a hanger and are disposed at an angle to this hanger to permit the springs to flex as well as allow the vertical movement of connecting cross-bars.—Farming Business.

MONEY IN SELLING LOAFERS

Keep Daily Record of Each Cow to Find Profitable Animals—Difference Soon Seen.

Cows look alike but their work at the pail is unlike. Keep a record by weight of the daily yield of each cow and you will soon see the difference. You will find, as every other dairy cow owner has found, that about half your herd are paying a profit, while the other half are loafers.

There is more money in selling the loafers as canners at almost any old price, than in putting costly feed into them with the expectation of reaping a profit on their output.

BEST RETURNS FROM GRAINS

Eight Pecks of Wheat to Acre Will Most Likely Hit Pivotal Point—Grading Counts.

Sow eight pecks of wheat to the acre and you will most likely hit the pivotal point in net returns. And that depends, too, on how you grade and drill your seed.

Small grain seedling does not seem to have yet become an exact science.

The KITCHEN CABINET

There is no time work ever done without enthusiasm. The artist whose heart is cold is a mere artisan. With no wide reaching affection and no uplifting ideal we make life a dreary and our duty of unalloyed tragedy.—Philip Mosson.

MORE MILK DISHES.

For economy let us use more milk. It is a valuable food and one quart, even at 15 cents has as much nutrition as three-quarters of a pound of beefsteak which has a large amount of waste. Milk is without waste, therefore a most economical food. If skim milk is used largely, when setting the sponge for bread, the product will be more highly nutritious, less shortening is used and a tasty loaf will result.

Potato Soup.—Cook and mash three medium-sized potatoes. In a quart of milk, skim milk may be used, add a slice of onion and a stalk of celery; scald and remove the vegetables, pour over the mashed potato. In a saucepan put two tablespoonfuls of butter, if the milk is skimmed, one if whole milk is used; add two tablespoonfuls of flour, a teaspoonful of salt, and when well blended add a little cold milk and pour it into the soup. Boil up and serve piping hot with toasted crackers.

Cream of Tomato Soup.—In a saucepan melt three tablespoonfuls of butter, add three and a half tablespoonfuls of flour and stir until smooth, add a teaspoonful of salt, a teaspoonful of chopped onion, then add a pint of canned tomatoes, mixing well. Add soda and onion, return to the fire after straining and pour this mixture, slightly cooled into a cupful and a half of milk. Reheat and serve hot. Do not boil or the soup will curdle.

Cheese Soup.—Scald a quart of milk, add a slice of onion, a blade of onion, and a pepper pod. Melt two tablespoonfuls of butter in a saucepan, add the same amount of flour, when well blended add the milk, removing the seasonings, and cook until creamy. Just before serving add a half cupful of grated cheese, two egg yolks, well beaten, salt, and pepper to taste, stir until the cheese is melted. Serve at once.

The cream soups which are so nourishing and which are made of various vegetables may all be made with skim milk, adding a little more butter to the flour for the binding, thus giving the food its right balance of fat.

Nellie Maxwell

The home-maker must fill many niches in her home and at the same time, well be able to direct with force and initiative all the business of the household.

GOOD EATING.

Bananas are like the poor, always with us, and the many ways that this wholesome fruit may be served is legion.

Banana Pie.—Rice enough peeled bananas to fill a cup. To this add half a cupful of sugar, two tablespoonfuls of molasses or the grated rind and juice of half a lemon, half a teaspoonful of salt, one beaten egg, one-third of teaspoonful of cinnamon, half a cupful of milk, and a third of a cupful of cream. Mix all together thoroughly and bake until firm in a pie plate lined with pastry.

Mexican Rabbit.—Melt a tablespoonful of butter in a saucepan, add half a pound of American cheese cut up in fine bits; stir until the cheese melts, add three-fourths of a cupful of cornmeal and a large red pepper, cut in squares or shreds; then add the yolks or two eggs, beaten, and mixed with half a cupful of thick tomato puree, half a teaspoonful of salt, and half a teaspoonful of paprika; stir constantly until the mixture is thick and smooth. Have ready four slices of toasted bread, toasted on one side only. Cut a clove of garlic in halves and touch the untoasted side of the hot bread here and there with the garlic; pour over the rabbit and serve at once. A carefully poached egg may be set above each slice, which will furnish a hearty meal.

Graham Bread.—Make a soft sponge of one cupful of warm milk, one teaspoonful of sugar, one teaspoonful of salt, a tablespoonful of butter, one-third of a yeast cake, dissolved in a fourth of a cupful of warm water, and white flour to make a thick batter. Cut the dough with a knife after it has risen and letting it stand overnight, then add three-fourths of a cupful of milk, three tablespoonfuls of molasses, a half teaspoonful of soda and grain flour to make a thick batter. Knead with white flour; let rise, and when double its bulk, bake 40 minutes.

Peas in Potato Cups.—Make small cups of mashed potato, brush with egg and brown, fill with creamed peas and serve at once.

Nellie Maxwell

"Cured"

Mrs. Jay McGee, of Stephenville, Texas, writes: "For nine (9) years, I suffered with womanly trouble. I had terrible headaches, and pains in my back, etc. It seemed as if I would die, I suffered so. At last, I decided to try Cardui, the woman's tonic, and it helped me right away. The full treatment not only helped me, but it cured me."

TAKE
Cardui
The Woman's Tonic

Cardui helps women in time of greatest need, because it contains ingredients which act specifically, yet gently, on the weakened womanly organs. So, if you feel discouraged, blue, out-of-sorts, unable to do your household work, on account of your condition, stop worrying and give Cardui a trial. It has helped thousands of women—why not you? Try Cardui. E-71

Road Bonds For Sale

Sealed bids will be received by the committee at the office of the County Judge in the Court House, Burlington, Kentucky, until 12 o'clock noon, February 20th, 1917, for the sale of Bonds Nos. 1 to 50 of Boone County's \$200,000 Bond issue for road purposes. These Bonds are in denominations of \$500.00 each, bearing 4 per cent. interest payable January 1st and July 1st and due January 1, 1922. You can bid for one or more Bonds. Bonds are dated January 1, 1917.

No taxes can be collected on these Bonds and they are equal to an investment that is taxable of about 5 1/2 per cent.

The Fiscal Court has entered an order that these bonds cannot be sold for less than par and accrued interest, which will make each bond amount to \$502.77 on day of sale.

P. E. CASON, County Judge, N. E. RIDDELL, County Attorney

Testing the Eyes
Sometime when people get glasses that suit them they go on wearing them for years without having their sight tested to discover whether any change has taken place. This is wrong. All should have their eyes tested at intervals. Glasses for old sight should be changed every two years. Whenever you feel uneasy in your glasses don't hesitate to call and see us. If no change is necessary we will tell you.

Local Happenings.

G. T. Rue, of Bellevue neighborhood, who has resided on Rice's farm for sixteen years, was in Burlington last Thursday. The farm has considerable soil adapted to the production of water-melons, and Mr. Rue has cultivated a large crop of melons nearly every year he has occupied it, and has become famous for his large, delicious melons, being visited every summer by many city people who returned home with their conveyances loaded with his product. Mr. Rue has decided to about abandon the production of melons this year and will turn his attention to the cultivation of a large crop of tobacco.

According to an exchange cablegram, a year ago were sold at \$6.50 a bushel this year quoted in the United States at \$8.00. With this announcement comes the statement that the stock of cabbage is larger now than a year ago, but that they are in the hands of speculators, who are holding them for still higher prices. It is, it seems, now time for those who have learned to do without eggs and butter to make similar arrangements with regard to cabbage.

The first record for 50 pounds of butter in 7 consecutive days under official test has been made by Segis Payne Johanna, a Holstein-Friesian cow owned by Oliver Cabana, Pine Grove Farm, Elma Center, N. Y. In the week ended Jan. 3, she produced 73.5 pounds of milk and 56.8 pounds of butter, 3.91 pounds more than her nearest competitor, the North Dakota cow.

It was remarkable that two ex-postmasters were laid to rest in Carrollton last Thursday. J. E. Grobmyer, who served under Cleveland's Administration from '93 to '96 and I. C. King, who succeeded Mr. Grobmyer under McKinley's Administration, and was the incumbent when Carrollton's new customhouse was dedicated. Carrollton News.

It was so cold the first Monday in this month that the Farmers Mutual Fire Insurance Co. adjourned its regular monthly meeting to last Monday, when the weather was again very cold, but the wind was not blowing.

An Enquirer truck struck E. E. Kelly's truck in Cincinnati one day last week. One of the rear fenders on Kelly's truck was badly disfigured.

Some of the Henry's seemed to have dual power last week, gasoline and steam, and even then it was with difficulty they stayed in business.

The local banks observed "last Monday" as a holiday, it being Abraham Lincoln's birthday. Next Thursday will be Washington's birthday.

J. P. Johnson, of Big Bone church neighborhood, has sold his farm and will have a public sale beginning at noon next Saturday.

At the York sale last Saturday corn sold as high as \$1.82; cows as high as \$85, and horses one hundred and twenty-five dollars.

W. L. Kirkpatrick hauled to the city one day last week for Hubert Ryle, of Carlton precinct, a hog that brought \$50.

Mrs. L. A. Popham, of Pt. Pleasant neighborhood, has been quite ill for several days. Dr. Yelton is attending her.

William Rice, of North Manchester, Indiana, was the guest of his cousin, Edward Rice, one night last week.

Prof. J. H. Munz, and wife spent from Saturday until Monday with friends in Covington.

It is said that ten million dollars were invested in automobiles in the United States in 1916.

Local papers are carrying a large number of advertisements of sales of personal property.

A physician gave a patient a box of pills with directions to take one five times a day.

The high cost of living should stimulate the preparation of gardens this spring.

Rev. Robert McNelly was called at this office one day last week.

If your ice house is empty you have no one but yourself to blame.

War and Starvation.

Whether the Southern Confederacy was "starved to death" as a result of the Union government's successful blockade of the sea, or whether the Confederate armies would have been conquered in the end, even if better supplied, has been sharply debated since the news came from Germany of that nation's dwindling food supply, and the questions are being answered according to the views of those who enter the argument.

Certainly the Southern Confederacy was not "starved" into submission as the Germans starved at Kut in 1870, or as the Turks starved the gallant little British army at Kut a number of months ago. Standing at bay behind the defenses of Petersburg, General Lee struck heavy blows until but a few days before the end, and after his line had broken and his army surrounded by Union troops he surrendered because he saw further resistance could serve no other purpose than useless shedding of blood, and not because his soldiers were hungry. When the news of General Lee's surrender reached General Johnson in the Southern command, he had plenty of food left in him, but he accepted General Lee's decision as meaning that further resistance was useless, and he gave up his command.

While these things are true, it is, moreover, true that the Union blockade undoubtedly hastened the collapse of the Confederacy. It was not that there was not sufficient arable ground held by the Confederates to raise all the food stuffs needed, or even a shortage of labor, both of which factors enter into the German situation. The trouble began with the breaking of the railroads. The railroads were the lifeblood of the Confederacy, and the fact that railway supplies could not be made or purchased. This lack of railroads facilities frequently caused thousands of soldiers to go hungry, when there was food somewhere in the rear. The closing of the sea crippled the Confederate armies in other ways. Anmunition grew scarce; the soldiers did not have proper clothing and this weakened their vitality. Altogether, the Confederate army was in a condition that it could not in any event have fought much longer.

The German situation, not perhaps, as it now is, but as it may soon be, is somewhat different. The Germans still maintain their splendid system of railroads and communications. They can put infantry on the train in the west of Europe and have them near the battle front in Eastern Europe in two days. They are making their own ammunition, but not in a single battle yet reported has a failure of German ammunition been noted. They doubtless suffer from an insufficient supply of both copper and of rubber, but all the national inventiveness is being strained to make the best use of the supplies of those commodities still at hand.

If Germany is actually "starving" today, the starvation is that of the civil population and not of the army. In 1861-5 the Confederate army frequently went without food, while the women and children in the rear were fed. In 1917 the German armies are well fed, but distress is arising in the cities. Despite this, the Evening Post believes that the problem is a military one. Only by smashing the German armies will the allies win the war. The blockade weakens Germany; that is all—Louisville Post.

Toliver Craig 110 Years Old.

Rev. G. W. Hill was called to Owen county last Saturday to preach the funeral of Toliver Craig, the oldest man in the county, he being 110 years old. He was laid to rest in the Stewart cemetery. News in Warsaw Independent.

The Williamsport paper claims that he was a native of Grant county, and G. W. Hill writes: "Uncle Toliver would make his annual pilgrimages from the northern part of Grant, Owen and Gallatin counties as far as Sugar Creek and back to Grant county. Uncle Wm. Crisman of Pleasant Memory, said before his death that Uncle Toliver Craig was born in 1806, and Uncle Pendleton Jump who died at the age of 96 years said he went to school to Toliver when a boy. Uncle Toliver leaves one nephew, Henry Montgomery, and Mr. Zinn, and the remainder of his family are citizens of Indiana."

Dr. Foster says: "I know Uncle Toliver Craig and attended him. His mind wandered on the question of perpetual motion. For many years he lived in a hollow tree on Brush creek. He was a grand old fellow."

It is possible that Mr. Craig is a descendant of the Craig family in Scott county. Toliver and Elijah Craig settled there in 1716 when George Washington was born as McClelland Fort. They were distinguished as Indian fighters. In about 1781 Toliver became a Justice of the Peace, while years later he became a member of the board of trustees of the Baptist church at Buffalo Trace, now called Great Crossings. Many tombstones mark the last resting places of the descendants of Col. Toliver Craig in Scott county. Owen County News Herald.

"Horse dealers all over the U. S. enjoyed in 1916 the best season since the war. The European demand stimulated the business and the outlook for the future is very bright," says the Farm-Sun Journal.

The Hopedale News Free says that the owners of that place are offering about a hundred of the best crops of wheat for sale in Christman county for growers are holding out for \$2.

PRODUCTION OF BEST BUTTER

Demand Price Commensurate With Quality of Product—Grain-and-Milk-Feeds Ration.

Make sure that you produce high-grade butter; then form a butter ration and demand a price commensurate with the quality of the product you are delivering and the labor thus involved in producing it.

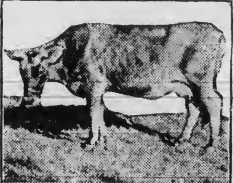

A grain-and-milk-feeds ration given in conjunction with grazing quietens the cows at milking time, causes them to come up regularly to be milked, increases and enriches the milk flow, furnishes a manure that is high in fertilizing elements, and economizes in the amount of pasture consumed. Cream that tests from 30 to 40 per cent butter-fat remains fresh and sweet much longer than that of a thinner grade; commands a premium price on the market; makes higher grade butter; leaves the producer a greater amount of skim milk for feeding to the calves, pigs and poultry, and takes less fertility away from the land.

HARDINESS OF JERSEY COW

She Has Shown Her Ability to Adapt Herself to All Conditions, Climatic and Otherwise.

A criticism often directed against the Jersey breed is that the animals are not hardy enough to stand severe weather.

Possibly such criticism has as its basis the fact that the climate of Jersey Island, the birthplace of the breed, is rather mild. But the criticism has no basis; in fact, Eminent's Bess, one of the world's most famous cows, was bred, raised and made her

Purebred Jersey.

great record in the severe climate of the Michigan peninsula, and Passport, a Pennsylvania Jersey, which has just broken the milk record of the breed, lived while on test in an open shed during a winter when the thermometer at several times registered 30 degrees below zero.

Wherever the Jersey cow has gone she has shown her ability to adapt herself readily to all conditions, climatic and otherwise.

ATTENTION TO CARE OF MILK

Average Farmer Can Apply Principles of Sanitation as Well as Small Dairyman.

With the advent of the bacterial count that is run on milk in larger cities of the country, and the careful inspection of dairies by state officials more attention is being paid to the care of milk in all phases of its production.

Although the bacterial count is not practical for the product of the average farmer, the principles of sanitation can be applied by him, almost as easily as by the small dairyman. Washing the udder and teats of the cow and drying them each time with a clean cloth before milking is one of the simplest, and yet most important steps.

Reliable dairymen have said it is impossible for clean milk to be produced if the milker works with wet hands. Almost invariably B. coli (a cause of intestinal troubles) will be found in the milk that is gotten under such circumstances.

COTTONSEED MEAL FOR COWS

Silage Alone Does Not Supply Balanced Ration—Some Grain Is of Very Much Importance.

Silage alone does not furnish a balanced ration, so some grain should be fed, especially to the cows that give the most milk.

At least one pound of cottonseed meal should be included in the daily grain ration.

BULL IS DANGEROUS ANIMAL

Many Advocate Utilizing Lost Power by Putting Head of Herd in Harness—Watch Him.

Putting the herd bull in the harness and making him work is a way of utilizing lost power that has many advocates. In doing this, however, it should always be borne in mind that the bull is a dangerous animal and needs watching.

SETTING TREES IN ORCHARD

Cover Roots With Dark-Colored Soil and Stamp It Down Tightly—Conserve Moisture.

In setting trees for an orchard dig holes about two feet wide and one and one-half feet deep. Place the soil by itself, the darker colored soil in another pile, and the bottom in another. Cover the roots of the tree with the darker colored soil and stamp it down as tight as possible. When the soil is all in, invert the soil over the dirt, and dig some more outside loam for a top covering. This acts as a mulch to conserve the vegetable matter. The roots will be deep and get a good start. Cut back the roots before planting so as to leave them 10 or 12 inches long, no longer. The new roots start out from the place cut.

Put some kind of vegetable matter, manure, if possible, on the top of the ground, or straw or grass of some kind, to hold the moisture until the trees get a start. After that mow the grass in the orchard every year and put it around the trees, keeping about one foot from the tree the first year, and a foot farther off each succeeding year for five or six years. The amount of vegetable matter needed depends upon the soil conditions. A poor piece of ground, of course, will need more manure, a strong soil well filled with humus less. The idea is to build up the soil to make reservoir conditions, and that is done by filling it with humus. It does not require very much vegetable matter after once in good condition.

HARM BY GRAPE LEAFHOPPER

Insect Injures Foliage by Sucking Out Juices of Leaves—Pester Quality of Fruit Results.

(By D. E. MERRILL, New Mexico Agricultural Experiment Station.)

The grape leafhopper is a sucking insect and does damage both as adult and as nymph, or young, to the foliage of the grape by sucking out the juices of the leaves through the slender sucking beak. Wherever a puncture is made, the tissue of the leaf at that spot first whitens, then turns brown, withers, and finally is blown away as the leaf dies. The punctures are

Grape Leafhopper.

nearly all made on the underside of the leaves and the injury shows at once by the discoloration of the upper side.

A damaged leaf shows the irregular yellowing, but may still hang on to the vine. If badly damaged it loses its ability to work, turns brown and falls. In severe infestations vines may be nearly or completely defoliated and in case of weaker vines death may result. The lessening of the leaf surface reduces the vigor of the plant, stunts the growth of the canes, diminishes the crop in amount and makes for a poorer quality of fruit.

LOW OR HIGH HEADED TREES

Successful Apple Growers Favor First Branches About Three or Four Feet From Ground.

The tendency among successful apple growers at the present time is toward the medium or low-headed tree with the first branches about three feet from the ground. Such trees have many advantages and with modern implements of cultivation can be worked at much less expense than formerly.

In localities where deep snow is the rule, rather than the exception, the only grower better head than one headed at less than four feet.

TRIM OFF USELESS SUCKERS

Too Much of Strength of Plant Taken Up by Worthless Sprouts—Break Them Off Close.

Too many suckers allowed to grow from the roots of the raspberry hills will take too much of the strength from the plants that are to make next year's crop.

Allow one or two more suckers to grow than will be needed, for fear of cutting to some extent. Then break off all remaining sprouts that start close to the ground.

Bank Your Surplus WITH THE Boone Co. Deposit Bank

(Incorporated)

Burlington, Kentucky.

It combines capital, confidence, consistency and courtesy. The big man with the big roll and the little man with the little roll are alike welcomed. WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. M. R. Hance who has been on the sick list is somewhat improved.

For Sale—Good work horse, or will trade for cows. Leslie Goodridge, Richmond, Ky.

Miss Katherine Hicks of Union, spent part of the past week here with relatives and friends.

Hon. W. N. Hind of Covington, spent last Thursday here looking after his farming interests.

Mr. and Mrs. John Ingram, of Cincinnati, spent Saturday and Sunday here with friends and relatives.

Mrs. Ollus Hamilton who has been in for some time since her return from Louisville is slowly improving.

M. Carl Price of Georgetown, was the guest of his wife's parents—Mr. and Mrs. M. E. Hance the past week.

Mr. and Mrs. Harry Norman and baby of Cincinnati spent the past week here with grandmother Mrs. America Norman.

Geo. B. Powers has been confined to his home the past two weeks with a severe attack of la grippe, but is now some better.

Mr. and Mrs. James A. Bird and little daughter, of Cincinnati, spent part of the past week here with parents, Mr. and Mrs. Mark Benoit.

Jas. Morris, of Covington, was here part of last week looking after arrangements to move back to his farm that has been occupied by Robert Baker.

Stephen Ingram who is in the employ of the Krell Piano Company, Cincinnati, is suffering from a severely sprained wrist sustained while at work last week.

J. D. Mayhew spent part of last week at Lexington attending the annual meeting of the Kentucky Lumber Dealers Association of which he has been a member for many years.

The Verona Civic League will give an entertainment and supper at the school auditorium, Verona, Thursday, Feb. 22d, that promises to be a very enjoyable affair. Admission free.

Chas. Childers of Latonia, spent Saturday here closing up his purchase of the Percival farm of about fifty acres near Walton from Thos. Percival, taking possession March 1st.

Mrs. Edward Pullilove left last week for Louisville to spend a couple of weeks with her sister Mrs. Mollie Holburn who has been quite ill. Mr. Pullilove expects to join his wife at Louisville this week.

John Riley of Verona, spent last Saturday here, and closed up his sale of a house and small tract of land near Verona to Frank Napier of Covington, who expects to move to the property next month.

Dr. Roland A. Nichols, of Hiram, Ohio, will deliver a lecture at the Walton Christian church, Monday evening, February 19th. Subject, "Salutaris." Dr. Nichols has the reputation of being an excellent and popular speaker.

C. M. Emral bought the old Wm. Lancaster farm in the Richmond neighborhood last week from Mrs. Freeman of Covington, and will take possession March 1. The farm contains one hundred acres and the consideration is \$5,000 cash.

Jas. A. Records, of Louisville, spent part of the week here the guest of his mother Mrs. Jane E. Johnson, going from here to Ex-Cell county to view a view to investing in the oil fields there having sold his dining room in Louisville.

A. Ralph Edwards sold to C. S. and E. E. Vallandigham the ware house property on Main St., occupied by them as a garage, for \$2,000. E. B. Vallandigham, who has been located in Covington, has formed a partnership with his brother C. Stanley Vallandigham in the business here and will make W. E. his home.

Samuel H. Henderson, of near Bracht Station, sold his farm of 11 acres to S. Spradin, of Boyd Station, who purchased it for a year's relatives for \$3,000 cash. W. E. Martin sold his farm of 102 acres near Crittendon to John Works of near Gardnersville for \$5,500. The deals were made through the real estate agency of G. B. Powers.

Walton Chapter Order of Eastern Star will have its regular meeting February 19th, and all members are requested to be present. Walton Chapter has received a very cordial invitation from Davis Chapter, of Dayton, Ky., to attend a special convention to be given Thursday evening, February 20, in honor of Sister Emma McElree as Grand Matron of Kentucky.

Judge Chas. Strother and A. Ralph Edwards spent Wednesday at Burlington on business. Mr. Edwards lodged the will of his father S. L. Edwards in the county court for probate. The will devises all of the property to his wife Mrs. Ella Nora Edwards and names her as the executrix with out bond. Mrs. Edwards will also retain the interest in the firm of S. L. Edwards & Son, and the business will be continued under the same name with A. Ralph Edwards as the manager.

Brit Senour, one of our highly esteemed citizens died at his home in Kenton county, about a mile from Walton, last Thursday, after a short illness from pneumonia. He had been ill but a few days, and his death was a sad surprise to his many friends. He was born in Kenton county at the Old Dry Creek meeting house, about 5 miles from Covington, and was in his 70th year, and his long and useful life was spent in this locality. He served as clerk in the store of Mably & Carue, Cincinnati, and also conducted a livery stable in Covington for a number of years. For the past 22 years he has lived on the farm where he died. Mr. Senour was a high class gentleman and an excellent citizen. He was quiet and unassuming, but he impressed all with his high character in many ways, and he had a host of friends. His widow and three children survive him, the children being Misses Stella and Blanche and Clarence Senour. The funeral took place last Saturday from his late home, the services being conducted by Rev. E. C. Lacy, of Walton Christian church, of which the deceased was a member. The remains were laid to rest in Highland Cemetery, the cortege being in charge of undertaker C. Scott Chambers, who used an auto hears and automobiles in making the journey to the cemetery.

Mrs. Robt. C. Green and daughter Miss Louise left last week for Florida to spend a month at different points on the east coast. Garnett Kemper of Lexington, State Agent of the Fidelity-Phenix Fire Insurance Co., spent part of last week here with friends.

The sale of personal property of W. Lee Johnson on the Mrs. Katie Rice farm last Thursday was very largely attended and everything sold at good prices. The total of the sale being about \$4,000. Horses sold low, but everything else brought good prices, the cows selling at high prices, high-bred sows at \$28. W. R. Johnson was the auctioneer and gave good satisfaction. Mr. Johnson is arranging to move to Latonia by March 1st, having bought property there. The community regrets the departure of Mr. Johnson and his excellent family.

The town council at the regular meeting last Friday night took up the proposition of rebuilding the main thoroughfare thru Walton to make it conform to what will be the rest of the Dixie Highway and the town being required to put it in proper condition as it is proposed to have a mass meeting of the citizens to discuss the matter generally and then arrange for a bond issue, and the contract for rebuilding of the roadway at an early date. Claude E. Harris has contracted to rebuild the balance of the roadway in this county for \$10,715.00, and no doubt he will be able to handle this in a satisfactory manner having all of the machinery and material on the ground.

The fourteenth sale at the Walton Loose Leaf Tobacco Warehouse last Saturday was the best sale yet held as the bidding was stronger than ever and everything sold at fancy prices. About 15,000 pounds were sold and it averaged \$5.92. The weather conditions were rather discouraging to the handling of tobacco, but another sale will be held Wednesday as well as next Saturday, and the offerings are expected to be as great as ever. J. T. Browning of Ohio, sold a lot of tobacco on the market last Saturday and was so well pleased with the results and general treatment that he announced that he expected to ship about one hundred thousand pounds from Ohio to this market. He reached here and a half million pounds.

Everybody in the agricultural line seems to have their mind concentrated on the rising of an extraordinarily large crop of tobacco the coming season, and some one has very wisely suggested that it would be much better to give greater attention to the raising of corn, oats, potatoes, alfalfa, etc., unless we want to reach a serious state regarding food stuffs. All of these products pay as well as tobacco and are more easily raised and not near so hard on the land. When one considers the prices paid for corn, potatoes, etc., it leaves no room for an argument that more attention should be given these crops as a plain business proposition, as it will not pay to give entire attention to tobacco because the price happens to be high this year and then take the proceeds and pay out more for corn, hay, etc., than a profit would justify; besides tobacco may not be as high in price next year, especially in view of the prospects of such a tremendous crop as is being prepared for. The farmer who raises his food supply is not only considered the wisest but in a general way he shows more on the profitable side of the ledger.

When Buying Seed

It is well to look to a house that puts quality above price. Did you ever stop to think that 25c on a bushel of seed amounts to only 6 to 10c per acre.

You surely can not afford to sow inferior seed for a difference of 6 to 10c per acre when the results may mean 6 to 10 dollars to you, to say nothing of having your farm infested with obnoxious weeds and filth.

High Purity & Germinating Test

is our constant aim, and judging from the way our old customers come back each year and many new ones that are so well pleased and we believe are succeeding.

We Give You Test on Every Tag

showing what is required by the New Kentucky Seed Law and if you write for samples we can give same on samples.

BUICK LIGHT SIX, \$1070 F. O. B. Detroit.

Some of the Big Features of The Buick:

Valve-in-Head Motor—Buick Valve-in-Head, the most powerful type of motor built. The very HIGHEST PRICED American Car, which sells at \$7000, has a Valve-in-Head.

Delco Electric System—All high priced 12-Cylinder Cars, the type that must have the most accurate and most positive ignition have The Delco.

Genuine Leather Upholstery—No imitation equals the genuine. Real Leather stands the hardest usage and looks as good as new all the time.

Exide Storage Battery—More Exide Batteries in use than any other.

Extra Long Cantilever Springs—Makes the Buick, positively the easiest riding Light Six.

No other Six at near the price has this combination of High-Class Features. Buick Cars have been on the market for 14 years, and back of every one sold is Buick Reputation and one of the Largest Factories in the country.

The superior power of The Buick is generally recognized. Its extremely low Gasoline and Oil consumption is surprising.

Don't buy before you see THE BUICK. Demonstrations cheerfully given whether you are interested or not and without the least obligation.

Catalogs of all models on request.

ROBT. W. JONES, Agent
WALTON, KENTUCKY.

Not Much Change in the Strike.

From advice received day after day from the milk producers who are temporarily sending their milk to the Clover Leaf Creamery at Burlington, it is evident that the milk strike being waged by the farmers is no nearer completion than it was at any period since its advent. Reports have been received from the large milk concerns in Cincinnati are receiving each day a sufficient quantity of milk to supply their customers but from what source is problematical, except that it is supposed to come from Ohio. It is the general belief that the farmers and producers made a serious mistake in allowing any milk whatever to enter Cincinnati, even though some of the smaller dealers did sign up to pay the increased price demanded, and for them to bring their strike to a successful culmination they should tighten up their organization in such a manner that not a drop of milk would enter the city. It certainly has proved a beneficial matter for the producers in having their place as the local creamery to turn to whenever they chose, for some few of them take advantage of the Clover Leaf Creamery only after ascertaining they cannot enter Cincinnati with their milk. A large majority, though, have remained steadfast in their refusal to sell to these and others like them who stick to their first avowed principles, will the credit go to the dealers who have yet to grant the reasonable increase asked by the farmers.

Draft Horses in Demand.

According to Wayne Dimsore, Secretary Percheron Society of America, there seem to be little danger of overproduction of draft horses in this country. He finds that not more than 10 percent of our farmers are raising colts. He believes that the next 10 years will find the greatest demand for the draft horse that the world has ever known. "It follows," he says, "is a necessary consequence that the demand for purchased draft horses for breeding purposes will continue to be good. Importations have been to all practical purposes, put off. We are producing 12,000 or 13,000 purchased draft horses eligible to register. This means in substance, that we produce only 5,000 or 6,000 stations for service per year, when we need at least 7,000 or 8,000. An excess of demand over supply always makes good prices, and the present is no exception.

"The farmer who uses heavy draft mares does better farm work and raises bigger crops than he who relies on small horses. Furthermore, he has horses to sell each spring at a profit. If you don't believe it, go ask any country banker for the names of the most successful farmers in this neighborhood. You will find them to be livestock farmers, and men who keep and use heavy draft mares, either grade or purebred in their farm work."—Exchange.

A Dog, Fell.

Georgetown, Ky., Feb. 7.—Circuit Judge Robert Stout sustained the demurrer in the case of the indictment against former Road Engineer Prather, charged with the demurrer in the case of the indictment against the Scott Fiscal Court and County Judge Joseph Ward. The indictment alleged malfeasance in office, governing of alleged failure to repair the Stamping Ground and Woodlake turnpike.

Will Open His Sugar Camp.

Chester, Tenn., of Limburg neighborhood, called on to renew his subscription one day—the past week and incidentally remarked "I'll have more good maple molasses again in a few weeks." He indulges in the fun of operating a sugar camp during the first months of each year.

Bought a Farm.

Riley & Riley closed a deal Monday with Judge Sidney Gaines whereby he became the owner of Miss Annie Crigler's farm of 25 acres and a fraction, on the road between Limburg and Harpeth, vest home grounds. Mr. Gaines' son, Cecil, will occupy and cultivate the farm.

Lambs Coming Fast.

Glen Crisler, who lives about three miles south of Burlington, had it ewes that dropped 23 lambs, all of which were saved, notwithstanding the very severe weather that prevailed night and day during the period the lambs were coming.

Good Sale of Hogs.

Fonnie Easton, who lives a mile southwest of town, sold one day last week six hogs at \$12.00 per hundred, receiving therefor in the aggregate \$183.40. Mr. Easton has no hogs on his farm now unless he has bought some in the last few days.

Test Seed Corn.

Now is a good time to begin testing the corn which you will use as seed seed next year. It is easily made and by making it you will have a better idea of "where you are at" at planting time.

Harbingers of Spring.

Monday morning while the mercury was two below zero, Mr. P. A. Hull counted 22 robins in one tree in front of Dr. Bennett's house. This was the earliest recorded date for the full season.

The second number of The Lyman Course will be given at the court house in Burlington, next Saturday, night, Feb. 13, at 8 o'clock.

The Farmer's

Since President Wilson diplomatic relations with Germany have received numerous further developments in the crisis, these consist of pledges to put great steel plants and other industries under national control, railway and professional experience at the service of the Government whenever they shall be needed, while the United States power of Congress and the Government of the United States to take over such establishments in emergency, the voluntary tenders to go to show that there is a great current of patriotism under the surface in this country, and that there will be no shortage of support to the Administration when it shall be required.

But there is one line of reason which, equally as important as any of those mentioned above, that seems not to have been thought of in the first flurry of our new international diversion. That is agriculture, the great wealth of the country, and the part the farmer should play in the preparations for war. Not that the farmer at any time questions the patriotism of the farmer—no class of our citizenship has sacrificed more than he on the field of battle—but it is in another way that he can do even greater service. And that is in the multiplication of the products of his industry, the farmer yet have produced to the limit of his capacity.

Should we be led into an armed struggle with Germany or any other country, nothing is more essential than that there should be abundance of food supplies, and of these must come from the farmer. Because of the enormous drafts that have been made on our grain, our food animals and their products by the countries now in the war to say nothing of the demands from nonexporting neutral countries, there is not at this crisis in the United States. So time an oversupply of these necessities has been the demand, so sharp the competition, that at this time grain and its products are at the highest prices they have sold for since the Civil War.

With the future tinged with uncertainty it seems not inappropriate to suggest to the patriotic interests of the nation to direct their attention to the possible increase of their products. More and more should be seeded to corn and other grains this spring. It is too late to "reap," but much can be done in the yield of that grain this year, and it is not only in more acres, but in intensification of culture, that much can be added to the production. Also there must be more food animals, and it is to the farmer that the nation looks for the expansion of those supplies. There are vast acreages in every part of this great country entirely unproductive whether wholly uncultivated or fallow, that now should be made to yield of those things that the country will so badly need should the present crisis develop into what threatens. This would be the farmer's "bit."—Enquirer.

Some Things Salt Will Do.

Salt and water will thaw a frozen drain pipe.
Salt will remove tea stains from delicate china cup.
Salt spread in blackberry haunts will kill the pests.
Salt added to snow makes the mixture melt faster.
Salt and water, warm, will stop chilblains from itching.
Salt thrown on a fire will extinguish a burning chimney.
Salt added to the rinsing water prevents clothing from freezing.
Salt placed under baking tin in an oven prevents their burning.
Salt is said to stop neuralgia if sniffed into the nostrils on the affected side.
Salt will quickly clean a discolored bath or uncleaned urinal.
Salt—a lump placed in the sink will keep the drain wholesome.
Salt placed first in the frying pan prevents grease from spluttering.
Salt and water rubbed into the scalp is good for falling hair after illness.

Salt and water removes the lime in new curtains and makes washing easier.
Salt and water will prevent the red borders of towels, etc., from running if the towels are steeped in it for twenty-four hours.
Salt—a teaspoonful to a pint of warm water—rubbed into weak ankles is said to strengthen them.
Salt added to potatoes when nearly done insures flouriness and keeps them going to pieces.
Salt sprinkled over apples before sweeping preserves the colors and keeps away moths.
Salt and coal dust mixed with water, put into tins to mold and dried, makes excellent mouse traps.
Salt thrown on fallen snow melts the carpet making and enables the snow to be swept up cleaner.

Vanceburg, Ky., February 9.—Ed. Land, charged with conspiracy with the County Engineer, Ivan Sanders, to defraud the county, was sentenced to 21 months in the penitentiary at Frankfort by the jury verdict given today. Rand, County Road Engineer, was charged with fraudulently drawing in one month for the work that was due him. Sanders was given 18 months in the penitentiary on a similar charge.

Don't forget the date, Feb. 13, at 8 o'clock, second number Lyman Course.

Straight to the Bullseye.

One American "shot" which every true American will enthusiastically endorse is that suggested by Secretary Lansing yesterday to the Swiss Minister in response to Germany's overture through that diplomat for "negotiations" between the governments of Germany and the United States with a view to preventing hostile conflict between the two powers.

The reply of the State Department is straight to the bullseye. We shall gladly negotiate with Germany when Germany makes it possible for us to negotiate with her. She withdrew her pledge to us to abandon unrestricted submarine warfare without discussing the matter with us. She left us nothing. Would but this be good our notification of her that in such an event we must sever diplomatic relations and to rely hereafter on other means than diplomacy and pledged words for the protection of our rights at sea.

Germany is proposing a conference with this time making it plain that she does not intend to discontinue the U-boat policy. That being the case, there is nothing for us to discuss with Germany. There is nothing for us to do but to maintain our own rights in the manner we have announced that we mean to maintain them whenever they are violated by Germany in the prosecution of her submarine campaign.—C-J.

In the early sixties Jim Smart, father of B. F. Smart, of the Shaker Bond neighborhood, was on a visit to Jeff Hopper who lived just above Salt Springs. Hopper's wife knit straw hats for the neighbors in those days when clothing from head to foot, for man and woman, was made at home out of material raised on the farm; when trade was by barter and money only used to pay taxes.

Mrs. Hopper wanted a new chimney to the house and asked Mr. Smart what he would charge to build it. He gallantly answered that if she would knit him a hat he would erect the chimney for her. She did, and he built a 25-foot stone column out of the abundant rocks that adorn the picturesque neck of Mercer county. He built it well and true, spending most of the summer on the job, but not more in those days and one of the few things most people had plenty of to spare.

The chimney being erected before the days of contractors, therefore honestly constructed with a view to its use as a smoke conductor, is still standing in its primitive integrity a monument to the builder's ability and to Mrs. Hopper's business acumen. It is giving use and comfort to the family of Charles Watkins, who now occupy the old home.—Wilmore Enterprise.

John W. Wells, a hustling and prosperous farmer of the Piqua neighborhood, raised 5,000 pounds of tobacco on five acres of land in 1916, which he sold over the breaks at Maxwellville at an average of \$10 per hundred. He realized Mr. Wells a total of \$50,000, quite a snug sum.—Mt. Olivet Tri-Week-Democrat.

On account of the Lyceum number at the court house next Saturday night, the local C. of P.'s will begin work at six o'clock sharp so as to get thru by eight o'clock in time to attend the performance.

Dr. J. M. Grimes, of Petersburg, was in Burlington a few hours yesterday enroute home from Indianapolis, having to come by way of Burlington on account of the ice in the river.

E. P. and Wm. Farrell, two of the many substantial citizens in the Verona precinct were business visitors to Burlington, Tuesday. They came over in the latter's automobile.

It is seldom that we have an opportunity to attend Lyceum Courses, so let's all be on hand next Saturday night at the court house, you will enjoy it.

On Feb. 21, 1917, there will be presented by the Senior Class of Boone County High School, at Liberty Hall, "Blundering Billy," a three-act comedy.

The temperature has been climbing upward since Monday, and Wednesday morning had somewhat spring like appearance.

Everybody loves a fool. Come and see "Blundering Billy," at Liberty Hall, Burlington, Feb. 21st, 1917.

February 11, say they will be on hand with a good program guaranteed to please the audience.

Taylorport people crossed the river on the floating ice, Monday. It was hazardous business.

Material is being hauled for the building Mr. Hester will erect on his farm west of town.

Command saw "Blundering Billy" at Liberty Hall, Feb. 21, if you want to laugh.

Miss Bessie Kirkpatrick is visiting her sister, Mrs. Albina, in Cincinnati.

Card of Thanks.

We desire to thank the way friends who helped me in my many troubles as shown graphically in illness and death. May God bless you as He surely will reward you. The Family.

AMICABLY SETTLED

By H. A. SLATTENGREN.

Hank Ruffy strode out of his shack into the hot Indiana sunshine. He lived alone with his son, Audry. Glancing over the sun-baked plains, he noticed something in the distance which caused him to hesitate and look more carefully. After a moment, he went back into the house and came out with a field glass. Leveling this at the thing that had interested him, he saw something that made him swear, as he lowered the glass.

"Audry," he shouted.

"Hello," came a voice from the shade of the shack.

"Laughlin's cattle have broken in to the oats again. I'm going over to give him a piece of my mind."

In a few minutes Ruffy was astride his pony, riding clouds of white alkali dust, galloping in the direction of McLaughlin's ranch.

McLaughlin was busy mending a saddle when Ruffy rode up to him and shouted a somewhat angry, "Hello, there."

"How are you, Hank? Glad to see you."

"Say, your cattle have broken into my oat field again."

"By heck! Is that so?" said McLaughlin in surprise as he arose.

"Yes, that's so, and you'd better get them out of there."

Soon several of McLaughlin's men were driving out the cattle and repairing the fence.

On the following afternoon McLaughlin noticed that some cattle were in his wheatfield. Hastily procuring his fieldglass, he saw that the cattle belonged to Ruffy.

"Ah, it's for that," he thought as he saddled his pony, mounted and rode away toward Ruffy's ranch.

When he reached Ruffy's place he found the latter lounging in his chair, smoking and reading a paper.

"Hello, McLaughlin. What's the trouble?"

"Hello, Hank. Nothing much, except that your cattle are sampling my wheat."

"The fence they are. Darned editors always say, Audry! Audry!"

"Coming up. What you want?"

"Hurry up and get my mavericks out of McLaughlin's grain. Be sure to fix the fence for good."

"I got you."

"How about some Sunnysbrook?" asked Ruffy.

"No. I don't care for any. Thanks, nevertheless. We must keep the cattle out of the grain if we want to do any threshing this fall."

"You are right, agreed Ruffy. The next time your cattle break into my wheat field, I'll ride over and shoot you up."

"The same here!" McLaughlin shouted as his horse galloped away.

A few days later McLaughlin had visited Ruffy in regard to the cattle, he noticed with chagrin and anger that Ruffy's cattle had again broken into his wheat field. Very angry, he got his rifle, jumped onto his already saddled pony and rode away.

At about the same time Hank Ruffy became aware of the fact that McLaughlin's cattle had again strayed into his patch of choice Silver King oats. He swore loudly. After this psychic relief he remembered his threat, and at once decided to put it into effect.

At about half past noon the ranch houses, McLaughlin and Ruffy met.

Ruffy shouted: "Do you remember what I said I'd do if your cattle got into my oats again?"

"Yep, and do you recall what I also said?"

"Not of your horse. I can't shoot you in cold blood."

"That's what I say. I'm quite handy with my fists."

Consequently the two slid from their steeds, slung their rifles over their shoulders and pulled off their outer clothing. Then after a few minutes of snoring, they lay on the ground in each other's arms and engaged in a regular round-and-tumble fight. This lasted for about five minutes.

Too tired to fight longer, they retreated to their horses and grasped their rifles. At this juncture an automobile came from the turn in the road and sped toward them.

The enraged ranchers could shoot at each other and Audry had driven their machine between them.

Audry spoke: "You big men are acting like a couple of kids. It's the worst I ever heard of. Don't you think it is a ridiculous, comical scene?" he asked Audry, who had been quiet all the while.

"Audry," she nodded and smiled brightly, and he joined in until they were both convulsed with laughter.

Ruffy and McLaughlin glowered at each other, and Audry until their children were quieted down.

Then Audry took Alga by the hand and said, "She's promised to make me the happiest man in the world. You know what that means." Forthwith he crushed her in his embrace and kissed her blushing cheeks.

Ruffy and McLaughlin smiled toward each other, and Audry, and their heads gently while looking into the sky.

"How would help my child's ride?"

"My wheat also," agreed McLaughlin.

"I'll shoot you," said Ruffy.

HEALTHY AND VIGOROUS HOGS

Pasture Furnishes Necessary Exercise in Gathering Succulent Feed—Feed Some Grain.

"Corn for fat and pasture for pork," said a farmer. He meant, says H. C. Ashby, assistant animal husbandman in charge of swine, University farm, St. Paul, that the pasture furnished exercise in gathering the green, succulent feed, and by keeping the hogs

Ready for Market.

healthy and vigorous, it put them in the best condition to make good gals from their grain feed.

It pays to feed hogs on pasture, for pasture alone will do little more than keep up a pig's weight. A light to medium grain ration is usually most profitable. About two or three pounds of grain a day is a good ration for hogs weighing eighty to one hundred pounds. If you have scales, weigh your pigs occasionally and feed about three pounds of grain daily for each 100 pounds live weight of hogs.

Good rations for summer feeding are easily obtained. On clover, alfalfa or rape pasture, feed corn and a little skim milk. On blue grass or timothy pasture feed three pounds of skim milk to each two pounds of corn. More milk would do no harm. If skim milk is not at hand, it will pay to feed oil meal or tankage with the corn, where blue grass or timothy pasture is used about one part tankage to seven parts corn or one part oil meal to eleven parts corn.

NOSE-BAG SUPPORT IS HANDY

Horse Is Enabled to Eat From Bottom of the Bag Without Bracing on the Sidewalk.

The interesting features of this device are the brace that runs to the lower part of the hames, and the flexible support attached to the top of the

Support for Nose-Bag.

hames. The invention is intended to enable the horse to eat from the bottom of the bag without being compelled to brace it against the sidewalk or other solid object.

PRODUCTIVE PERIOD OF EWE

Does Her Best at From Three to Six Years of Age—Keep Her White Teeth Remain Good.

The most productive period of the average ewe's life is from three to six years of age. As a general proposition, keep the ewe as long as the teeth remain good and she is producing lambs regularly. Of course, if sheep are kept continuously on the same pasture, they are liable to stomach-worm infection, but such infection more often proves serious in the case of young lambs than with older sheep.

BROOD MARE AND HER COLT

Youngster Should Be Kept in Dark and Still During Day—Allow It to Suckle Often.

If the mare is worked, keep the colt in a cool, dark stall during the day. For the first few weeks after foaling bring the mare to the barn and allow the colt to suckle.

Do this in the middle of the forenoon and in the middle of the afternoon, as well as at morning, noon and night.

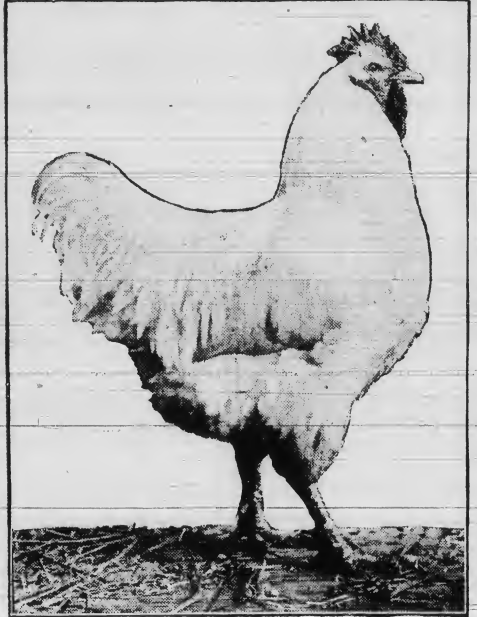

GREATEST MISTAKES OF POULTRY RAISERS

One of the greatest mistakes a poultry raiser can make is to allow sick and ailing birds to run with the rest of the stock. In this way the sick bird drinks from the same pan that the others use, and the disease spreads most rapidly. Chickens with the gapes or any other trouble will easily transmit the disease through the medium of the drinking-pan. The safest way is to take the sick bird out and keep it away from the rest of the stock until it has fully recovered.

An old farmer who is now off the active list, but still lives on the farm and raises poultry as a diversion, says he visited many of the largest poultry shows in the country just to inspect some of the best birds of the new varieties, and he declares that nothing better than the Plymouth Rock and Wyand-

valid as there can be. Then, too, you can fuss over a cow, a horse or a dog without feeling the insignificance of the labor, but when it comes to a hen you just don't want to waste your time, and so you let it alone, and if it lives well and good, and if it does it's no great matter. In itself it is not, and far be it from me to advise tussling over a sick hen. Let it die in peace, but let it be a reminder that it is well to learn how to avoid such mishaps in future.

Cost of Feed. According to the New York agriculture experiment station, the cost of food, per chick, to weigh one pound, on ground grain, is three cents; on whole grain, three and seven-tenths cents. After making repeated tests in feeding, this station says the ground ration proved considerably more prof-

VIGOROUS, HEALTHY WHITE PLYMOUTH ROCK COCK.

dotte varieties for real business stock. He said, "You can tell all inquirers that these two breeds are still at the top, and there are enough varieties of them to please any sensible person."

Complain of Nests. If a hen could speak, the first thing she would complain of would be the nests. The first complaint would probably be in regard to their size and the meager amount of nesting material allowed her. Then she would hear about the location being so public, and not a bit of whitewash there to kill the mites. Some of the nests are low down; of course it is easy for the hen to reach them, but they are also handy for the pup you set such store by. Oh, no; the eggs won't hurt the dog, but eggs at 25 cents per dozen make a pretty expensive diet for growing dogs. There are remedies for most of the diseases that afflict poultry, but a sick hen or cock is about as hopeless an in-

habitant than the whole-grain ration with the growing chicks; and the same is true of capons of equal weight from these chicks, and from others of equal weight and age, fed alike before castrating. No difference was noticed in health or vigor of chicks or capons fed either ration.

Clover hay or clover clippings dried, or green clover growing on the lawn or in the field is a great help to egg production for two reasons: It furnishes the green food necessary for the fowl, and it furnishes the nitrogen that goes to make the albumen, which is a large part of every egg. If a hen is fed corn all the time, from what source is she to get the material for making the large amount of albumen that must be elaborated by her? The corn indeed supplies a small amount of this material, but clover hay is worth much more for this purpose, pound for pound.

EGGS DURING WINTER

Early Hatched Pullets Must Be Given Best of Care.

Select Most Desirable Fowls for Breeding Purposes and Keep Only Few of Choicest Cockerels—Furnish Green Feed.

There is no need of farmers carrying a flock of poultry all through the winter without getting eggs. To secure plenty of eggs in winter the early hatched pullets must have the best of care from the beginning. That is, they must be kept growing from the time of hatching until fully matured, which should be about the first of November.

So far as facilities are concerned the farmer has everything "coming his way" and there is no reason why his flock of pullets should not produce an abundance of eggs during the winter season. With but little attention pullets which have free range where they may glean an endless variety of seeds, bugs, worms and grain, sand-shine and fresh air, shade and pure water than can be so easily provided, will, without a doubt, make very rapid development and mature much earlier than pullets kept where these natural surroundings are not to be had.

Another important point is the culling of the flock. The early hatched chicks, when sufficiently developed to distinguish the sex, should, if possible, be separated, as the pullets will grow and thrive much better by themselves. Select the most desirable pullets for breeding purposes and keep only a few of the choicest cockerels. The pullets are placed in their winter quarters and fed as great variety of food as the farm usually produces to get them in a laying condition as soon as possible. Feed them plenty of green food, such as cabbage leaves, all small apples and potatoes, turnip tops, in fact, anything

to make a variety, which is greatly relished by the flock. Milk, either sweet or sour, is fed to them, all that they will drink every day. Fresh water is kept constantly before them. It never pays to compel poultry to drink impure water and this can easily be avoided by cleaning their drinking vessels each day. Success in getting eggs in winter is due to keeping the flock healthy and in a good fighting condition. The poultry house and yards are kept in a sanitary condition, as this is the first requisite of successful poultry keeping.

PRODUCTION OF BIGGER EGGS

Purdue Experiment Station Thinks It Possible to Produce Eggs of Better Color and Shape.

Is it possible to produce bigger eggs, or more uniformly colored eggs, or eggs with firmer white or yellower yolk than we are at present producing? The Purdue experiment station thinks it is, and the eighth annual Purdue egg show last May laid on display 370 dozen eggs. There were represented the commercial class, the farmers' class, the experiment station class, the students' class, the high school class, the frank egg class, besides several others. The object of the show is to encourage the production of more and better eggs.

COMPEL FOWLS TO EXERCISE

All Grain Should Be Fed in Deep Litter—Birds Should Always Be Eager for Feed.

Feed the grain in a deep litter on the floor and make the hens exercise for all of their grain. The mash may be fed either wet or dry, and should be so regulated that the fowls will get about equal parts of mash and of the scratch grains.

It is necessary to give the fowls plenty to eat to get good results, but the birds should always be eager for each feed.

THE KITCHEN CABINET

It is a good and safe rule to adjourn in every place as if you meant to spend your life there, never outlining an opportunity of doing a kindness, or speaking a true word, or making a friend—John Ruskin.

GOOD SANDWICH FILLINGS.

Peanut butter mixed with whipped cream is a filling well liked by those who enjoy peanut butter.

Ripe Olive Sandwiches.—Chop a half-cupful of ripe olives with one sweet, green pepper, combine with cream cheese which has been moistened with French dressing.

Sweet Sandwiches.—Chop a half-cupful of raisins, one cupful of walnuts, a fourth of a cupful of grated coconut and a tablespoonful of grated chocolate; mix with thick, sweet cream.

Green olives chopped fine and mixed with mayonnaise. Figs and nuts or nuts and dates, finely chopped and mixed.

Orange marmalade, jelly, grated maple sugar with browned almonds, finely chopped. Equal parts of grated Swiss cheese, nut, onion, chopped. Dutch cheese mixed with chopped olives.

Finely-chopped celery with mayonnaise.

Ham mixed with chopped pickle and celery. Equal parts of ham, celery and mayonnaise. Cold roast chicken, moist beef, or cooked oysters, chopped fine.

Lettuce leaves and mayonnaise. Cream cheese, French dressing, and lettuce.

One cupful of cold roast chicken, three olives, one pickle, a tablespoonful of capers, all minced fine, and mixed with mayonnaise.

Hard-boiled eggs, and watercress, finely chopped, mixed with softened butter.

Caviare and lemon juice. Lobster meat and mayonnaise.

Cucumber, grated onion and mayonnaise. Olives and anchovy, finely chopped, lettuce and mayonnaise.

Grated cheese, seasoned with salt, pepper, mustard and anchovy paste. Cheese with chopped olives and pickles added.

Marschinese cherries and nut meats, chopped fine. Cottage cheese and cherries.

Cream cheese and hard-boiled eggs mixed to a cream. Quince jelly and walnut meats, chopped. Cream cheese, olives and chopped green peppers.

Neenie Maxwell
The KITCHEN CABINET

A home based on right principle will be simple. No ostentation or living beyond one's means; simplicity in entertainment, in offering freely of what one has to friends, without apology or explanation.

SOUR CREAM DISHES.

A few tablespoonsful or half a cupful of sour cream is valuable these days, and should be used with economy.

Sour Cream Salad Dressing.—Whip a cupful of sour cream with a little lemon juice or pineapple juice for flavoring, season with salt, a little sugar and mix on fruit or vegetables. When vegetables are used for the salad a bit of red pepper, mustard or Worcestershire sauce may be added. Sour cream may be substituted for sweet cream in any salad dressing.

Cottage Cheese.—Four boiling water over a dish of thick sour milk, which will cook the milk enough so that it may be drained in a sieve. Season with plenty of cream, salt, a dash of red pepper and some melted butter. If there's not enough cream to give it richness, 15-20 drops of boiling water is added. This method makes a tender curd and is quickly made.

Sour Cream Cookies.—Cream a half cupful of butter, add one and a half cupfuls of sugar, a half cupful of sour cream, two eggs, a teaspoonful of soda dissolved in the cream; mix well, add flour to roll, sprinkle the top with sugar.

Sour Cream Pie.—This pie is baked with two crusts and is delicious. Take one cupful of sour cream, sugar, raisins and one egg. A tablespoonful of vinegar, a half teaspoonful each of salt, cinnamon and nutmeg, a fourth of a teaspoonful of cloves.

Codfish With Sour-Cream White Sauce.—A white sauce, using sour cream; a cupful and a half for sauce to serve three or four people is sufficient. Melt a tablespoonful of butter and when bubbling hot stir in two tablespoonfuls of flour and a cupful and a half of sour cream; cook until heated through; add shredded codfish and serve. Decorate with baked potatoes.

At the enveloped dish, using codfish, white sauce, made with sour cream, and sliced potatoes, is very appetizing. Butter the dish, put in a layer of the potatoes, then one of white sauce, then a layer of fish, finish with the potatoes and white sauce, with buttered crumbs on top. The potatoes are previously cooked.

WANTED—Sub-agent in each precinct in Boone county for **BUICK AUTOMOBILES**. An attractive proposition for reliable party in each of these localities, who intends buying a machine and who will devote a little time to the line.

Don't Wait. Write to Day.

ROBT. W. JONES, General Agent for Boone County.
WALTON, KY.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Mr. E. F. Wolfe of De-Mossville, spent Monday here on business. Daniel Webster of Zion Station, spent Saturday here on business. For Sale—5 hogs weighing about 100 pounds each. Mrs. Susan Snodgrass, Walton, Ky.

John W. Alt of Hume neighborhood, spent Saturday here on business and with friends. Dr. and Mrs. J. G. Slater of Ludlow, spent Saturday here with their relatives and friends.

Judge Chas. Strother and Jno. L. Vest, spent part of last week at Williamsport attending the Grand circuit court.

Judge J. G. Tomlin is indisposed from a very severe cold and is confined to his home most of the time.

J. Elmer Griffith and bride of Covington, spent the week here the guests of his father Chas. Griffith.

E. L. Kelley has begun rebuilding the Walton electric light plant and expects to have the plant in operation within 60 days.

A. B. Tompkins, who travels for a Cincinnati saddlery house, has been confined to his home here the past two weeks with a very severe cold.

Mrs. W. C. Moore of Greenville, O., and Mrs. Geo. W. Ransler of the past week.

Rev. John E. Roberts, of California, Campbell county, and brother, A. C. Roberts, of Verona, spent part of the week here with relatives and friends.

C. M. Ennal purchased the Lancaster farm of 100 acres near Richmond, sold the farm to Clarence Tanner for \$3,200, possession to be given March 1st.

George L. Miller of Big Bone Springs, spent part of the week here, guest of his son John C. Miller. He had a lot of tobacco on the loose leaf market.

Miss Jeanette Chambers, who teaches in the graded school at Harrodsburg, returned from a week's visit here with her parents, Mr. and Mrs. Robt. Chambers.

Thos. Morris of Gallatin county, was here Tuesday closing up his purchase of the farm of Wm. H. Franks near Walton, and will move to the place the first of the week.

Dr. and Mrs. B. K. Menefee, of Covington, spent Monday evening here attending the meeting of the Eastern Star Chapter No. 100.

Mr. Menefee being the Grand Matron of the State.

C. M. Ennal bought the farm of Lew Wilson near Bank Lick last Thursday. The farm contains about 70 acres and the consideration is \$4,000 cash, possession to be given March 1st.

Wm. C. Clark who has been enjoying a visit to friends in Fla., returned home the first of the week. Mr. Clark says the weather destroyed a great deal of vegetation and young fruit.

Jos. C. Hughes and A. Records Johnson attended the sales of the loose leaf market at Dry Ridge Thursday, getting a few pointers in the business for the benefit of the Walton market.

E. O. Elliott, of Covington, was here Tuesday relative to his purchase of the W. T. Turner farm in Kenton county, but Mr. Turner not being here to make a satisfactory title, the sale was rescinded.

C. W. Burton of Dry Ridge, was here Tuesday through Friday. He is Real Estate Agent Geo. B. Powers the Chas. C. Hopper farm near Crittendon, containing 150 acres, for \$7,500, possession to be given in March.

Mr. and Mrs. Geo. J. Bubbs and little daughter Evalyn Fay have gone to Oklahoma City, Oklahoma where Mr. Bubbs will have charge of the agency of an acetylene lighting company, and expect to remain there for several months.

J. F. Blackstock of Saskatoon, Saskatchewan, Canada, was the guest of Judge J. G. Tomlin the first of the week. Mr. Blackstock is one of the best business men in the Great Northwest, and a most clever, affable gentleman to meet.

The loose leaf tobacco market had about 130,000 pounds of tobacco on sale Saturday, and it averaged \$15.50.

Wednesday was about the same, and brought the number of lbs. sold up to two and a half million lbs. at an average of \$15.52.

Mrs. Jno. L. Vest, Mrs. Charles Ransler, Mrs. T. Grubbs, Mrs. J. M. Stanner and Miss Louvenia Edwards attended a reception at Dora Chapter Eastern Star at Dayton, Wednesday evening, given in honor of Mrs. Emma Menefee, Grand Matron of the order of Kentucky. It was a delightful affair.

R. M. Billiter, manager of the loose leaf tobacco market at Williamsport, here on Wednesday here on the market, and complimented the management very much on the methods and the business transacted. The markets at Dry Ridge and Williamsport have sold over three million lbs. of tobacco this season.

ANOTHER

Boone County Boy Who Has Made Good in The Business World.

The farm, which, speaking collectively, has cradled its full share of the nation's successful men, was the birthplace of George L. Riley, of Kentucky and California, a young man who has quickly made good in the business world.

Mr. Riley first came to Pasadena ten years ago with his brother. He remained there about a year, then went north and later returned to the farm in Kentucky. He returned again less than six years ago. He went to work as clerk for the Hammond Lumber company, and in three months' time, although he had never kept books before, he had gained such proficiency and confidence of his superiors that he was made bookkeeper. From that time his rise to the management was rapid. His friendly personality and courteous and efficient business methods made him much to the local branch of the company.

Mr. Riley, the Pasadena manager, was born in the most northern house in Kentucky, just west of the river, from Cincinnati, Ohio. The farm gave him his start in life and education that was not lacking in value to a man who, though he did not then know it, was about to enter the lumber industry. Mr. Riley is but 31 years of age, having been born August 18, 1885. He is certain, his friends believe, to continue to advance in the lumber world, just as he went ahead more rapidly than most men advance, in the Pasadena establishment of the company he represents.—Pasadena (Cal.) Star-News.

Mr. Riley is a brother of Supt. E. C. Riley, and has many friends in this native county, who will read the above with pleasure.

A Correction.

There was an error in the appointment of the road bonds that were sold February 23rd. The Erlanger Deposit Bank bid for twenty bonds, \$10,075.20, when their bid was tabulated as a par bid, and the correct appointment for the bonds is as follows:

W. T. Berkshire, 10 b's	\$20.00
Z. T. Kelly, two bonds	1,008.00
Erlanger Dep. Bank, 10 bonds	10,075.20
A. R. Bonnar, nine bonds	4,527.00
W. D. Croper, 12 bonds	6,036.00
E. H. Blankenbaker, 3 b's	1,500.00

Total fifty bonds	\$25,176.20
Accrued Int. on bonds	138.50
Net premium on bonds	\$37.70

Public Sale.

We will offer for public sale, Friday, March 9th, 1917, at 1 o'clock p.m., at what is known as the Jerry Phipps place on the Carpenter road and between the Hicks pike and the Frogtown road, and about 2 miles north of Richmond, the following two tracts of property: Span of four year old mules, gentle, good workers; pair of good work horses; four sows; new road wagon; delivery wagon; one horse; one cow; one calf; one improved milk can; new mower; hay frame; 60 bushel barrel; 2 cultivators; two horse corn drill; disc harrow; one horse grain drill; one horse hay rake; two Oliver chilled plows; four sets of work harness; double trees; self binder; lot of mowers and other articles. A Week's News

Samuel Smith, of the Gunpowder neighborhood, has moved to Bellevue.

Walter Swaney moved, last week to Frank Walton's farm in Bellevue precinct.

Dr. Evans will begin his lecture at 8 o'clock at the Court House Saturday night March 3d.

A mid-summer thunder storm disturbed the slumbers of many about 4 o'clock last Friday morning.

Born, to Sam Johnson and wife, in Memphis, Tenn., a boy, so a letter informed their friends here last week.

Several of Burlington's young people attended the school entertainment at Bellevue, last Thursday night.

Wood savings seemed to have lost none of their popularity in some of the neighborhoods in this county.

John Ryle, who resides down on Gunpowder creek, sold a good horse to a foreign buyer, Monday, for \$140.

Mrs. Jas. E. Smith entertained the Five Hundred Club at her delightful home near town one afternoon the past week.

There is a recipe out for an eggless finger bread. It is said to be a good one and will become a very popular finger bread.

March is here and it is sincerely hoped it will be equipped with a better class of weather than that of January and February.

Hedge's portable gasoline saw mill was doing custom work last week. Give it a chance and it will prepare stove wood with a rush.

Burning tobacco plant beds is now in order, and indications are that in some neighborhoods in the county an increased acreage will be planted.

James Waters, from over on Long Branch, was transacting business in Burlington, Monday. Mr. Waters has been in delicate health for some time.

SALESMAN WANTED to solicit orders for lubricating oils, greases and paints. Salary or Commission. Address LINCOLN OIL CO., Cleveland, Ohio.

During the past week several parties living outside of the county have been looking at farms out on the Bellevue pike with a view to buying.

"The hide of the black rhinoceros is almost an inch thick." And he never sought public office. What a waste of adequate preparation.—C.J.

The banks and the circuit clerk's office were the only business places at which Washington's birthday was observed in Burlington as a holiday.

Some of the schools in the county dismissed on the afternoon of Wednesday of last week—on last Monday morning—a Washington birthday vacation.

A truck that weighs three tons, carrying a load that weighs four tons, is a right good thing for smoothing out the bumps in a road when the ground is soft.

Elbert Rice, of Union, was a business caller at this office one day the past week. Mr. Rice is one of the prominent young farmers of that part of the county.

It can be said to the credit of the General Assembly now at labor in Frankfort, that they have not been introduced as many tax bills as there are members of that body.

Mr. Crawford, who lived last year on J. B. Gaines' farm near the second covered bridge out on the Petersburg pike, has moved to James Jones' farm down on Gunpowder creek.

Cecil Gaines is beginning to wear a farmers' smile and is anxious to begin turning over the soil on the farm his father, Judge Gaines, bought recently in the Lima burg neighborhood.

Ed. Rice began preparing his potatoes for planting last week. He thought he would better get his seed ready before potatoes become too valuable to cut into pieces and put in the ground.

Last week Fred Morris sold to a Louisville party a race mare for \$300 f. o. b. Erlanger. Mr. Morris has kept eight race horses for other parties this winter. He has been recognized as one of the best men in the country to take care of that class of stock.

Samuel Pettit, who lives about three miles out on the East Bend road, was in Burlington Friday. He stated that he and his sons are preparing to put in a considerable acreage of tobacco this year. Mr. Pettit sold his last crop for \$12 and says had he put it on this loose leaf market he would have got at least \$18 and that next year he is going to get what it brings on the market let that be much or little.

Obituary.

Mr. Henry O. Rouse and his sister, Perline Rouse, died within the last week at Spring Place, Ga. They were born in Boone county, Kentucky, and moved to Spring Place about 12 years ago. Miss Rouse was born May 20th, 1835; Mr. Rouse was born Feb. 22, 1810. Mr. Rouse died Feb. 8th, 1917; Miss Rouse died Feb. 11th, 1917. What can be said of one concerning life and character can be said of the other. They both early in life joined the Lutheran church and were always loyal members after moving to Georgia their being shipped when their health would permit them with the Methodist. They were good neighbors kind and affectionate friends, loved and honored by all who knew them. They are survived by one brother, E. L. Rouse, who lives in Ky., and health. Several nephews and nieces also are left to mourn their loss to them. We offer our heartfelt sympathy and point them to Him who alone is able to heal the broken hearted.

We believe that the spirits of the good brother and sister have taken their flight to the land where there is no pain nor sorrow.—Spring Place paper.

B. L. Rice.

B. L. Rice, son of Columbus Tinsley and Sally, died of pneumonia March 2nd, 1917. He was born March 2nd, 1851, and died Feb. 10th, 1917 at Covington's General Hospital, after a lingering illness of several months.

Mr. Rice united with the Baptist church at Union when very young. He was a man of very high intelligence and during his early life was an active member of a number of business enterprises. However his farm took a large share of his interest and after educating his children in the city schools of Covington, he moved back to his farm near Union.

Mr. Rice married Ollie Orr Stansley, Sept. 17, 1872. To this union one daughter, and four sons were born, all of which survive. Mr. Rice died August 10th, 1913. Mrs. Rice also leaves one sister, Mrs. J. W. Conner, to mourn his loss.

Julius E. Rouse Dead.

Julius E. Rouse, son of Mr. and Mrs. Geo. E. Rouse, died of pneumonia in a hospital in Lexington last Saturday afternoon. He is survived by his wife, three sons and one daughter. Mr. Rouse was a daughter of the late Owen P. Conner. Mr. Rouse moved to Fayette county about fifteen years ago. He was a native of Boone county and was one of the county's leading farmers and breeders of fine Hampshire hogs. He prospered and became a citizen of Lexington. He was just ready to begin taking life easy. Mr. Rouse was highly respected by the people among whom he was raised and well as those in his adopted neighborhood and all lament the death of a man whose life was so fraught with usefulness. He was attentive to his business but his social attributes were such as to render him a most companionable gentleman. When a man like Julius E. Rouse is taken he is missed.

Marriages.

Lewis Clout of Waterloo, and Mrs. Elizabeth Stephens, of last week's neighborhood, were united in marriage in Rising Sun, on Wednesday of last week.

Irvin N. Conner, son of J. B. Conner, and Miss Addie Mae Long, daughter of Ben Long, all of the Florence neighborhood, were united in marriage in Rising Sun, on Wednesday of last week.

Stanley Stephens, of this neighborhood, and Miss Agnes Hodges, of East Bend neighborhood, were united in marriage in Rising Sun, on Wednesday of last week.

Getting Busy.

Bart Aylor and others who are to build a dam from the foot of the Carpenter hill down to Woolper creek to Owen Beemon's are making arrangements to get busy with the work and put it through as rapidly as possible. The short haul required to get the rock necessary for the construction of the road will facilitate the work. And with each and every man interested doing his part the road ought to be completed in a few weeks after work begins.

Big Farm Sold.

The 380 and 400 acres of land belonging to the estate of the late Missouri Walton, of Erlanger, and lying on the Bellevue pike, was sold last week to his real estate man named Anderson and a resident of Bracken county. It is said the consideration is close to \$12,000. The land is on the south side of the pike and extends back to what is known as the Middle creek bluffs.

Embargo on Milk Continues.

The big milk meetings held the latter part of last week in the country and the one held in Cincinnati last Saturday made no change in the situation and the embargo place on milk for several weeks ago is still in effect, with no indication of being lifted soon.

Don't forget that next Saturday night, March 31, is the last number of the "Lyoness" comic. This number is a lecture by Arthur Wilson Evans Welsh Wit and Humour. You will be entertained by this lecture.

Personal Mention

Dr. Nunnally, of Ballisville, was a business visitor to Burlington, Monday.

Benjamin F. Crisler, of McVittie, was transacting business in Burlington, Monday.

John S. Surface, of Florence, was a caller at this office a few minutes last Thursday.

Mrs. J. G. Furnish and son, Joe, were visiting her parents, Mr. and Mrs. J. C. Revill, Sunday.

Emmerson Crisler, of Cincinnati, was the guest of his sister, Mrs. J. S. Adams, a few days the past week.

Albert Conner was too ill to attend the funeral of his brother-in-law, Julius Rouse Monday in Lexington.

Mrs. Lula Walton, of Bellevue, spent last Saturday until Monday with Mr. and Mrs. Wm. Smith, of Georgetown.

Mrs. F. A. Hall spent from Thursday until Monday with her daughter, Mrs. H. W. Shearer and Miss Lise Hall in Newport.

J. M. Craven, of Lima burg, came in last Thursday to see how the RECORDER's force observed the birthday of the father of this country.

Miss Louise Walton, of Home City, Ohio, the guest of her grandmother, Mrs. Furnish, spent from Friday evening until Sunday afternoon.

Miss Eliza Rouse, who is spending the winter with her sister, Mrs. F. A. Walton, in Covington, was in Burlington a few hours last Sunday.

Miss Mary Roberts who is teaching in the Graded School at Petersburg, spent Saturday and Sunday with her parents, Mr. and Mrs. C. C. Roberts.

Mrs. Jas. W. White and daughter, Miss Alice, of Fickertown, were guests at John C. White's, Saturday night, and attended the school entertainment at Library Hall.

Wilber Rice and wife, of Idlewild, were Saturday night guests of uncle Edward Rice's and attended the entertainment. Mrs. Rice went home with them Sunday, returning home Monday.

Miss Tatelle Huey, who is teaching in the Dry Ridge High School, came home on the evening of Feb. 24, to spend this Washington birthday vacation with her parents, Mr. and Mrs. R. B. Huey.

Women Do Not Vote.

The women, whenever given a change make it clear they do not want the ballot, and when, in the face of their protests, they have thrust upon them they do not use it.

Let those who doubt this statement read an article by Mr. J. S. Eichelberger, which appears in the "Woman's Protest," an anti-suffrage organ, in which a national election is thoroughly analyzed and the fact mathematically demonstrated that the women will not vote, even when they have the right to vote. Mr. Eichelberger says, taking Illinois, 132 men vote to every 100 women. The vote did not affect the result. The assumption is that the women will vote in a body. As a matter of fact, they divide and vote with the men. For President Wilson and Mr. Hughes combined 114 men voted to every 100 women. For President Wilson 148 men voted for every 100 women, and for Mr. Hughes 151 men voted to every 100 women. Mr. Eichelberger says that in Illinois alone is it possible to separate the votes of the women from those of the men. In Illinois 41 per cent. of the double the "Woman's Protest," an anti-suffrage analysis, it appears that male suffrage Delaware, with only 66,000 men, cast more votes than woman-suffrage, Wyoming with 57,000 men and 35,000 women. This is the State that has had woman suffrage the longest.

He combined proportion of eligibles who vote falls below 50 per cent. in six of the twelve suffrage States and only in one—Morison Utah—did it rise to the masculine average of 70 per cent.

President Wilson obtained a larger popular majority (96,021) in the 12 woman-suffrage States than in the 12 man-suffrage States. Mr. Hughes, who actively bid for the woman vote, obtained 27,082. That is, the woman suffrage states and only 31 of that 91 electoral votes of the woman-suffrage States.

President Wilson carried an anti-suffrage Ohio and suffrage California by about the same plurality percentage as Mr. Hughes carried anti-suffrage West Va. and suffrage Illinois. These figures clearly prove three propositions:

First.—That the agitation for woman suffrage is from a small corner of woman who are trying to force it upon the great body of 18 women against their wishes.

Second.—That the ballot is not used by woman the women do not use it. Some vote from a sense of duty, who are opposed to woman suffrage, even this addition does not secure a vote of 50 per cent.

Third.—That even where women vote they have no effect, no influence upon the election; they do not alter results, the results being the same whether the women vote or stay at home; in other words, the women do not divide, in giving the ballot to woman they do not alter the proportion between good and evil; the polls are not divided; the numerator and denominator instead of having ten we have 8—Lombville Evening Post.

For 8-10-100 work horse, also barrel race vintner. Apply to Mr. Tom Souther, Idlewild, Ky.

Our Rest Room is at Your Service.

CONRAD BROS.

Mr. Customer,
Boone County, Ky.
Dear Sir:—
Uncertain March is with us again, and our thoughts turn towards Spring. Before long we will display our new styles and fabrics for the coming season.
Before we do this, you will have a chance to pick up a real bargain in a Man's, Young Man's or Boys' Suit or Overcoat from what is left of our large Winter Stock. It is our loss to carry them over till next winter—your profit to buy them.
Our business has increased wonderfully in our new location, due to years of honest service in the old location and increased efforts to satisfy our customer and his pocket book, in our new store.
Trusting you will give us an opportunity to "show you," I am
With Best Wishes,
Yours truly,
SELMAR WACHS.

**FAR BETTER THAN NEW TIRES,
FAR CHEAPER IN PRICE, TOO.**

You can buy three of our ORIGINAL 2-IN-1 TIRES THAT ARE PUNCTURE PROOF For the price of one new tire. Send us your old tires. We will send you in exchange

FIRST CLASS 2-IN-1 TIRES
These tires will give you at least from 2,500 to 5,000 miles.

OUR 2-IN-1 TIRES ARE BACKED BY OUR IRON-CLAD GUARANTEE.

Size	If You Furnish 2 tires	If You Furnish 1 tire	Net Price of 2-in-1 Tires	Size	If You Furnish 2 tires	If You Furnish 1 tire	Net Price of 2-in-1 Tires
28x2 1/2	\$3.00	\$3.50	\$4.00	34x4	\$6.50	\$8.00	\$9.50

NATURE WOULD BALANCE EVEN

Creatures That Prey, and Those That
Are Preyed Upon, Have Natural
Insurance Limited.

It is a common fallacy to believe that the strongest animals are the most numerous. It is true that the strongest animals are the most numerous, but it is also true that the strongest animals are the most numerous. It is true that the strongest animals are the most numerous, but it is also true that the strongest animals are the most numerous.

It is true that the strongest animals are the most numerous, but it is also true that the strongest animals are the most numerous. It is true that the strongest animals are the most numerous, but it is also true that the strongest animals are the most numerous.

TOKYO STREETS A PUZZLE

Even Old Residents Are Said to Find
It Hard to Find Their Way
About Them.

Tokyo is made up of a group of small towns which extended until, like the old lady's two feet, they met. It is the most conservative city in Japan, and it is the most modern city in the world.

On my motorcycle, the only way I have mastered to find my way about is by memorizing the numbers of the main lines and then riding till I see a car. Then I know where I am. The city is grouped around the imperial palace, and segments, like detached pieces of pie, radiate from the center of the city.

Fire Loss in United States.

If one could imagine all the buildings destroyed by fire in the United States in a year arranged along one highway, each building occupying a lot 65 feet wide, the highway would extend from New York to Chicago, and the buildings would line it on each side. Such is the calculation of the department of interior. Furthermore, a person traveling this scene of desolation would pass in every thousand feet a ruin from which an injured person has been taken. At every three-quarters of a mile he would encounter the remains of a human being who had been burned to death.

For years, it is estimated, the value of actual property annually consumed by fire in this country reaches \$250,000,000, and another sum of about like proportions is spent for the maintenance of fire departments, waterworks, insurance programs, etc., to prevent still greater losses.—Cleveland Plain Dealer.

Snuff Upsets Burglar's Plans.

When Miss Jennie McAlpin of Doyle, La., was confronted by a burglar in her home the other night she outwitted the intruder, who demanded money, by leading him to her grandmother's room, catching up the elderly woman's snuff box and quickly dashing the contents in the astonished miscreant's eyes.

She then grasped with him and wrested the revolver from his grasp, but when she marched him toward the front door, cutting for help, the robber leaped blindly down the steps and escaped.—New Orleans Times-Picayune.

Soldiers Had Gone On.

As the British transports poured forth their freight of Australian New Zealand troops at Gallipoli, a young officer on one of the battleships noticed that the men went only a little way, then stopped. "Why don't they advance?" he cried. An older officer by his side looked through his glasses, and remarked quietly, "They can't advance." Nothing more pathetically beautiful has come out of the war. Surely the Anzac troops could ask no finer epitaph.—Youth's Companion.

The Exception.

"I am going to call up that pretty telephone girl and ask her to marry me."

"Then you won't get the usual answer."

"What do you mean?"

"She'll hurry to reply, 'Ring on.'"

Can't Do Without Them.

"We are here today and gone tomorrow," said the philosopher.

ONE VIEW OF A PESSIMIST

Somewhat Poetic Description, But
Most People Will Agree That It
Is Largely Truth.

A pessimist is a man of the man who didn't believe there was any such thing as adversity.

He is an offspring of the man who was sure that the horseless carriage would never come, and a nephew of the man who was willing to bet that men would never fly.

A pessimist is a direct descendant of the man who was sure that wireless telegraphy was a fool's dream and a submarine merely the creation of a fiction writer's brain.

The pessimist's ancestry scoffed at the telephone, the typewriting machine, the 20-story building, anesthetics and every forward step the optimists have taken for the betterment of human life.

WARNED BY A PREMONITION

Bankers Removed \$250,000 Because of
It, and Building Caught Fire
That Night.

"I have a premonition that something is going to happen during the night," said the cashier of the banking firm of C. R. Richards & Co., agents of the Lloyd Italian Steamship line, at 31-33 Broadway, one week ago.

So \$250,000 in cash and securities to the vaults of the Equitable Trust company.

Something did happen. Fire started in the building, and early the next day firemen were fighting a stubborn blaze in the rear beneath the street.

Deaf volumes of suffocating smoke poured out of the building, permeating the neighborhood with a heavy, nerve, which also occupied the building. The loss was \$200,000.—New York Telegram.

What the Rabbit Costs Australia.

The State of South Australia has, since 1891, erected 29,148 miles of "vermin fences" enough to encircle the globe and with the remnant build a double line of fence along the southern border of the United States. When contracts now running are completed the mileage will be much increased.

New South Wales has expended over \$27,000,000 for rabbit extermination and has within its borders 98,000 miles of fence. One of the best Australia's fences extends entirely across the continent. Of late years the rabbit has been repaying in part for his keep—paying board, as it were. He goes to swell the total of food exports from the commonwealth. Along the country roads rabbits may be seen hung on the rabbit carts which convey them to the packing houses to be prepared for shipment as frozen meat and hides. Practically all are exported (the Australian does not eat "vermin"), and during 1913 frozen rabbit and hare to the value of 1,400,000 and skins to the value of \$200,000 were sent from commonwealth ports.

Prison Journals in Japan.

It is an interesting fact that the large prisons in Japan are publishing journals for circulation among the convicts. As a means of perpetuating the memory of last year's imperial coronation, the prison authorities have started publication of monthly journals for the benefit of prisoners, who are of course practically cut off from news of the outside world. These papers, which are mostly filled with moral stories and other neutral matter considered suitable for prison inmates, are edited and published by the prison officials, and are reported to enjoy great popularity among the convicts. The journal published by the Koseigo prison, Tokyo, is entitled Mado-no-Hikari (The Light of the Window) and that issued by the Sugamo prison, Tokyo, is called Kinen (Commemoration). Both are said to be very creditable publications.—Japan Weekly Chronicle.

Promoting Thrift in Colombia.

The Colombian congress has adopted a measure providing for the appointment by the minister of public instruction of a commission to investigate methods for promoting saving throughout the country. This commission will work out a general plan of organization of public and school savings banks, retirement funds, and societies for mutual aid and co-operative buying.

New Paris Fashion.

Overalls and hickory shirts are being worn in Paris because the coal shortage has closed the laundries. We'll probably be wearing these garments at the opera next season.

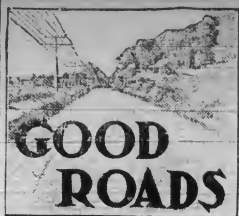

Old Stuff.

"A scientist takes one bone and reconstructs a dinosaur."

"That's nothing. Our laundry can take one bone and reconstruct a dinner."

Academic Consolation.

About the only consolation for the high cost of living is that some of the college professors is that some of them are able to explain why it is.—Milwaukee Journal.

GOOD ROAD WORK IN WINTER

Maintenance of Dirt Roads Is Problem Confronting Farmer—Making Split-Log Drag.

One of the problems confronting the farmer is the question of maintenance of dirt roads. Not only should dirt roads be maintained during the spring and summer months, but the winter months as well; especially is this true where there is not an overabundance of snow, which conditions exist with many of our readers.

The King road drag may be used with much benefit during the winter months, just after thaws or rains. Good work can be done at this time of the year because the soil is crumbly or mealy and pushes easily toward the center of the road.

If the road has been properly cared for during the summer and fall, it will be only a slight task to drag it during the winter when conditions are right. At that season of the year there is little for the work team to do and in early spring the roads will be in shape to turn water and permit of early drying. In fact, the winter-dragged roads will be dry and hard in the spring when neglected roads will be soft, rutty and springy. There is no best time to drag roads, so after the work and then drag whenever you can during the winter. Each year roads will be in good shape next spring. Make a split-log road drag and keep it going on the highway.

D. Ward King, the inventor of the drag, gives the following directions for making a split-log drag: Take the two pieces of a split log, ten or twelve inches thick and seven to ten feet long. Set the halves flat sides to the front. Fasten 30 inches apart with strong stakes, the ends of which are wedged in two-inch angle holer, bored through the slabs. Put a solid plank platform on the stakes for the driver to stand on. A chain is made of strong wire or chain, the long end fastened to stake over the top of the front slab, the short end should be put through a hole made in center of the slab and near the end to prevent the back slab tilting forward. Face four or five feet of the ditch end of the front slab with iron. An old wagon tire, worn share of road grader, or any piece of flat steel will answer for this purpose.

As a general rule, always haul the drag at an angle of 45 degrees, moving the dirt to the center of the road.

CHURCH TO HELP GOOD ROADS

Isolation and Solitary Confinement of Women Do Much Toward Filling Insane Asylums.

In a lecture on "The Church and Good Roads" the Rev. James Thomas told the ministers' conference in Denver, Colo., that "The isolation and solitary confinement of the farm wife and the farm servant girl do much toward making these women form a considerable percentage of the inmates of insane asylums."

The speaker continued, "The good roads problem is one to which the church must very soon give material aid." The church is a force in any undertaking and good roads enthusiasts will welcome its efforts in behalf of rural welfare.—Houston Post.

IMPORTANT DUTY OF PEOPLE

Prompt Repair and Careful Maintenance of Good Roads Is Essential —Farmer Is Interested.

The making of good roads is one of the most important duties of the American people, and their prompt repair and careful maintenance is essential.

There is probably no subject in which the progressive farmer is more deeply interested than that of having roads connecting him with his markets, over which he may be able to haul the greatest possible load.

WELL WORTH THINKING OVER

Two Machines—Being Manufactured Where One Would Do If Farmer Gives It Proper Care.

A farm machinery manufacturer under the following statement: "If the farmer cared for his machinery as he should, we would have to manufacture but one machine when we are now putting out two."

Top Dressing for Roads.

A mixture of iron filings, sand and cement is being used experimentally in France as a top dressing for highways.

Put Roads to Bed.

"The farmer who 'put his road to bed' for the winter in good shape, will think himself lucky."

Distance to Market.

Roads shorten or lengthen the distance to market according to their condition.

"Cured"

Mrs. Jay McCle, of Stephenville, Texas, writes: "For nine (9) years, I suffered with womanly trouble. I had terrible headaches, and pains in my back, etc. It seemed as if I would die, I suffered so. At last, I decided to try Cardui, the woman's tonic, and it helped me right away. The full treatment not only helped me, but it cured me."

Cardui
The Woman's Tonic

Cardui helps women in time of greatest need, because it contains ingredients which act specifically, yet gently, on the weakened womanly organs. So, if you feel discouraged, blue, out-of-sorts, unable to do your household work, on account of your condition, stop worrying and give Cardui a trial. It has helped thousands of women,—why not you? Try Cardui. E-71

FOR SALE
Delinquent Tax List.

FOR SALE TO AN ORDER OF THE BOONE FISCAL COURT directing me to receive bids for the 1914 Delinquent Poll Tax list of Boone county. I will receive sealed bids for the said list until 12 o'clock, noon, Tuesday, March 4, 1917, at which time all bids received by me will be delivered to the said Boone Fiscal Court which reserves the right to reject any or all bids. Bids on said list can be made on the precincts separately or on the list as a whole.—The sale will be for cash, and bidders must be prepared to comply with the terms promptly. There are 760 delinquent polls in the county, returned as follows from the twelve precincts:

Burlington	54
Bullittsville	77
Beaver	32
Bellevue	41

Red Star Flour

Everyone is demanding better, more wholesome bread. Here is the flour that gives you this real flavor. It makes you want more. For bread made with **RED STAR FLOUR** is moist, flaky, so good. Not dry and tasteless.

It contains the entire food values of the wheat berry. It is creamy white, the purest flour that can be made. The essential aromatic oils of the wheat wherein lies the flavor are not milled out of it.

Remember the name and ask for **Red Star Flour**. Your grocer can supply you.

Testing the Eyes

Sometime when people get glasses that suit them they go on wearing them for years without having their sight tested to discover whether any change has taken place. This is wrong. All should have their eyes tested at intervals. Glasses for old sight should be changed every two years. Whenever you feel uneasy in your glasses don't hesitate to call and see us. If no change is necessary we will tell you.

DO YOU TAKE THE RECORDER?

Local Happenings.

Next Monday is county court day.

The past week was not so exacting on coal bins.

It is said that autoing on the Bellevue pike is no snap.

H. G. Buckner, of Erlanger, was in Burlington a short time last Sunday afternoon.

The Owen county circuit court is in session at Owenton. Judge Sidney Gaines presiding.

Last number of the Lyceum Course next Saturday night, and it is expected to be the best of the season.

Some of the local fans are puzzling their brains over the base ball problem the Post sprung a few days since.

Samuel Smith, who resides down on Gunpowder creek, reports catching a lot of nice fish in that stream the last day of last January.

One of the largest property owners in Erlanger told the Recorder a few days since that the Lexington pike would be concreted through that city.

A gentleman who has lived on the Burlington and Florence pike for many years says since that road was reconstructed the travel thereon has increased many times.

A Pennsylvania dealer in horses visited Edward Botts' farm in the Plattburg neighborhood, last week, and looked over several of Mr. Botts' fine animals but did not buy.

John Walton trailed the Overland auto he has had for some time to Hubert Conner, of Elzton, the trade involving half a dozen of Mr. Conner's fine Holstein milk cows.

Navigation on the Ohio river was resumed fully, last week, to the delight of the towns along its banks. In some places fuel and food supplies were almost distressingly scarce.

Ross Tupman, brother of Mrs. B. F. McGlasson, died in Pleasant neighborhood, died in Bakersfield, Cal., last Saturday. The body will be cremated and the ashes returned to his relatives here to be finally disposed of.

R. B. Huey, of Clover Lane neighborhood, is installing an acetone light plant in his residence, while a couple of the Rogers boys at Bellevue have arranged to illuminate their homes with electricity. The above named gentlemen believe in home comforts.

Benjamin Stephens, Jr., who resides on the pike above Florence has been afflicted in a very peculiar manner for several days, his jaws being locked without any apparent cause for the trouble. It is said he has suffered no pain and is able to be about all the time.

Dolphie Seebree, caretaker on Burlington R. D. 2, did not show up at the Burlington office until after 6 p. m. last Friday. The heavy rain that fell that afternoon from Gunpowder creek past fording at the Weaver mill crossing, and he had to wait there until the flood receded.

The B. B. Hume Automobile Co., Covington, sold four Republic trucks, last week. Geo. W. Hill & Co., bought eight 14-cylinder and one two-ton capacity; the Montgomery Co. bought a 3-ton and a Mr. Dougherty a one-ton. Besides the above they sold one Franklin and one Chevrolet automobile.

A fair size crowd attended Chas. Shinkle's sale last Saturday, and good prices were realized. The team of mares brought \$372.50; a two year old heifer with a young calf sold for \$61. Twenty pound turkey hen brought \$10.75. Mr. Shinkle will move to Petersburg, he having rented his farm to C. C. Pigg to cultivate this year.

Newton York who followed his sale of land a few weeks ago with a public sale of his personal property will not shake the dust of Boone county from his feet, but has cast anchor in the neighborhood where he has lived so long by investing in two small tracts of land not far from that which he sold recently.

It begins to look like the land owners along the East Bend road from Burlington to Waterloo by way of Wm. Carpenter are going to take advantage of their present opportunity and have that road piked. The fiscal court has let a bid of \$400,000 for the right or way and if there is a failure of the effort to put the project through the fault will lie at the doors of the private owners along the route. It is one of the important roads in this part of the county, and if piked that importance will be increased.

In the last week half a dozen farms have been looked over in this part of the county by prospective nonresident buyers, and in every instance, except one, the farm is located on a pike. One sale on a pike, said to amount to about \$12,000, has been made, and it is related that Chas. Youell was offered \$1500 more for the J. W. Rouse farm near Limaburg than he gave for it a few months ago. When a man buys a farm now days he wants to get some road along with it.

WHAT A BATTLE COSTS

Total Artillery Expense of Army Corps is \$820,000 a Day.

When it is remembered that there are today under arms more than 2,000,000 soldiers in the European war the importance of the task of keeping those men in the field and keeping them supplied with the munitions with which they must wage war appears. It has been estimated that it costs approximately \$100 to outfit a soldier. Of this \$25 goes for a gun and \$25 for 1,000 rounds of cartridge. The average life of a uniform under modern service conditions is very short; that of the ordinary rifle is six months. In all of the history of war there never has been such a rapid exhaustion of all of the materials with which it is made.

An idea can be gained of the immensity of the outlay required in the prosecution of a great battle by reference to some of the figures from Verdun. A seventy-five centimeter gun can fire about 100 projectiles a day. Approximately 100 projectiles cost approximately \$200. Considering this and the depreciation of the gun, which is particularly rapid, the daily outlay for its operation amounts to \$200. It is estimated that the 120 seventy-five-centimeter cannon in any army corps, fired all day, costs in munitions and depreciation \$24,000. In addition to this, each army corps has about 40 pieces of heavy artillery. Explosives and depreciation for a single day's work for them totals \$500,000, making the total artillery expense of an army corps \$28,000 a day.

If the outlay in gun metal and powder is heavy it is no more so than the outlay for materials demanded by the present necessities of trench warfare. The effect of the war has studied this phase of the present war carefully says that to put a trench in a state fit for occupation in winter requires 1,250,000 running feet of 3 by 3 timber, 36,000 running feet of corrugated iron, 6,250,000 sand bags weighing 100 lbs. each, 20,000 standards and pickets to the mile. In addition to this 300,000 lbs. of barbed wire fence has to be used weighing 110 tons. When one stops to recall the hundreds of miles of trenches which stretch across Europe in different directions, and how often sections of the trench have to be built, he can gain some idea of the tremendous amount of material required in their outfitting.

The picture of the vastness of the munitioning trade and the immensity of the task of keeping the armies in the field—and in fighting conditions may be gained from the statement that there are now more than 4,000 organized munition plants in Great Britain, 1,000 of them in the output of never produced war materials before the war broke out. They employ nearly 3,000,000 men and nearly 1,000,000 women. The vastness of the industry in England is not out of proportion to that in France. Although Germany holds 70 per cent of France's coal and some 80 per cent of its iron, France has been able by the opening up of new furnaces and by immense importations of ore and pig metal, largely to overcome this handicap.

While it is difficult to present authentic figures upon the production of explosives used by the allies furnished by the U. S. the figures of the Department of Commerce do show something of the extent of the munitioning trade. Authorities disagree widely as to the percentage of America's contribution to munitions.

One authority puts it as low as two per cent, while another says that it does not exceed five per cent. Whatever the percentage may be, the figures of the Department of Commerce show that in the first eight months of 1917 our exports of horses, mules, brass and manufactures of brass, motor cars, copper and manufactures of copper, explosives, steel, rubber products, iron and steel manufactures, lead, leather and manufactures of leather, nickel, mineral oils, sugar, surgical apparatus, tin, zinc and manufactures of zinc amounted to \$433,000,000. In the first eight months of 1916 our exports of those same materials amounted to \$1,986,000,000. From these figures it would appear that our contribution to the munitions trade of Europe during the year 1916 would approximate more than \$2,000,000,000. Our exportation of explosives alone for the calendar year will reach upward of \$700,000,000. In the first nine months of 1916 America's exports to the Allies in munitions amounted to \$3,125,000,000, as against \$750,000,000 for all of the other nations of the earth, Belgium being a new rival.

The labor demands of the munition industry in the U. S. have reached unprecedented heights. Recently one big manufacturer of munitions, who has been asked by the States army authorities to give him the names of the rejected recruits between the ages of 21 and 30, has been offered a wage of from 3.50 to \$5 a day, with lodging at 50 cents a week. National Geographic Society Bulletin.

Pertinent to Farmers.

Every hour seems to draw this country nearer to war. No man can assure us that we will escape, for no man knows.

The war may see us shut off from all sources of supplies from the outer world, and dependent entirely upon local production.

Facing such a possibility it is incumbent upon every farmer to cultivate to the limit of his acreage and ability, and the taxpayer who has a vacant lot should do the same.

The time to begin is NOW. If we place armies in the field this winter, the food and the products come from the farms.

DAN'S REPARATION

By SUSAN CLAGETT.

"I tell you Ellen, I will not have it. The man is a gambler. I grant him is a gentleman, that he is a delightful companion. I feel his charm as well as you, but to have him something nearer than a friend is not to be thought of. You must give up that foolish idea."

"Idea," scoffed Dan's sister. "I love Larry O'Connor, Dan. I am thirty years old and he is the first man I have ever cared for save yourself. Knowing this, do you think that I will give him up?"

"You are old enough not to let your heart get the better of your judgment, your common sense. I have known O'Connor for six years. I know him as one man counts to know another up here in the mines. He is a true friend. He will divide his last penny with an enemy if that enemy is hungry, but he can no more keep out of a game of chance than you can keep from breathing. He left here Christmas night and went directly to McQuibban's. He broke the bank. At daybreak he took his team and started for Fort Gibson. I heard today he made a clean-up there."

"I must think it out, Dan," Ellen answered slowly.

It had turned bitterly cold, the cold that freezes cheeks and extremities unawares. Fortunately there was no wind, but in crossing the flats Larry O'Connor had to pause several times to thaw the ice from the feet of his dog team. Each time he stopped there came a whimper from the handle on the sled, and at a longer pause a voice said irritably:

"My heart is freezing, Larry. Aren't you almost there? Don't you see your stubbornness in making me take the trip?"

"There was nothing else to do, Tim. I had to get you away. You have about finished me in Fairbanks, as you have in every other place I have been. Now I am through with you. Leave you at Fort Gibson. What you do thereafter is nothing to me, save this: You are to keep away from me. They will cure you at the fort until you can travel. Then hit the post trail for Holy Cross."

Larry left his team at Gibson, reaching the next morning on Orr's stage. The first person he met upon reaching Fairbanks, as he was the last with whom he had spoken before leaving, was Dan Holiday. O'Connor stiffened as he saw him. He could not forget their talk, a talk that had turned in the first glimmer of happiness that he had seen for years into a bitter reality of despair. He would have pressed with a curt nod but that he saw Ellen standing near her brother. His heart missed a beat as he caught sight of her, her arms filled with tundra, her gay cap and blanket coat making a spot of brilliant color against the grayness of the coming night. She nodded gayly and called to him that she was keeping open house New Year's day and he must come and help decorate the rooms.

Dan wheeled about and looked at her with a heavy frown. Larry thanked her, but said he had an engagement. The first person he met upon reaching Fairbanks, as he was the last with whom he had spoken before leaving, was Dan Holiday. O'Connor stiffened as he saw him. He could not forget their talk, a talk that had turned in the first glimmer of happiness that he had seen for years into a bitter reality of despair. He would have pressed with a curt nod but that he saw Ellen standing near her brother. His heart missed a beat as he caught sight of her, her arms filled with tundra, her gay cap and blanket coat making a spot of brilliant color against the grayness of the coming night. She nodded gayly and called to him that she was keeping open house New Year's day and he must come and help decorate the rooms.

"Break it," she commanded with a laugh. "All the while, including the butcher, the baker and the candlestick maker, are coming, and there will be no place else for you to go, so come you must."

All through New Year's day and evening Ellen watched and waited. Then he came, so late that her heart had grown chill with fear. As he made his way toward her he was stopped by a newcomer. Ellen could not help but overhear their conversation.

"Where is Tim? I heard he was with you," said the newcomer.

Larry hesitated. "He was, for a time." His eyes rested upon Dan, who was standing near. "The two of us went to the fort on Christmas night. He will go on to Holy Cross and from there to Nome."

"Doing better or worse up here?"

"And you are still the scapegoat, I suspect?"

"Drop it, Jack," Larry said irritably. "The other turned to Dan. 'Have you ever seen his twin? Alike as two peas—alike in everything save character. Larry has all of that. Tim is a local chap, but Jack, and the worst of his weakness is that he lets O'Connor take the blame for his misdeeds. I think he has committed every sin save murder and he is a confirmed gambler. A lucky one, too, if all that I hear is true.'"

"Larry left town some days ago after cleaning up McQuibban's bank." "The gambler," the other answered with a show of anger. "Suppose he has been up to his usual tricks. It wasn't Larry. That fellow is the straightest, whitest white man I have ever known."

Larry considered. "I guess it is up to me to keep my mouth shut, and glancing about the room. He made his way to his sister and Larry, who were standing together at the further end of the room, and talked very earnestly with them for some minutes; then he rapped upon a table shading near."

The silence was instantaneous. Dan looked at Larry and all his indignation melted. Then with a rush the words came—not many, but when they were uttered punishment reigned for a moment.

"Say it again," someone called. And once more Dan said:

"Ladies and gentlemen I wish to announce the approaching marriage of my sister to Mr. Lawrence O'Connor." Copyright, 1917, by the McClure Newspaper Syndicate.

SODA WATER WELL IS FOUND

It is in the Philippines, and Experts Declare It is Carbonized by Nature.

Many queer things have been discovered by the drill since and before Colonel Drake discovered that oil could be obtained by the artesian process, but very much more unique one is that recently struck in the Philippines. It is located in the town of San Fernando, on the island of Ticao. At the depth of 465 feet an enormous vein of water was struck, with such a gas pressure that the volume was thrown 80 feet in the air. It was only by exerting every possible effort that a small flood was averted. The flow was finally checked, however, and the water directed out and downward through two small pipes, through which it continues to rush with undiminished force.

Samples of the water taken show that it is heavily charged with carbonate and gas and appears and tastes like ordinary soda water, but analysis is not yet completed.

The man in charge of the drilling, who has had 40 years' experience in drilling artesian wells in many parts of the world, maintains that he has never seen or heard of the equal of the Ticao Island phenomenon.

WHEN ONE'S LIFE IS SHAPED

Not in the Cradle, But From 12 to 18 Years of Age, Prof. Earl Barnes Declares.

"The hand that rocks the cradle rules the world? Nonsense!—it only bundles the material. The time of the shaping of life is from twelve to eighteen years, old, that is the formative period. All great educators know that," Earl Barnes said in his lecture on Jean Charnes at Pittsburgh. It was the last of six studies in going given by Mr. Barnes before the University Extension society.

Nothing is more fragile than the reputation of genius to professional life," said Mr. Barnes. "Genius is solitary and individual, can never be fulfilled until it goes out from the routine and stays out. If genius were respectable, like you or me, he would be mediocre like you or me."

Perfect Watch.

When a part of the Shackleton expedition to the Antarctic land was stationed at Elephant Island they had only one timekeeper, and it hung over a blubber stove for four months, in the smoky atmosphere of a hut made of stray pieces of wood, blocks of ice, odd bits of canvas and an upturned beer barrel. But this is only a part of its history. The watch belonged to the man who had charge of the motor sledges, and it was reported that in the two and one-half years of the expedition this watch was never altered, never stopped going and gained just one minute.

Following incident from an English paper shows how important a chronometer is on an expedition of this kind.

At one period, in order to accomplish an arduous march, Sir Ernest Shackleton told his companions to discard all their personal belongings. It was imperative to march lightly. Sir Ernest himself set the example by throwing away 50 sovereigns (perhaps, had they been treasury notes instead of gold he might have retained them), and everything else went but six pairs of socks, one point of tobacco and one pound of cocoa—and the watch.

Bean-Shooter Minds.

Bean-shooter minds is the latest saying to be reported. They are the discovery of Dr. George Edgar Vincent, president of the University of Minnesota and president-elect of the Rockefeller foundation.

Speaking on "Crowd Psychology" in Chicago a few evenings ago he said, among other things: "The truth is, we are so much alike that we bore each other almost to distraction."

"Some people have tumbler minds, like beer. They load them with one end and shoot the contents out of the other."

"Idiot and children are the only ones you cannot hypnotize."

"A society for the suppression of the obvious remark would soon fill a city block."

Fastidious Fox.

Waldemar Edington of New York recently presented a live silver fox to the Zoological Society of St. Louis. The animal is valued at \$500. The gift was hurriedly accepted with profuse expressions of thanks, which are now in a way to be reconsidered and revised. The fox refuses to eat ordinary food and rejects practically everything offered it except fresh eggs. And fresh eggs are 10 cents a dozen in St. Louis, scarce and apparently looking up.

Unsentimental Thing.

How—There are times when I care nothing for riches—when I would not so much as put forth a hand to receive millions.

She—Indeed! That must be when you are tired of the world and its struggles and vanities—when your soul yearns for higher and nobler things is it not?

He—No, you're wrong. It's when I'm asleep.

Cumulative Responsibilities.

What do you think an extra session would accomplish?" "Probably," answered Senator Sarghian, "it will dig up material for more extra sessions."—Washington Star.

My Household and Kitchen Furniture and other incidentals. Terms made known on day of sale.

ANNIE E. CRIGLER

BELLEVUE.

Carl Baker is visiting his brother, Rev. C. E. Baker. Samuel Wilson, of Rabbit Hash, spent Sunday at H. D. Brady's. Mrs. C. E. Baker and children are visiting in Campbell county. Mrs. John Maurer went to Louisville, Sunday, for a visit. Mr. and Mrs. Willard Clure, of Indianapolis, Ind., are visiting relatives here. Clifford Sutton spent a few days with home folks the latter part of the week. Mrs. Joshua Rice has sold her property to C. S. Smith and will give possession April 1st. Mrs. W. A. Fritz, of Milford, O., has been the guest of her sister, Mrs. Chas. Dolph, for several days. Mr. and Mrs. Richard Marshall, of Bark Works, Ind., visited relatives here the latter part of the week. Prof. G. S. Harris and wife spent several days the latter part of last week with relatives in Patriot.

HATHAWAY.

The sick in this locality are on the mend. N. L. Moore's truck was out of commission last Thursday. C. S. Smith sold his farm to Jotie Cunningham and will move to Gunpowder creek. John D. McNeely sold to Marcus Ryle a portion of his farm known as part of the Rue place on Gunpowder creek. J. P. Johnson, who recently sold his place to Robt. Rouse, had a sale a few days ago, and things brought fair prices. John C. White and family, of Burlington, were guests of Geo. L. Smith and wife and Mrs. Cynthia Mason last Thursday. R. Lee Huey and tenants delivered their crops of tobacco to Hubert Brady, of Bellevue, last Thursday. They received good prices. Mrs. Sarah E. White sent her crop of tobacco to the Walton Loose Leaf market one day last week and got very satisfactory prices. John Walton has exchanged his last year's Overland for a 1917 model.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

DEVON.

Omer Easton is home from a visit to friends near Burlington. Thomas Northcut, of Cincinnati, is the guest of his father, Robt. Northcut. Douglas Rector was the guest of friends in Froggton neighborhood last Sunday. Mrs. C. D. Carpenter and mother, Mrs. Sarah Rector, were in Covington last Monday. Misses Mary and Jennie Dixon entertained last Sunday in honor of Mr. John Hogrife and bride. A large number of guests were in attendance. Mr. and Mrs. Wilson Ellis entertained delightfully Saturday night with music and dance. Mr. Ellis and family will soon move to the farm of John Rucker, near Pt. Pleasant church, and all will be sorry to part with them.

ERLANGER.

Mr. and Mrs. A. B. Corbin have returned from Orlando, Fla. Miss Lora Veltan entertained the Freshman Class of E. H. S. Friday evening. Dr. E. E. Clure and wife of Ludlow were visiting old friends here last week. G. C. Graddy, of Petersburg, is visiting his daughter, Mrs. Courtney Walton. Miss Mattie Kroylich, of Petersburg, spent last week with Mrs. Chesler Davis. Miss Beulah Roberts spent the week-end with her cousin, Melvin Roberts of Florence. Mrs. Noah Clure has returned home after a stay of two months with relatives in Ludlow. Rev. W. M. Wood, Associational Evangelist of North Bend Association, preached here Sunday evening.

VERONA.

Interest in making is going on in this community. Mr. and Mrs. D. Hess Vest are entertaining a fine girl. Young lambs are making their appearance in this locality. A large crop of tobacco will be picked in this neighborhood. J. M. Powers has returned from a Cincinnati hospital, where he was operated on, and is doing well. Rev. John Eadie, of Louisville, delivered good sermons at New Bethel church last Sunday. The home of Mrs. Nannie A. Roberts was the scene of a family reunion last Thursday, and all her family was present. The lightning struck J. E. Ransom's residence, last Friday morning, doing considerable damage. Mr. Ransom carried insurance in the Boone Co. Insurance Co. A band of volunteers representing Christ and the Bible teaching rendered some good banjo and vocal music here last Thursday evening at an open air service. Some interesting addresses on the Bible and its teachings were listened to by quite a good crowd.

GUNPOWDER.

Stephen Coffield, of Ind., is the guest of Alonzo Beemon. Kenneth Stevens has moved to Mrs. R. C. Tanner's farm known as the E. D. Crigler farm. R. E. Tanner purchased a new Ford car last week thus making another good road advocate. Mrs. Lenna Bonham, after spending several weeks at Cambridge, Pa., returned last week to the delight of her numerous friends. R. A. Hanger and wife, of Santa Fe, Mo., are guests of her sister, Mrs. Malie Beemon. They were present at the morning services at Hopeful last Sunday. Lost—Red Bourbon gobbler, has been missing about two weeks. Any information concerning him will be gladly received by Mrs. L. M. Rouse, Ring Beaver 306, Consolidated. J. P. Tanner had some difficulty in delivering the mail last Friday on account of the creeks being on a rampage. He had to back track almost all day. The meeting of the Joint Council at Hopeful last Saturday was attended by all the members. The following officers were elected—B. A. Floyd, chairman; E. H. Surface, treasurer; Edgar Graves, secretary. Considerable other business was transacted pertaining to the interest of the three churches, Hopeful, Hebron and Klenner. The same good feeling which characterized all the meetings of that body prevailed.

GRANGE HALL.

A. O. Rouse has purchased a new Ford machine. Owen Preaser was sick several days last week. Mr. Seinford is building a tenant house on his farm. Mrs. Walter Craddock was very ill last week with tonsillitis. Miss Emma Love, of Rising Sun, is visiting her brother, J. C. Dove. Thomas Adams has moved to the farm he purchased of A. O. Rouse. Paul Aylor has moved to Milton Beemon's farm which he has rented for the coming year. Miss Alline Clements entertained a number of her friends last Tuesday night with a party. Mrs. Clyde Clements, of Covington, visited her mother, Mrs. Elly Tanner, and other relatives here last week. J. A. Loomis had two sheep killed by dogs one night last week. Most of the sheep raisers report having good luck with their herds. John J. Cleek has been very ill with bronchitis and grip for several days. Wm. Wilson bought a splendid five year old mule of Ezra Aylor last week. Mrs. G. W. Ossman, who has been very sick for ten days with grip, is improving. Mr. and Mrs. John English will move to J. D. Griffith's farm. Mr. English will grow a large crop of tobacco on the shares. Mrs. Dan Dudley, of Bracht Station, is nursing her father and mother, Mr. and Mrs. J. H. Sleat, who have been very ill for two weeks. J. M. Baker and J. P. Hamilton delivered the last of their crop of tobacco 625 pounds to the Walton Loose Leaf for an average of 55 cents of expenses.

HEBRON.

Hubert Conner, of Hebron, was a RECORDER caller, Tuesday.

PETERSBURG.

Carson Stott has purchased a Ford. Rev. R. H. Carter preached here Sunday. Mrs. Maud Froehman is the guest of her mother. Milton Miller, local mail carrier, is very sick with pneumonia. Frank Berkshire is at home after an absence of several weeks. Mr. and Mrs. Harry Morand, of Aurora, were Sunday guests at E. K. Witham's. Mr. and Mrs. Weyliff Jones, of Gratz, are visiting Rev. William Wood and family. Miss Luella Bailey was called home because of her mother's illness. She has been visiting Mrs. Sadie Hurd for several months. Mr. and Mrs. E. L. Helms and family are staying with E. T. Krutz and family for a while on account of Mrs. Krutz's illness. The Epworth League contest is becoming very interesting. The blues are ahead in this race. The nettings are very interesting with a good attendance and five new members were taken in Sunday night.

FLICKERTOWN.

Ben Hensley visited Jas. Snyder, Friday night. Herman Rueie will move to Indiana this week. C. C. Figg bought a good work mare of Jas. Minor, Saturday. Spide Aylor furnished a fish dinner for Shinkle's sale, Saturday. Mrs. C. J. Hensley is visiting her parents, at Addyston, Ohio. Taylor Johnson left for his home in Walnut Prairie, Illinois, Monday morning. Moses Bevard, of Bark Works, Indiana, called on Bolivar Shinkle one day last week. Wm. Romines and wife and Clifford Romines were guests at Herman Rueie's last week. Henry Deek and family, and Chas. Beemon and wife dined with Lewis Sullivan Sunday. Chas. Shinkle sale was well attended and every thing brought good prices. Horses from \$50 to \$183, cows \$50 to 70 dollars; turkeys 52 cents a pound.

CONSTANCE.

Miss Minnie Zimmer is improving. Mrs. Dena England is still in the hospital. J. H. Klassen's family is sick. Frank is able to be out again. There will be services at the church here next Saturday night. Brother Carter will occupy the pulpit. Mr. and Mrs. Thos. Kenyon and little son were calling on Mr. Oliver Kottmeyer and family Sunday afternoon. Mrs. C. C. Adams, who was visiting her parents, Mr. and Mrs. A. F. Miller, has returned to her home in Harrison county. The oldest son remained. We saw an auto standing in front of Montgomery Anderson's, yesterday, and knew that Mr. and Mrs. Haberer were entertaining Mr. H. W. Robinson and wife.

HEBRON.

Dr. Sayre, of Florence, will be in Hebron on Thursday off each week. Mrs. Emma Schiars and daughter, of Norwood, were guests of relatives here Sunday. Mr. and Mrs. Geo. Gordon and daughter, Miss Jessie, spent Sunday at James Bullock's. Misses Mabel and Amy and Lulu Regenbogen of Cincinnati, spent Sunday with their parents. Mary Louise, little daughter of Mr. and Mrs. Luther Rouse, who has been sick has improved.

PT. PLEASANT.

The peach buds are nearly all killed in this locality. Robin and other birds of spring have made their appearance here. Miss Mamie Hilly has resumed her school after an illness of a few weeks. Allie Walton and family, of Hebron, visited his brother, Ira last Thursday. Miss White and wife of Cincinnati, were guests of Miss Flora Youell, Washington's birthday. Mrs. Sayre and Slater were called to see Mrs. Jack Baker last week. She is ill of a stomach trouble. Worth Kelso visited his sister, Mrs. Harvey Souther, last Saturday night while on his way from Tennessee to Detroit, Michigan. Dr. Allie Walton was called to see Mrs. Frances Clutterbuck's horse that was crippled and upon investigation found that the animal had a broken limb.

MT. ZION.

Mrs. Cora Stephens is improving. J. O. Richards had a woodsawing Wednesday. Mrs. L. W. Clarkson spent Tuesday with Mrs. J. J. Summers. Cliff Norman spent Saturday in Cincinnati purchasing seeds. Mr. and Mrs. E. H. Surface dined with Mr. and Mrs. John Surface at Florence, Sunday. Mr. J. S. Corbin and little son, Worth Clements, are passing the week with relatives at Hathaway. G. R. Kennedy and Chas. Craven spent Saturday in Cincinnati on business pertaining to the milk strike. Mr. and Mrs. J. W. Hogan had as guests, Sunday, their daughter, Mrs. Geo. Rice and Mr. Rice, of Price Hill. Mr. and Mrs. R. C. Norman and daughters, Sarah and Dorothy, of Covington, spent Sunday with relatives here. Miss Bessie Craven, who is attending Erlanger-Hi School, spent the week-end with her parents, Mr. and Mrs. Charles Craven. Mrs. Lottie Ellis Marshall and son, John, have returned to Covington after a week's visit with her aunt, Mrs. Ellen Richards. Mr. and Mrs. Henry Jung's many friends regretted their departure from this place. They will move to their new home in Ohio this week.

BUCKEYE CORNER.

T. B. Miller took his tobacco to Carrollton, Monday. Ryle Ewbanks is able to be out after a severe case of measles. Mrs. Georgia Ryle was a guest at T. E. Miller's one day last week. Jake Stahl entertained the young people Saturday night with a multiparty. Mr. and Mrs. Geo. Burris and family were guests at John Hartman's, last Sunday. Miss Pearl Ambrose and Robert Harris attended the moving picture show at Warsaw last Saturday night. W. W. Grimsley and wife, of Walton, former citizens of this place, were here Thursday and Friday at their old home. Several from here went to Indiana to attend the sale of Will Looke, but on account of an all day rain the sale was postponed. Miss Bessie Gullion accomplished daughter of Mr. and Mrs. Emory Gullion, of this place, and James Smith, an excellent young man, of Brooksville, Indiana, were married at Warsaw Saturday by Rev. Yeager, Christian minister. Miss Gullion has the best wishes of all her friends for a happy and prosperous future. She is finishing a seven months term of school at the Hughes school.

Wm. Craddock, who lives a mile and a half west of Burlington, received, Monday, a telephone message from Morrow, Ohio, stating that his son-in-law, Frank Hamel, had shot himself and that the funeral would be Wednesday. The message did not say whether the shooting was self-inflicted or done on purpose. Mr. Hamel was a barber in Morrow, and had been married only a few months. Mr. Craddock went to Morrow, Tuesday.

MISTAKE HARD TO CONDONE

It May Be Set Down as Certain That Neighbor Will Never Borrow Money From Perkins.

Some people keep grammophones as a hobby; some do it on purpose. I live at the No. 1, situated in a quiet avenue. I have lived here for two weeks. But when I came I didn't know they had a grammophone in the house.

The house next door to me is called the Retreat. From nine in the morning until the last car home there comes from this house the sound of an old-fashioned piano, two more pianos, more than that usual, a concertina in the last stages of decay, the bagpipes, and the clarinet disguised as a musical instrument.

What did Edison want to invent such things for? One of these days I shall write him a jolly stiff note about it.

I ask you, what would you do if you were writing an article on "The Economical Aspect of the Black Book's Particulars as Compared With the Physiology of the Great City," and then to be greeted with information that it is still a considerable distance to Tipperary?

The matter is fast becoming serious. Only the other morning when I came downstairs I found our cat lying dead with cotton wool in each ear. I could get anything to grow in the garden.

The other day I decided upon action. I said to Perkins, who lives at the Retreat, when I saw him in his garden:

"Do you want to sell your gramophone, Perkins?"

"Gramophone?" he said. "That isn't a grammophone. That's my daughter singing. Got a good voice, don't you think? Writes good poetry, too. I ought to get some advice for her, don't you think?"

"Yes," I said. "You ought to see a doctor. To-day a piece of bone is pressing on the brain."

Perkins doesn't speak to me any more.—London Answers.

RADIO MEN GETTING SCARCE

Ships in American Ports Are Delayed Because Wireless Operators Fear the Submarines.

There is a shortage of first-class wireless telegraph operators, and in some instances recently boats leaving American ports have been held up until a man could be found.

A few days ago a boat bound for an English port wanted an operator. The place was offered to two Philadelphians operators, but they hesitated at taking chances with German submarines, and the master of the craft was forced to pick up a gallant soul from New York, who agreed to make the trip. Wireless operators on cargo boats get from \$40 to \$80 a month and their keep.

Build Vast Artificial Lake.

A remarkable engineering feat was recently accomplished in southern India when the mammoth artificial lake of Marikana was completed in Mysore—an Indian state twice as large as Maryland, ruled by an enlightened and progressive maharaja. It is 18 miles long and has an area of 30 square miles. The dam thrown across the gorge—240 feet wide—to impound water that formerly ran to waste and is now being utilized for irrigating land that would be otherwise parched and barren. It is 1,300 feet long, 162 feet high, and 15 feet thick. A weir 470 feet long has been built to discharge excess water, which, during the monsoon is heavy. The work was initiated and finished by Indian engineers and is a monument to their engineering skill, as it is a tribute to the government of his highness, the maharaja, who furnished the money for it—\$1,500,000.

Instantaneous Hot Water.

The "thermo-fuser" is the name of a new invention designed to bring a supply of hot water from the most stubborn cold spout within a few seconds. It is a 600-watt electric heater which is readily attached to the plumbing piping, and when connected with the nearest electric lighting outlet heats the water in the faucet to the boiling point three seconds after the current is turned on. The water coming through this heater is pure, we are told, and may therefore be used "where ordinary tank water would not be sufficiently sanitary." Hence it should prove a boon to doctors, dentists, trained nurses, confectioners, as well as to the long-suffering male who prefers but seldom gets hot water for his shave.

Conscripted to Golf.

It seems that a form of conscription is now applied to golf. A writer, one of our training camps states that the officers in one of the main centers of the Royal flying corps have been literally ordered to the links, one day in each week. One of the courses in the vicinity is quite crowded with khaki, and the players have begun to find the fascination of the game and its value in making them fit.—Golfing.

Exaggerated Forecasting.

"I'm trying to save up something for a rainy day," remarked the thrifty citizen.

"You don't want to stop there," replied the gloom expert. "If half the present predictions are correct, you want to save up for hail, thunder and lightning."

He's Unsatisfied.

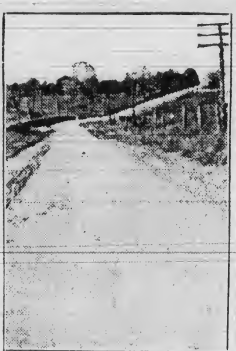

An Indiana prosecuting attorney says he's satisfied that there are truth combinations to fix prices. Every body seems to be satisfied except the faithful consumer.—Pittsburgh Dispatch.

PUBLIC ROADS

GOOD ROADS HELP CHILDREN

Improved Highways of Great Benefit to Them in Going and Coming From Country Schools.

The rural population is more willing to support better schools today than at any previous time. It is being realized that all educational activities or agencies must be more or less correlated, and, more than all else, that they must be more accessible to the children. In many counties where the roads are poor, the children are of the antiquated one-room variety. They are usually located along bad roads which, during the winter, when the schools are usually in session, become so nearly impassable as to make it difficult for the children to reach them. This condition causes irregular attendance and restricts the educational opportunities of the child. Not only this, but it often impedes the economic consolidation of these small schools.

Stone Road in Ohio.

er schools into larger, stronger graded schools, with high school courses, directed by a competent principal and corps of teachers.

On the other hand, in counties which have improved their roads, the schools are easily reached, the average attendance greater, the efficiency largely increased and economic consolidation made possible. Regular attendance at school means consistent and regular growth of both school and pupil, and consolidation of schools means a maximum of efficiency at a minimum of cost. It is also noteworthy that there is a marked trend for the consolidated school to become the social and intellectual center of the community. Most modern rural schoolhouses are so constructed as to serve the community as gathering places for various kinds of public meetings, and where vans are used to convey the children to school during the day they are frequently pressed into service to haul the farmers and their wives to the institute work, lectures, or entertainments at the schoolhouse. The consolidated school becomes a sort of community center to which all educational and social activities converge, and in order that it may properly perform that function all of the highways leading to it should be so improved as to render it readily accessible throughout the year.

PERILOUS RAZOR-BACK ROADS

Miniature Mountain Ranges Should Not Be Maintained in Center—They Are Dangerous.

If you have ever ridden along a country road which has been worked to a peak in the center so that your head tilted one way while you tried to keep your balance by tilting the other, you know what the wrong kind of road dragging is.

Roads so dragged should be reported to the road supervisor, or the county engineer. Such roads are positively dangerous.

Help the good roads cause by seeing that the roads of your vicinity are not made miniature mountain ranges.

ROAD VERY SIMILAR TO LIFE

Rough Road is Interesting, but We Must Travel Over It Slowly and Quite Carefully.

How much a road is like life. The good road is like life at its best—smooth sailing, and enjoyable. A rough road is like life at its worst.

Conserve Soil Fertility.

Soil fertility can be conserved by the use of good crop rotations which include the legumes, by feeding all crops on the place where they are grown by the careful return of all manures to the soil.

Care for Farm Machinery.

The farm machinery is only used for a short period, but must work continuously when being used. Hence it must be in good running order and properly adjusted.

FARM WORK AND MACHINERY

Eloquent Salesmen Often Fall Into Exaggerations and Make Farming Appear as Joke.

Much mischief has resulted to farming as an occupation from the exploitation of the idea that machinery will do the whole job and that future agriculture will be a matter of pressing buttons and setting wheels in motion. The eloquent men who make and sell machines often fall into exaggerations that are harmful and that finally set in to cartoonish which depict farming as a mere joy ride. It is silly and futile, of course, and it should mislead no one.

The trouble is that too much of it is believed and the thing soaks into the general consciousness.

Good farming is work, hard work. It is not going to be anything else. Human genius will continue to help in minor improvements, but the big, eternal plan goes on. The soil is full of miracles, but there is no miracle that will enable man to use the soil profitably without labor.

When the ablest scholars of the world set about to revise the Bible they recently left untouched and unchanged the nineteenth verse of the third chapter of Genesis: "In the sweat of thy face shalt thou eat bread."

YIELDS OF SWEET POTATOES

Loss of About Eleven Bushels Per Acre in 1916 or Considerably Increased Acreage.

Sweet potatoes, on a considerably increased acreage this year, show a yield of 91.9 bushels, which is about 11 bushels below last year and about one bushel below the average. However, because of increased acreage, the total production of 67,683,000 bushels is, with the exception of last year's crop of 74,255,000 bushels, the largest ever produced in this country, and much above the average of 31,117,000 bushels.

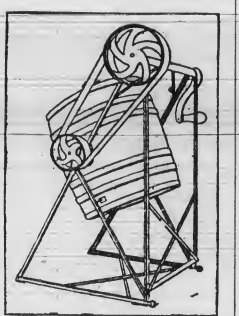

The crop in New Jersey is 2,300,000 bushels, compared with 3,555,000 bushels produced in 1915. In Virginia the output is 5,070,000 bushels compared with 3,740,000 last year.

The crop is strikingly better also in North Carolina, and does not vary greatly from last year in the remaining states. In quality, sweet potatoes are reported at 37.5, much below the fine quality of 52.2 reported last year and slightly below the average of 58.5.—United States Department of Agriculture.

CHURN WORKED WITH HANDLE

Device Invented by Canadian Is Great Improvement Over Old-Fashioned Contraptions.

It used to be, and not so long ago that if the farmer's wife wanted to make butter or churn anything she put the stuff in a bucket-shaped vessel and stirred it rapidly with a paddle. Among the newer kinds of churns one of the best is that designed by a Canadian. First there is a light but strong framework mounted on

New Churn.

rollers. Midway up this frame a barrel is swung on a shaft which is operated by a driving gear. The driving gear is worked by turning a handle. A hook at the bottom of the barrel holds it stationary while the top is being opened and it is being filled. Then the top is fastened on tight, the hook released, and the handle turned. By means of the gearing the barrel is spun around rapidly, and in a few minutes the churning is done better than it could have been done in the old days after long and weary work.

MUTTON AND WOOL ANIMALS

Good Sheep Require Good Pastures and Pay Well—Waste Land and Hillside Unprofitable.

Mutton breeds of sheep do not depend on waste lands and hillside to be profitable.

Good sheep require good pastures, and pay well. Wool is simply a product of the sheep, and no farmer can make sheep pay who depends on wool only for his profit.

KEEP ONLY PROFITABLE COW

Farmer is on Right Road to Success When He Begins to Study Each Particular Animal.

When a dairy farmer begins to study each particular cow in his herd with a view to keeping only those which will produce economically and abundantly, he is on the right road to success.

BENITA'S CHOICE

By JOSEPH SHAW.

Benita fingered most provokingly and deliberately on the road home. There are times when home seems the very last desirable place in the world to go, and this was one of them. First of all, Grandmother Bollins had told her at least seven times that day to count her blessings one by one, and she'd be surprised to see what the Lord had done.

Then her mother had said: "Benita, child, what does all you? You are heartless. You drop everything you touch, and you haven't a decent word for anybody in the family."

Why should she have thought Benita heartless? Weren't they all against her? Wasn't it had enough to have a name tacked on one like Benita Dusenberry, coupled with an artistic temperament, and then Benita's family without any of the finer instincts at all? Somehow she had never noticed the lack of these finer instincts until Jessica and her brother had come to stop awhile at the Three Pines.

Wallace, the tall, fair musician brother, was dreamy and aloof. He took long, solitary walks through the woods and roads, and came back to improve marvelous airs on his violin. Once Benita had met him, standing encircled, gazing at something in his hand.

"Little girl," he had said, "can you tell me the name of this?"

"Alder's tongue," answered Benita. She thought everybody knew what plain, everyday alder's tongue looked like. She told Len about it when he came up to help Tom with the wood-cutting. Len was twenty and nearly six feet tall. He looked fearfully hoarse beside Wallace.

Len had laughed and said he looked "sort of peaked." Genius should look ethereal, Benita had thought. Then the climax came. Jessica told her that she, Benita, was the inspiration for Wallace's latest improvisation, "The Maid of the Pines."

"I hope he will be able to capture it and write it down. It has all the walling of the wind in the pines in it, and the mystical yearnings of the unfledged soul," she explained.

After the dishes were finished Benita threw a cape around her and went out under the three tall pines in front of the house, to catch the mystical yearning herself. But Len came along from the barn, and stayed talking to her until her mother called her in. He reminded her that they were engaged. Benita had put the thought from her for several weeks.

"I guess by Easter I'll have things settled so we can be married. Think your mother can spare you by then, Benita?"

"I don't know," Benita had said vaguely. "I think eighteen is plenty old enough to get married, and I won't be seventeen till next month."

Now had come this final day. Mrs. Brewster, Len's mother, had sent for her to help with some quilting. "You might as well, 'cause half of them are for you and Len," she said cheerfully. And all the afternoon Benita had quilted and listened to long accounts of this piece and that piece, and whose dresses they had come from back in the annals of Len's family. All the way up the hill road Benita told herself she would break her engagement to Len the next day, and find what Jessica called the path to higher happiness. And then over the edge of the woods, just where the eastern sky was darkening at nightfall she saw a rising column of smoke, followed by a spurt of yellow flame. It came from the house, she felt sure, as she broke into a quick, light run along the frozen road.

Then, just as she reached the gate she saw Wallace. He sat on the stone wall with his violin, quite like Nemo. Benita thought later, drawing steady strains from his violin, and Jessica was beside him with three suit cases packed safely.

"Where is mother?" Benita exclaimed.

"Oh, the young man who cuts wood is lighting the fire in the kitchen," Jessica told her happily. "Isn't it an inspiring sight? Wallace has a theme already, 'Glowing Embers.' Do you like it, Benita?"

But Benita had fled around by the back way. Her mother was helping Tom draw buckets of water from the well and soaking blankets and old burlap sacks to pass up to Len on the "L" roof. Several times when the flames and smoke hid Len from sight, she found herself praying for the safety of her Len, brave and fearless.

It was nearly nine before the last smoldering was extinguished. The fire had been confined to the "L," thanks to Len, and he stood eyeing the result proudly, smoky and begrimed, his arms bare. Benita was beside him. Len glanced down at the slim figure beside him, and smiled.

"Hello, dear," he said. "We beat it, didn't we?"

"You were splendid," Benita answered, solemnly. "Just splendid, Len. The whole house would have gone if you had not fought the way you did. I'm awfully proud of you."

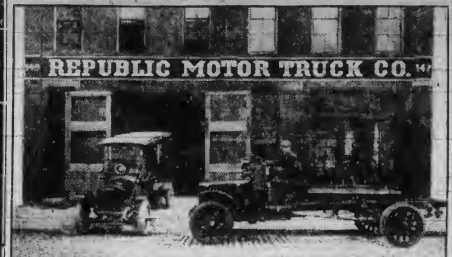

"Even if I can't fiddle?" Len's blue eyes were twinkling. He had not been altogether blind to current events.

Benita shrugged closer to him with a little sigh of relief.

"I don't mind if it is in a fiddle, Len," she whispered. "I don't like violin music, anyhow, not at all."

Farm for Rent.

I will rent my farm of 140 acres more or less, 2 miles southwest of Richmond Station, Ky., for 5 years for \$300.00 per year in advance, with option of renter paying part of rent in fixing fencing and buildings each year. Renter must give bankable reference. Address Mrs. J. A. ROGERS, Box 4, Brookfield, Mo.

Wanted—Two extra good Farm Hands, \$1.00 a day, house, garden, and pasture furnished for cow or horse. W. A. GAINES & SON, 506 1/2 Burlington, Ky., R. D. 1.

Take your County Paper.

ON THEIR SECOND VOYAGE.

WALTON.

J. Wm. Houson has been confined to his room—this week being quite ill.

Chas. A. Slater, of Ludlow, spent Thursday here with friends and on business.

Joseph Myre, of Glenoe, was in Walton, Monday, buying building material.

Mrs. Otis Hamilton who has been ill for some time is gradually recovering her health.

Mrs. Jno. L. Vest and son Walter spent Tuesday at Verona with relatives and friends.

Henry C. Diers has been commanded to his home this week with a severe attack of grippe.

W. R. Price, of Folsom, spent last Saturday here on business and attending the tobacco market.

W. R. Rouse who has been quite ill the past couple of weeks with grippe is slowly getting better.

Chas. Shinkle of Chase, Ala., and C. M. Norheurt of Kenton county, visited friends here Tuesday.

John L. Vest spent the week in Chicago taking depositions in some law cases in which he is an attorney.

Mrs. S. F. Powers of Verona, spent the past week here the guest of her son W. R. Powers and family.

Mr. and Mrs. W. R. Rouse spent part of last week at Cynthiana the guests of his cousin L. E. Rouse and family.

Claud Carlton, of Glenoe was here Monday. He recently engaged in the undertaking business on an extensive scale.

Thos. Morris and family moved last week from Gallatin county to the W. H. Franks farm near town where he recently purchased.

Dr. John W. Stapleton who is located at Youngstown, Ohio, in a dental office, spent part of last week with his mother Mrs. Anna C. Stapleton on the farm near town.

Mrs. Kate Jones moved to Ludlow last Thursday so as to be near her daughter Mrs. J. G. Slater, and Judge Chas. Snyder and family have moved into her property.

C. B. Brooks bought the farm of Elbert Kennedy consisting of 77 acres near Verona for \$2,000, last Wednesday through the real estate agency of W. B. Johnson & Company.

The many friends of Mrs. N. M. Norheurt, who has been in Booth Memorial Hospital for the past four weeks, will be glad to learn that she has sufficiently recovered to return to her home.

Mr. and Mrs. Wm. Norman and two children spent part of the past week at Marion, O., attending the funeral of W. A. Fullilove, a brother of Mrs. Norman, who died Feb. 23rd, after a long illness, in the 60th year of his age.

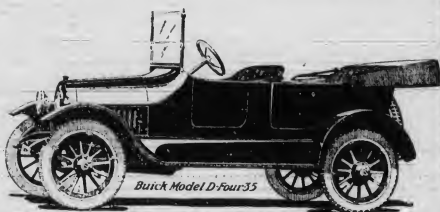

Jas. G. Pennington has sold to Frank Castleman of near Erlanger the house and four acres of ground near Walton for \$600, possession to be given at once. Mr. Pennington bought this property from O. T. Bond about a month ago for \$400.

Johnson Rogers, of the Richmond neighborhood, has purchased two tracts of land near Walton, each containing 14 acres, from Judge J. G. Tomlin, for \$3,000, and will move there in a short time, and is advertising a sale at his present residence on the Booth farm.

Rev. E. C. Lacy, pastor of Walton Christian church will have an illustrated lecture at the church building, Sunday night, March 11th, to which all are invited. This is an option lecture with the interesting views is not only interesting but very instructive.

Milton Stowers, aged 42, died at his home here last Saturday morning from pneumonia. He leaves a wife and several children. He was a good citizen and was respected by everybody. The funeral took place Tuesday, the remains being interred at Crittendon.

The Royal moving picture show resumed its Saturday night entertainments last Saturday night, using a calcium light for the purpose, and will continue the Saturday night performances with this light until the electric light plant resumes operation.

No other car made, at the price, or within several hundred dollars of the price, has all these high-class features. Yet, and as great as all these, is its wonderful power.

Even competitors have recognized the superior power of The Buick "Four." And, to combat this big feature, many of them say to prospective buyers, "It has too much power for its size." No car can have too much power for this section of the country.

Great power, doesn't mean speed alone. It means ability to climb our steepest hills, and take the hardest pulls, with ease. This insures minimum wear, practically no up-keep expense and long service.

Think of all these many features in an elegantly finished car, with Electric Starter and Lights for \$675. Besides, Buick reputation and one of the largest factories in The Country stands back of every one of them.

Don't Buy Before You See The BUICK—
It is Lots Better to be SURE Than SORRY.

And don't WAIT to see The Buick, for with the existing "tied-up" freight conditions, as soon as the "good weather" demand is on, it will be next to impossible to get prompt deliveries. Too, all tendencies in the Automobile line are toward higher prices.

Catalogues of all models on request. Demonstrations given at any time, without the least obligation.

ROBT. W. JONES, Agent

WALTON, KY.

Miss Rose Menke spent part of last week at Norwood, Ohio, the guest of her sister, Mrs. J. Jackson who was tendered a "showers" last Saturday evening, when there were about fifty guests present and nice refreshments were served.

Rev. A. Kirtley Johnson has received a call from the church at Ghent, Carroll county, to become the pastor. The church membership signed the call unanimously. The position has a salary of \$1,000 per year and has a fine parsonage. Rev. Johnson has the matter under consideration.

Died—Mrs. Jas. W. Whitson at the home of her son, Wm. T. Whitson near Ryle, Gallatin county, last Thursday, at the advanced age of 80 years. "Aunt Bettie" as she was affectionately known, was a life long resident of Gallatin county, and was highly esteemed by everybody. Undertaker C. Scott Chambers had charge of the funeral which took place at the Concord cemetery last Saturday.

Judge and Mrs. J. G. Tomlin entertained with a six o'clock dinner in a delightful manner last Tuesday evening in honor of their guest J. E. Blackstock of Saskatchewan, Canada. Besides the host and hostess there were present: Mr. and Mrs. Jno. L. Vest and son Walter, Mr. and Mrs. Jno. C. Miller, Mr. and Mrs. A. B. Tompkins, Mr. Belle Dickey, Mr. and Mrs. D. H. Wallace.

Dr. L. G. Wallace, of Corinth, Grant county, supplied the place of the Presiding Elder of the M. E. church here last Sunday, filling the pulpit morning and evening and preaching two magnificent discourses on the true religion. Dr. Wallace was the chaplain of the Frankfort penitentiary for several years, and has been prominent in public affairs for several years. He is at present in charge of the graded school at Corinth.

Several members—of—Walton Chapter Eastern Star will respond to the very cordial invitation of Rosebud Chapter, of Covington, to be present at a Reception at the Masonic Temple, Covington, Monday, March 12, from 3 to 5 o'clock, in compliment to Sister Emma Menefee, Grand Matron of the same, and Sister Clara Henrich, Rt. Worthing Associate Grand Conductress.

Mr. and Mrs. Carl Webster, of Verona, was here Saturday, closing up the sale of their property consisting of about 12 acres of land and house at Verona, to Hugh Vest, the consideration being \$1,200 cash. Mr. Webster is in the employ of the L. & N. Railway Company and has been the auctioneer at Verona, but has been promoted to a better position at Lexington, and he will move there at once.

Walton Loose Leaf Tobacco market last Saturday averaged \$15.00. Offerings, 83,000 pounds. The next sale is to be held Saturday, March 10th. Sales will be held at this market through the month, and, perhaps through next month if the offerings justify. Most of the loose leaf markets will close this week, but as there is quite a lot of tobacco in this section yet to be marketed, the growers are thought to best give the growers a chance to dispose of it especially as the buyers promise to attend the sales.

Many a housewife's high hopes have gone glimmering, just because an erratic Biddy went worm-hunting when thirteen costly eggs were almost due to hatch. That doesn't pay.

BUCKEYE INCUBATOR

on the job and get results! The Buckeye hatches every hatchable egg, and attends strictly to business the whole 21 days. No sure we of this that we guarantee the Buckeye to hatch more and better chicks than any other incubator, regardless of price. Seven sizes, 40 eggs to 600, and sold as low as \$4.50. Come in and get a copy of "The Verdict of the User," backed by affidavit. Then you'll know.

Don't Depend on the Uncertain Hen

Why Not Buy a Buckeye Incubator and raise chickens the modern way? Why let a hen set three weeks and then run 6 to 8 weeks with a litter of chickens and come through with a half dozen chickens, when you could keep her laying that 10 weeks and hatch the chickens in a Buckeye and raise them in a Buckeye Brooder. Say you had 10 hens engaged in hatching and raising chicks, that equals 100 a week at the best laying season which would easily equal 40 to 50 dozen eggs.

THINK IT OVER.

Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their superiority over all other makes. More sold than all others combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

Now is the Time to spray your trees with Scalecide. The world's best dormant spray. The great tree saver. Write for booklet. It's free.

Good Seeds—Good Crops, we handle only the best field and garden seeds. All sold in bulk at saving prices. Write for catalogue of garden seed. Let us quote you on high grade Timothy, Clover, Sainfoin, Alfalfa, Red Top, Seed Oats, etc. A Postal Card May Save You Dollars.

GOLDEN BLEND COFFEE. Grows more popular every day. Our sales increase, our friends increase. Send a dollar bill and we will send you 4 lbs. by mail. Do it now.

ARCADE FLOUR—The World's whitest and best Winter Patent. KANSAS CREAM—The Perfect Bread Flour, makes more and better bread. Ask those who use it. They Know.

Goode and Tunkie
GROCERIES, FLOUR, SEEDS, MEDICINES.
19-21 PIKE ST. 18-20 W. 7TH ST.
COVINGTON, KENTUCKY.

Public Sale.

We will offer for public sale, Friday, March 9th, 1917, at 1 o'clock p. m., at what is known as the Jerry Carpenter place, on the Carpenter road and between the Hicks pike and the Frogtown road, and about 2 miles north of Richwood, the following described property: Span of four year old mules, gentle, good workers; pair of good work horses; four sows; new road wagon; delivery wagon; DeLaval cream separator; 4 improved milk cans; new mower; hay frame; 60 tooth harrow; 2 cultivators; two-horse corn drill; disc harrow; two-horse grain drill; two-horse hay rake; two Oliver chilled plows; four sets of work harness; double trees; self binder; lot of plows; Babcock milk tester, and numerous other articles. Terms—All sums of \$10 and under, cash. On all sums over \$10 a credit of nine months will be given, purchaser to execute note with approved security before removing property.

All of the above property was bought new last year and since then the wholesale price has increased 25 percent.

D. B. WALLACE & CO.
W. B. JOHNSON, Auctioneer.

Administrator's Notice.

All persons indebted to the estate of B. L. Rice, deceased, are requested to come forward at once and settle the same; and those having claims against said estate must present them to the undersigned administrator, proven as by law required. J. W. CONNER, Administrator.

PUBLIC SALE

Monday, March 12, 1917,

at 1 o'clock p. m.,

At the John Booth farm on the Dobbin road, 1½ miles from Richwood, Boone county, Ky., on a credit of nine months without interest, on all sums over \$5.00, Two Cows with calves, 1 a Jersey and 1 a Guernsey, 4 year old Cow fresh in April, yearling Heifer, two weaned Jersey Heifers, good work Mare, light harness Mare, Steel Tire Buggy, and numerous other articles.

JOHNSON ROGERS.
Lute Bradford, Auctioneer.

RALEIGH'S TORONTO 2d

Thoroughbred Registered Jersey Bull, will be permitted to serve cows at \$2 payable at time of service with privilege of re-servicing if she fails to get with calf; will be at P. M. Voshell's on Woolper creek, April 1.

VOSHELL & BOITS.
St. Patrick's day comes on Saturday this year.

At the place hogs are bringing old and ham ought to taste mighty good.

Get your harness and plows in condition for use when the ground is in proper condition.

Hens having got down to business the price of eggs have a downward tendency.

Judge T. F. Curley and W. W. Grimsey of Walton, were transacting business in Burlington yesterday.

Mrs. D. M. Bagby, executrix, of Walton, lodged for probate in the county court yesterday, the will of her deceased husband Dr. D. M. Bagby.

Public Sale!

I will offer for sale at public auction to the highest bidder, at the late residence of Mrs. Susan Helms, Petersburg, Boone County, Ky.

On Saturday, March, 10th, 1917,

The Following Property:

One House and Lot, same being the residence property, and being a two story frame dwelling in good repair, 7 room house with two porches, and is considered the most comfortable building and location in Petersburg, overlooking the Ohio River, and has all the necessary outbuildings.

One tract of land with barn on First and Mill Streets.

One tract land between Second and Third Streets.

Also the entire lot of Household and Kitchen Furniture consisting of one Parlor Suite, Hamilton Organ, new Brussels Carpet, various Bric-a-Bracs, 3 Ingrain Carpets, new \$65 Singer Sewing Machine, new 150 size Moore's Heating Stove, Dressers, Tables, Benches, Chairs, Dishes, Cooking Utensils, 1 nearly new Range Cooking Stove, 2 Cooking Stoves, hand-made Sideboard, Antique Furniture, Dressers, Bedding, Garden Tools, Stone Jars, Sausage Mill, Churn, 3 Iron Lard Rendering Kettles, and many other articles.

Terms—Everything will be sold without limit or reserve. There will be no by-bidding, and all purchasers must come prepared to comply with the following terms: All sums of \$10 and under, cash; on sums over that amount a credit of six months without interest will be given, purchaser to give note with approved security, negotiable and payable at the Farmers Bank of Petersburg, Ky. Positively no property to be removed until terms are complied with.

EVERETT L. HELMS.

J. E. NIXON, Auctioneer.

P. S.—If the above property is not fully disposed on the above day and date, the sale will be continued at 12:30 p. m., Saturday, March 17th, 1917.

For Sale

My Store, Stock and Fixtures such as Oil Tanks, Scales and all other Fixtures, also a good Truck.

Will sell and make price right and on easy terms.

See me for further information.

A VOICE FROM GALLATIN

Has An Ax to Grind, But Wants It Ground on The "Ground Stone Of Justice."

Seeing some articles in the Recorder on the road question, it gave me courage to pen one also. I am not a citizen of Boone County, but I am a taxpayer there on a small scale, and Boone is my native county. I left there 33 years ago to make my home in Gallatin County so it makes old Boone, her people and her institutions very dear to me.

Mr. J. W. Huey says in his article he supposed Gallatin County influenced the court to locate the inter-county seat road by Beaver and Richmond to the Gallatin County line. I wish to say that Gallatin County had no say in the matter, and that there was no expression from Gallatin County in the matter at all.

I thought, before I read Mr. Huey's article the door of hope for the Big Bone precinct was closed, but I find that he is one man who, if no other is standing firm for this benighted part of the county. Mr. Huey says the main road from South Fork to the Gallatin County line is the logical road to build the inter-county road. I say so, too, for it is running in the bed of the old State road from Louisville to Cincinnati, and it is the nearest and most practical route. It gives more people an outlet than any other road. In fact, it is the only one in the county but what has a convenient outlet. There is not a quarter of a mile of turnpike in the Big Bone precinct from South Fork to Big Bone. There are places that are three miles from this dirt road to the Gallatin County line, and not even a dirt road, just a path through farms. The pike from Big Bone to Union is almost as bad. I am told, in fact I know, it would open up a great big territory of the county in there.

C. C. Sleet says he hopes to see the day that pikes will parallel the county from one end to the other with not over five miles apart. I am glad Mr. Sleet expressed himself thus. He certainly wants the State road to run over this dirt road from South Fork to Big Bone, and would not have to go out to the famous watering place, Big Bone Springs.

Mr. Sleet says he would like for the road to run by him, but all can not have good roads. Mr. Sleet has certainly moved and sold his possessions if this road does not auger him pretty closely. I went over that proposed state road last fall with some friends and one of the crowd seemed to know the county and the people and after crossing Middle Creek and passing the Kells land and came to a log house on the side of the pike. I inquired, "who owns that place now?" He asked, "C. C. Sleet." We went on a short distance farther and on the opposite side of the pike was the Aunt Becky Sleet farm. I asked, "who owns that now?" The answer was, "C. C. Sleet." We went on thru Beaver and came to where the Tickwood pike comes to the Beaver and Union pike, and we asked the wise guy which road to take and he said we had better go by Richmond as there is a short pike on the Union road that is not piked; there is a good pike beyond that first house some two or three hundred yards from where we are. "Who lives in that house?" I asked. The answer was, "C. C. Sleet."

But I suppose he has moved and sold his possessions since then, and he did not say he was not on this road, but I inferred as much.

Mr. Sleet advises some members of the fiscal court to stand firm and not give way to criticism. I think if any of the county's consciences are hurting them, the proper way is to call for a reconsideration or resign for an "open confession" or resign for an "open confession."

I am not criticizing the court and think the only criticism they are entitled to is for not making an investigation before they went too far and not listen to every man who had an ax to grind. Some will say, "he has an ax to grind." I will agree with you on that but I want it ground on the "ground stone of justice."

I, unfortunately, own and control about 220 acres of ground, in that "hell for sartin" place as the fellow called it that wanted to rent some of it from me a short time ago. And the old home is there where I grew into manhood under the roof and protecting care of mother, one of the best women that ever lived, even if I did not get the credit according to her teaching, it comes home to me now, and as I grow older I am reminded of her Godly counsel.

And there is another ax to grind. I own an interest in a little church, when I say own an interest in it, I mean my membership is there and so is my mother's as long as she lives, and if there is any good in me I owe it to mother, and that old church.

there, I was present when the bridge commissioners met to locate the bridge and I thought saw a disposition on the part of Boone county commissioners to locate it some other place; it located at all, disregarding the wishes of the people in Boone and Gallatin counties, who would be benefited by it, and it could be built at less cost where the people wanted it and connect the two inter-county seat roads from Gallatin line to Big Bone, Union and Florence. I have since thought that they had the route to Beaver and Richmond selected was the reason they did that.

I think I understand why the court has selected the Beaver route for the State road. It was because it was put up by them by the people in favor of that route, that there was two bridges to build on the Big Bone route. We admit that, but where in Boone county do they need them worse? People in there pay their share of the road and bridge tax to build bridges over the county and I understand they have made all the roads bridged.

But for the high water on that road to Big Bone is concerned, you can cross it anywhere a long time after you can cross the bridges on the State road in Gallatin county going to Warsaw. I have written enough for this time, but will advise the court to locate the Big Bone route and see for themselves as I doubt very much whether any of the members of the court have ever been over it from Big Bone to South Fork.

A. A. ALLPHIN.

Where Banks Can Help.

Potato planting this year is of great importance to the consumer. The size of the crop—not in Kentucky, of course, but in the United States—will be determined largely by the ability of the individual farmer to buy seed potatoes at \$10 a barrel.

A dispatch from Henderson says the farmers in that section are made hesitant as to large potato crops by the fact that at \$10 a barrel the seed potatoes will cost \$10 an acre. That, of course, is only one of the expenses of planting. Potatoes must be well fertilized. Fertilizers cost a good deal. If stable manure is relied upon largely it is not a free product, prices of feed considered, and to the fertilizer hauled from the cattle barn and stables, a considerable fertilizer usually is added. It is perhaps not overestimating to say that the production of potatoes this year, seed, fertilizers and cultivation, will cost \$70 an acre. The question which the average farmer is asking himself as the potato planting season approaches is whether it will pay him better to risk \$70 an acre in the production of potatoes or to plant corn and get from his potato groupings under account of its state of fertilization and other bushels of corn. The seed corn costs practically nothing by comparison with seed potatoes. The growing of corn is less laborious than growing potatoes. A corn crop, under known conditions, is the surest crop on the farm. Nothing is so easy to grow. A severe weather can kill it, and where the ground is prepared as potato ground must be the growing of corn is very nearly a sure proof. Corn can be harvested early and cheaply because it needs no protection against frost. Potatoes have potato cellars large enough to hold storage possible. The general custom is to accept market prices of the year.

There is an additional reason why the farmer is likely to consider planting his potatoes. Potatoes must be paid for the seed potatoes at a time of the year when an crop is maturing and cash is scarce. There is less increasing disposition to loan money to farmers to stimulate production. This year potato planting should be stimulated by making it easy for farmers to buy seed potatoes. The crop matures in early July, when wheat and oats are in the shock and when, in this section, orchard grass has been cut and the chances are that the general farmer who will be hard pushed, without help at potato planting time, will be able to pay his bill in July.

A large potato crop is a national necessity. A small one would be a national calamity. The farmer who needs money with which to buy seed potatoes should in the interest of the consumer, be encouraged to plant potatoes.

Money, to those who deal in it as a commodity is plentiful just now. The banks have money. The farmers can use it to the advantage of the people. A house financial advance is of service to the banks. A bountiful potato crop is a feature of economic preparedness; in this event of war an important factor in security and preparedness. If a large crop is to be insured the needs of the farmer who is needy, some of them are to be met by the banks. Looked at it once, —Country Journal.

Wholesale Raid.

Officers at Falmouth last Tuesday rounded up something like 25 "sponties" on Main street, opposite the court house, who were engaged in card playing. The game was made up of men high up in the school system, and of Sunday school boys. Many of the boys, knowing how to gamble, and controlled with indisputable authority, when they tossed up the dice, they would make a gambler a "loser" and would make him a "loser" like the gambler. Now, I understand officers will make a similar raid on the county will be comparatively free from the card-playing game. —Falmouth Recorder.

DISCOVER INSECT DESTRUCTIVE TO PEACH

PEACH TREE PRUNED TO DEVELOP OPEN TOP.

(From the United States Department of Agriculture)

An insect destructive to the peach and kindred fruits, believed to be new in the United States, has been discovered by entomologists of the United States department of agriculture in the District of Columbia and its environs. This insect, which in its adult form is a brownish moth and in its larval stage, attacks both the tender shoots and fruit, causing serious losses.

Because of the habits of the worm, the usual control measures such as spraying with certain arsenates will

Young Peach Tree.

probably not be effective. The smooth young shoots, owing to their rapid growth, are protected by the poison solution for only a very short time after the spray is applied, and hence it is almost impossible to poison them. The entomologists of the department who have been investigating the pest

DON'TS IN HANDLING BULL

Don't let him get the upper hand at any time.
Don't let him realize his enormous strength.
Don't keep him confined. Give him plenty of exercise.
Don't trust any bull at any time. It is the "gentle" bull that does the damage.—W. W. Sweet.

WINTER CARE FOR CHICKENS

Every Preparation Made to Insure Fowls With Proper Supply of Food Will Be Repaid.

In the winter the care of poultry is quite a task and every preparation that is made to reduce work and insure the birds with a proper supply of clean food will be well repaid. On the general farm the cattle, sheep and hogs will doubtless come first and too often the hens are neglected. The only way to insure proper treatment for the poultry flock is to equip the house with feeding appliances that will enable the farmer to care for the flock without wasting time. All of the hoppers can be made on the farm from packing boxes or scrap lumber and when once constructed the job is done and the hens will pay for the labor many times.

GOOD HENHOUSE EQUIPMENT

Low Table for Water and Milk Is Handy—Hopper for Dry Mash Is of Much Importance.

Keeping the flock in good condition is more easily accomplished if the house is furnished with good equipment. An oblong table about two feet high and long enough for the water pail and a creak of spruce milk is useful in protecting the chickens from the litter on the floor.

A large feed hopper which will hold a week's supply of dry mash is important. Small hoppers for feeding grit, oyster shell and charcoal are necessary.

An effort to get along without the hoppers will always result in wasted feed or a poor condition of the flock. If any of the necessary ingredients are not furnished.

will continue to study it in the hope of developing control measures.

What the insect is. The insect, known to science as *Lias paysoni* modestus, is believed to have been introduced from Japan. So far as the department's entomologists know, it has not been found in America other than in the District of Columbia and in the adjoining territory of Maryland and Virginia. The specialists are desirous of knowing if the insect has attacked peach, plum, or cherry trees elsewhere in the United States.

The presence of the insect can best be determined in most cases by the injury to the peach trees. Inures into practically every tender twig and causes new shoots to push out from lateral buds. These are not checked in turn, the abnormal stimulation of lateral growth producing a much-branched and bushy plant. A copious flow of gum from the twig ends often follows the attack of the caterpillars.

Injury to Fruit.

In attacking fruit the young caterpillars generally enter through the skin at or near the point of attachment of the fruit stem. The larva, as it grows, makes its way to the pit, where it feeds on the flesh, which soon becomes much discolored and more or less slimy. Larvae entering at the side of the fruit are more likely to eat out pockets or cavities in the flesh.

A whitish silk cocoon in which to pupate. Moths emerge in the spring for egg-laying by the time the shoots are well out.

The bureau of entomology, United States department of agriculture, especially requests owners of peach or other fruit trees to report the presence of this new pest in their orchards. Specimens of twigs may be placed wrapped in paper or, preferably, in a suitable box.

TREES PROTECT FARM FOWLS

In Summer They Afford Shade and in Winter Some Protection From Wind and Sleet.

Those who live near a forest where the chickens, turkeys and geese may have the run of it are fortunate. In the summer the trees afford shade, in the winter some protection from the chilling winds and driving sleet. Besides trees protect the soil; keep it from washing or blowing; shed their leaves, making a covering to hold moisture, protect insects, etc.

Fowls delight to scratch among leaves under trees and in a little forest. Turkeys will eat acorns and find many insects in such places as the forest or grove.

Where one lives on a prairie or on the plain it would be well worth while to plant a few trees near the house to protect it from the bleak winds, add to its setting and at the same time give the fowls a place to "range." Even on the plains such quick growth as black locust or catalpa could be planted and it would not be long till a nice little grove would be had. There are other trees that grow fast and would soon make sufficient growth to be of use to the poultry. The trees need not waste, for when large enough for posts or other useful purposes they could be thinned and younger growth left to take the place of the older.

Even where one has but a city lot or a small poultry yard on the farm a few shrubs could be used to advantage for shade in summer and for winter protection. Flies, privet, grapevines, japonica, heuriza, spiraea, lilac and other shrubs or vines might be used for this purpose.

RAISING MUTTON AND WOOL

Marketable Lambs Can Be Produced by Crossing Western Ewes With Good Mutton Ram.

Native or western ewes crossed with a good mutton ram produce good marketable lambs and with present prices of wool the fleece will more than pay the cost of keeping the ewe. Native ewes will be high in price.

Western breeding ewes can be purchased in carload lots at any of the stockyards. One hundred and thirty to one hundred and forty will be required to make up a carload.

Burlington was a much better place in which to spend the day last Monday than Washington.

It is stated that President Wilson will call an extra session of Congress to convene within a fortnight.

The second inauguration of Wilson and Marshall was a hummer, notwithstanding the ugly weather.

Congress put the District of Columbia on the "chore day" list, which may result in shorter sessions of that body.

Gov. Goodridge, of Indiana, could not control the recent legislature and his legislative program was badly wrecked.

England is very anxious for the United States to go to war with Germany. Can it be that Johnny Bull has doubts as to the allies' ability to take care of European military affairs as they now exist?

Mr. Zimmerman might as well have been real generous with Mexico and tendered her all that part of the United States lying west of the Mississippi river. He could have delivered the goods just as easily.

The action of Senator Stone & Co., resulting in the defeat of President Wilson's sacred neutrality measure, created a more intense indignation throughout this country than resulted from the exposure of the Zimmerman intrigue.

Those Senators and Representatives who refused to support the President in the nation's hour of peril, should be given their passports, and no doubt they receive them when the voters get an opportunity express their opinions of them.

It is reported from Mexico that Villa has sent his troops to the few hundred, home, and that he will take a few weeks' vacation. Probably the next head of the bandit he will be wiping a Carranza command off the earth as a vacation diversion.

Covington real estate is very cheap just now. Half a dozen decent conveying town lots in different sections of the city, were lodged for record in the County Clerk's office there last Saturday, and in each deed the consideration recited was one dollar.

President Wilson began his second term last Monday, with several perplexing international complications on his hands, but there is no man in this country who is better calculated to handle them for the welfare of the country. No matter what the problem is that confronts him he undertakes its solution like a statesman that he is.

With no apparent let up in the winter, many of the farmers in this country are threatened with a scarcity of provisions for their livestock. Owing to many days of wet, muddy weather during the feeding period, considerable food has been wasted where animals were fed other than in doors. The ground has been covered with snow, requiring liberal feeding all this year.

Zimmerman's contention in defense of his effort to secure an alliance with Japan and Mexico in case the United States goes to war with Germany is, that the "plot was to fall flat" automatically, in case the United States did not take up arms against Germany, but he knew that Germany was contemplating acts calculated to bring about the war for which he sought to make preparation, consequently he did not expect his plot to "fall flat," any more than he expects his correspondence to be intercepted.

The proposed revenue law that a special session of the legislature was called to consider has had very rough sledding, and if it gets thru it will not be without several important amendments. The proposed law is such a radical departure from all the revenue laws of the past in Kentucky, that many are knocking it on general principles, while others are urging objections to it which, from their standpoint, appear well taken. The proposed law put a bad taste in the mouths of hundreds of taxpayers when they discovered that the first thing it seeks to do is to create three or four offices each with an annual salary of \$4,000, followed with an appropriation of \$20,000 per year for other expenses that will be incurred because of the law. The State is loaded down with unnecessary officials, commissions and boards of control, and any law that proposes to increase that burden will not be received with general favor. It costs Kentucky too much money to sustain its government, and a retrenchment along that line would meet a hearty endorsement except by those who would be deprived of their "fat takes." Who ever heard of an office or commission being abolished in Kentucky? On the other hand they are being increased as regularly as the General Assembly convenes.

The Supine Senators.

The necessity for a change in the Senate is more clearly demonstrated than in the closing hours of the Sixty-fourth Congress. The will of a majority of the Senate is broken and necessary legislation thrown into the discard simply because it lay within the power of a few supine Senators to occupy the closing hours of the session with wind-jumping to prevent a vote upon the resolution to confer power upon "the President" to protect American shipping.

The American nation has been placed in a humiliating attitude before the world. Comfort and aid have been lent to those unfriendly to the United States, who will see in the failure of the Senate to act upon so important a matter as the armed neutrality resolution a non-existent cowardice and lack of patriotism among the people of the country.

Unlimited debate in the Senate may, at times, have served a useful purpose in the defeat of extravagant appropriation bills, but the purpose of disgraced members to defeat just and necessary legislation. In this particular instance the lack of courage has wrought an irreparable wrong to the nation. This is not a nation of cowards, nor is the Senate, as a whole, or in more than a small minority, so supine and weak-kneed as to give forth such an impression to the world. A foolish rule of cloture has made the nation look childish and weak.

Failure of the great appropriation bills and other legislation indispensable to the conduct of government, will probably make it necessary for the President to call the new Congress into session at once. Should he do so it is to be hoped that he will not come with a traditional obstructive tactics in the House of Representatives which might accentuate to the world the belief that America is a "time" when partisanship should be thrown to the winds. Every member of Congress is duty bound to do all that lies within his individual power to maintain the dignity, rights and honor of his government, and his honor.

Chest With a History.

A very pretty history is back of an old chest that is now in possession of Mrs. Evaline Shelby Roberts, of Marion, in this State, whose father was a grandson of Gov. Shelby, of Kentucky. This chest was made for a storage place for some time prior to the year 1800, a Dutch family by the name of Crider brought the piece of furniture from Ireland, about the year 1800, using it as a storage for their linens while crossing the ocean. During the voyage an infant of Mrs. Crider became sick and died on the vessel. His mother being unwilling for her child to be cast overboard, after its death hid it away in this chest and in a few days the sailors, who were at that time very superstitious, noticed that the sharks began to follow the ship.

It was at once suspected that a death had occurred on board, and search was made, the roll of the passengers and crew were called and all were found to be alive. Finally, one of the crew remembered that a baby had been brought aboard before the ship set sail; another search was made, and the dead child found, concealed in the oak chest with the fine linens, and around its little body the mother had placed different kinds of spices and preservatives to keep the child until the ship could reach land. Upon its discovery, regardless of the appeal of its mother, it was thrown overboard by order from the master of the vessel, but the chest in which it had been concealed was brought on across and has been preserved from that time to the present, and is very highly prized by its owner Mrs. Roberts.

Descendants of the Crider family intermarried with descendants of the Shelby family and in this way the old chest has been handed down from one generation to the succeeding one for the last 200 years.—Harrodsburg Herald.

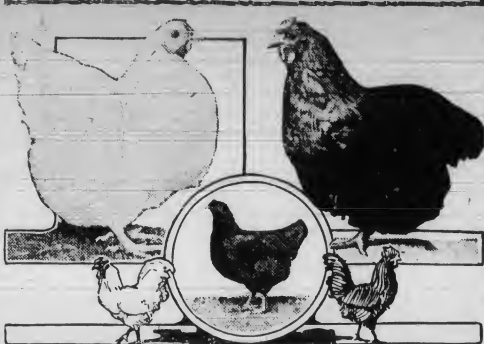

Alfred James, of Cynwyd, believes there must have been something in that story about a convention of rats, upon deciding to "bail the cat." He is certain he stumbled on a rat convention that was just about ready to put the question today. James went into his stable to feed his horse. He opened the feed box. The sight that met his eyes, he says, he will never forget. There was a large, fat, lazy black cat. Of course the cat's name is Thomas—in this case Thomas Atkins, although Thomas is no English name. James saw his cat Thomas resting on the oats in the grain box. Seated on Thomas' back was a large rat, almost as large as the cat. Thomas, and surrounding Thomas was a circle of five or six other rats.

"The rats appeared to be having a good time," James said, "Thomas did not appear to be having a good time at all. Thomas looked so scared, with a twitch in his ninth life.—Bala Penn. Cor. Philadelphia Record.

First and Third Sundays.

Servants at Florence Christian Church, first and third Sunday in class, members and friends, Thursday evening in each month at 7:30 p. m. The Second Quarterly Conference of Christian Church Workers of Boone County, held with this church on the 14th ult., was well attended, and a splendid program was rendered.

PROFITABLE GAINS IN FATTENING PENS

WYANDOTTE, RHODE ISLAND RED AND ORPINGTON.

In order to make the most economical gains it is necessary to have the utility or heavy breeds of fowl. The lighter breeds, as Leghorns, Minorcas, Anconas, etc., do not, as a rule, make profitable gains in the fattening pen. Cockerds of the breeds of Rocks, Orpingtons, Rhode Island Reds, Wyandottes, Game, Dorkings, etc., are usually preferred. When a bird is between three and four months of age it makes the greatest gain when put in a fattening pen or crate. If one needs a heavy bird it would be necessary to leave them on the range a little longer, as there is a limit to the time that a bird can be profitably confined in the feeding pen.

The most economical gains are usually made the first two weeks of feeding, and there is seldom much profit in feeding longer than three weeks.

Personal Mention

Mrs. Mary A. Thompson is visiting friends at Erlanger.

Dr. E. W. Duncan was quite ill several days the past week.

Mrs. Mary Hume was considerably indisposed again last week.

Atty. G. W. Tolin made a business trip to Cincinnati, Tuesday.

Mrs. J. A. Cuyward entertained the Busy Bees, Tuesday afternoon.

Miss Laura Frances Riddell was quite ill several days the past week.

Mrs. Kathryn Tanner and Miss Mary Furlong entertained at cards last Monday afternoon.

Attorney Benjamin Riley made a business trip to Cincinnati, Harrison county, last week.

Frank Robbins, of the Pleasant Valley neighborhood, was a business visitor to Burlington last Friday.

W. E. Vest, of Covington, the pioneer real estate agent in this county, was in Burlington a day or two last week.

H. Schanker & Son, of Erlanger, were callers at this office, Tuesday. Messrs. Schanker have a Boone county trade which they appreciate.

Mr. and Mrs. Earl Walton, of Petersburg, were guests of her father, G. G. Hughes, and brother, William Hughes and wife a day or two last week.

Howard Kelly's six year old son was taken to a Cincinnati hospital one day last week to have his tonsils removed and to receive other surgical attention.

Mrs. P. E. Gason returned from the Indian Hill, Ohio tuberculosis camp one day last week, somewhat improved. She is keeping up the treatment given her while in the camp.

John P. Duncan, of Lexington, came down last week to spend a few days with his brother, Dr. E. W. Duncan and other relatives. He was just about knocked out with a cold when he arrived in Burlington.

Robert Chambers, of Walton, attended the fiscal court Tuesday. Mr. Chambers spent many of his youthful days in Burlington, when the town was noted as a business point. Mr. Chambers investigated the present citizens of the town were here when he was, and learned of only three—Mrs. Martha Adams, of Mary Thompson and Mrs. Babe Riddell.

Senatorial Courtesy.

During the debates in Congress last week, Senator after Senator complained that Congress, notably the Senate, had lost the respect of the people.

This is, in considerable measure, the fault of the Senate, and to blame for its own unpopularity. It is not that there are not some able men in the Senate, therefore, but they permit themselves to be stifled by clinging to certain absurd customs of the past. "Senatorial courtesy" permits a few Senators to grasp at patronage that might be denied them on their merits, and, at the same time, it subjects the Senate as a whole to public contempt.

It is not necessary for the Senate to adopt cloture of the kind that is necessary in the House. The Senate is a small body, and with less than one hundred members, there is no reason why each important matter should not be fully debated. That feature of "Senatorial courtesy" that permits a Senator to speak as long as he cares to, or by the mere registering of an objection to prevent the taking of a vote is absurd. To make itself respected the Senate needs to make itself efficient. So long as it retains the rules which permit the Senate to be so inefficient, it will continue to be so. Last week there will be frequent changes among Senators.—Ea.

We have known birds left in the crate for four or five weeks to be thinner after being fed that length of time than they were at the end of the second week, says a writer in an exchange.

Crate fattening will increase the weight of a bird by one pound or a trifle more in three weeks, the exact amount depending on the type of bird, the kind of feed, and the carelessness of the feeder. When fed on a mixture of finely ground grain, mixed to a butter in skim milk or buttermilk, flesh of the highest quality is produced.

Chickens are not the only kind of fowl that are fattened in pens or crates. In most of the poultry-fattening establishments will be found a large number of turkeys, and possibly some water fowl.

METHODS OF PICKING

Suggestions Given as to Successful Poultry Practices.

Much Depends on Whether Fowls Are for Future Consumption or for Immediate Use—Fowls Keep Better If Not Drawn.

Dry picking and wet picking are the two general methods used in dressing poultry, depending upon whether the birds are for future consumption or immediate use.

"Successful dry picking depends on the proper sticking of the fowl," said F. E. Fox of the poultry department in the Kansas State Agricultural college, "as the longer the bird is left after sticking, the harder the feathers set. Dry picking takes a trifle longer, but if the sale of the fowl is to be delayed for any reason, as by shipment or storing, it should be dry-picked. "When the fowls are dry-picked they are bled by thrusting a sharp knife through the throat and the jugular vein is pierced. Blood will immediately begin to flow from the mouth. The brain is then pierced through the eye. This loosens the nerves that have control over the feathers. After this portion of the brain has been paralyzed the feathers readily yield themselves to the hands of the picker.

There are two general methods of dry-picking poultry, the bench method and the string method. Commercially, the bench method is generally preferred.

"Poultry keeps better if it is not drawn. The head should be neatly wrapped in paper, and the feet left intact.

"If the fowl is for immediate use, it is a trifle quicker to scald it and use the wet method of picking. In this method the 'bloom' is spoiled and the bird will keep so well. All scalded fowls are immediately drawn. In cold weather one can send the birds almost any distance by parcel post."

TROUGHS USED FOR FEEDING

Domineering Fowls Keep Timid Ones Back—Best to Scatter Grains in Deep, Clean, Litter.

There are domineering hens in every flock which keep the timid ones in a constant state of fear and subjection. When food is given in a trough where the hens can eat their fill, the domineering hens keep some of the others back and often eat twice as much as their share, while the less fortunate ones do not get enough. The result is both fat and skinny fowls in the same flock—which is always undesirable.

The way to avoid it is not to feed in troughs entirely, but to feed freely largely of dry grains, cracked grains and seeds, and scatter them in a deep, clean litter that compels every hen to hunt and scratch for her share, thus giving each an equal opportunity.

REMEDY FOR SICK CHICKENS

Epsom Salts is Most Effective for Alling Fowls—Half a Teaspoonful is Standard Dose.

Epsom salts is one of our most effective remedies for sick chickens. Salts at bed if the fowl has been starved for half a day or an before giving. Half a teaspoonful to a grown fowl is a standard dose. Sometimes more or less is indicated.

Saturday, March 17th, 1917

Beginning Promptly at 1 O'Clock P. M.,
The Following Property:

Eight good Cows, 2 with calves by their sides, 2 Heifers fresh in April, yearling Heifer, Bull Calf 8-mos. old, Registered Jersey Bull Calf 5-mos. old (fine); 2 good work and driving Mares, 2 Registered Chesterwhite Sows, 14 Shoats, Sow and 9 pigs, some Toulouse Geese.

Two sets good Wagon Harness, set good Buggy Harness, set good Spring Wagon Harness, good Buggy, nearly new, Spring Wagon, Mowing Machine, nearly new, Hayrake, Cultivator, 5 Plows, various kinds, Pitchforks, Hayfork and Pulleys, Grindstone, Diggers, Log Chain, good 2-h. Sled, Double and Single trees, Man's Saddle, Riding attachment for plow, Scalding-box, Lard Press, Bicycle, good as new, Milk Cooler, Cans and Buckets, a lot Household Goods and things too tedious to mention.

TERMS OF SALE.

All sums of \$10.00 and under, cash; over \$10.00 a credit of six months will be given, without interest, purchaser to execute note with approved security, negotiable and payable at Florence Deposit Bank, Florence, Ky., before removing property.

G. R. KENNEDY.

GEO. BURKETT, Auctioneer.

Remember Day and Date, Saturday, March 17, 1917.

SEE THAT THE NEW SEED

LAW IS COMPLIED WITH
An Open Letter to the Farmers and Seedmen of Kentucky.

The new Kentucky seed law was enacted nearly a year ago, and has been in effect since September 23, 1916. Everybody concerned has had ample time to comply with it. If it seems there are people who are not familiar with it, and some who intend to defy its provisions. Briefly stated, it requires that all field seeds, such as those of clover and oats, must bear a label giving the percentage of purity and of germination, and the date of filling and the percentage of germination. Failure to label seeds properly renders the seller liable to a fine of \$5 to \$100 dollars for each violation. The law was enacted for the protection of Kentucky farmers and seedmen and this open letter is an appeal to them to uphold it by insisting that it be complied with.

Do not receive seeds that are not labeled as the law requires. Buy only of people who comply with the law. Insist that field seeds be honestly labeled with the approximate percentage of purity and germination.

Insist that sealed packets of seeds bear the date of filling and the per cent of germination in large type.

If you find dodder, sour dock, or wild onion seeds among field seeds, send us samples for testing. It will be done free. Insist that a copy of the law in Circular No. 5 of the Department of Entomology and Botany, and read it carefully. H. L. Garmon, Head of Division.

Stanley Stephens, who was married about ten days ago, will go to housekeeping on T. Z. Roberts' farm where Carl Casson resided last year. Mr. Stephens, recognizing the Recorder as a house hold necessity, came in Tuesday and enlisted as one of its patrons, and, of course he will have better luck with his chickens, hogs, cows, &c.

A card has been received from Mr. and Mrs. Robert B. Rouse, of Florence, announcing the birth of a son, Robert, at the St. Elizabeth's Hospital, Cincinnati, February 26. Weight eight pounds.

Mrs. Kittle, who died at the home of her son in Ellettsville neighborhood, was buried at Petersburg yesterday. C. Scott Chambers, undertaker of Walton, had charge of the funeral.

The snow disappeared at a rapid rate Tuesday afternoon, and it was a fair weather day.

It is a pity that in the United States there are only two men who know all things—Roosevelt and Watson. They always come up with an "I told you so."

Two additional big sales advertised this week. Thos. O'Hara, of near Erlanger, Tuesday, March 20, and G. R. Kennedy, near Devon, March 17th.

Several firetrucks have passed thru Burlington the past week enroute to Indiana to make their future home. One band of the movers was Grant county people.

If an abundance of snow during the winter prevents a good crop, 1917 crops should be bumpy.

FOR RENT—Home and to acreage each for tobacco and corn. C. C. Adams, Williamstown, Ky.

Hogs \$14.15 in Cincinnati market, Tuesday.

President Addresses Congress.

Excerpts from the president's address:

"We stand firm in armed neutrality. It seems to me that in no other way can we demonstrate what it is we insist upon.
"We may even be drawn on by circumstances, not by our own desire, to more active assertion of our rights and a more immediate association with the great struggle itself.
"But nothing will alter our thoughts or our purpose. We desire neither conquest nor advantage."
"We wish nothing that can be had at only the cost of another people. We have always professed unselfish purpose and we covet the opportunity to prove that our professions are sincere."
"The tragic events of the 30 months of turmoil thru which we have just passed have made us citizens of the world. There can be no turning back.
"And yet we are not the less Americans. We shall be the more American if we remain true to the principles which we have been bred. We have known and boasted that they were the principles of a liberated mankind."
"That therefore, the things we stand for, whether in war or in peace:
"That all nations are equally interested in the peace of the world and in the political stability of free peoples, and equally responsible for their maintenance."
"That the essential principle of peace is the actual equality of nations in all matters of right and privilege."
"That peace cannot securely or justly rest upon an armed balance of power."
"That governments derive all their just powers from the consent of the governed and that no other powers should be supported by the common thought, purpose or power of the family of nations."
"That the seas should be equally free for the use of all peoples, under rules set up by common agreement and consent; and that so far as practicable they should be accessible to all upon equal terms."
"That national armaments should be limited to the necessities of national order and domestic safety."
"That the community of interest and of power upon which peace must henceforth depend imposes upon each nation the duty of seeking to fit its influences proceeding from its own citizens to encourage or assist revolution in other states should be sternly and effectually suppressed and prevented."

The local rural mail carriers had hard trips last Monday on account of snow drifts they encountered. While the weather was nine hours, on horseback, having to detour two or three times. He generally gets around in about six hours. Elmer Stephens was in his cart and made the circuit in about an hour's extra time, having to take to the fields in some places. Dolphus Sowers has his troubles but got back to Burlington in very good time.

It was reported here Monday that Erlanger was on the verge of a full famine. That not a lump of coal in either yard and many people were going about the town with sacks begging for coal.

Rev. Robert McNeely is now a resident of Rabbit Hash neighborhood, occupying the Hodges farm near Collin Kelly's.

J. C. White has installed a gas meter on his mill and for his sole purpose of keeping from running out of gasoline when on the road.

Courtney Pope is out and Mr. John J. Aylor is in. Aylor is in a new house in Richmond night school.

LITTLE SHEEP POINTS

Many Settlers Use Animals for Clearing Up Land.

Flock Can Be Sheltered in Common Shed, Open to South—Give Ewes Careful Attention at Lambing Time—Keep Them Dry.

(By FRANK KLEINHERG, Wisconsin Experiment Station.)

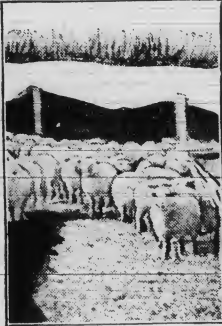

Sheep make excellent land clearers. Many settlers use sheep to clear land and put it in shape for dairying. A diet of brush alone will not make the sheep thrive—they need grass or a little grain besides.

Sheep can be sheltered in a common shed, open to the south and having a hay or straw roof. It should be free from drafts. The roof must not leak and the floor must be dry. If the ewes lamb early, a warmer place is needed for them during lambing.

It pays to use a good ram, for he is half the flock. If ewes from the western ranges are purchased and crossed with a purebred ram of a mountain breed, offspring improve rapidly. This is an inexpensive but profitable way to start in sheep.

Start with a small flock, until a knowledge of sheep is secured. Large flocks are harder to handle, more susceptible to disease and are expensive to experiment with. A small flock, handled right is profitable and rapidly develops into a larger flock.

Ewes need watching at lambing time, more than at any other. Feed them

Sheep in Winter Quarters.

the right ration, keep them dry and warm. Castorine and kerosene while they are very young.

Early lambs are more profitable than late lambs. The best prices are for a lamb weighing 60 or 70 pounds in May or June. The lambs need more feed than their mothers' milk if the best prices are to be made.

Dip the flock about a week after shearing them. A warm day should be selected and the dipping done early in the morning. Then the sheep are dry by night. Shear the sheep as soon as the weather is warm enough so that they will not take cold if fleece is removed.

DIFFICULT TO FATTEN CALF

Many Farmers Believe That It Is Not Possible to Get Good Veal by Pail Feeding.

It is quite a difficult matter to fatten a veal calf in any reasonable time without new milk. Indeed, many think the only way is to let the calf suckle the cow, that you cannot get first-class veal by pail feeding. But suckling the cow is so detrimental to the cow that good dairymen feed the calves and with very good success. However, when you come to do away with milk entirely, or even try to make veal with skim milk and grain, you are up against a difficult proposition.

There is prepared calf meal on the market that is probably the best substitute for milk. It is good to grow calves on, but to fatten veal is quite different. A good food can be obtained by mixing many of our different grains together, as oats, corn, barley, wheat or bran and middlings, and then cooking to a thin gruel. Calves will grow on this, but will not fatten when quite young.

PILLS FOR CHILLY WEATHER

Treat Sluggish Fowls With Pellets Made of Mixture of Ginger, Pepper and Mustard.

Sometimes, these cold days, a chicken will be found which is apparently a little out of condition, and yet not sick. On these occasions, sprinkling the mash with pepper, about as one would pepper a dish for the table, seems to act as a good tonic. Red pepper in moderation is even better than black. If individual treatment is given, pick up the sluggish birds and give pills made of equal parts of ginger, pepper and mustard, well mixed and made into a dough with flour or cornmeal. Make into pellets the size of a cherry, and give twice a day.

BREEDING STOCK IN WINTER

Egg Production During Cold Weather Season Should Receive Little Thought by Poultryman.

The best of the breeding stock should not be forced for winter egg production or they will not be in the best condition for breeders in the spring. Egg production during cold weather is of second consideration.

FLAVORING OF HIGH VALUE

Cook Who Is Predigal in the Use of Celery Will Find She Has Made No Mistake.

Celery should be used as frequently as possible, not only because of its delicious flavor, but because it is one of the few vegetables possessing so many highly valuable chemical salts. Indeed, it has been declared very often that celery has direct curative properties for the nervous rheumatic person. Incidentally, there is practically no waste to celery—every bit of it can be used.

Of course, we know best the use of the delicate stems stalks, for salads and fillings. But the outside stalks, even though not perfect enough in appearance for service in the fancy, should not be neglected, but stewed or used in the making of soup. The trimmings, too, leaves, imperfect stalks, can be added to broths, soups, or used to help flavor other dishes. The addition of a little chopped celery to any kind of soup or vegetable dish is sure to improve its flavor.

If celery is not used immediately, it can be wrapped in paper and kept in a cool place, and it will then remain in good condition for many days.

Two cups of chestnuts, two cups of celery, four cups of milk, one-half cup of butter. Small onion, carrot, salt, four cloves.

Chop the celery, onion and carrot and brown in butter, add milk and cloves and allow to stew for about one hour.

Blanch chestnuts and boil ten minutes. Drain and stew for half an hour in one-half of the celery liquor that has been stewed. Then press through a colander and pour into the remaining celery-and-milk mixture and cook for ten minutes. Serve hot and, if desired, garnish with a few whole-cooked chestnuts.

DELICIOUS DISHES OF RICE

Five Suggestions for Those Who Are Fond of the Cheap and Appealing Cereal.

To Boil Rice.—Pick over one cupful of rice, wash in two waters, drop in one quart of boiled salted water, cook slowly on back of stove. Never stir, and when done each kernel will stand alone. Pour into colander and set on coolest part of stove. It should be boiled in an open steamer. One tablespoonful of lemon juice added to water in which rice is boiling makes it very white and keeps kernels separate.

Rice Omelet.—Beat one cupful of rice and two cups of milk in a bowl, salt and pepper. Fry until brown, cover with powdered sugar and serve at once.

Rice Croquettes.—Put over fire in double boiler one cup of milk and one-half cupful of washed rice. Cook till thick, add one cup of eggs, one-half teaspoonful of salt and two tablespoonfuls of sugar. Remove from fire, beat till smooth, add one-half teaspoonful of vanilla, a few leaf boiled in rice and milk removed as soon as a slight flavor is given to add to delicateness of seasoning. Spread all on a flat dish, and when cold form into cone shape. Dip in egg, then in crumbs and cook in boiling fat. This makes 12 croquettes.

Rice Bread.—One tumbler rice flour, one and one-half gills of milk, one egg, two tablespoonfuls butter, one tablespoonful cooked haddock, the white of one egg beaten, one-half cup of milk, one-half cup of sugar, one-half cup of flour. Bake three-quarters of an hour.

Rice Cornbread.—One pint boiled rice, one pint cornmeal, one dessert-spoonful oil, one pint sour milk, two eggs beaten well.

Deviled Fillets of Chicken.—Cut chicken meat into long, thin strips or the thin portions of the breast. Dip in melted butter, broil until cooked or heated through. Then place on a hot serving dish and spread with the hot mixture two tablespoonfuls of vinegar, two of Worcester-shire sauce, one of mushroom catsup, one tablespoonful of chutney sauce and a dash of salt.

Baking Powder Biscuits.—Sift together one teaspoonful of baking powder and one-quarter teaspoonful of salt. Mix into the flour one large tablespoonful of lard, then add one-half cupful of milk, stirring in milk with knife. Roll out the dough on a floured board and cut into shape with a cutter. Bake in quick oven about fifteen minutes.

Household Lore.—Dark-colored foods will not fade if soaked in salt and vinegar in the water.

In the home a fireless cooker is indispensable. At times when a large amount of cooking is done it will work overtime, night or day, without getting out of repair or using up fuel.

Flaky Pie Crust.—Use one and one-half cupfuls flour, two-thirds cupful lard, mix with as little cold water as possible. Roll out, then spread lard on and roll again. Repeat this process several times. You can use this for other pies or tarts.

More Appetizing Potatoes.—When baking potatoes grease them first with a little butter, and when cooked they will be beautifully brown and crisp, with the nice glazed appearance that makes them look so appetizing.

Use Glycerin.—A couple of teaspoonfuls of glycerin in a small amount of water is useful in softening the lather in which shaved articles are to be washed.

SWAT THE BUGS

Here are a few animal parasites that can be controlled by dipping in some reliable stock dip.

On hogs—Hog louse, flea, red mange, and sarcoptic mange.

On sheep—Sheep tick, sheep-skin mite, mange.

On cattle—Texas fever tick, mange, scab, various kinds of lice and mites.

On horses—Lice and mites.

BEST SOIL FOR HORSE RADISH

Plant Is Propagated by Cuttings Which Are Made From Trimmings From Its Roots.

Horse-radish does best on deep, cool, rich soil and for best results late season growth is necessary.

It is propagated by root cuttings which are made from trimmings from roots prepared for the market. The best cuttings are about the size of one's little finger, and from 4 to 7 inches long. They should be planted in rows far enough apart to allow horse-radish, and from 12 to 18 inches apart in the row.

The horse-radish plant is very hardy and will stand much abuse, but in planting one must use care in setting the cutting so that the upper end is on top, otherwise the horse-radishes will grow irregular in shape. Very often it is planted with other crops, such as cabbage, spinach, early beets, etc.

In preparing for the market all of the rootlets are cut off and the roots tied in bunches of 12.

FIND VALUE OF DAY'S LABOR

Four Hours and 34 Minutes Required to Produce Bushel of Corn in 1855—Less Time Now.

The United States Department of Agriculture in 1855 made an investigation as to the time required to produce a bushel of corn. They found that it required 4 hours and 34 minutes of human labor. From 1900 to 1912 a similar investigation was made. T. P. Coomer, director of the North Dakota experiment and station in summing up the results, finds that 45 minutes is the time required to produce a bushel of corn now, or only one-sixth as long as in 1855. In other words, a day of human labor now is worth more than six times as much as in 1855, due to the use of more and better machinery, better varieties of corn and better soil management.

SELECTION OF BEST LAYERS

Large, Thrifty, Clean Fowls That Are Good Egg Producers Are Most Desired by Farmer.

W. Theodore Witmann, poultry expert of the Pennsylvania department of agriculture, gives the following advice: Good layers have long bodies, legs sloping to the tail; medium-length legs set well apart; full prominent egg basket; pelvic bones thin and pliable; comb large, always red, and the number of serrations makes no difference.

At this time of the year if you wish to improve your flock, the only hens you must breed from are your best

Flock of Plymouth Rocks.

hens, the big and persistent layers which are in good plumage and which have pale shanks, pale beaks and lobes, and red combs.

The present show type of Single Comb White Leghorns, with low tails, small and evenly-serrated comb, etc., is about as valuable, in a utility sense, as a poodle dog. Pay no attention to these "points" unless you wish to follow the shows, when they become highly important. Large, thrifty, clean birds that are good layers are to be desired by the poultryman.

ALFALFA TO FOLLOW WHEAT

Thorough Disking and Frequent Harrowing Will Often Be All That Is Needed in East.

When alfalfa is to follow winter wheat or other small grain crops in the East, a thorough disk, followed by frequent harrowings, will often be all that may be required, provided the land is worked shortly after the grain is removed.

When plowing in this case is necessary, the preparation of the seedbed will often be facilitated by disk, ahead of the plow and by following the plow at once with a pulverizer and harrow.

MR. CHARLES' WASHING

By LOUISE OLIVER.

Jane, pounding a spring 1-2-3-4 read-stroke very merrily before and full of puddles—heard a little boy yell. Just at first her heart stood still, for she thought she had run over him, but on coming to a sudden stop and looking back through the curtains she saw a little boy very much alive, jumping up and down like an angry little Jack-in-the-box and shaking a grimy fist in her direction. Beside him on a small wagon was a washbasket full of clothes and she was not too far away to see the ominous black spots all over the snowy white cover.

Jane pulled up to the curb and got out. "Did I do that?" she asked. "Are you sure?"

"Sure as I am that I haven't got home and tell me. She'd beat the tar out of me for spilling Mr. Charles' washin'." He's her most particular customer.

Jane's face turned red. "I'm sorry. I hadn't any idea I was splashing so and I know just how you feel. Once I had on a new dress and a man whizzed past in his automobile just like that," she chafed her hands together, "and spoiled my dress forever."

"Well, that ain't me. Look at 'em. Are you sure?"

"And I don't want you to hate me like that, so I'll tell you what I'm going to do. Tell me how much it is and I'll pay you. Then I'll take the washing home myself after I've fixed it up."

"It's a dollar and a half."

"Here it is, then, and if you'll bring the basket over beside my car I think we can lift it in. You run home, now, and don't you worry about the washing. I'll fix it all up. Good-by, now, I'm going."

"Good-by," he turned away as she started the engine, then came back. "Oh, say, will you give 'n this?" Mr. Charles' washin' was in his pocket and it was not spilt in the water. She dried it—now it's all right. Don't forget, now! He held out a bit of paste-board.

She shoved it into her pocket and started the car. She had gone several blocks before she realized that she had not asked the man's name and address nor did she know any more about the youngster she had relieved of his load. Suddenly she thought of the paste-board. But to her surprise she saw her own features looking back at her.

"My picture! And in his pocket! The little boy said his name was Charles. I don't know any Charles, not a single one. It's very odd. Well, I'll look over the clothes. Maybe his name's on some of the things."

Jane took the washing to the Working Girls' home, where she and a few of her friends showed the girls the dignity of labor by co-operating with them at their work.

"Girls," called Jane merrily, "I've brought home something out of the ordinary; do you think we can do 'em?"

"Sure, Miss Jane, we'd wash a circus tent if you'd bring it."

Now in his apartment on the other side of the town one Charles Armstrong was pulling out bureau drawers, rummaging through boxes and turning out pockets. "I'm darned if I can remember where I put that picture. Funny how things turn out. When they sent home my camera pictures that girl's was in by mistake, and I haven't been able to get her out of my head for a minute since. And the day of the fire I splashed mud all over that same little girl and she's hated me ever since. I don't know her name and I don't dare to find out."

He started to dress for dinner and dug through his drawer for a certain shirt. "Hang it, my washing's two days late. I'll have to run down in the car, I guess, and get it. Mrs. Miggins or Dickie must be sick."

"Didn't you get your clothes, Mr. Charles?" said Mrs. Miggins in astonishment a little later. "Why, Dickie took them two days ago. Dickie's gone home."

And Dickie, sniffling and scared to death, told the whole thing. She promised to take them, she said. She said—

"Did you give her my name and address, Dickie?"

"No. She didn't ask."

"Do you know hers?"

"I gave her the picture, and she didn't ask me to look like the picture, though? It must 'n been her."

"Is that all you know about her? Did she say anything else?"

"No. Oh, yes. She said a man splashed her once!"

"All right, Dickie. Don't cry and here's a dime."

He drove to Kelson's. "Did any young lady lose a picture? One was sent in with mine a few weeks ago by mistake. No, I haven't it with me, but thought I could mail it to her if I knew who it was."

"Why, yes. Miss Jane Cartwright lost one. Likely that's it. Yes, I have her address."

So Charles headed for Jane's. They recognized each other in an instant. "Yes, I have your clothes," explained Jane. "But the mud spots just wouldn't come out."

"Then we're even. I'm sorry I spoiled your dress."

"Will you tell me what you were doing with my picture?"

"Yes, I'm in love with it."

She reddened. "You make love as you drive a car. It isn't always the best way."

"I need someone to teach me patience. I'd be a very willing pupil. Won't you try?"

"I'll think about it," answered Jane. (Copyright, 1917, by the McClure Newspaper Syndicate.)

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pressed steel frame—every supporting part a forging or pressed steel—Republic Torben International Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

WALTON.

Mrs. D. B. Wallace has been sick since the first of the week.

Miss Isabel Tompkins spent the past week with friends and relatives at Ghent.

John Herndon of Owenton spent the first of the week here visiting friends.

Mrs. W. B. Garriatt and little son who have been ill with grippe have about recovered.

John Lane of Ludlow spent Sunday here at his farm near the Southern railroad depot.

Jno. L. Vest spent last week in Chicago and at Owenton in relation to his law practice.

J. W. Conner of Union spent from Saturday until Monday here and at Verona with relatives and friends.

Mr. and Mrs. Geo. L. Miller of Big Bone Springs are here on visit to their son John C. Miller and family.

Mr. and Mrs. Guy Griffith of Ghent, spent part of last week with his uncle A. B. Tompkins and family.

F. A. Cison of Covington, was here Saturday arranging to close his purchase of the O. T. Bond property from J. C. Pennington.

Jas. R. Wallace spent part of the week in Covington closing contracts for several sites with parties who own farms in Kenton county.

Mr. and Mrs. Edward Fullmer returned last week from Louisville where they have been at the bedside of their sister Mrs. Mable Holburn.

Wm. D. Cropper of Burlington, the popular and efficient sheriff of Boone county, was here Saturday on business and attending the tobacco sales.

M. H. Richards of Napoleon, Gallatin county, Wm. Ferguson of Sparta, and A. L. Ward of Glencoe, were here Saturday buying tobacco on the local market.

J. Wm. Houston continues to be ill and is confined to his bed with a stomach affection. His assistant foreman is looking after his duties on the L. & N. Railroad in the carpenter and bridge work.

Mr. and Mrs. A. B. Tompkins left Monday for French Lick Springs, Indiana, to spend ten days for the benefit of Mr. Tompkins' health as he has been on the sick list for a couple of weeks.

Mrs. W. L. Gaines who is under the care of Dr. B. K. Monette at Covington having a minor surgical operation performed is rapidly recovering and expects to be home the latter part of the week.

John W. Callender of Natchez, Mississippi, was a visitor here Monday enroute to Sparta, where he formerly resided. He had been at the bedside of his mother at Wallmansworth, she being quite ill.

Married—Herschel March, 20, to Mrs. Jane Helmick, 20, at the home of the bride near Gardnersville, March 7th, being the third wedding and venture for each. The bride is an aunt of E. L. Northcutt of Walton.

Mrs. Mary E. Daniels, 85, died at her home near Goshen, March 7th, after a long illness. She was the mother of several children and survived her. The funeral took place from the Goshen church last Friday, and was in charge of undertaker Edwards.

Geo. L. Miller sold to Dr. J. F. Daugherty last Saturday, a farm near Big Bone Springs containing about 112 acres for \$3,000. Dr. Daugherty purchased the property as an investment, but will put a tenant on the farm to do some improving.

Chas. J. Elrick, of LaGrange, Roadmaster of the C. & N. Railroad between Cincinnati and Louisville, was here Monday looking over some property in the hands of Geo. B. Powers, the real estate man, and may invest in this quarter.

Monday afternoon the residence of Rev. A. Kirtley Johnson caught fire from a defective fire and narrowly escaped destruction as there was a high wind blowing at the time. Fortunately the fire was discovered in time and extinguished without much damage to the property.

Chas. E. Butler of Paris, Bourbon county, was a visitor here last Friday. He has rented the L. B. Dickerson farm near Union with the privilege of purchase at the end of the year, and will spend most of his time there. Mr. Butler was circuit clerk of Bourbon county for twelve years.

Mrs. L. V. Stephens, 83, died at her home near Atwood, March 7th, from erysipelas. Mrs. Stephens was dearly beloved by a large circle for her excellent qualities of heart and mind. The funeral took place Monday, the remains being interred in the cemetery at Independence, undertaker Edwards having charge.

Rev. A. Kirtley Johnson has concluded to accept the call as pastor of the Baptist church at Ghent, Carroll county, and will move there the first of next month. He is advertising to sell at public auction his home and several lots of personal property, Tuesday, March 27th, and it is very desirable property as a residence.

Died—Mrs. Robt. Axton, aged 30 years, at her home near Fiskburg, March 7th, after a long illness from asthma. Mrs. Axton leaves a husband and a large family of children. She was a daughter of the late Rev. J. C. Hagley, and a sister of Wm. H. Hagley, near Walton. The deceased was a faithful member of the Wilmington Baptist church.

B. B. Poland writes from Corbin, Ky. Indiana where he is now residing that the publication of the death of his youngest daughter was an error as it was his eldest daughter, Mrs. O. L. Hall, who died at her home at Moulton.

COLUMBIA GRAFONOLAS

From \$15 to \$200

On the floor at any time. Shipments made same day we receive orders. Will send Records and Needles by mail.

We Are Especially Featuring:

No. 2159—"Pray for Sunshine but be Always Prepared for Rain," and "Follow Me."

No. 2167—"Poor Butterfly," and "The Century Girl."

No. 2158—"Harmony Medley"—both sides.

No. 2140—"Old Zip Coon." "Arkansas Traveler."

Give us your orders direct to Walton House and we will give them prompt attention.

Northcutt-Mercantile Co.

Walton, Ky.

Alabama, Feb. 4th, from Lagrippe: Mrs. Judy was 31 years old and was born near Glencoe. Her husband is the cashier of the bank at Moulton, and five children survive her.

Charles E. Harris, of Covington, was here Monday. He has the contract for the rebuilding of the Dixie Highway in Boone county, and is now negotiating with the town council of Walton for the improvement of the main street that connects with the Dixie Highway so as to have it compare favorably with the highway. It will require an issue of bonds to meet the expense of the improvement and this will have to be submitted to the people.

The Walton Loose Leaf Tobacco Warehouse had a good sale last Saturday, when nearly 50,000 lbs. of tobacco was sold at an average of \$15.16. The next sale will be held next Saturday and probably there will be about two more sales before the house closes for the season, so those who expect to market tobacco at the house this season are urged to have it pulled over the counter of the Equitable Bank alone for the tobacco. The business has been better than was expected, and the management gave universal satisfaction.

The corn and tobacco show of the Walton Advertiser was held last Saturday at the Walton opera house, and while the display was good yet not so many samples of either corn or tobacco. The premiums of \$50 in cash was awarded and paid as advertised.

The judges were: Tobacco—J. E. Williams, J. C. Browning, John Gilligan, Corn—C. L. Griffith, W. Wayland, J. C. Bedinger. The awards were as follows: Red Tobacco—1st Frank Norman, second Kenneth Johnson, 3rd Vest Bros. 4th, Vest Bros. Bright Tobacco—1st Ira Stephens, 2nd Carl Neumeier, 3rd John Barnes, 4th Frank Connelly, Corn—White, 1st, Jas. W. Cheek & Son, who also were awarded the second and third premiums; M. M. Lacey, second, Yellow 1st, Sidney Ambrose, 2nd and 3rd, W. P. Foreman, 4th, J. B. Powers, Silage, Corn, 1st, Jas. W. Cheek & Son, 2nd G. B. Powers. All of the tobacco samples were sold to W. T. Hill of Carrollton at 20 cents for red and 26 cents per pound for yellow, the buyers being various parties. All of the samples brought between ten and fifteen dollars, which leaves Mr. Stamler with a profit of the show about \$18 out of pocket.

Mrs. J. W. Whitson, died—Mrs. James W. Whitson at the home of her son Wm. T. Whitson near Kyle, last Thursday, at the advanced age of eighty years. "Aunt Letty," as she was affectionately known, was a life long resident of Gallatin county, and was highly esteemed by everyone. Undertaker Scott's members had charge of the funeral which took place at Concord cemetery last Saturday. Her husband preceded her to the grave several years ago.

Died Suddenly. Jacob Engle, age 42, died suddenly in Covington, Mo., on March 5th. He had gone to bed the previous evening and while in poor health for some time, he had no complaint for several days. The next morning when his room was visited he was found dead. An examination developed that he had died from a morass of the brain. The remains were taken to Mr. Marsh church near Falmouth, Wednesday, where they were interred.

The Ohio river will, exceed the flood stage of 50 feet at Cincinnati this morning, and is expected to continue rising during the day. It rains throughout the day, and rain continued yesterday and with continued rain forecast for today and an uncertain future, and erosion cannot be determined until the rains have ceased.

FOR RENT. House and 10 acres each of tobacco and corn land, near C. C. Adams, Williamson, Kentucky.

PETERSBURG.

Mrs. Owen Watts' mother is visiting Mrs. Watts.

Chas. Shinkle bought the home of the late Andrew Holms, Saturday night.

Quite a number of Burlington people attended the play here last Saturday night.

Mrs. Dudley Blyth, and children, of Burlington, spent Sunday with her parents J. M. Bots and wife.

Mr. and Mrs. J. B. Berkshair, Miss Lucile Berkshire and Mr. Max (Gritley), were Sunday guests of Mr. and Mrs. J. S. Asbury.

Misses Agnes Thompson and Ruth Snyder, Albert Stephens and Karl Boets, were in Burlington a short time Sunday afternoon.

Rev. Wm. Wood, of the Baptist church, preached here—Saturday and Sunday nights. He will preach at the M. E. church, the second Sunday in April.

The P. H. served supper to the B. H. S. boys Saturday evening at the school house. There were twenty-four present, and every one had a good time and a greater feeling of comradeship was felt between the two schools.

"Blundering Billy," presented by the B. H. S. troupe at Krutz Hall Saturday night, was enjoyed by a large audience. The presentation of each character was especially good and the antics of "Blundering Billy" caused much merriment and laughter. No distinction could be made in the characters, every one playing his or her part splendidly. Mr. Frank Milner rendered a beautiful solo just after the first act. Mr. Ralph White gave a very amusing sketch and Prof. Muntz recited a poem. Mrs. Bender, making a beautiful accompaniment on the piano. We wish to commend these young people for their splendid work in presenting this play.

RABBIT HASH. Colin Kelly, who has been very sick, is improving rapidly.

Bill Craig and wife, of Rising Sun, spent Thursday at R. M. Wilson's.

John Doyle, of Rising Sun, attended Lewis Beeson's sale Saturday.

Hubert Ryle and Robert Ayler have each bought a new Studebaker automobile.

Harry Anderson, "the shoe man" of Rising Sun, came over, Sunday, to see Colin Kelly.

Paul Damorath returned last Wednesday, from a two weeks' visit in Louisville and Miss Geo. Bunker, Henry Ancheman, Fred Theis, Robt. and Lou Bird, of Rising Sun, were here last Thursday, buying a stock.

E. L. Stephens has purchased of John McConnell, of Columbus, Miss. 106 acres of land in East Boone, known as the Clements place.

Charlie Stephens and Walter Rector have bought a large amount of hay in Indiana, and are selling it to the farmers in the Waterloo neighborhood.

Word was received here Friday that the President had signed the bill that Congress had passed increasing the pension of Mr. Elijah Hodges to forty dollars per month. Mr. Hodges is a deaf, serving soldier, well advanced in years and his many friends are gratified that the government has provided for his old age so well.

How our living in the midst of this bill thru in the midst of they had in the closing days of Congress is a mystery, but A. B. Rector gets anything for his constituents that they deserve.

The moving reason is on, and there have been so many changes that we hardly know where people are now living. Mrs. Octavia Ryle moved to Waterloo and took charge of the telephone switchboard; W. J. Hodges moved into the house she vacated here and has charge of the telephone exchange; Rev. Robt. McNeely moved into W. J. Hodges' house; "Red" Rice moved to the farm near Low Gunpowder; William Stephens moved to the farm he bought of Charles Bodine in Red Bank; he bought of Wm. Stephens; Al Holmes moved to William Craig's house on Luck creek.

Many a housewife's high hopes have gone glimmering, just because an erratic Biddy went worm-bunting when thirteen costly eggs were almost due to hatch. That doesn't pay. Put a

BUCKEYE INCUBATOR

on the job and get results! The Buckeye hatches every hatchable egg, and attends directly to business in whole 24 days.

So sure are we of this that we guarantee the Buckeye to hatch more and better chicks than any other incubator, regardless of price. Seven sizes, 40 eggs to 400, and sold as low as \$1.50.

Come in and get a copy of "The Verdict of the User" backed by affidavit. Then you'll know.

Why Not Buy a Buckeye Incubator and raise chickens the modern way? Why let a hen set three weeks and then run 6 to 8 weeks with a litter of chickens and come through with a half dozen chickens, when you could keep her laying that 10 weeks and hatch the chickens in a Buckeye and raise them in a Buckeye Brooder. Say you had 10 hens engaged in hatching and raising chicks, that equals 100 a week at the best laying season which would easily equal 40 to 50 dozen eggs.

THINK IT OVER.

Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their superiority over all other makes. More sold than all others combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

Now is the Time to spray your trees with Scalecide. The world's best dormant spray. The great tree saver. Write for booklet. It's free.

Crowd Seeds. Crowd Crops, we handle only the best field and garden seeds. All sold in bulk at saving prices. Write for catalogue of garden seed. Let us quote you on high grade Timothy, Clover, Sapling, Alfalfa, Red Top, Seed Oats, etc. A Postal Card May Save You Dollars.

GOLDEN BLEND COFFEE. Grows more popular every day. Our sales increase, our friends increase. Send a dollar bill and we will send you 4 lbs. by mail. Do it now.

ARCADE FLOUR—The World's whitest and best Winter Patent. KANSAS CREAM—The Perfect Bread Flour, makes more and better bread. Ask those who use it. They Know.

Food Prices of 1917.

If we could forecast the future even for the space of one year ahead we of this country would undoubtedly make some amazing discoveries.

One piece of information, however, is being forced upon our attention without our being gifted with any extraordinary foresight. It is that during at least the next twelve months there will be no material reduction in the cost of living.

Already we are experiencing war prices for foodstuffs without being able to do so.

Should this country become entangled in the war, which at this writing seems almost inevitable, the situation will not be improved. But even with prices as they are, the situation will be before another crop is harvested is a matter to be pondered with misgivings.

Take, for instance, that of seed planting. With potatoes wholesaling at from \$2.50 to \$3.00 per bushel, can the potato raisers afford to sell them, afford the enormous outlay necessary to plant an acreage sufficient to surpass the crop of 1916, or even to equal it? If the answer is not increased we can hardly look for a reduction in price—unless the government jills the unscrupulous food speculators.

Will the actual acreage of spring wheat and oats be sown, with these grains at their present almost prohibitive prices? Or will the farmer figure that he can clean up enough profit on a smaller crop.

Even the good housewife's onion patch is in danger of shrinking, owing to the enormous rise in the price of this odorous vegetable.

To make the situation more serious still, the indications are that southern farmers are preparing for a record crop of cotton. The agricultural papers and those connected with the agricultural community have been insisting on their advice to farmers to reduce rather than increase the cotton acreage. But is and is not cotton intoxicating and it is doubtful if the southern farmers can be prevented from letting go everything else in order to make a killing on cotton. Such a course would have the effect of reducing the south's production of foodstuffs even below normal, thus further complicating the food situation.

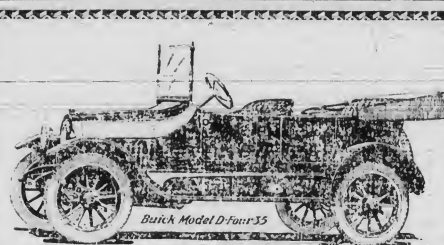

It could be remedied however, if our people would get one idea firmly fixed in their minds, that our lands must be made to produce more, and more, AND MORE.

It is the age-old law of supply and demand which, barring the activities of the price boosters, always works to maintain an equitable balance. That the scarcity of an article enhances its value, is a law as immutable as those governing the seasons.

It should be the first and greatest duty of every citizen of this country during the coming year to see that every available foot of land under his control be made to produce some crop. Food crops are preferable, but SOME crop should be raised. Mother earth is calling to her children to come and partake of her bounties, and we will have only ourselves to hold responsible if we refuse.

Conservation and increase of food crops is the only thing that can relieve the situation—except to junk the speculators.—EX.

Franklin. The wheat crop in this country, which many of the leading farmers believed ruined two weeks ago, is now showing marked improvement and in some sections it is believed an average crop will be made.

BUICK "FOUR" \$675

F. O. B. Factory.

The Season's Very Biggest Automobile Value.

Valve-in-Head Motor,
Delco Electric System,
Exide Storage Battery,
Genuine Leather Upholstery,
Stewart Vacuum Gasoline System.

No other car made, at the price, or within several hundred dollars of the price, has all these high-class features. Yet, and as great as all these, is its wonderful power.

Even competitors have recognized the superior power of the Buick "Four." And, to combat this big feature, many of them say to prospective buyers, "It has too much power for its size." No car can have too much power for this section of the country.

Great power, doesn't mean speed alone. It means ability to climb our steepest hills, and take the hardest pulls, with ease. This insures minimum wear, practically no up-keep expense and long service.

Think of all these many features in an elegantly finished car, with Electric Starter and Lights for \$675. Besides, Buick reputation and one of the largest factories in The Country stands back of every one of them.

Don't Buy Before You See The BUICK—

It is Lots Better to be SURE Than SORRY.

And don't WAIT to see The Buick, for with the existing "tied up" freight conditions, as soon as the "good weather" demand is on, it will be next to impossible to get prompt deliveries. Too, all tendencies in the Automobile line are toward higher prices.

Catalogues of all models on request. Demonstrations given at any time, without the least obligation.

ROBT. W. JONES, Agent

WALTON, KY.

Overland-Willys Knight-Chambers

I have the agency in Boone County for the above cars. Prices ranging from \$650 to \$2600.

Am also in a position to sell second hand machines of exceptional value. Will gladly supply catalogues to interested parties.

A Week's News

J. E. Rouse Dies of Pneumonia.

J. E. Rouse, of Payne's Depot, one of the most prominent farmers and stock breeders in Scott county, and an excellent gentleman, died Saturday afternoon at St. Joseph's Hospital, Lexington, after a brief illness from pneumonia. He was 59 years old.

His wife, Mrs. Cora C. Rouse, four sons, J. Howard Rouse, Geo. E. Rouse, J. Howard Rouse Owen C. Rouse and Calvin Patterson Rouse, a daughter, Mrs. Rufus Lisle, Jr., and five sisters survive him, Mrs. W. S. Cole, of Columbus; Mrs. J. M. Craven, Mrs. W. S. Bradford, Mrs. A. M. Yealey, and Miss Nellie Rouse, of Florence.

Funeral services were held in the Lexington cemetery chapel Monday morning conducted by the Rev. J. P. Smith, Jr., of Bethel church, and the Rev. R. S. Wilson, of Midway. Burial was in the family lot in the Lexington cemetery.

The pall-bearers were Harry V. Rouse, C. B. Patterson, C. E. Marvin, Dr. E. M. McKee, A. L. Ferguson, of Georgetown; William Cogay, of Midway; W. C. Hargis, and H. Clay Poynter, of Midway.—Georgetown Times.

Big Milk Meeting Tonight.

President Harry Hagley, of the Queen City Milk Producers' Association, has called a meeting of committee for tonight at the Covington Industrial Club, to further discuss the proposed cooperative distribution of milk, cream and other dairy products.

The plan, discussed at a general meeting of the association Saturday at Central Turner Hall, Cincinnati, is part of the campaign against dealers and distributors who, despite the strike of many weeks' duration of the producers, are holding out against the producers' terms.

Dealers who have signed the new contracts will receive their milk, but producers of milk and cream will not. That the embargo will remain and that they hope to form a co-operative company, equal to the orange growers' association of California. There were 500 at the Saturday meeting.

Big K. of P. Rally.

The local K. of P.'s are anticipating the greatest time in the history of their lodge on the night of the 31st inst. When the team from Eureka Lodge, No. 1001, will come out to put the finishing touches on a class of eight who are taking the degrees. A bountiful supper will be a big feature of the occasion, and in its arrangement therefor the committee on "Eat" will ignore totally the "high cost of living" and have an abundance. If you are a K. of P. you want to be in on the doings the night of the 31st inst. in Burlington. The Eureka team has the reputation of being the most proficient in the State. It will be accompanied by a band of eighteen pieces, and the old town will be made lively by the visitors remain, provided, always, if the weather is of the proper and much desired kind.

Electric Lights for Florence.

The citizens of Florence expect to install electric lights in their residences and to have their streets lighted by electricity in the very near future. The power will be supplied from Covington, Florence is located on the Dixie Highway—one of the most important thoroughfares in the country, and the citizens should take a pride in bringing the town to the observation of the hundreds of strangers that will pass through there annually while touring the country in their machines, therefore, they should give the electric light proposition liberal consideration as it will be a permanent improvement of much value and a great convenience to them.

50 Cent-a-Bushel Coal, May Be.

A dealer who furnishes a very large lot of fuel for consumers in this part of the county informed the Recorder a few days since that there is a probability of coal costing 50 cents a bushel of 40 pounds before this time next year, which price will be almost prohibitive.

Beemon had a Good Sale.

Last Saturday was a fine day and encouraged the assembling of a very large crowd that afternoon at the sale of Lewis Beemon down on Middle creek. Everything sold well, cows bringing as high as \$87; corn, \$1.35 a bushel.

Getting Ready to Plant the Weed.

The preparation of tobacco plant beds was begun several days ago wherever ground in the proper condition could be found. It now looks like a big crop will be pitched this year.

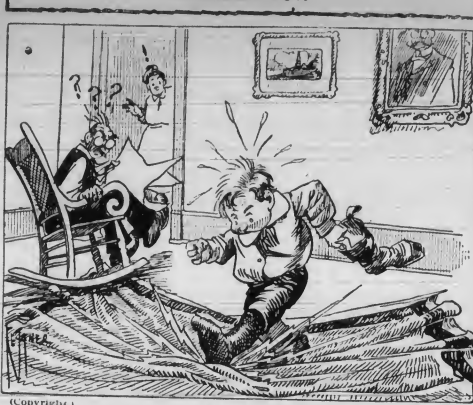

Has Disposed of His Purchase.

Albert Conner has disposed of his purchase of 140,000 pounds of tobacco, having put it all over the floor of the Walton Loose Leaf house at very satisfactory prices.

The survey of the Bullittville and Dry Creek turnpike was begun last Monday. The work is necessary to the preparation of specifications for repaving the road, which, according to reports, is in a very bad condition and much time and labor will be necessary to put it in first-class order.

The rains that have fallen this month will have a tendency to pack the ground so that it will be heavy work at plowing this spring.

CHILBLAINS!!

Personal Mention

Mrs. Howard Huey is quite ill, Mrs. H. G. Furnish is the guest of her parents, Mr. and Mrs. J. C. Revell.

Mrs. Arminta Carpenter, of Richmond, is the guest of Mrs. R. S. Crisler.

W. H. Marshall, of Locust Grove neighborhood, was in Burlington yesterday.

Rev. A. E. DeMoisey, wife and child were Sunday guests of Mr. and Mrs. E. J. Kelly.

Wilber Rice and wife, of Idlewild neighborhood, were guests at Jack Eddins' last Sunday.

W. L. Kirkpatrick and family were Sunday guests of his brother Elmer Kirkpatrick, any wife.

Dolphin Seavey, carrier on R. D. No. 2, has been sick the past few days. Leslie McMillen is substituting for him.

Mrs. Edna Rouse has returned home after spending the winter with her sister, Mrs. E. P. Walton, in Covington.

Lewis Beemon, who has been having trouble with his eyes, went to the city, Tuesday, to consult an oculist.

Mike Holworth, of Union neighborhood, was transacting business in Burlington, last Saturday, and made a call at this office.

James A. Duncin, of Idlewild neighborhood, was the guest of his brother, Dr. E. W. Duncin, and wife several days the past week.

C. C. Roberts has returned to the farm after an enforced vacation of three weeks, the combination against him being snow, rain and sickness.

James T. Gaines and wife and Mrs. Belle Clary, of Erlanger, have returned from St. Petersburg, Florida, where they spent the past three months.

J. M. Thompson and son, Ira Lee, of Petersburg, and W. D. Cropper, L. A. Conner and N. F. Ridell were on the tobacco market at Walton, last Saturday.

Mrs. J. E. Botts, of Switzerland county, Indiana, who is visiting her relatives in this county, was the guest of her sister, Mrs. Chas. Mauser, the first of this week.

Richard White was quite ill a few days last week, having a severe cold. Mr. White is one of the few old Confederate soldiers who remain in this part of Boone county.

W. H. Wilson, of Union neighborhood, was a business visitor to Burlington, Monday. Mr. Wilson is one of the Recorder's staunch friends and always drops in to see the boys when in town.

Mr. and Mrs. C. C. Hume, of Verona, were visitors to Burlington, last Thursday, having business with County Judge Cason in regard to the estate of Mrs. Hume's mother who died a few weeks ago.

Mr. and Mrs. Eugene Long, of McVie, were Sunday guests of her parents, Mr. and Mrs. R. S. Crisler. You know without telling that Colonel never was happier than when in the presence of that grandson last Sunday.

Stanley Cason, of Middle creek, returned last Friday, from his journey in the south. He made quite a tour of the country while there, but found no locality so attractive as the Middle creek hills after winter breaks.

STORM FORECAST BY
MARSH, HE ASSERTS

W. W. Marsh, weather prophet of Winston Place, Cincinnati, 1893, says: "My forecast printed in The Post-Ex, 21 called for the disastrous storm that made its appearance in Cincinnati and vicinity, and over the Ohio Valley Sunday night, 22nd."

Marsh says flood is due. He also predicts more cyclone and heavy rains throughout the country between March 15th and March 25th.

NOTICE—We have removed to 15 Erie Street, where we will continue to do business of manufacturing Auto Tops, Car-
tains and Seat Covers.

Sale to begin at 10 a. m.

THOMAS O'HARA,
N. W. Burkett, Auctioneer.

Commissioner's Sale.

Boone Circuit Court.

Edgar Goodridge, sole devisee of Alfred F. Kiser, dec'd, plaintiff, Against J. Equity.

Minnie Sparks, et al., defendants.

By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its August term, 1916, in the above styled cause, I shall proceed to offer for sale to the highest bidder at public sale, on Monday, the 2nd day of April, 1917, at 1 o'clock p. m., or thereabouts being County Court day, upon a credit of six months, the following property, to-wit:

Two lots in Boone county, Kentucky, situated in the town of Thynbort. The first lot, No. 47 (forty seven) on the north side of Third street, between Elm and Walnut streets, fronting sixty feet on Third street by one hundred and sixty feet deep to an alley numbered two.

The second lot is 48 (forty eight) situated at the east corner of Third and Elm streets, fronting sixty feet on Third street by one hundred and sixty feet deep to an alley numbered two.

The above lots being the same conveyed by Benjamin Sparks and wife to Alfred F. Kiser by deed dated March 27th, 1905, and recorded in Deed Book 48, pages 30 and 31, in the County Clerk's office, at Burlington, Kentucky.

Or sufficient thereof to produce the same of money so ordered to be made.

For the purchase price the purchaser of said real estate, with approved security or securities, must execute bond, bearing 5 per cent interest from the day of sale until paid, and have the foregoing effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply with the following terms:

Amount to be raised by sale, \$504.01

SELMAR WACHS,

605 Madison Avenue, Covington, Ky.

THE DAIRY

GIVING AN UPWARD SQUEEZE

The drawing shown here illustrates how one of the standard milking machines draws the milk from the cow's teat. Any method of drawing the milk from the udder down through the teat also tends to draw blood from the veins of the udder down into the smaller veins of the teat. It is necessary that something shall keep massaging this blood back from the teat, so that it will continue in circulation. The comfortable upward squeeze does exactly this. This squeeze is adjustable, so that the

operator, by turning a little lever, can give a heavier squeeze to a big-teated cow and a lighter squeeze to a small-teated cow. This such cow gets just the squeeze needed in her individual case—a feature that makes each cow give her maximum.

When the calf milks, its tongue has a squeezing action on the teat, the same as your tongue does if you place your finger in your mouth and suck it. This squeezing action of the calf's tongue keeps the blood in the teat in circulation. If the calf stopped squeezing, just sucked each swallow, it would slowly suck so much blood down into the veins of the teat that the teat would appear red and swollen.—Farmers Mail and Breeze.

RECORD OF BIG IMPORTANCE

Small Amount of Work Required to Keep Books if Done Regularly—Profit or Loss Shown.

It is a good thing to keep records of all the farm operations. They may seem trivial at the time, yet some day are sure to be of great value and are a great help and satisfaction in clearing up difficulties that frequently arise. It requires only a small amount of work to keep them if the work is done regularly and systematically. The very fact that records are kept makes one careful of details and interested in making the things of which the records are kept turn out the best. It helps one to have a firm grasp on his affairs and to know just where he stands in all his work. He knows whether he is running his farm or any branch of his farming at a profit or at a loss.

In no branch of farming are records of more importance than in dairying. It is of actual money importance to know whether a cow is making a profit on the feed she consumes or is eating more than she is worth.

VENTILATION OF DAIRY BARN

Where Air Is Good, Cows Should Remain in Stalls at Night Both in Summer and Winter.

If ventilation of the barn is good, cows should remain in the stall all night, both in summer and in winter. If ventilation is imperfect in very hot weather it would be advisable to turn them out in some clean lot or pasture, but in doing this considerable manure is lost.

During some of the colder days of winter it would be advisable not to turn cattle out except during short periods for watering. Chilly weather has considerable influence in reducing milk flow and a good cow should not be exposed to too severe climatic changes.

CULL OUT ALL THE LOAFERS

Big Increase in Profits Made by Farmer Who Weeded Out All Unprofitable Animals.

Merely by culling out the unprofitable cows one farmer reports that he was able to raise the milk receipts per cow from \$20 one year to \$130 the next; and the live-stock receipts per \$100 worth of feed from \$70 to \$170. This made it possible for the farmer to increase the profit \$1,500 on his farm in addition to what the farm contributed toward the living and after 5 per cent interest on the investment had been subtracted. The year previous the farmer had lost money.

FARM POULTRY

START IN POULTRY BUSINESS

Spring Is Good Time to Begin—Either Obtain Breeding Pen or File Order for Eggs.

Spring is a good time to start in the poultry business. Either obtain a good breeding pen from someone who is reliable and who raises the breed you fancy, or else send for eggs. You do not have much time to obtain breeding pens, for most breeders of purchased stock have their pens nated by this time and without doubt will have disposed of their surplus choice breeding males by advertising them last fall and selling them to parties wanting good breeders.

The other plan, then, is to send to these breeders and obtain their price lists at once. Even if you do not care to have the eggs for a month or so, send now and obtain the price lists and get your order booked, for others are doing the same thing, and most breeders send out eggs in the order booked. Delays oftentimes cost much, due to inability of the shipper to fill his many orders as promptly as he may desire.

BEGIN FIGHT ON PARASITES

Poor Policy to Wait Until Spring When Insects Become Numerous—Dust Birds Thoroughly.

A common practice among poultry men is to wait in the spring until lice and other parasites have become so numerous that they will be noticeable. By far the better plan is to begin the fight early and keep them from getting a start.

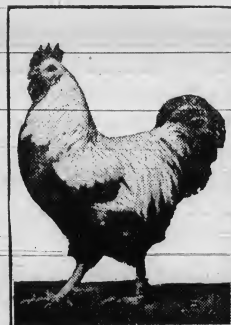

One of the best means of doing this is to dust the birds thoroughly with a good insect powder, at regular intervals, beginning in late winter. There is no harm in giving the birds an application occasionally even in midwinter, since they are never entirely free from them, and everyone of these pests killed before the breeding season may mean a million or two less to fight next summer.

ROOSTER TO IMPROVE FLOCK

In Selecting Young Fowls Use Best Judgment—Certain Characteristics May Be Noted.

The kind of cockerels used is far more important than most farm-poultry raisers believe. The fact that one bird looks well and is healthy and active is a good indication of a good bird. But this is not enough. The male bird should be of such good breeding that he will improve the flock. If he is not capable of doing this he is not worthy of his place as head of the flock.

When you are selecting the male birds from the young cockerels of your own flock you should use your best judgment and find the best individuals. In this case you must be in-

Silver Pencilled Plymouth Rock Cock.

fluenced by the appearance of the birds, as for the most part the cockerels will be about the same in breeding unless you have trap-nested and kept records in the hens.

It is rather hard to select young cockerels as they may often deceive one when they are quite young. Like a calf, a cock, or a pig, there is much speculation in selecting for breeding purposes. Nevertheless, there are certain characteristics that may be noted. From these a careful breeder will determine the male birds for his flock.

CHICKENS KEPT IN BROODERS

Much Loss Can Be Avoided by Keeping Everything Clean—Use Cut Straw for Litter.

Much of the loss in raising chicks in brooders can be obviated by keeping the floor of brooders and brooder houses covered with an inch of clean sand.

Cut corn stover or cut straw may be used on the sand for scratch litter. Such material as clover or timothy chaff or barkwood hulls are objectionable to the brooder house. The chicks pick up the particles of the fuzzy stuff and are not able to pass them through the crop.

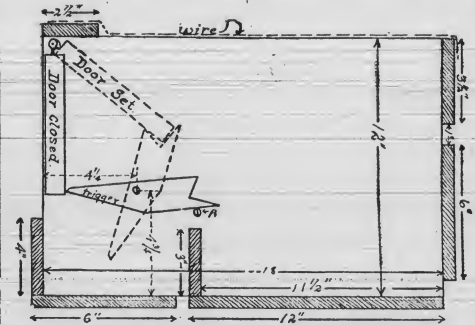

The young chicks need a daily feeding of five-cut green grass if they are to do well.

MISSOURI TRAP NEST IS SATISFACTORY

By T. E. QUINNHERBY, Missouri State Poultry Experiment Station.

There are many kinds of home-made trap nests, but none have proved so satisfactory with us as this one. The nests are of good size, 12 by 18 inches inside measure and 12 by 15 inches high. A board 3 inches high is put across the nest 12 inches from the back, which makes a nest 12 inches square, and this board holds the nesting material in place. The nests should be built in pairs. This makes a nest in which a good large hen can be comfortable either sitting or standing, which is a desirable quality in a trap nest. This door and trigger can be used on any sort of nest or box you care to use.

The body of the nest is built of light material, one-half or five-eighths inch lumber. The trigger and front door should be made of seven-eighths or inch material. Nests which are to be placed under tight droppings platform or underneath any object which will prevent the fowls from roosting on them need be covered only with one-

LEFT INSIDE WALL OF NEST AS IT FACES YOU.

inch mesh poultry netting. Otherwise, under the top of the nest flight, it is a good idea to leave an inch opening in the back or sides of the nests for ventilation.

Wire Door Favored.

Use a door consisting of a frame over which small mesh wire has been tacked. We like the wire door better than a solid wooden door, because of the fact that it affords ample ventilation, the lack of which is one of the main faults of the average trap nest.

The door is hung on screw eyes, which fasten in the upper edge of the frame. With a gimlet or small bit make holes in sides and partition for heavy wire near top entrance, from which suspend the doors by screw eyes. This permits the doors to swing back and forth freely, and makes a cheap hinge.

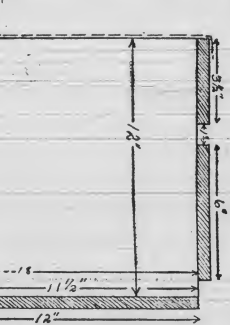

The door is checked by means of thumb buttons, which are placed on the front of the center partition and act as a stop for both doors. If you should be troubled with the buttons working loose, tighten them.

The trigger can be attached to the side of the nest box by using a long screw, but in every case it must work freely. The screw must be set squarely into the side of the box to

also prevent the trigger from binding against the side. Free action of this trigger is positively required. Setting the Trigger.

The trigger must be set in such a position that when the door is swung inward and rests on the notch it will be invitingly open and at the same time this opening must be small enough to prevent the hen walking into the nest without touching the door with her back. As she steps into the nest and slightly raises the door, the trigger is released and falls backward. The door then swings down and the pointed end of the trigger rises behind it, effectually locking it.

See that the nesting material does not interfere with the trigger. Long hay or straw may eventually get piled up in such a manner as to interfere with its action. To remove the hay, simply turn the button and swing the door outward, or if you prefer, turn down the point of the trigger and swing the door in toward the top of the nest, thus permitting the bird to come out. Of course the nest can be

LEFT INSIDE WALL OF NEST AS IT FACES YOU.

set in a partition with a back door through which the hen may be removed.

It is necessary to drive a nail into the side of the box in such a manner as to check the falling trigger, when the sharp end rises to a point where it safely locks the door. The point of the trigger would rest near the bottom of the door when it is closed. The trigger resting on the back of the door prevents any hen on the outside from coming in and the door closing against the button prevents the hen in the nest from releasing herself.

Prefer Secluded Spot. The hens prefer to lay in some secluded spot. Don't put the nest down on the floor or out where it is too light. The hens see the soft shelled eggs and the broken eggs, and they often develop the habit of egging. The nests should be simple and constructed so they may be easily removed.

We prefer to place the nests under the droppings platform. This is a convenient place, and the nests do not occupy any of the valuable floor or wall space. You should have one nest to every four hens. Keep the nests absolutely clean and remove the nesting material quite often.

BAD TRAITS ARE INHERITED

While Chickens Are Maturing, Watch Distinguishing Characteristics and Cull Undesirables.

It has been proved that criminal tendencies are inherited, and that crime runs in families. If it were not true that the laws of heredity were evident in the culture of chickens, there would be no possibility of breeding with any assurance of obtaining a desired color, size or shape. While, then, the chickens are maturing and their distinguishing characteristics are asserting themselves positively, be on the lookout for bad characters and weed out the undesirables. The bully is pressing a tendency that was born in her. She interferes with the contentment of the flock, and keeps the rest in a continual state of excitement. This in turn affects their laying, their appearance and their health, and she should be dealt with drastically. The feather-puller and egg-eater are in the same class, and they should all go the same road—to the market.—Clemson College Bulletin.

KANSAS RATION FOR WINTER

Dry Mash Made of Cornmeal, Middlings, Meat Scraps, Lined Oil Meal and Alfalfa.

The ration used in winter feeding on the poultry farm of the Kansas State Agricultural college is a dry mash made according to the following formula: 60 pounds of cornmeal, 60 pounds of wheat middlings or shorts, 50 pounds of meat scraps, 50 pounds of wheat bran, 10 pounds of lined oil meal, 10 pounds of milled alfalfa, and 11 pounds of salt.

This is fed in connection with a scratching feed thrown into the litter and consisting of three parts of wheat, two parts of corn and one part of oats, mixed by weight. Dried oyster shell and charcoal are kept before the birds all the time, and they are fed once a day all the green feed they will eat, clean in half an hour.

If skim milk is fed, the meat scraps in the dry mash is cut one-half. In order to induce the hens to drink enough of the milk, they should be given no water.

DAMAGED FEED FOR POULTRY

At Present Prices Poultryman May Find It Economical to Buy Good Grade of Salvage.

In buying salvage wheat the factor of whether or not the chickens will eat it is very important. There are two kinds of salvage wheat. One is water soaked, which when it comes through a fire snuffles very strong and has a bad taste. The hen will turn this down every time.

Fires occurring in elevators where there are no fire-fighting facilities leave the wheat in a better condition. There may be a little water on the wheat, but the fiery and water-soaked wheat is not present; consequently the palatability of the grain is not much affected. At the present prices one may find it paying to feed a good grade of salvage.

FEEDS FOR BREEDING STOCK

Keep in Mind Importance of Materials Carrying Proper Proportion of Protein and Fats.

In feeding your breeding stock, keep well in mind the importance of balanced feeds, those carrying the proper proportion of protein, carbohydrates and fats.

Make regular use of hoppers to contain the feeds and keep them clean, either of which poultry can have access to at all times; also the grit, oyster shell and charcoal. The hens are wiser than we may give them credit for, and will, if given this chance, do their own "balancing."

PREVENT BIG POULTRY LOSS

Much Money Can Be Saved Poultryman by Keeping Houses Comfortable—Clean Up Now.

Half the chickens hatched in the United States die of the white diarrhea; 75 per cent of the chicken raisers in the country have losses from roup.

The way to prevent these losses is by keeping the poultry comfortable and clean. The time to overhaul the poultry yards and houses is now.

ERLANGER HARDWARE CO

THE STORE THAT SAVES YOU MONEY.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

PT. PLEASANT.

J. J. Rucker is in Tennessee on a business trip.

Some farmers will begin plowing in a few days if the weather continues favorable.

Rev. Simmons was entertained at the home of J. J. Rucker Saturday night and Sunday.

Mrs. Addie Gaines entertained her sister-in-law, Mrs. J. W. Utz, of Erlanger, last Saturday.

H. L. Tanner delivered a bunch of hogs to the Union Stock Yards last week, for which he received a fancy price.

The temperature last Monday was considerably colder than that of the day previous which was warm and spring like.

Miss Flora Youell spent from Saturday evening until Sunday morning with her cousin, Mrs. Dolly White, in Covington.

Mr. and Mrs. Jas. Brown, entertained the following at dinner last Sunday: Mrs. Amanda Tanner and daughter, Miss Una; Mrs. B. H. Tanner, Mrs. Walton and wife and Chas. Stephenson and wife.

GASBURG.

Wild ducks have been very plentiful on the river for a couple of weeks.

Farmers are having good luck with their lambs. Hugh Arnott has saved 28 out of 30.

A vast amount of corn, hay and ground feed has been hauled from Aurora by the farmers on this side of the river.

Jas. McCarty and Miss Bella Houze, both of this vicinity, were quietly married in Aurora last Saturday afternoon.

Farmers are getting anxious to get to work and on account of the high prices for other farm products, the acreage of melons will be considerably curtailed.

We were in Aurora a couple of weeks ago and there was a big load of hay lined up on the street, waiting to cross beside several loads of corn and ground feed.

There being no coal in Bellevue has caused a great deal of trouble.

hauled from Petersburg to the country below Woolper, in consequence of which our gravel road is badly cut up and in bad repair generally.

ERLANGER.

Mrs. Harry Ryle is entertaining Mrs. John Berkshire, of Petersburg.

Miss Louise Buckner spent the week-end with friends in Georgetown.

Mr. and Mrs. H. W. Shearer, of Newport, spent Sunday with relatives here.

Helen Riggs was among the sick last week, having a light case of pneumonia.

Miss Elizabeth Stevenson, of Union, spent last week with Mrs. Robert Felthous.

The lecture by Dr. J. W. Porter on "Mothers, Wives and Sweethearts" was well attended.

Mrs. Earl Garrett, of Limburg, spent last week with her parents, Mr. and Mrs. Charles Edwards.

Miss Lora and Hazel Yelton spent the week-end with their aunt, Mrs. D. H. Lawrence, in Covington.

Mr. and Mrs. J. C. Mills were called to Independence by the death of Mrs. Mills' grandmother, Mrs. Stephens.

The O. E. S. Sewing Circle was delightfully entertained last Tuesday afternoon at the home of Mrs. Morgan Mitchell.

Mrs. H. F. Childress and Mrs. C. B. Terrill attended the luncheon bridge given by Mrs. Rome Reesop, of Lexington, pike.

A box social and parcel post sale will be given at the Southside Chapel by the "Gleaners" on March 24th. Be sure to attend.

Dr. and Mrs. James Riffe and son, James, and Miss Adaline Kinley, of Covington, spent Sunday with Mr. and Mrs. Homer Riggs.

The Order of the Yellow Dog continues to flourish. Kennel No. 1 at Masonic Hall and Kennel No. 2 at Junior Order Hall are initiating large classes weekly.

A special meeting of Bristow Chapter, O. E. S. was called last Thursday night at which time Mrs. Chas. Craven and Mrs. C. E. Kennedy, of Devons, was initiated into the order. A nice lunch was served and a social time enjoyed.

Several members went to Covington and attended the reception given by Rosebud Chapter for Mrs. Clara Henrich and Mrs. Emma McNeely.

MT. ZION.

John Newman, of Richmond, spent Sunday with relatives here.

Mrs. and Mrs. Edward Newman entertained a few friends Saturday evening.

Mrs. J. S. Conner and son were calling on Mrs. J. W. Hogan, Sunday afternoon.

Miss Isabella Stephens spent last Sunday with her cousin, Miss Sarah Glacken.

Miss Mary Utz passed the week at Richmond, guest of Mesdames Barlow and Robinson.

Mrs. Walter Riddick and family and Miss Ornella Rouse dined at D. W. Newman's, Sunday.

Chas. Craven and family visited friends in Florence Sunday and attended services at the Baptist church.

The pupils of Mt. Zion school regret very much having to give up their excellent teacher, Mrs. G. R. Kennedy. They having sold their farm will leave here in the near future.

Joseph Hamble and son of Bellevue, Campbell county, spent Sunday at their farm here recently purchased of H. Jung, Mr. Hamble expects to be nicely domiciled by the first of April.

BIG BONE.

Larry Farrell was a caller here Sunday.

J. L. Jones was in Walton Saturday on business.

Al Hamilton, who has typhoid fever, is improving.

Miss Mary Steiner, of Covington, is visiting her parents here.

L. L. Miller sold his farm on B. & B. & Beaver pike to Dr. Daugherty of Walton.

Mrs. J. L. Jones is visiting her daughter, Mrs. Chester Stephens, in Covington.

Mr. and Mrs. G. L. Miller have gone to Walton for a visit with the Sams, J. C. Miles and family.

Mrs. H. F. Jones entertained the Ladies' Missionary Society of the M. E. church at her home, Tuesday.

Mr. and Mrs. A. J. Walton entertained with a party for their daughter, Miss Stella, last Saturday evening.

FRANCESVILLE.

Misses Ella and Rhoda Egerton entertained Miss Alma Muntz, Sunday.

Frank Estes and Miss Florence Egerton were guests at Chas. Muntz's, Sunday.

Harry Reikmann, of Cincinnati, spent Sunday with his father, William Reikmann.

Raymond Baker of Campbellton spent the week-end with friends in this community.

Rev. J. W. Campbell, of Bullittsville, preached two excellent sermons at Sand Run, Sunday.

Mrs. R. S. Wilson and son, Alfred, of Hebron, visited Jerry Estes and family, last Friday.

James Day, wife and family and Will Bowman, of near Idiz, spent Sunday at A. J. Ogden's.

C. D. Seothorn and wife entertained Mr. and Mrs. J. W. Grant, of Bullittsville; Mr. and Mrs. S. Radell and Raymond Baker Sunday.

GRANGE HALL.

Mrs. P. P. Neal was sick several days last week.

Mrs. Bert Clore spent Sunday at P. P. Neal's.

Owen Prosser and family have moved to J. C. Love's farm.

Chas. Smith and daughter, Thelma, were visiting in Union, Friday.

H. C. Prosser, of Latonia, is visiting his mother, who improves very slowly.

J. M. Utz, of Union, who has been very ill for several months, was moved to the home of his daughter, Mrs. Ezra Blankenbaker, last week, where he will make his home for the present.

Clyde Clements and wife, of Covington, were visiting relatives here several days last week.

Mrs. Clements was called to the bedside of her mother, Mrs. Eli Tanner, who is very ill with rheumatism.

S. W. Riley, of Montana, was transacting business in this neighborhood, and calling on some of his old friends and relatives, from Thursday until Saturday of last week. He left here to visit his niece, Mrs. Rold Bradley, of Louisville, Ind., but will return to his home in a few days.

HEBRON.

Roy Garrett purchased of Lesh Stephenson his Ford machine.

Mr. and Mrs. Harold Crigler are proud parents of a son, since the 17th.

Mrs. Neltch died Saturday at the home of her daughter, Mrs. Hunter.

Floyd Crigler, of Cincinnati, spent Sunday here with his brother and wife.

The C. E. Social met with Mr. and Mrs. Frank Hossman, Jr., Saturday night.

A large crowd attended the milk meeting and oyster dinner here Thursday.

Miss Mamie Garrett will entertain the Helper Circle next Saturday afternoon.

Dr. Hafer and family, of Louisville, were guests of relatives here Saturday and Sunday.

Mrs. Alice Day, of Ludlow, is spending several days with her son, Harold, and wife.

Mr. and Mrs. Lister Hemphill, of near Taylorsport, have been entertaining a son since Sunday.

Alfred Newmark was injured last Friday in his truck, which was struck by a street car and damaged so it had to be left for repairs.

Richard Allen moved from the Limburg neighborhood last Thursday. To Hubert Connor's home that was until recently occupied by Allen Goodridge.

IDLEWILD.

Bernard Berkshire moved, Monday to the Walton farm on Ashby Fork.

Mr. and Mrs. E. O. Norman and children spent the week-end in Union with his mother, Mrs. M. C. Norman.

Mrs. W. P. Cropper, of North Bend, and Miss Hattie Kirtley, of Bullittsburg, made Mrs. Chester Grant a short visit Saturday afternoon.

Mrs. Bernard C. Gaines entertained a number of little Misses Saturday afternoon in honor of her little daughter's fourth birthday anniversary.

Miss Marietta Stephens, a very charming young lady of Bullittsville neighborhood, has been the most noted guest of Mr. W. T. Berkshire the past week.

E. A. Martin, who has been a most efficient clerk for L. L. Seothorn, has just resigned his position, having recently purchased a farm.

Mr. and Mrs. R. S. Hannah, who are now in New York City, are receiving congratulations over the arrival of a little daughter February 23, Elizabeth Rosella.

Mr. and Mrs. D. B. Berkshire and Miss Lucile Berkshire, of Petersburg, and Mr. Max T. Gridley, of Cincinnati, were pleasantly entertained by Mrs. J. S. Asbury, recently.

GUNPOWDER.

Owen Ross and wife were sick a few days last week.

R. E. Tanner has about recovered from a severe case of grippe.

Mrs. R. E. Tanner was the guest of Mrs. Florence Floyd last Sunday.

The ground hogs turn has expired and we can look for some better weather.

The Main Telephone Co. will add several new phones to their system this week.

E. L. Roush, who was reported last week as being among the sick, has not improved any.

Ira Long, one of our hustling young men, has a good position in Cincinnati and began work a few days since.

Bert Clore and wife visited at Big Bone last Sunday and were guests of her parents, Mr. and Mrs. P. P. Neal.

Clifford Rouse and sister, of Covington, visited relatives in the Union neighborhood last Saturday.

Joe Weaver and wife attended the funeral of Mrs. Mary Weaver in Georgetown last Friday. They returned Saturday.

Mrs. Mary C. Weaver, nee Floya, died at 2 o'clock a. m. Wednesday the 27th inst., at her home in the 73rd year.

She had been in declining health for the last two years and her death was not unexpected.

Mrs. Weaver was a native of this county, but had lived in Georgetown for the past twenty-five years.

She is survived by her husband, J. L. Weaver, but by no children, an only son Addison Weaver having been born to her and died nineteen years ago.

Mrs. Alfred Underwood is a grand daughter of Mrs. Weaver.

Mrs. Weaver was a faithful member of the Baptist church at Georgetown for several years, and when the summer came she was ready and willing to go.

She was of an unassuming nature, and a kind and affectionate companion.

Her many virtues had made for her a host of friends, and as was clearly demonstrated by the large number of friends who gathered to pay last tribute of respect.

The funeral services were conducted at the residence last Friday at 2 p. m. by Rev. Dr. Davis, assisted by Rev. Mr. Boswell.

The remains were then taken to the Georgetown cemetery and there to rest by those of her son, in the presence of a large concourse of sorrowing friends.

The entire family have the sympathy of all who knew her.

I am now ready to do your spring painting, paper hanging and decorating. Will also paint automobiles, bicycles and motorcycles. All work guaranteed.

CHAS. E. FOWLER,
Bullington, Ky.

BELLEVUE.

Colds are prevalent here. Thelma Kelly's children have measles.

Leave notes for this column at the Postoffice.

Miss Edith Baker is visiting her brother, Rev. C. E. Baker.

Capt. Ed. Maurer spent Saturday and Sunday with home folks.

Wesley Kelly has moved to Wm. Rogers' farm just out of town.

Mrs. O. N. Scott went to Vevey, Sunday, to visit Mrs. Frank Riley, Curtis Kelly, of Seymour, Ind., spent several days here the past week.

Warren Flick attended the loose leaf tobacco market at Madison, last week.

P. H. Brown has purchased Curtis Kelly's land out on the Bellevue pike.

Ross Brady sold his black mare to Fred Morris, of Burlington, for a good price.

Mrs. Charles Rue and children spent the week-end with her aunt, Mrs. J. H. Smith.

Miss Eva Deck, of Cleves, Ohio, has been the guest of her brother John, for several days.

Spunky Smith is making daily trips with his gasoline boat to Aurora except on Sunday.

Several of those who intend being candidates for the Democratic nomination for county offices at the August primary election, while not yet publicly announced, are securing the necessary parapher-

Northcutt Mercantile Co.

Walton, Ky.

WALTON.

Mrs. D. I. Wallace still continues
quite ill. Mr. and Mrs. A. B. Tompkins
John T. Willford, of Ryle, Gal-
latin county, spent Tuesday here
on business.
Mrs. R. Wallace spent last week
in Owen county selling silos and
dairy supplies and had a nice busi-
ness.
Nich McCormick, one of the
progressive farmers of the Ver-
ona neighborhood, spent Tues-
day here with friends.
Mr. and Mrs. A. B. Tompkins re-
turned Monday from a sojourn at
French Lick Springs, Ind., much
improved by the visit.
Mrs. W. L. Gaines, who has been
in Covington taking special med-
ical treatment returned home last
Monday much improved.
Miss Anna Laurie James returned
home last week from a very
pleasant visit to friends and re-
latives at Elwood, Indiana.
Miss Anna McClure of Leitch-
field, and Mrs. Wayne Hyland, of
Louisville, are the guests of
Mr. and Mrs. E. P. Northcutt.
Mr. and Mrs. J. W. Cross, of
near Union, spent Monday here
visiting his mother who is very
ill, with little hopes of recovery.
Miss Sylvia Hurt who has been
teaching school at Jonesville,
Owen county, returned home last
Saturday, having completed the
term.
Mrs. Eugenia B. Powers and
daughter Miss Blanche, of Ver-
ona, spent Tuesday here the
guests of Mr. and Mrs. J. Cloyd
Powers.
The residence property of Mrs.
Lizzie Fullilove narrowly escaped
destruction by fire last Thursday
afternoon, catching fire from a
defective flue.
Claud B. Harris, who has the con-
tract with S. M. Hillier, to re-
build the Dixie Highway in Boone
county, was here last week and
stated that he expected to begin
the work by May 1st.
Miss Stella Senour has resigned
her position in the silk depart-
ment of the Shillito Co., Cincin-
nati, to spend the summer with
her mother Mrs. Britt Senour on
the farm near town.
Mr. and Mrs. R. L. Vallandigham
have moved last week from Cov-
ington to the property of Mrs.
Anna Hind in North Walton. Mr.
Vallandigham having purchased a
half interest in the Walton Gar-
age from his brother C. S. Vallan-
digham.
Mr. and Mrs. Owen S. Watts, of
Petersburg, spent several days
here the first of the week, with
their many friends. Mr. Watts is

the cashier of the Farmers' Bank
at Petersburg, and is not only giv-
ing satisfaction in that position
but is increasing the business of
the bank to fine proportions.
John Peagan and family have
moved from Bracken county to
the Orrin P. Peagan farm near
Walton, which he recently pur-
chased from the Peagan heirs.
Mr. Peagan is an up-to-date citi-
zen and is successful farmer.
He and his excellent family
are gladly welcomed to this com-
munity.
Mr. and Mrs. A. B. Renaker and
little daughter, visited friends
here Saturday enroute to Dry
Ridge on a visit to his mother
Mrs. Paul J. Renaker and other
relatives, returning Monday. Mr.
Renaker is the cashier of the
Peoples Deposit Bank at Burling-
ton and is one of the most pro-
gressive citizens in the county.
Diel John V. Peck, at Madison-
ville, Ohio, of pneumonia, re-
turned home last week. He was
a native of Boone county, and
was about 15 years old. The re-
covery was brought here Sat-
urday and he is now at the place
from the Walton Baptist church,
the services being conducted by
Rev. H. P. D-Moisy after which
the interment took place in the
Baptist cemetery. Mr. Peck was
well known here having resided in
this locality nearly all his life.
Rev. E. C. Lacey, of Walton
in preparation a lecture, "Are You
Married?" and will deliver the
lecture at the Walton Christian
church Monday evening, March
26th, and he should have a fine
welcome from a large audience as
he is an excellent speaker. The
small admission of 10 cents will
be charged to cover the expenses.
The lecture will be under the
auspices of the Ladies Aid Society
of that church.
LAST SALE OF THE SEASON.—
The Walton Loose Leaf Warehouse
Company will probably have its
last sale for the season next Sat-
urday, March 24th, as the tobacco
has about all been sold. Should it
appear that enough will be offer-
ed later to justify another sale
arrangements will be made to
have a special sale which will
be well advertised. The market
has been a great success, and
nearly three million pounds have
been sold on the loose leaf floor
and over four hundred thousand
dollars have been paid over the
truck counters in Walton this
season for the crops.
If any of the growers have
tobacco to market write the Ware-
house Company and arrangements
will be made to have a sale.
There is sufficient to justify

The Campfire Girls entertained
at the home of Mrs. Emma Jane
Miller, last Saturday night, and
all had a most delightful time.
The club, consisting of 11 members
and 10 gentlemen guests, com-
prised the party. It being St. Pat-
rick's Day, the color scheme was
green in honor of the Patron
Saint of the Emerald Isle, even the
refreshments being of that color
while the rooms were very artist-
ically decorated in the same color.
The shrimock decorated all the
members and guests. Artistic re-
presentations of the potato, Ire-
land's great production, was giv-
en on each member, being painted by
Miss Nell Williams, and a prize
was awarded the person writing
the greatest number of words on
the paper, composed from the
word potato. Wendall Rouse won
the prize.
James Haven, who formerly re-
sided here and returned last week
from a visit to friends and re-
latives, met with an accident last
Tuesday that caused his death.
That evening in going out High
Street he lost his way and climb-
ed the fence on to the roof of a
small house on the Clay Baker
lot and fell to the ground, a dis-
tance of about ten feet, breaking
his collar bone and sustaining
other internal injuries that caused
his death at the home of his
step-son, Jas. T. Hurt, who has
him given every attention. Mr.
Haven was 82 years old, and his
wife died about three years. He
was born in Kentucky and served
in the Union army, during the
civil war. Two children survive.
Mrs. Haven, of Cleveland,
Ohio, and Mrs. Ora Adkins of Cov-
ington. He was a kind hearted
man and a good citizen, and he
had many friends here. The fun-
eral took place Sunday afternoon
from the Walton Christian church,
the services being conducted by
Rev. C. Lacey, after which the
remains were laid to rest in the
Baptist cemetery. Mr. and Mrs.
J. T. Hurt desire to express their
thanks to the friends and neigh-
bors for kind words and sym-
pathy shown Mr. Haven while ill
at their home.
James E. Smith has given the
toll house he bought near Bur-
lington on the Petersburg pike a
thorough repairing, putting it in
first class order. It has caused
some to make predictions as to
coming events.
When it comes to paying \$125
for a milk cow it takes very
much like somebody thinks there
is something in the milk prod-
uction business notwithstanding the
high cost of feed and it is nec-
essary to buy for milk cows.

Many a housewife's high hopes
have gone glimmering, just because
an erratic Biddy went worm hunting
when thirteen costly eggs were al-
most due to hatch. That doesn't
pay. Put a

BUCKEYE INCUBATOR

on the job and get results! The Buckeye
hatches every hatchable egg, and stands
strictly to business the whole 21 days.
So sure are we of this that we guarantee
the Buckeye to hatch 100 per cent of all
hatchable eggs, or we will refund the price.
Seven sizes, 60 eggs to 400, and sold as low
as \$1.50.
Come in and get a copy of "The Verdict
of the Expert," backed by affidavit. Then
you'll know.

Why Not Buy a Buckeye Incubator and raise chickens
the modern way? Why let a hen set three weeks and then
run 6 to 8 weeks with a litter of chickens and come through
with a half dozen chickens, when you could keep her laying
that 10 weeks and hatch the chickens in a Buckeye and
raise them in a Buckeye Brooder. Say you had 10 hens
engaged in hatching and raising chicks, that equals 100 a
week at the best laying season which would easily equal
40 to 50 dozen eggs.

THINK IT OVER.

Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their su-
periority over all other makes. More sold than all others
combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

Now is the Time to spray your trees with Scalecide. The
world's best dormant spray. The great tree saver. Write
for booklet. It's free.

Good Seeds—Good Crops, we handle only the best field
and garden seeds. All sold in bulk at saving prices. Write
for catalogue of garden seed. Let us quote you on high
grade Timothy, Clover, Sainfoin, Alfalfa, Red Top, Seed
Oats, etc. A Postal Card May Save You Dollars.

GOLDEN BLEND COFFEE. Grows more popular every
day. Our sales increase, our friends increase. Send a dol-
lar bill and we will send you 4 lbs. by mail. Do it now.

ARCADE FLOUR—The World's whitest and best Winter Patent.
KANSAS CREAM—The Perfect Bread Flour, makes more and
better bread. Ask those who use it. They Know.

Goode and Lunkie
GROCERIES FLOUR SEEDS MEDICINES

COVINGTON, KENTUCKY.

Automobile Facts.

Many a person, who, after having
used his first Automobile long enough
to learn its performance and its ca-
pabilities in detail, concludes that had he
been well enough informed in the
beginning to thoroughly investigate
the several important features in the
make-up of cars, he would have
made a different selection.
Don't take a chance, but profit by
the experience of others.
On the streets of Cincinnati, our
nearest large city, one sees about
three times as many Buick Cars as
any other make, selling above \$375.
(This is not mere idle talk. Look for
yourself.) Could there be more con-
clusive proof of its popularity and
efficiency, and more dependable as-
surance to a purchaser, that in a
Buick, one gets more for the money
of the qualities in an Automobile,
that makes an owner always satis-
fied with his selection?
Let's have that demonstration be-
fore the "good weather" is on.
Prompt deliveries can be made
NOW. **ROBT W. JONES**
Walton, Ky.

Wanted

To hear from owners of small farms
that want to sell and give possession
this spring. I have sold out all the
small farms except a few of the high-
est priceables. demand is for \$45 and
\$50 land. I will charge you 25 per
cent if I make a sale.

G. B. POWERS,
Real Estate Agency,
Walton, Ky.

FOR SALE

One mail wagon for horse, good
as new, will sell cheap, a nice one.

RABBIT HASH.

Woodsavings are all the go
here.
Telford McCosky, of Scottsburg,
Ind., is visiting his mother at
Dr. Cayle's.
Harry Acra has bought Al Wil-
son's farm known as the James A.
Wilson homestead.
Murray Ryle moved into Mrs.
Sallie Stephens' house in upper
Rabbit Hash last week.
Mrs. Clara Riggs has received a
new line of spring and summer
millinery which will be on dis-
play at her home this week, and
everybody is invited to come and
inspect it.
J. H. Walton made a trip to
Shelbyville, Ind., last week to
look at some fine stock, and while
there was in an auto which over-
turned, and he came home consid-
erably bruised but not seriously
hurt.
The river began to fall Sunday
afternoon, reaching a stage or
about 30 feet. The high winds
Saturday and Sunday caused the
water to cut the banks badly.
Considerable damage was done the
new pike below Rabbit Hash.

SELMAR WACHS,

605 Madison Ave., Covington, Ky.

Practically designed and durably made, Overalls have be-
come a necessity on the farm. Our judgment in selecting
garments for the all-purpose use, has created a demand
for the WACHS kind of Overall, and we are pre-
pared for emergencies. Our stock includes a
number of grades of Overalls each a
leader at its price.

MEN'S, YOUNG MEN'S AND BOYS'

BOONE CO. RECORDER

W. L. RIDDELL, Publisher.

A Week's News

Carl Rouse shipped a bunch of nice hogs to market Tuesday.

Judge Gaines is holding circuit court at Warsaw, Gallatin county.

Easter Sunday is April 8th this year. Will your Easter hat be ripe?

Rev. Claunch will preach at Sana Run next Sunday morning and evening.

W. D. Arnold, of Bellevue, was a business visitor to Burlington, Tuesday.

Charles Shinkle, of Petersburg, was a business visitor to Burlington, last Monday.

Dirt roads are rounding into good shape rapidly when the weather will permit.

Prof. and Mrs. Muntz are entertaining his mother, Mrs. Muntz, of Cynthia, Harrison county.

Thos. Rouse, of Pleasant Ridge, O., is in this neighborhood looking after his farming interest.

Miss Besse Hall, of Newport, was the guest of her parents, Mr. and Mrs. F. A. Hall, last Sunday.

Mrs. W. C. Goodridge entertained a large number of her friends at Five Hundred, last Saturday afternoon.

The river is receding very much to the liking of those who had lands submerged by it and the back water.

Mrs. Timothy Westbay, of Covington, was the guest of friends in Burlington a few days the latter part of last week.

The RECORDER has a few garden and flower seed for distribution due to the courtesy of Congressman A. B. Rouse.

The Bellevue people will be given a treat in the way of an entertainment by Burlington High School next Saturday night.

Phil Lambert, of Florence, has equipped an auto bus line to make regular trips to the traction line. He has an advertisement in another column.

John Delshanty and wife, of the Beaver neighborhood, were business visitors to Burlington, Monday, coming over in their new automobile.

Mrs. J. C. Furnish returned to her home in Covington the first of this week after a visit of several days with her parents, Mr. and Mrs. J. C. Revell.

Lost—Between J. C. Revell's and the court house in Burlington, on Monday afternoon, four pieces of narrow coated edge. Please return to Miss Jonette Revell.

J. M. Barlow, the Pleasant Valley pioneer, was transacting business in Burlington, Monday, among other things made peace with the Recorder for another year.

Edward Berkshire was in Tuesday and reported having one hundred young chickens to look after and when asked about the fruit prospects said all the cherries and peaches are killed.

J. S. Cason, of Richmond, was a business visitor to Burlington, last Saturday. Mr. Cason is one of the men in his neighborhood who did much to secure an order for the construction of U-F. pike.

Circuit Clerk Maurer has placed in the hands of Sheriff Cropper the list of grand and petit jurors to be summoned for the April term of the Boone circuit court.

Dr. Batte and brother, who own a large stock farm near Harvest Home's grounds, bought of Mrs. Anna Judge, of near Union, a choice lot of Chesterwhite stock hogs at very fancy prices, recently.

A large crowd attended Thomas O'Hara's sale Tuesday, and fancy prices prevailed. Farm implements sold for more than they cost when new. Cows brought as high as \$125. Small seed potatoes brought \$1.25 a bushel. The crowd was well fed.

Edward Rice was a guest of Esq. Wm. Stephens, near Petersburg, last Friday night. He says the Squire has brought thru the winter as handsome a bunch of cattle as he ever saw. This is only one of the many complimentary statements he made in regard to the Squire as a farmer.

Harvey Southern, then of Point Pleasant neighborhood, called in Monday and subscribed for the Recorder to be sent to his new home, 1070 Palmer, East Detroit, Michigan, to which city he went yesterday to make his future home and work in the Ford automobile shop. His wife's people live in Detroit. All wish Harvey good luck.

Mr. and Mrs. Julia Lucian Johnson announce the marriage of their daughter, Mary Virginia.

Mr. Conrad Julius Ebersohn on Wednesday March the fourteenth, last, married Miss M. C. Ebersohn, daughter of Mr. and Mrs. Ebersohn, of Portland, Oregon.

HIS PASSPORTS

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of March 22d, 1877.

Indiana has a \$2,000,000 State House.

Fred Douglas has been appointed Marshal of the District of Columbia.

One hundred and ninety-nine babies were exhibited at the Baby Show in Cincinnati, last Monday and Tuesday.

In the U. S. Senate are 41 Republicans and 31 Democrats. The Republicans have a majority of six over all.

Capt. L. C. Norman announces this week for State Senator.

Owensboro has 29 mails per week.

Twenty car loads of tombstones of Vermont marble have been received at Lexington for the Federal cemetery.

Petroleum fever almost epidemic in Warren county.

Cincinnati parties awarded contract for building a \$34,000 house in Georgetown, Scott county.

About 170 black people will leave Jessamine county next Monday for Kansas.

A Ministers and Deacons' meeting will be held at Sana Run on Friday and Saturday the 30th and 31st of this month. The ministers invited and expected are Elders John Underhill, Wm. Vansion, Jamieson, Bro. Davis, of Louisville; W. H. Felix, J. M. Bent and Tunison, of Covington; R. K. Graves, H. Stinson, and James Kirkley. The deacons of the church are especially invited. The invitation is signed by R. E. Kirkley.

The spring term of the Boone Criminal Court convened last Monday, Judge J. D. McManama presiding, and Commonwealth's Attorney Warren Mansfield in attendance. The grand jury for the term was organized as follows: Hon. J. A. Gaines, foreman; J. W. Gaines, E. M. Gaines, Templeton Gaines, Alonzo Gaines, Noah Seagraves, W. L. Rouse, Henry Cropper, H. L. Lavelle, H. Hoffman, Milton Whitolt, Ben Stephens, Lewis Conner, W. T. Gorman, Noah Clore, Tuesday J. A. Gaines and Noah Clore was excused, they being civil officers and J. E. Frazier and Joe Rich were summoned in their stead. The petit jury were summoned as follows: J. Tanner, Joe Conner, R. A. Brady, Owen Conner, William Rouse, Legrand Gaines, John Smith, T. B. Rouse, L. W. Riley, Russ Conner, J. P. Utz, Weaver, W. C. Rouse, Joe Weaver, Owen Gaines, J. W. Kennedy, John W. Berkshire, L. P. Arnold, N. S. Walton, Nick Talbot, Benjamin H. Gaines, Cyrus Bruce.

John T. Mison has constructed a platform on which to walk into the Legislature. It is against the road law, the dog law, the stock law and any appropriation of money for the improvement of the State water course.

Last Monday the demand for a view of Joe Goss was so great that it became necessary for the jailer to have him appear on the laning at the top of the jail stairs.

Prof. Tice said nothing about snow, rain, sleet, thunder and lightning on the 14th inst.

Batter 27 cents a pound and scarce.

P. U. Major, Judge O'Hara and Governor John Fisk are attending court.

James N. Early, of Petersburg, is critically ill.

Geo. R. White has moved to Missouri.

Someone wants to know if Joe Goss is left-handed. Ask Charlie Ridell.

Floness X-Rays, Rev. W. C. Barnett, assisted by a student from Springfield College has just concluded a very interesting meeting at Hebron. There were eight additions—Wynn Barnett who has been attending college is at home.

Rabbit Hash—B. C. Calvert shipped the first tobacco of the season this week. The Grange warehouse is about completed. The river is bank full—Jas. Blair and Miss Kate Bailey were married on the 14th—Bessie McConnell united with East Bend Methodist church last Monday night—Robt. Kirtley preached at J. Q. A. Stephens' last Saturday—Mrs. John Stephens has pneumonia—Joe Walton and family have returned from a visit to Bracken county.

Joe Goss, one of the principals in the Goss-Allen prize fight, which took place near Walton, in this county, on the 7th of September, 1876, was, about ten days since arrested in the City of New York after calling on Joe Coburn, a brother pugilist, who was sentenced to ten years' imprisonment in the penitentiary for shooting two policemen with intent to kill. Goss was arrested for the violation of Kentucky laws prohibiting prize fighting. The Gov. of this State issued a requisition for him, and Detective Blyth, of Louisville, went to New York, where he found Goss, whom he brought to Kentucky, and last Thursday morning delivered him to the jailer of this county.

It was soon informed that the offense for which he was indicted is but a misdemeanor, and that he could demand a trial at once. He would have been acquitted, but was notified of the fact, and on last Friday morning held a special session of the Quarterly court for that purpose. A jury was impaneled and trial commenced. The indictment charging the accused with fighting for a prize of \$2,000, was not inclined to, and did not prosecute severely. The case being given the jury, they retired, and in about one minute and a half returned a verdict of guilty, and fixed the fine at \$250, the least amount possible. Everybody sympathizes with Goss, and had it been possible, no doubt he would have been acquitted.

After Goss was remanded to jail, we called upon him for the purpose of a brief interview, and found him willing and ready to answer any question propounded in regard to his career as a pugilist.

Batter 27 cents a pound and scarce.

P. U. Major, Judge O'Hara and Governor John Fisk are attending court.

James N. Early, of Petersburg, is critically ill.

Geo. R. White has moved to Missouri.

Someone wants to know if Joe Goss is left-handed. Ask Charlie Ridell.

Floness X-Rays, Rev. W. C. Barnett, assisted by a student from Springfield College has just concluded a very interesting meeting at Hebron. There were eight additions—Wynn Barnett who has been attending college is at home.

Rabbit Hash—B. C. Calvert shipped the first tobacco of the season this week. The Grange warehouse is about completed. The river is bank full—Jas. Blair and Miss Kate Bailey were married on the 14th—Bessie McConnell united with East Bend Methodist church last Monday night—Robt. Kirtley preached at J. Q. A. Stephens' last Saturday—Mrs. John Stephens has pneumonia—Joe Walton and family have returned from a visit to Bracken county.

Joe Goss, one of the principals in the Goss-Allen prize fight, which took place near Walton, in this county, on the 7th of September, 1876, was, about ten days since arrested in the City of New York after calling on Joe Coburn, a brother pugilist, who was sentenced to ten years' imprisonment in the penitentiary for shooting two policemen with intent to kill. Goss was arrested for the violation of Kentucky laws prohibiting prize fighting. The Gov. of this State issued a requisition for him, and Detective Blyth, of Louisville, went to New York, where he found Goss, whom he brought to Kentucky, and last Thursday morning delivered him to the jailer of this county.

It was soon informed that the offense for which he was indicted is but a misdemeanor, and that he could demand a trial at once. He would have been acquitted, but was notified of the fact, and on last Friday morning held a special session of the Quarterly court for that purpose. A jury was impaneled and trial commenced. The indictment charging the accused with fighting for a prize of \$2,000, was not inclined to, and did not prosecute severely. The case being given the jury, they retired, and in about one minute and a half returned a verdict of guilty, and fixed the fine at \$250, the least amount possible. Everybody sympathizes with Goss, and had it been possible, no doubt he would have been acquitted.

After Goss was remanded to jail, we called upon him for the purpose of a brief interview, and found him willing and ready to answer any question propounded in regard to his career as a pugilist.

Mail Orders Shipped The Day Received.

Printed Taffeta—Sport designs; very stylish and new. Per yard.....\$1.50

Commissioner's Sale.

Boone Circuit Court, Edgar Goodridge, sole devisee of Alfred F. Kissick, dec'd, plaintiff, Against Equity.

Minnie Sparks & defendants. By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its August term, 1916, in the above styled cause, I shall proceed to offer for sale to the highest bidder at public sale, on Monday, the 2nd day of April, 1917, at 1 o'clock p.m. or thereabouts being County Court day, upon a credit of six months, the following property, to-wit:

Two lots in Boone county, Kentucky, situated in the corner of Third and Fourth streets, one lot being the first lot, No. 47 (forty seven) on the north side of Third Street, between Elm and Walnut streets, containing six and one-half acres of land, and the other lot being the second lot, No. 48 (forty eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the third lot, No. 49 (forty nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fourth lot, No. 50 (fifty) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifth lot, No. 51 (fifty one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixth lot, No. 52 (fifty two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventh lot, No. 53 (fifty three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eighth lot, No. 54 (fifty four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the ninth lot, No. 55 (fifty five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the tenth lot, No. 56 (fifty six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eleventh lot, No. 57 (fifty seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twelfth lot, No. 58 (fifty eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirteenth lot, No. 59 (fifty nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fourteenth lot, No. 60 (sixty) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifteenth lot, No. 61 (sixty one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixteenth lot, No. 62 (sixty two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventeenth lot, No. 63 (sixty three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eighteenth lot, No. 64 (sixty four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the nineteenth lot, No. 65 (sixty five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twentieth lot, No. 66 (sixty six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-first lot, No. 67 (sixty seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-second lot, No. 68 (sixty eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-third lot, No. 69 (sixty nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-fourth lot, No. 70 (seventy) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-fifth lot, No. 71 (seventy one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-sixth lot, No. 72 (seventy two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-seventh lot, No. 73 (seventy three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-eighth lot, No. 74 (seventy four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the twenty-ninth lot, No. 75 (seventy five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirtieth lot, No. 76 (seventy six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-first lot, No. 77 (seventy seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-second lot, No. 78 (seventy eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-third lot, No. 79 (seventy nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-fourth lot, No. 80 (eighty) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-fifth lot, No. 81 (eighty one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-sixth lot, No. 82 (eighty two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-seventh lot, No. 83 (eighty three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-eighth lot, No. 84 (eighty four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the thirty-ninth lot, No. 85 (eighty five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fortieth lot, No. 86 (eighty six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-first lot, No. 87 (eighty seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-second lot, No. 88 (eighty eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-third lot, No. 89 (eighty nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-fourth lot, No. 90 (ninety) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-fifth lot, No. 91 (ninety one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-sixth lot, No. 92 (ninety two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-seventh lot, No. 93 (ninety three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-eighth lot, No. 94 (ninety four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the forty-ninth lot, No. 95 (ninety five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fiftieth lot, No. 96 (ninety six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-first lot, No. 97 (ninety seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-second lot, No. 98 (ninety eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-third lot, No. 99 (ninety nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-fourth lot, No. 100 (one hundred) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-fifth lot, No. 101 (one hundred one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-sixth lot, No. 102 (one hundred two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-seventh lot, No. 103 (one hundred three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-eighth lot, No. 104 (one hundred four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the fifty-ninth lot, No. 105 (one hundred five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixtieth lot, No. 106 (one hundred six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-first lot, No. 107 (one hundred seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-second lot, No. 108 (one hundred eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-third lot, No. 109 (one hundred nine) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-fourth lot, No. 110 (one hundred ten) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-fifth lot, No. 111 (one hundred eleven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-sixth lot, No. 112 (one hundred twelve) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-seventh lot, No. 113 (one hundred thirteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-eighth lot, No. 114 (one hundred fourteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the sixty-ninth lot, No. 115 (one hundred fifteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventieth lot, No. 116 (one hundred sixteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-first lot, No. 117 (one hundred seventeen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-second lot, No. 118 (one hundred eighteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-third lot, No. 119 (one hundred nineteen) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-fourth lot, No. 120 (one hundred twenty) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-fifth lot, No. 121 (one hundred twenty one) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-sixth lot, No. 122 (one hundred twenty two) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-seventh lot, No. 123 (one hundred twenty three) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-eighth lot, No. 124 (one hundred twenty four) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the seventy-ninth lot, No. 125 (one hundred twenty five) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eightieth lot, No. 126 (one hundred twenty six) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eighty-first lot, No. 127 (one hundred twenty seven) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the eighty-second lot, No. 128 (one hundred twenty eight) situated at the corner of Third and Fourth streets, containing six and one-half acres of land, and the other lot being the

DAIRY POULTRY

BALANCED RATION FOR MILK

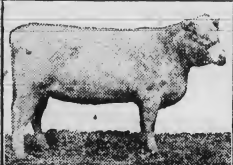

Cow Must Be Given Combination Necessary to Maintain Her Functions and Produce Milk.

For the most profitable milk production, the cow must be fed a balanced ration at the cheapest price such a ration can be provided. By balanced ration is meant the combination of such a proportion of nutrients and in such a quantity as the cow requires to maintain her bodily functions and as she can utilize in the production of milk. These nutrients are classified as protein, carbohydrates, and fats. Protein is one of the principal constituents of milk; fats and carbohydrates perform much the same functions, that is, produce energy and heat, and in the balancing of a ration are usually classed together. If the cow is given a ration containing an excess of either element, the excess is liable to be wasted; hence the economical importance of a balanced ration.

USE SHORTHORNS FOR DAIRY

American Association Representing This Class Fixes Basis at 60 Per Cent for Milk.

The question is often asked, in judging dairy, or dual-purpose Shorthorn cattle, how much is allowed for beef and how much for milk. The American association representing this class of cattle fixed the basis at 60 per cent for dairy qualities and 40 per cent for beef. This is a very good basis to work from. More should be given for

First Prize Shorthorn Heifer.

dairy, for this is most likely to be deficient, and a larger ration will have a tendency to stimulate the dairy development. Some stock shows and fairs fix the ratio at 50 per cent for each; but the rating given above seems better. More emphasis is being placed on the development of the dairy qualities of this breed, bringing it back to its original standing among the breeds of the world—one of the best for dairy purposes.

SILAGE IN PRODUCING MILK

Increase of 17 Per Cent Is Seen in Test Conducted by Ohio Experiment Station.

Cows fed a ration composed largely of silage produced 17 per cent more milk and 28 per cent more butterfat than those given a ration consisting mainly of grain in a feeding test conducted for 121 days at the Ohio experiment station. The silage ration was also cheaper for milk production.

PREVENT LARGE DAIRY LOSS

Contagious Abortion Costs Farmer and Stockman \$20,000,000 Yearly in Dead Calves.

Every farmer and stockman should fight contagious abortion in his district, and do his part to save \$20,000,000 loss in dead calves and sterile cows. The disease is preventable and controllable. Isolate affected animals, treat aborting cows, disinfect the bulls and clean up the premises. This is good business for cattle owners.

COMMON CAUSE OF TROUBLE

Next to Overfeeding Calf Is That of Feeding Milk Too Cold—Feed at Blood Heat.

Possibly next to overfeeding the calf on milk, the commonest cause of trouble is that of feeding milk too cold.

Feed milk at as nearly blood heat (98 degrees F.) as possible and remember that 20 degrees below blood heat may result in a case of scours with very young calves.

CHIEF FACTOR IN CREAMERY

Much of Success or Failure Depends Upon Density of Cream—Thin Cause of Big Loss.

The density of the cream is one of the most important factors in the success or failure of a creamery. This cream is chiefly responsible for the abnormal loss of butterfat and quality of butter and hence the low price paid the patrons for butterfat.

FREE RANGE IS ESSENTIAL FOR TURKEYS

For those who are favorably situated for raising turkeys, a more profitable side line can hardly be found. Given plenty of range where the turkeys can find grasshoppers and other insects, green vegetation, the seeds of weeds and grasses, waste grain, acorns and nuts of various kinds, the cost of raising them is very small and the profits large. Grain and stock farms are particularly well adapted to turkey raising, and it is on such farms that most of the turkeys are found. Little has ever been done in the way of raising turkeys in confinement, and where it has been tried the results have been discouraging. Plenty of range is essential to success in turkey raising.

Turkeys for Breeding. In selecting turkeys for breeding, the most important factors to be considered are vigor, size, shape, bone, early maturity and color of plumage. Fifteen turkey hens can safely be mated to a vigorous tom. If twenty-

they less enough should be allowed to take all the poult hatched. They can be given a few eggs from the incubator or from under the chicken and allowed to hatch the poult themselves, or at night a newly hatched poult can be slipped under each turkey hen that is to be given a brood of poult and by morning she will be glad to take them.

Lies are a great annoyance to sitting hens and are one of the worst enemies of young poult. Dust the hen thoroughly with some good lice powder before she is placed on the nest and once a week thereafter while she is sitting.

Poult in Open. If the weather is warm and dry no shelter is required, as the poult do better in the open. Should it be rainy, however, they need to be protected, for nothing is more injurious than for them to become wet and chilled. The most satisfactory plan is to confine the mother turkey to a coop in a field

RAISING TURKEYS ON MASSACHUSETTS FARM.

five or thirty hens be kept, two toms should not be allowed to run with them at the same time, but one should be confined one day and the other the next. When two toms are allowed to run together during the mating season, they fight badly, and the stronger does practically all of the mating.

Turkey hens are wont to "steal" their nests in hidden places. Confine the hens early some morning soon after they have come down from roost, and let them out late in the afternoon. Those that are laying will then head for their nests in order to lay the eggs they have been holding. You can then gather the eggs and set them to suit your plans.

Turkey hens, chicken hens and incubators are commonly used to incubate turkey eggs. About a week before the poult are due to hatch, tur-

where the poult can run in and out and find green grass, green vegetation and other food. The coop should be moved to fresh ground every day.

In proper feeding and close confinement cause many failures in turkey raising. Given free range on the average farm, the poult can easily pick up their own living. If there is little or no feed outside the coop, for the poult to pick up, they should be fed about five times a day, feeding only a small quantity at a time. A good feed for the first few days is stale bread soaked in milk and squeezed dry. Corn-bread crumbs and clabbered milk or cottage cheese is also quite often fed with excellent results. Green feed and grit should be on hand at all times. As the poult grow older, the ration should gradually be changed to grain.

RIGHT PROPORTIONS OF FEED

Professor Kempster of Missouri Agricultural College Gives Rations for Winter Feeding.

Hens cannot lay consistently unless they have the right foods in the right proportions. H. L. Kempster, associate professor of poultry husbandry in the Missouri College of Agriculture, gives the following rations for winter feeding:

(1) Scratch feed: One part wheat, two parts corn.
Mash (ground feed): One part bran, one part middlings (shorts), one part cornmeal, one part commercial beef scrap.

(2) Scratch feed: Two parts corn one part wheat.
Mash: Ground oats, buttermilk or sour milk as a drink.

The parts in the rations are given by weight and not by volume. Other factors are met in egg production, and it may be that proper feeding will not produce desired results. However, desired results cannot be obtained without proper feeding. The ration is one of the important factors in egg production which can be controlled. Certainly the man who feeds for egg production will receive more eggs in a year than the man who follows an systematic feeding plan. Mr. Kempster has written "Feeding for Egg Production," circular No. 76, which may be had by application to the College of Agriculture, Columbia.

FRESH AIR VERY IMPORTANT

Make Sure That It Comes in Way Not to Cause Draft or Roasting Fowls—Keep House Open.

Always be sure that there is chance for some fresh air to get into the house at night and be sure that it comes in a way which will not cause a draft on the roosting fowls. Until it gets extremely cold do not close the house tightly.

PROPER TIME FOR HATCHING

Larger Breeds Should Be Started in January, February and March—Lighter Breeds Later.

Plumton, Rhode Island Reds, Wyandottes, Game hens and Sussex may be hatched in January, February and March. The Leghorns, Anas, Minorcas, Seelies and Andalusians may be hatched in March and April.

HEALTH OF POULTRY FLOCKS

Some Fundamental Principles for Poultryman to Observe—Cleanliness of Big Importance.

A few fundamental principles will serve the poultryman to keep his flock in health if these rules are observed. They are as follows: Good clean quarters, thoroughly disinfected at reasonable intervals, grains free from mold, feed in clean litter or on clean floors.

Plenty of fresh water placed in open dishes that are frequently disinfected. Plenty of fresh air at all times and a house for protection which does not permit of any drafts.

A constant supply of grit, oyster shells and charcoal and the regular ration of green feeds such as vegetables or sprouted oats. A supply of protein in the shape of animal feed such as milk, beef scraps or green cut bone.

SPROUT OATS FOR CHICKENS

Placed in Trays, With Net Bottoms, They Are Ready for Feeding in About Five Days.

A quart of oats is soaked in a pail of water overnight and the surplus water poured off next morning. The oats are then washed three times with clear water or running water and sun-dried or spread on a quarter inch deep on shallow trays. These trays, which have wire mosquito netting bottoms, are placed in a warm room and the oats kept damp. In about five days they are ready for feeding and make an excellent midday food for young chicks or mature fowls. About a cubic inch a day of sprouted oats is sufficient for a hen and half the amount for a chick.—Clemson College Bulletin.

MISTAKE IN FEEDING FOWLS

Giving Hens Red Pepper and Hot Condiments to Produce Eggs Is Like Whipping Tired Horse.

Some, yes many, make the mistake of feeding their hens red pepper and other hot condiments to induce winter laying.

The practice is generally bad, the whipping a tired horse to make him pull or run fast when he is weak or tired or hungry and needs to rest to get the stimulating effects of good feed rather than a whip.

ERLANGER HARDWARE CO

THE STORE THAT SAVES YOU MONEY.

General Hardware and its Kindred Lines.

Will act as Agent for Rental or Sale of Real Estate.

That the Burlington and Florence turnpike has not gone to pieces this winter is a fact that is a very great annoyance to those who have been knocking the road ever since the day the fiscal court decided to buy the road and reconstruct it. But after all the road is proving that it is the best constructed road ever built in the county, and the way it is standing up under the heavy traffic to which it is subjected is a most agreeable surprise to the members of the fiscal court. The most serious objection to the road made so far is that it was built that people of Covington can come to this part of the county in their automobiles. It is fair to presume that a person who believes that believes also that Covington and Kenton county are making a concrete road of the Lexington Pike in order that Covington motorists can reach the Burlington and Florence pike in comfort. Selfishness is a perfect hoodwink in many instances, and the person who, in his paroxysm of selfishness, makes the statement above referred to is too blind to be significant to learn that Covington and Kenton county are building from Covington to the Boone county line a very expensive road on which there will be a thousand miles of Boone county travel to every ten miles of Kenton county travel on the Burlington and Florence pike. For putting a person in a ludicrous position nothing excels selfishness.

The session of the U. S. Senate that closed last week was the first of the kind in many years which was not called upon to confirm a cabinet nomination. The traditional purpose of calling the Senate together for the short session, customary after each presidential inauguration, has been to act on the nomination of cabinet officials for the new administration. President Wilson decided, however, that all the members of his cabinet family could be retained without the formality of a re-nomination.

It has come to this in Kentucky: If you doubt your Governor, your Governor in his very act and suggestion his heinousness raise the howl "you're opposing the Administration." A considerable element of people in Kentucky have the habit of doing their own thinking and they will continue so to do regardless of the criticism of the trailers of a Governor or any other citizen of the State, and it is time some people were learning this.

In another column is published a very interesting letter from Florence, Montana, the writer of which like nearly all others who cast their lots in a new country, sees all the advantages and none of the faults that may exist there. According to the letter here referred to Montana is little short of an agricultural paradise, but it is feared its author has overlooked disadvantages that will ultimately appear to him.

The Admission eight-hour railroad law has been held constitutional and valid in all respects by the Supreme Court of the United States. The decision makes eight hours the standard of a day's work and wages for men in operations of trains, and legalizes the wage increases which went into tentative effect on the passage of the law.

The czar had to abdicate. If the official bosses in all the European powers that are engaged in the war were to abdicate and the war turned over to the people it would be closed out in a few weeks, and the men would get home in time to replenish their larders by cultivating crops this year.

Germany is playing into the hands of the allies when she sinks American ships. Instead of making enemies it stands the Kaiser in hand to keep peace with those countries not already at war with him, as he now has more on his hands than he can attend to satisfactorily to himself.

The loose leaf tobacco warehouses have about concluded their sales for this season, and at all of them good prices have been the rule, and more growers than heretofore will be found delivering their crops to them when they open again for business.

It looks very much like the bill the tax commission reported to the special session of the legislature will become a law. Of course it will be amended some. The only way to ascertain it merits no demerits is to try it out.

The month of March has borrowed no weather to speak of consequently it owes no coming month anything to be sprung on the country in the next few months.

As the days pass the prospects for war increase, and the indications are that the President will issue a hurry call for the convening of Congress.

The postponement of the railroad strike means that it is off.

Wilson Has Power to Proclaim "State of War" Officials Hold.

Washington, March 15. When the announcement of the ruthless destruction of three unarmed American merchant ships by submarines, it was officially admitted here tonight that virtually a state of war exists between the United States and Germany.

Technical details of the status of the United States in position of armed neutrality. Whether this shall be changed before April is the date fixed for the war-making branch of the Government, President Wilson did not decide.

On the President is contentment, it is a call for an immediate session of Congress to hear in address asking for authorization of aggressive measures against the submarine menace. Already American ships are being armed to defend themselves; the next move must be to send warships with their topmost gunboats and clear the transatlantic lanes.

Some of the highest officials of the Government held that the Executive has the power to declare that a state of war exists and to proceed with aggressive steps heading the assembly of Congress. There is no indication, however, that the President will follow that course.

Of the three ships destroyed, two of them were unladen and home-bound, and all were American built. American-owned and -operated vessels, however, are being dispatched to the safety of those on board, and that some of the members of the crew have been lost.

Today's developments brought the Government face to face with the problem of formulating a definite policy for the nation in case the United States actually enters the war. This possibility was mentioned by the President in his inaugural address March 4.

All of the conditions outlined by the President in his message, announcing the diplomatic relations with Germany as leading to a state of armed neutrality have now been fulfilled. The "over-act" described here has actually come in fact it had not been committed when the President went before Congress again.

Since then he has established a state of armed neutrality with the specific authority of Congress.

President Wilson was on a tour of the United States, and he has given all available facts of the situation to the public. He has given all available facts of the situation to the public. He has given all available facts of the situation to the public.

Several hours later reports came from Consul Frost at Queenstown and Consul General Skinner at London telling of the sinking of the City of Memphis, the Vigilante and the Illinois. These dispatches confirmed pass reports, but added no details.

International lawyers and constitutional experts here showed no hesitancy tonight in saying that President Wilson has full authority to interpret this as an act of war, and announce that an actual state of war exists by reason of Germany's flagrant assault on American shipping.

Such action would be subject to the approval of Congress. Despite the unbroken sinking of the passenger liners, like the California and the Lancia, the jeopardizing of Americans on enemy ships, and the sinking of other American ships, the House and the Senate, since the unrestricted warfare began, some officials inspired by the President's announced reluctance to believe that Germany would carry through her threat.

German sea warfare may be fairly to interpret this as an act of war, and announce that an actual state of war exists by reason of Germany's flagrant assault on American shipping.

With the certainty that this country will become involved in hostilities with Germany, even if only for the keeping open of the door to Europe, officials are scanning the news from the various war fronts with the closest scrutiny. A direct, intimate interest has been developed rather academic attention of days when America seemed far distant and isolated. An advance on the west front in Mesopotamia is now being hailed with eagerness borne of a realization that it may have a direct effect on America's future history.

The kaleidoscopic developments of the last few weeks' history has been followed most keenly. The apparent crumbling of Turkish power in Mesopotamia and Persia as shown by the capture of Van today by the Russians, following the fall of Bagdad to the British, the unexpected sweeping forward of both British and French in a wide swath in the west from the pro-war swath revolution in Russia, threats of internal trouble in France, and China's avowal of relations have all served to convince many observers that the beginning of the end is near.

The German retreat in France is not yet accepted as more than a strategic move. The Russian revolution, too, is admitted to hold possibilities of counter-revolution. The military and naval successes which have been won in some quarters (it is held) could not be taken as a sign of strength for another great offensive.

Consul Frost at Queenstown reported to the state Department tonight the sinking by a German submarine of the American steamer City of Memphis, saving 300,000, survivors had been picked up and that an Admiralty vessel is searching for nine missing.

The Vice President.

Thomas R. Marshall, whom the American people have chosen to be their President in case of any vacancy in the office in the next four years, is an American patriot, and the words he speaks have a sense and sanity that are urgently needed.

"We can't get on with a portion of our people loving another country better than they love the United States, and a wide portion hating another country more than they love the United States. We can't get along with these factions, the Germans, the Irish, and the anti-British. That makes guerrillas out of us."

These men who are doing their part to make Germany and "us" because they hate England more than they love America have far less excuse than those who are doing similar part because they love Germany more than they love America. There will be pardon for the German-American who hamstrings his adopted country for love of Germany before there can be pardon for the non-German who hamstrings for hatred or for England. To these factions there seems peril that a third will be added—those who love their own interests more than they love the United States, and to them the Vice President says:

"We must drop internal strife and party politics. We must drop the fight between capital and labor; we must drop our personal convictions of the war in Europe; if we are to hope to survive this crisis, we must have 100,000,000 horses now. The people selected President Wilson, and the time is here when we must stand by him."

GOOD BREEDING.

It shows good breeding to respect what is going on in the world, and to be a gentleman or a lady. They are the real heroes of life. Their disappointment makes them grand, for in their discomfiture their spirit is as gentle as a summer sunset. But with some others it is not so. They rage at a little mishap. They denounce everything and everybody in their disappointment. They are simply ill bred. It is not so with a gentleman or a lady. They accept a reverse as a matter of course and make a virtue out of a disappointment. —Columbus Ohio State Journal.

"HIGBEE of HARVARD"

A Comedy in Three Acts will Be Presented by

Junior Class of the Boone High School

at the School House, Bellevue, Ky.,

Saturday, March 24, 1917

At 8:00 O'Clock P. M.,

Cast of Characters and Synopsis of Play:

Watson W. Higbee, from Montana.....Edwin Duncan
A good fellow with millions, who knows neither fear nor grammar.
Hon. V. Withrow.....William Finn
A blue-blooded ex-Senator with a tall family tree and a short bank account.
Lorin Higbee, son of Watson.....Walter Brown
Champion athlete of Harvard. In love with Madge.
Theodore Dalrymple, called "Ted".....Kirtley Cropper
Worked his way through Harvard. In love with Nancy.
Higgins, the butler.....Virgil Gaines
Nancy Withrow, the Senator's daughter.....Gwendolyn Goodridge
An up-to-date, level-headed girl.
Madge Cummins, from Montana.....Maud Tanner
A quiet sort with temper when needed.

Mrs. Ballou.....Sarah Ryle
The Senator's sister from New York, who meets her second affinity at the eleventh hour.

Mrs. Malvina Meddigrav, originally from Montana.....Agnes Carver
Must always be shown.

Time—the present; place—Boston and Montana.

Act 1. Lawn at the Withrow home. Mrs. Ballou gives some orders. "A Grizzly Bear." Planning a marriage. How Watson led the German. Higgins is shocked. Ted and Nan. My father. Mr. Higbee, Seize.

Act 2. Drawing room at Withrow home, evening of same day. Madge and Watson disagree. How Watson tried to sing. Malvina gets mad. "He fired me out." Two ways of doing things. Trouble. Fathers are deceived. Father and son. The quarrel. The climax. Kicked out. Higgins butts in and gets fired. "Good bye"

Act 3. A mining camp in Montana five months later. A hard luck crowd. Tomorrow is Thanksgiving Day and no turkey. An unexpected visitor. Interesting news. A dream fulfilled. More visitors. A couple of would-be "stern parents." Still more visitors. Malvina sings with dire results. Everybody in a maze. Higgins gets desperate. "I'll blow that confounded mine." An explosion. A fortune at last. Watson makes a match and gets matched himself. Finale.

Admission, 25c; children under 12, 15c; reserved seats, 35c

County News Items

Interesting Facts Gathered During the Week by Our Correspondents.

GUNPOWDER.

M. F. Utz and family spent last Thursday at H. H. Clor's. Most of the farmers who handle sheep are having good luck with their lambs.
H. H. Clor and wife and R. E. Tanner and wife broke bread with this scribble last Sunday.

EASTER DISPLAY

Saturday, March 24.

Newest Millinery.

THE RIGHT PLACE TO BUY

Quality--Styles--Prices.

Zula Bales,

Rising Sun, Ind.

The milk strike that has been on for the last two months is off. Farmers, having come to terms with the Producers' Association, the first of the week. The producers gained their point after a fight that lasted several weeks longer than was anticipated when the embargo was declared. "Stick, brother, stick" won the day.

On the night of Dec. 24th a Ford automobile belonging to Dr. B. K. Menefee was stolen from the front of a moving picture show in Lexington. The machine was located in a stable at Williamsport, last Monday by the doctor's brother, A. Y. Menefee. Two men were arrested after the machine was recovered.

Asa McMillan shipped six market hogs yesterday. The hogs were nice 200 pound hogs and the big butchers desire.

GIVE EXHIBITION OF LOYALTY

West Indian Possessions of Britain and France Have Sent Their Sons to the War.

None of these lands of the Lesser Antilles has prospered quite as much as Cuba, Porto Rico and Panama during the last 15 years, owing to the peculiar relations of these three countries to the United States. But they have prospered far more, they have infinitely better and juster governments, than most of the revolution-ridden "republics" that face on the Caribbean and the Mexican gulf; from the standpoint of life, liberty and property, they are beyond comparison better living places for rich men and especially for poor men.

They reflect honor on the nations to which they belong; the public servants are upright, fearless and efficient. The English colonies regard England, and the French colonies France, with devoted loyalty—a loyalty which in each country has been well earned by the mother country. Everywhere we found that the young white men had thronged to the support of the mother country in the war—almost every family we met had kinsmen at the front.

Even more striking was the genuine loyalty of the colored men and black men to the flags under which they had found justice. Thousands had volunteered from the British colonies. Martinique and Guadeloupe were under conscription, like France; and these two islands, with less than half a million population, had sent 15,000 soldiers across the seas—Theodore Roosevelt in Scribner's Magazine.

EASY TO HANDLE BIG LOADS

Attachment Devised for Trucks Makes the Work of the Wheeler 50 Per Cent Easier.

In order to make it possible for a workman to manage a heavily loaded two-wheeled hand truck with less physical exertion than is ordinarily required an attachment has been devised which holds the cargo in place, allowing the man to tilted forward and shift the center of gravity is over the wheel axle.

When wheeling on level flooring a man is thus relieved of the weight of the article he is moving; his concern is merely to maintain its balance while propelling the truck.

The device consists of an anchor and chain attachment, hinged in a tube, which is attached beneath a truck. By tipping the latter forward against the object it is to carry, the chain is drawn out to the required length, locked by dropping one of the links into a narrow slot in the neck of the tube and the hook engaged at any convenient point.

Sixteen Records at a Time.

Designed especially for the use of retail dealers, a compact machine that perforates music rolls for use in player pianos is being introduced. The apparatus is described in Popular Mechanics. It is capable of making from one to sixteen records at a time from sheet music, and will also turn out copies of any standard roll. Its operation is said to be so simple that satisfactory work can be done by persons who are not musicians. The particular advantage of the machine seems to be that it enables a small dealer to fill his customers' orders promptly without having to carry a large, expensive stock. It also facilitates the conveniences that confront patrons when special orders have to be mailed to a factory before their wants can be supplied. Since 16 sheets can be perforated simultaneously, a dealer in making a roll to order has an opportunity to add 15 records to his stock with no expense other than the bare cost of the paper and spools.

Sure It Was That One.

In the course of his weekly sermonette to children Sunday, Dr. H. C. Clippinger, pastor of Wall Street Methodist Episcopal church, Jeffersonville, told a story of a little girl who had two nickels, one for herself and one to put in the collection. The child lost one of the nickels.

"Which one do you suppose she lost?" asked the minister of the children sitting in the front rows. A very "human" little boy up on the front seat knew the answer: "The missionary nickel was lost."

And that is just the one the little girl in the story decided was the lost nickel.—Indianapolis News.

Full Record of Earthquakes.

Systematic earthquake recording has been a part of the work of the United States weather bureau since December, 1914, and it is shown that the United States has 150 earthquakes in 1915, three or four of them severe. Shocks noted without instruments are reported from the bureau's 200 regular and many cooperative stations. The bureau has seismographs at Washington and at Northfield, Vt., and has the records of instruments of 18 other institutions that extend from Panama to Alaska and from Hawaii to Porto Rico.

New York City as a State.

Col. J. B. Bellinger wants the city of New York elevated into a new state. To that end he would have annexed to it adjacent slices of Connecticut and New Jersey. In his opinion elevation of the city into a state would bring power to solve complicated problems, such as transportation and food distribution. Should his idea be adopted the new state would possess the unique distinction of being the only state in the Union without an agricultural area or farming population.

POULTRY

WINTER TONIC FOR POULTRY

Beets, Silage and Alfalfa Produce Satisfactory Results—Cabbage Also Is Excellent.

Succulent feed should be given to chickens in winter, because of its value as a tonic, asserts R. M. Sherwood, acting head of the department of poultry husbandry in the Kansas state agricultural college.

"Beets, silage, and alfalfa may be obtained on most farms," said Mr. Sherwood. "All of them are soaked in our talk are of great value. The milk softens the leaves, and also furnishes valuable food nutrients. It is well for the farmer to plant winter wheat or rye near his chicken house."

Cabbage is excellent as a green feed. In the opinion of Mr. Sherwood, some persons feed turnips, potatoes, and even apples. Sprouted oats are often used for succulence, but it is not desirable that the sprouting be done in the house because of the offensive odor given off. This necessitates the use of a special sprouter with heater, and adds materially to the cost of the feed.

REPAIRS FOR THE INCUBATOR

Time to Get Machine Into Working Order—Removable Parts Should Be Thoroughly Cleaned.

(By C. E. BROWN, Poultryman, Northwest Experiment Station)

In a few days many incubators will be in operation. Whether the chicks are to be hatched early in March or not until the middle of April, it's time to look after repairs and to get the machine—in shape. Repairs for the incubator may not be readily found.

If the incubator was neglected at the close of last season, it should be thoroughly cleaned. Removable parts should be taken out and washed and the entire machine should be thoroughly cleaned. A 10 per cent solution of formalin should be used as a disinfectant in washing the interior of the machine.

PREPARE GEESSE FOR MARKET

Use Slender-Bladed Sharp Knife, Making Cut Well Back in Order to Induce Free Bleeding.

When the birds are thoroughly fat and plump, geese may be killed in the following manner: Hang by the feet, back to the wall and insert a long slender-bladed, sharp knife into the roof of the mouth. The cut should be made well back in order to induce free bleeding. It is difficult to dry-pick a fat bird without tearing the skin. A better way is to loosen the feathers by scalding or steaming.

A good way is to make a small platform of laths and place it in the bottom of a barrel so that the platform will be about 4 inches above the water. Pour into the barrel boiling water until it comes within about an inch of the platform. Lay the geese on the platform, cover the barrel tightly with a heavy piece of carpet or cloth and allow it to steam for five or six minutes.

Before placing the bird in the barrel, tie a stout string to its feet, leaving one end hanging outside by which

Well-Bred Toulouse Goose.

The bird may be drawn out and suspended at a convenient height for plucking. Have a large bag or barrel near into which the feathers may be placed as they are plucked. Care must be taken not to allow the bird to be soiled by blood or dirt as they will lose their value.

After the bird is thoroughly cleaned, dip in cold water and allow it to remain two or three minutes. Leave feathers on about half the neck neck to the head and also on the wings above the first joint. Geese should be plucked with the hands on and undrawn. Do not lay one bird upon another when plucked but wrap each in a clean cloth or paper, place it in its back and allow it to cool in that form. Never hang a bird up by the feet or head to cool as this destroys their plump appearance.

CRACKED CORN IS CHEAPEST

Fowls Get Enough Benefit From Picking Up Small Pieces to More Than Pay for Cracking.

Cracked corn is cheaper as a chicken feed than is whole corn. That is, the chickens will get enough benefit over whole corn, from the exercise required to fill their crops with an excessive amount of cracked corn, to more than pay for the cracking. A slave should be used to sift the fine portion of the corn for making mush. The poultry breeder should not try to save by limiting the amount of food, but by avoiding waste of food.

Kill off the new and mice which destroy an enormous amount of grain. Feed in clean litter. If there is any mash left after feeding scrape it into a bucket for the next day's feed.

Educate Farmers.

It is coming to be recognized as a most obvious fact that if we as a people are to again put our country on an equitable footing with the rest of the world, we must educate more farmers. Not educate more farmers for professions, but educate more boys for farmers.

From the ineptness of the public school system, the first step toward the entire trend of education has been away from the farm and toward the professions. Even the manual training schools have tended to swell the ranks of the mechanical trades at the expense of the farms.

No nation can achieve permanent prosperity without a great and prosperous farming class. When the farm decays the nation deteriorates. Our farms are the very life and heart of our country.

Some, though, may ask how we are to educate more farmers.

Very simple. Make every free school in the land primarily an agricultural school and a literary school. A seven year matter, before leaving are not the growing necessity of existence. Bread and meat are. Educate the youth of the land first toward that which is most vitally necessary to our national life, and when this is accomplished, if there be leisure and means for adding the skills, let them be added.

Since out of every 100 high school pupils on emerging from that school enter the ranks of the toilers, in some department or other, if in this education the farm has not been made attractive to them, but they have been given a thorough and practical knowledge of its workings, then a large per cent of them will as a matter of course choose that as their occupation in life.

When war broke out between the allies and the central powers the world stood amazed at the wonderful perfection of the German military machine. But the cause behind it was as simple as A. B. C. Every German youth had been educated and trained as a soldier first of all—after that for a vocation.

But in time war will cease. The arts of peace will again demand the attention and energies of the world, and among them there is none to compare with the great art of coming from Mother Earth her golden harvests.

But, you ask, if all of the boys are educated to be farmers, what of the professions and the trades? There will always be some who, by natural fitness, will gravitate to the professions, enough to keep their ranks recruited. As a matter of fact, these same professions could spare half of their present members and not suffer in the least.

Educate farmers! The farms are suffering for them, and the professions and trades are overburdened with them.

Co-operative Association.

Delegates representing the milk producers of nine counties of Northern Kentucky and Southern Ohio and Indiana, met at the Covington Industrial club last Thursday and organized the Tri-State Milk Producers' Co-operative association.

The 30 men who attended the meeting elected as president H. B. Berning of Mt. Healthy, Hamilton county, Ohio. The organization will be incorporated with a capital stock of \$50,000 and the value of the stock will be \$10 a share.

Each member will be permitted to take out as many shares of stock as half the number of cows he owns.

To become a member each producer must submit one gallon of milk for each cow and the price of the milk will be paid by the producer into the co-operative association.

The organization will work in co-operation with the Queen City Milk Producers Association.

The retail price of milk will not be increased over the present price. Besides dealing in milk the organization will buy, sell and exchange farm products, live stock and feed.

There will be no paid promoters or stock solicitors and all subscriptions will be paid by members directly into the treasury. The organization will pay six per cent dividends and the balance will be prorated among members according to amount of milk sold.

Fiscal Courts "Hog Tied."

Frankfort, March 16.—The Court of Appeals today "hog tied" the fiscal courts that designate the apportionment of road funds in anticipation of a road bond issue and then attempt to do otherwise dispose of the money voted by the people on the faith of its order.

The Metairie Fiscal Court in February, 1916, a month before the people voted a bond issue of \$30,000, ordered the money spent in four inter-county seat highways and applied for State aid. After the election the Fiscal Court entered another order distributing the money among the various districts, and M. O. Scott secured an injunction requiring the Fiscal Court to stand by its February order.

The Court of Appeals, in an opinion written by Commissioner Clay, affirmed the Circuit Court and said, "when a fiscal court prior to an election on a bond issue, names a route to be constructed with the proceeds of such issue and the bond issue is carried on faith of such order, the Fiscal Court is without authority thereafter to repeal or amend the order and thereby defeat the purpose for which the bonds were voted. The same rule applies if the resolution prior to the election fixed the order in which roads are to be constructed."

The World is But a Bubble.

Friend Will—You ask how the world is using me? I have no complaint to make, got plenty to eat and having a clear conscience get plenty of sleep.

I have passed my three score and ten, and have nearly three years start on the other ten and have good health.

But the world is in a very bad fix; it has gone money mad and is using every conceivable means and invention to murder their fellowman. The oldest Christian countries in the world are now the greatest murderers. But there have been murderers and wars ever since the world was made.

When there were but four people on the earth there was one murderer, and as the earth became populated wars commenced and God's children lost all of their moral sense and became so wicked that he had to destroy all of them except one family and commence again. All that was caused by eating one apple and indications are that it was green.

Noah gave us a good start again but the prohibition people think he ought not to have drunk the wine. But that apple still causes the people to have wars and some very cruel ones. Then came Jesus Christ and his new command to go into all the world and preach the gospel to everyone. But there are going to be wars and rumors of wars. The Christian commenced to invent better instruments for war and murder, and they made gunpowder and guns and sold them to the Chinese to shoot missionaries, and so it will be as long as time lasts.

But if every one would use his moral sense that Nature and Nature's God has endowed him with and live up to its teachings, this earth would be a Heaven.

Hoping you are enjoying good health and prosperity, I remain, Yours Truly, T. J. McNEAL.

SHEEP RAISING.

Ohio Was Once First in This Important Industry.

(Milwaukee Journal.) America needs nearly 600,000,000 pounds of wool annually for domestic consumption. Over half of this supply must be bought abroad despite the fact that acres of acres of American soil are well adapted to sheep and wool raising. There are 13,000,000 sheep in the United States now, but in 1900, in the face of immense growth in wool requirements and a mounting price during the war, we should have 150,000,000 sheep instead of less than 30,000,000.

Texas had 8,000,000 sheep in 1883, but now reports only 2,500,000. Ohio had nearly 8,000,000 sheep in 1890, and was the first sheep state in the union, but now it has only 3,000,000. Almost every state shows a decided decline in wool production, largely because of the belief of farmers that high-priced land does not yield a profit. The South alone could raise 30,000,000 sheep. Texas, if it were fenced could supply all the United States with wool. The worn-out lands of New England would support easily scores of millions of sheep and with great increase in the fertility of the soil. Waste lands of upper Wisconsin, Michigan and Minnesota and other Northern States would feed tens of millions of sheep. With wool prices at unprecedented heights, farmers should turn to sheep as never before.

John W. Ryle, who resides down on Gunpowder creek, shipped 17 Jersey hogs to the Cincinnati market by Kirkpatrick's truck Tuesday. They averaged 150 lbs. and brought 1 1/2 cents a pound. Mr. Ryle left home Tuesday morning, went to the city, sold his hogs, got his check for the hogs and was back home in Burlington by 1:30 p. m.

Hal McGregor

Record (2) 2:26 1/2, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Hamilton county, Ky.

Hal McGregor (2) 2:26 1/2 by Hal Dillard 2:0 1/2, 1st dam by Wilstar 2:17 1/2; 2nd dam by Oscar Williams 2:12 1/2; 3rd dam by Ohio Volunteer 2:20.

The sire of Hal Dillard is Brown Hal 2:12 1/2 (world's record when made); also the sire of Star Pointer 1:59 1/2, the first horse to beat 2:00.

He not mislead a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:03 1/2, Frankie Dillard 2:03 1/2, H. B. 2:05 1/2, Hal C. 2:05 1/2, Hal Leaf 2:07 1/2, Hal Clipper 2:07 1/2, Cinnamon 2:07 1/2, Dillard Union 2:07 1/2, Buttermilk 2:08 1/2, Cambril 2:08 1/2, Young Dillard 2:08 1/2, Elroy D. 2:10 1/2, Roup Hal 2:10 1/2, total 9 standard times.

Sons of Hal Dillard sired: Dan Boy 2:05 1/2, Hal B. Jr. 2:05 1/2, Raven 2:03 1/2, Hattamont 2:05 1/2, Hal R. 2:05 1/2, Hal McKinney 2:06 1/2, Edie Dillard 2:06 1/2, Hallie Loo 2:07 1/2, Hal Grey 2:08, Halhook M. 2:09 1/2, Vera B. 2:07 1/2, Hal Grey 2:08, Hallock M. 2:09 1/2, Dillard 2:09 1/2, Della H. 2:10, Jerry Dillard 2:09 1/2, Hal D. 2:10, Dillard Onward 2:10 1/2, Helen B. 2:10 1/2.

Hal McGregor with only 70 days track work last year trotted one eighth in 34 seconds, 4 in 31 second, and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be brot by June 1st as horse gues in training.

Cure will be taken to prevent accidents but I will not be responsible for any that may occur. Will farm a few good mares.

W. B. ARNOLD, Petersburg, Ky., R. D. 1.

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickel steel construction—deep channel pressed steel frame—every supporting part a forging or pressed steel—Repub-Torben Internal Gear Drive—heat treated, drop forged I-Beam—unquestionably guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750
1 1/2 Ton Truck \$1375. 3 Ton Truck \$ 2650

WASTE OF GARDEN STUFF.

Two factors in the high cost of fruit and vegetables have received but little notice from the consuming public. I refer to the questions of grading fruit and vegetables and the licensing of hucksters. Fruit and vegetables are graded by selecting the finest specimens, and then they are sold at a price to cover the entire crop, while the greater portion produced is wasted. We pay as much for a dozen apples as half a bushel of wholesome cooking apples should cost, says a writer in New York Sun. If fruit and vegetables were sorted sufficiently to cull out the partly decayed and badly bruised portions, these to be sold as such, a vast amount of stuff would come on the market at a moderate price, and at the same time fancy fruit could be sold by the dozen to those in quest of that grade. Nearly all cities issue hucksters' licenses, and the huckster, by working in unison with the storekeepers, create a monopoly inside the city limits. The producer is kept from access to the city with his load of fruit and vegetables unless he takes out a license, and this would not be profitable to the average producer. The result is to allow the hucksters and other dealers to exact from the consumer as high a price as possible and at the same time set the price to the producer. Public markets should be provided in cities and the privileges of the market limited to the producer only.

The telephone rang. You interrupted your work to answer. You courteously stated that the party wanted was not in. Your answer for your courtesy and the interruption of your work was not even a grunt. It was the click of the other party's receiver. He didn't have to be courteous. He was anonymous, says St. Paul Pioneer Press. Having the heart of a boor, he was not courteous for courtesy's sake but merely for the sake of being tolerated by society. Or perhaps he believed he was talking to a subordinate personage on whose good will he was not dependent for favor, personal or commercial. Possibly he was just too busy to be decent. Anyhow, it didn't make any difference. Under the cloak of anonymity he could be the cur that he was secretly wanted to be and nobody would know.

An official statistical report just issued by the commission of labor and appalling information that in the year 1916 the accidents incident to the industries of the state claimed no fewer than 251,488 victims, of whom 2,387 died of their injuries. This means that an average of eight lives a day were sacrificed, the monthly average being 215 killed and 20,967 injured, says Philadelphia Public Ledger. Military operation in which the United States has been engaged since the Civil war has furnished results so bloody and tragic as this. The mere statement of the facts ought to hasten the coming of that era of safety for industrial workers until the attainment of which our civilization is impeded and our industrial progress a sham and a delusion.

These who ascribe the origin of the theory of canals on Mars to Prof. Percival Lowell make a mistake. Professor Lowell's self-imposed task was that of developing a theory first launched by Prof. Giovanni Schiaparelli of the University of Turin, who became famous for his discoveries with relation of falling stars, the rotation of mercury, and the asteroid hypothesis, says Christian Science Monitor. Professor Lowell never claimed to have been the originator of the Martian canal theory, but he was its most active defender.

When the British "tank" cars first went into commission they were a wonder and created alarm and panic wherever they appeared on the front of battle. Nothing much has been heard of them lately. Are they like a new football formation, which can win a game or two, before the opposing team has a chance to prepare for it, but is less successful? The crowd against which it is brought forth has secured an inkling of what it is coming to.

Necessity is the mother of invention. Among the results of the shortage of supplies in Germany, it is said, is the discovery by German inventors of a way of making an efficient substitute for rubber from pitch. There are those who believe that this may turn out to be a thing of no little practical significance after the war.

Next Monday is county court day, and the Monday following circuit court will convene for a two weeks term.

Forty Years Ago Today

Items Taken From the Issue of The Recorder of March 29th, 1877.

Senator Beck denies voting for the confirmation of Fred Douglas. In 1878, 139,334 acres of land were listed for taxation in this county. John D. Lee, the Mountain Meadow murder was executed last Friday.

Lawrenceburg loses one hundred thousand dollars of trade from Boone county, Ky., by not including three miles of pike. Register.

Lawrenceburg, Indiana, is making strong efforts to secure a stove foundry.

J. M. Riddell moved to Williams-town last week.

A little son of W. S. White got one hand badly mangled in a cutting box one day last week.

Spring work has been advanced but little since March arrived.

Three hundred men on the dock at the Owen county criminal court.

Walton.—Mr. Matson is doing a thriving tobacco business here. Park Holton has purchased the residence on the farm of the late John Rogers and will move to it. The cold weather has discouraged the farmers.

Bullittsville.—Miss Sallie Watts has returned from a protracted visit in Lexington. Joshua Masters is erecting a neat frame cottage. 121 graves sold to Harvey Hinkle 120 fat sheep at five cents a pound. John Riley died last Friday.

Florence.—Burglars were busy in town Friday night, getting money and property to the value of about \$100.—Born to S. W. C. and wife a 9 pound boy. Mrs. Sep Foster, whom reported dead, is living.—Mrs. Belle Buckner and son, John, have returned from a visit to Oldham county.

Plattsburg.—More work than ever before was done on farms in February. The country are now behind with their work.—Tobacco has been selling for six to seven cents.—Died March 22, Catherine Sturgeon.

Dr. Mulcher's Views Of Food Question.

The following is quoted from a recent letter from Dr. Fred Mulcher, Director of Farm Extension work in Kentucky: "The great wave of hysteria is passing over this country concerning the food situation, and many people who have given no careful study to agriculture are urging that agricultural production be increased. Be sure to impress upon your farmers that this would be a great mistake at the present time, as sure as I live, that any increase in farm products above that produced in any normal year will be disastrous to the farmer for the following reasons: The cost of material is higher, the cost of labor is higher, and the farm products per unit will be more expensive to produce this year than ever before in the history of the country. The increase above normal will result in bringing down prices to such an extent that farmers will lose money. It would not be to the farmers of the State of Kentucky, fight for the Extension Service to take up the propaganda of increasing production above normal. Let us therefore advise conversation on the part of the farmer, because there is no danger of a famine, and if a large amount above the normal is produced, prices will be cut down to such an extent as to make the farmer worse off than he has been before."

No Cause for Food Frights.

(Philadelphia Record.) Why should there be food riots in Russia? It has been impossible for Russia to market her last three crops of wheat abroad. Ten years ago Russia was exporting 135,000,000 to 200,000,000 bushels of wheat per annum. For three years the wheat surplus has stayed at home, and the people should have been better fed than ever before, and they are supposed to have had more money to spend for food than ever before for they can't spend money for vodka, and being obliged to keep their money has been recent. Ten years ago Russia has put an embargo on Russia exports of wheat and white bread ought to have displaced black bread.

Numerous auto parties composed of strangers, were in Burlington, Sunday.

Our War Month is April.

If there is anything in April being America's war month, April, 1917, will bring us into conflict with Germany. It was on April 18 that the battle of Lexington was fought. It was on April 19 that Congress put the embargo on British trade that ushered in the war of 1812. It was on April 26 that the war with Mexico began. It was on April 11 that Sumner surrendered, and the Civil War began. It was on April 21 that we declared war on Spain.

The Critical Year War May Not End For Some Time, But Will Be Won This Year.

(New York Commercial.) After the Union forces secured control of the Mississippi River and the great Confederate drives crumpled up at Gettysburg, the Civil War was over, according to military authorities, who have written its history, but the fighting went on because the Confederates did not know that they were beaten, and the heaviest casualties in action were yet to come. In the same way it is now to be expected that this year will end, but it will be a year of prolonged resistance will not change the result. The Russian revolution has added to the uncertainty, but the world will soon know which side gave it.

Germany is evidently preparing some new move this spring. The surrender of Bapaume, Verdun and other towns almost without a struggle comes as a surprise and appears to indicate weakness which may be counteracted by shortening lines and falling back in prepared positions nearer to the great military basis in Germany. The British army is using heavier artillery, and deep reinforced trenches appear to be as useless as steel-capped forts proposed to be in the first weeks of the war. The new move is fighting in the open country behind the lines the Germans are now abandoning, which would put the British in a new tact that they are likely to welcome after two years of trench warfare.

The Entente Allies can afford to wait longer for a decision than can the Central Empires. Germany is losing her foreign trade completely, while England is improving hers. The new move is fighting in the open country behind the lines the Germans are now abandoning, which would put the British in a new tact that they are likely to welcome after two years of trench warfare.

If the German loses this war his throne will probably follow that of his cousin, the Czar of Russia. The German people will make a revolution, and the Kaiser will be driven out. The German people will make a revolution, and the Kaiser will be driven out. The German people will make a revolution, and the Kaiser will be driven out.

If the Central Powers do not win a satisfactory peace this year they will have to wait to save the Hohenzollern dynasty. The German Chancellor's promise of electoral reforms shows that the Kaiser is willing to sacrifice to save his crown. The German people cannot fail to conclude that these concessions have been promised to save off internal revolution. They conclude from this that a revolution would bring peace, because the Entente Allies would grant generous terms if part of Germany's price of peace was the exile of the Hohenzollerns.

Has Bought More Machinery. Jesse Kirkpatrick has bought a new and a fine cross-cut saw to be operated by his gasoline engine, which will expedite greatly the preparing of material he uses in the construction of buildings. He has a large lot of work to do this year and help being hard to secure he has called machinery to his assistance.

A washing rain fell here about four o'clock last Friday afternoon. It was not at all welcome.

NEW ALBANY, INDIANA.

Struck By Cyclone—Fifty Persons Killed and 200 Injured Property Damage Heavy.

Louisville, Ky., March 23.—More than fifty persons were killed and nearly 200 injured when a cyclone swept the city of New Albany, Indiana, at 4 o'clock this afternoon. Without warning, the storm, with a velocity of 50 miles an hour, struck the city and swept a path of wreckage and destruction at some places six blocks wide. Houses were crushed level with the ground or borne away bodily, and manufacturing plants crumpled. The principal damage was wrought in residential and manufacturing sections in the northern outskirts of the city. The main business center of the city was not touched.

The Gale struck the Corydon pike about two miles below the city, and after it had wrought considerable damage in the space of five or six minutes, moved southwest and entered New Albany, at about 4 o'clock. The first being one of the thickly populated residential sections. With terrific speed it tore thru the streets for a distance of three blocks, laying everything low that stood in the way. Reaching the intersection at State and Pearl streets, it turned and leaped over the city, a distance of one mile to the outskirts, where it came down again and struck the earth between Vincennes street and Charlestown road.

Here it played frightful havoc with three blocks of homes and shops along Vincennes street—before it rose again and passed away. The damage done on the Corydon pike, below New Albany, was great. It was a terrible scene, who were caught by the gale at this point. A. M. Floyd, manager of the Cumberland Telephone Co., reported that hundreds of trees were uprooted. The gale carried great force thru the air and littered over the ground in the wake of the storm as it moved in the direction of the city.

War Booms Walking Sticks. People have popular ideas of what is necessary and what is not. For instance, despite the need of rigid economy that is being London are in walking sticks. More are being made and sold and faster than before the war boom.

Before the war about two thousand persons were employed in the walking stick trade. The trade is rather small, but it is a regular boom in walking sticks. More are being made and sold and faster than before the war boom.

An Entire Family Wiped Out.

Within four days the entire family of Albert McLaughlin, coal oil dealer at Madison has been wiped out by diphtheria. His wife, 29 years old, died last Thursday; their baby, a boy, 8 months old, died Friday, and mother and child were buried in the same grave Sunday. The remaining child, William, 9 years old, died Monday.—Carrollton Democrat.

Wide Tires Make Easier Hauling.

For many years advocates of good roads have urged the use of wide tires on wagons as a means of reducing the needless wear of road surfaces. For as many years the average farmer has shown little inclination to adopt such tires. He pays taxes for the maintenance of roads and claims that they should be kept in good enough condition for him to use any width of tire he prefers. He objects to being taxed for something which he must pamper to the extent of foregoing what he regards as one of his inalienable rights to the slightest degree. His point of view is buttressed by firm convictions that it is difficult to persuade him to change it. The most convincing argument in his case is usually one that presents a prospect of financial advantage, and there is a good argument for wide tires based on their saving to the farmer. In fact, it is a better argument for such tires than their merit in protecting roads. It is based on facts ascertained by experiments made by the U. S. Office of Public Roads and Rural Engineering under the direction of E. B. McCormick, chief of its division of rural engineering.

An earth road was plowed up, graded and then rolled with a 10-ton roller weighing 450 pounds per inch of width of the rim of the wheels. The wheels were then loaded until the total weight on the wheels was 5,000 pounds, the pull in pounds required to haul it along the road was ascertained. The wagon was equipped with 18, 2, 3, 4, 5 and 6 inch tires, and the weight of the loaded wagon was 885, 885, 885 and 203 pounds per inch width of the tire. These different widths. It will be noticed that with 18 and 2 inch tires the wheels produced greater loads pressed on the road than did the 3, 4, 5 and 6 inch tires. It is self-evident that such tires will cut up a new road somewhat and alter the road undesirable. After each test and before the beginning of the next, the road was re-rolled, graded and again rolled so as to have the conditions at the beginning of each test as uniform as possible with an earth road. The people selected for comparison were those in which moisture and the weather conditions were identical.

The results of all these tests show that the pull of a gross load when 18 inch tires are used, 32 pounds with 2 inch tires, 72 pounds with 3 inch, 69 pounds with 4 inch and 62 pounds with 5 inch. With 6 inch tires the pull increases somewhat above that with 5 inch tires, indicating that for such wagon and load there is no advantage in increasing the width of tire above five inches. From these figures it will be seen that a horse must exert itself about 25 per cent more to pull the same load with 18 inch tires than with 3 inch tires, and over 10 per cent more with 6 inch tires. Any such steady, need less strain on the strength of horse is available by substituting wide tires for narrow tires. The farmer's assets which he will be quick to see when pointed out.

The width of tires recommended by the Department of Agriculture is as follows: One horse wagon weighing 2,000 pounds loaded 24 inches; light two horse wagon weighing 3,500 pounds loaded, 28 inches; medium 2-horse wagon weighing 4,500 pounds loaded, 3 inches; standard two horse wagon weighing 6,300 pounds, 4 inches; heavy two horse wagon weighing 7,000 pounds, loaded, 5 inches.

With such tires not only will the farmer work his horses to the best advantage but he will also reduce the amount of money that must be spent to keep the roads in a condition for easy use. He will be a gainer in every way. Like the heavier loads with the same team, he can haul the same load with less exertion than with narrow tires, and even though the wide-tired wagon goes over the earth road it will roll it instead of rutting it.

On Friday last a party from Cincinnati bought a big lot of oranges up by boat from Cincinnati and sold them out to Mayville for \$1.00 per box, a cut of \$1.00 from the regular price of \$2.00. The fellows who sold them were cutting the high cost of living, so they said, but when they purchased oranges on the spot they found the top layer of oranges and the rest so badly frozen that they could not be used. They had paid cash for them and the sick citizens got away with the money. About 40 boxes were sold.—Flourish Times-Democrat.

A Gully Washer. The rain that fell here between three and four o'clock last Friday afternoon was a regular gully washer. The foot bridge across the creek immediately south of town was carried away. The foot bridge near the creamery

GUARDS CALLED OUT.

First Duty Will Be to Guard U. S. Property, Munitions Plants, Shipyards, Etc.

Washington, March 24.—The War Department has made plans for calling out the entire National Guard of the United States and is awaiting the word from President Wilson to summon the troops of Kentucky and those of the other States to the colors.

The President, on his part, has decided, it is said, to call out the guard, but is undecided whether or not to do it immediately or to wait until Congress has pronounced this country at war with Germany. The chances favor his waiting until Congress has acted. It was decided to today in official quarters that the guard would be required to perform one of two services, and possibly both. It will be expected first of all, to perform police duty in guarding all Government property, all plants or shipyards engaged in work for the Government, or for the Allies, all transportation facilities which might be exposed to attack and to quell any local disturbances.

In the next place the guard may be again sent to the border to relieve the regular forces for possible service in France. The War College has prepared plans for the dispatch of an army to Europe, but it is not determined by the President whether such an expeditionary force as this country is able to furnish, should be dispatched abroad.

Whether the regulars participate in the fight against Germany or not, it is the present purpose of the administration to avail itself of the services of the militia for purely domestic service. It is not now proposed to send any of the National Guard to Europe whatever the administration may decide. The regular army. The State forces will be kept in the U. S. to protect the property and obtain order. Even in the event of an expeditionary force of say 500,000 men for service in France, the guard will not be called on to go, according to statements made today. The importance of keeping a trained force at home to handle any Mexican difficulty or to train volunteers will make it necessary to employ the guards at home.

Individual State Governors, such as Gov. Whitman, of New York, Gov. McCall, of Massachusetts and Gov. Dyer, of Illinois, have been called out certain units of their militia for special duty. Other Governors are about to do so.

This action in no sense will interfere with the plans of the War Department. Once the President orders the militia of a State to be called out, this force immediately passes under the command. State authorities no longer have authority over the troops. All this is provided for in the act of Congress establishing the National Guard, and was carried into effect when the guardsmen, months ago, took the "dual" oath which bound them in the Federal service.

If again called into active service, strenuous efforts will be made to recruit the guard organizations up to full war strength. In the event this is accomplished approximately 250,000 men will be in the field, as guardsmen, a force sufficient to meet all domestic demands and to provide adequate patrol on the Mexican border in the event the regulars are called away for other duty.

There is said to be a serious question in the minds of Administration officials as to the advisability of calling out the entire militia at one time, or to argue on the one hand that the organization of the Eastern and Southern States might be ordered to mobilize first, or if it should be found later that the service of the remainder of the State troops was required then in turn, it could be called to the colors.

The Eastern and Middle Western organizations, it is said, would be sufficient to protect all industrial, transportation and other interests in that territory, also to provide guards for any interference with property, including armaments, storehouses, public buildings and Federal reservations.

How Million Dollars Looks.

(Popular Science Monthly.) In a recent celebration held in San Francisco one of the chief attractions was a pile of a million dollars in gold. The privilege of having a good look at all this money was given the guests by the City Treasurer, who offered to release the display before the coins were released. The display was a pile of gold pieces in the display which were to be brought for the treasury. The coins were in mint condition and they were placed on top of the pile. Such a pile would be nearly one foot high. The pile was the height of the large hall on the Federal Capitol at Washington.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

J. Wm. Houston continues quite

Wanted—500 good forest posts. John R. Williams, Walton, Ky., Elijah Hon, of Sugar Creek spent Tuesday here on business and visiting friends.

John Lane, of Ludlow, spent Sunday visiting friends and looking over his real estate.

Mrs. D. M. McCarty of Bank Lick, spent Tuesday here with friends and on business.

Mrs. Sara Glenn, of Covington, spent part of the past week here with relatives and friends.

John Taylor of the Richmond neighborhood, bought a Buick car from the agent Robt. W. Jones.

Clifford Rouse, of Louisville, spent part of the week here with his parents, W. R. Rouse and wife.

Mrs. Charles Best and little son of Paris, were the guests of her parents, Mr. and Mrs. J. C. Diers.

Clarence Williams, of Cincinnati, spent Sunday here the guest of his uncle John C. Miller and family.

J. D. Renaker and son, Grover, of Dry Ridge, spent last Saturday here with friends and relatives.

Rev. S. T. Hill, pastor of the Richmond Presbyterian church, spent Monday here with his many friends.

Miss Louise Green enjoyed a pleasant visit to Covington and Cincinnati last week with friends and relatives.

At the sale of Rev. A. Kirtley Johnson on Tuesday the home and grounds were bid in by J. B. O'Neal at \$1,980.

W. Lee Johnson, who recently moved to Latonia from Mrs. Kate Rice's farm, was here last Thursday on business.

Judge J. G. Tomlin spent part of the week in Indianapolis the guest of his brother, Dr. Wm. S. Tomlin and wife.

James Emral, of Sparta, spent part of last week here, the guest of his brother, C. M. Emral.

Dr. J. F. Daugherty bought from Thomas W. Marshall last week a lot on Chambers avenue in the new subdivision for \$125.

Mrs. S. H. McCart and two children enjoyed a pleasant visit to their old home at Lansing, Tennessee, the past two weeks.

Mrs. Mary Ryan, one of our venerable ladies of the Mud Lick neighborhood, who has been very ill is somewhat improved.

Mr. and Mrs. Jas. Williamson of near Cynthia, were visitors here Saturday enroute home from a visit to her farm near Glenwood.

John Markberry, Floyd Webb and Miss Lillian Northing of Williamson, were the guests of Miss Lena Bolington last Sunday.

Mrs. Mary Holloway of Point Pleasant, West Va., arrived here last week on a visit to her father, Charles C. Hunkle and other relatives.

Jno. L. Vest spent part of last week at Warsaw attending the Gallatin circuit court representing several clients in cases before the court.

John L. McDonald, of Ghent, was the guest of Mr. and Mrs. A. B. Tompkins part of last week, enroute to Detroit, Michigan, where he holds a position.

Mr. and Mrs. John M. Carlton of Zion Station, spent Saturday here with friends and looking at some property with a view to making a purchase and moving here.

Theodore F. Chambers, who has been enjoying a pleasant visit of two months in Covington, guest of his son, Prof. C. Spencer Chambers, returned to his home here last week.

Work on the electric light plant is progressing rapidly and it will be only a short time until Walton will enjoy the advantages of the electric light on a better scale than heretofore.

Ben Stansler sold his general merchandise store at Bracht last week to John McCormick, of near Ellettsburg Station, and has bought the store of Robert Coffman in Verona to take charge April 18th.

Richard Stoen Veach aged 60, died at his home near Bracht on the 20th inst., after a short illness from valvular heart trouble. He leaves a wife, two sons and two daughters to mourn his death.

Fred Miller, who has been traveling for a large wholesale rubber shoe manufactory in Pennsylvania and West Virginia, the past three months, returned home last Friday, after a very successful season.

John E. Williams and family expect to move back to their farm between Walton and Verona the coming week after spending the winter here for the benefit of the school facilities for the children.

J. B. Thompson, of Owen county, near Sparta, was here Tuesday looking for a couple of good work horses to purchase and purchased one from Wm. Gilpin for \$125 which he soon delivered at Sparta Wednesday.

Rev. W. B. Hall, pastor of the M. E. church at Hughes Chapel and Big Bone Springs, spent Monday here with friends. He came from Cardale to his new charge and is very much pleased with his membership and the position.

W. R. Rogers and sister Miss Lizzie of Burlington, spent Sunday here with their many friends. Miss Rogers is the county clerk of Boone county and is one of the most able and accommodating officials to be found anywhere.

Mrs. B. B. Allphin is in Covington taking treatment at a hospital

for a long time. Her recovery is assured which is pleasing information to her many friends.

Mr. and Mrs. Benj. Norman of Covington, spent Tuesday in this country looking at some farms with a view to purchasing, having sold the farm they owned near Walton to his brother Everett Norman.

The Royal moving picture show is giving only one performance during the week until the electric light plant is restored.

John Taylor of the Richmond neighborhood is now given every Saturday night and is remarkably good considering the calcium light having been used.

Mr. and Mrs. P. Boswell, of Mt. Sterling, who have been located at Horse Cave, Warren county, the past year, where Mr. Boswell purchased a place for the American Tobacco Co. spent last week here the guests of his sister Mrs. Fred Wayland and husband.

Wm. C. Green, who is employed in the office of the Norfolk and Western Railroad in Cincinnati, spent Sunday here with relatives and friends. Mr. Green has given excellent satisfaction in his position and is to be given a second promotion for efficiency next week.

Mrs. Mollie Christie, aged 76, died at her home at Lewistown, Mo., Feb. 27th. She was the daughter of Mr. and Mrs. Jerry Glenn, and was born and reared in this locality. She was a consistent member of the Methodist church from which her funeral took place at Lewistown on March 1st.

B. Ellis McElroy and R. Wood Carpenter have been appointed to position of weighers of the mail for the next month en route on the railroads. Mr. McElroy having the run between Cincinnati and Knoxville on the L. & N. railroad, and Mr. Carpenter on another road.

These appointments were secured through Congressman Rouse.

Chas. Shinkle and family who recently moved from near Huntsville, Alabama, have rented the Standard property occupied by John E. Williams and are moving in this week as Mr. Williams is moving to his farm. Mr. Shinkle and family are very welcome additions to this community as they are most excellent people and he is a number one business man.

Samuel S. Spradling who bought the farm of Miss Amanda Ackerman near Walton, and upon which Miss Ackerman resided, has decided to rescind the trade as she decided that she did not want to sell her property, and give him a donation of \$100 to let her out of the trade and pass to her certain personal property he had shipped to the farm. Mr. Spradling will probably purchase another farm in this quarter.

Police Judge Thomas F. Curley and town Attorney Chas. Strother and a special grand jury selected by the town held sessions last week in the opera house for the purpose of taking evidence against the illegal sale of whisky and drunkenness that prevailed here the past month. The circuit court will have a batch of testimony from which to render indictments.

A farmer friend says that he rides his farm of rats in the following manner: on a number of shingles he put a half teaspoonful of molasses and on that a small quantity of concentrated lye, and then place the shingles around the perimeter of the farm. The next morning I found forty dead rats and the rest left for parts unknown. I have cleared several farms in the same way. I never knew it to fail.

The fear that German spies in the country may do some damage to railroad property a surveillance is being kept over most of the large bridges. The L. & N. Railroad Co. has had four watchmen on their bridges near Walton for the past week, so that in case of war being declared between the United States and Germany that these highways of travel would be safeguarded from a destroying agent.

C. Scott Chambers, the popular undertaker, on his new road scraper on the Walton and Beaver road last week had a bone broken in his left forearm, but strange to relate did not rest in the extent of his injury until next day when the pain was so great that he consulted his physician Dr. G. C. Rankins who diagnosed the injury and gave Mr. Chambers the necessary surgical attention, and he is now rapidly recovering.

Judge J. W. Cammack, late circuit court judge of the 14th judicial district, residing at Owenenton, has formed a partnership with T. A. Perry of Owenenton, who was a partner of the late H. Caple Batts, and they will practice law in the district under the firm name of Perry & Cammack. Both have the reputation of being able lawyers and Judge Cammack has a large following in the district and no doubt the firm will enjoy a fine practice.

Ground was broken for the foundation of the new Methodist parsonage. Minny and Contractor Geo. P. Nicholson will run the building to completion as rapidly as possible. The pastor Rev. W. B. Garrett is very proud of the liberality and generosity of his members in arranging to have a "home" for the pastor of the church, and they are worthy of such credit in the congregation as small and it is difficult to raise the necessary money.

Next Saturday, March 31st, will be the closing sale on the Walton loose leaf market for the season as about all the tobacco has been sold and delivered. It is intended to have a sale last Saturday, but there were not over 20,000 pounds of tobacco on the market and that amount did not justify a sale. The sale next Saturday will make the total amount sold since the house was opened in December 9th about 2,700,000 pounds, which is far in excess of the expectations of the management, and the sales have averaged \$15.63. Should there be enough tobacco left over to justify a special sale one will be held after due advertising.

Rev. E. C. Lacey delivered his lecture "Are You Married?" at the Walton Christian church Monday night to a house filled to overflowing. This was E. C. Lacey's final effort in the lecture line, and in his very pleasing introductory remarks he stated that it must not be understood that he intended to abandon the ministry for the lecture field, but was merely trying out his ability in the lecture field with a view to using it as a side issue at opportunity.

The lecture was very enjoyable throughout and contained many valuable thoughts and the large audience appeared to be well pleased with the maiden effort.

The case of Carl Neumeister vs. the Millers' National Insurance Company, of Chicago, for the amount due on the insurance policy for the loss of his flour mill by fire several years ago, was compromised last week by the attorneys J. G. Tomlin and Jno. L. Vest accepting a payment of \$750. In the United States circuit court at Covington a verdict was rendered for \$3,500 in favor of Mr. Neumeister, but the case was reversed and sent back for new trial, and the ruling of the court indicated a rough road to another judgment in that court, besides the heavy expense entailed, and overtures being made to Mr. Neumeister leading to a settlement.

Mr. Vest went to Chicago and closed the matter. Chas. Strother was the local attorney for the insurance company.

Mrs. Babe Riddell has been very ill the past week.

Get your garden ready to plant as soon as possible.

Mrs. O. P. Phipps has her mother, Mrs. Belle Cason as her guest.

For Sale—Fresh Guernsey cow and calf, Ethel Marquis, Florence Ky.

People will be too busy to attend court next Monday if the weather is good.

The Kentucky Legislature evidently believes in plenty of offices and fat salaries.

R. J. Stephens, of Rabbit Hash, was a business visitor to Burlington, yesterday.

Mrs. Mary Hume, who was very sick several days the past week, is very much better.

It is about settled that the town of Florence will be lighted by electricity in the near future.

Some say when the time to sow oats arrives so will the regardless of the condition of the ground.

The High School students are hustling for advertisement and copy for the School Annual.

Man past 30 with horse and buggy to sell Stock Condition. Powder in Boone county. Salary \$70 per month. Address 9 Industrial Bldg., Indianapolis, Indiana.

Business at the local creamery is not so brisk since the milk strike was declared off. The creamery, however, gained a few new patrons as a result of the strike.

Lost—On Lexington pike, Saturday, March 21, between George Hoffman's and Covington, straw grip containing clothes and other articles for identification. Finder please notify or leave at C. W. Myers in Florence, Mrs. Geo. Hoffman.

Chapin-Moon. Mr. and Mrs. E. Y. Chapin have announced the engagement of their daughter, Ethel, to William Decker Moon, only son of Congressman John A. Moon. The wedding will take place late in the spring. Both Miss Chapin and Mr. Moon are among the best-known and most popular of young Chatsanogans. Their engagement will prove of keen interest throughout the community. Chatsanog, Tenn., Times, Sunday, March 25th.

Mr. Farmer. Don't forget to use plenty of that GOOD FERTILIZER this year. It costs less than last year, while everything you raise is higher than ever known.

I have it now for you. L. T. CLORE, Burlington, Kentucky.

FOR SALE. Seven years old Shetland Pony with buggy and harness; also two good horses suitable for family or farm. SCOTT CLARK, Walton, Ky.

Don't Depend on the Uncertain Hen

Many a housewife's high hopes have gone glimmering, just because an erratic Biddy went worm-hunting when thirteen costly eggs were almost due to hatch. That doesn't pay. Put a

BUCKEYE INCUBATOR

on the job and get results. The Buckeye hatched over 100,000 chicks and stands strictly to business the whole 21 days. So sure are we of this that we guarantee the Buckeye to hatch more and better chicks than any other incubator, regardless of price. Seven sizes, 40 eggs to 80, and sold as low as \$2.50. Come in and get a copy of "The Verdict of the User," backed by affidavit. Then you'll know.

Why Not Buy a Buckeye Incubator and raise chickens the modern way? Why let a hen set three weeks and then run 6 to 8 weeks with a litter of chickens and come through with a half dozen chickens, when you could keep her laying that 10 weeks and hatch the chickens in a Buckeye and raise them in a Buckeye Brooder. Say you had 10 hens engaged in hatching and raising chicks, that equals 100 a week at the best laying season which would easily equal 40 to 50 dozen eggs.

THINK IT OVER. Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their superiority over all other makes. More solid than all others combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

Now is the Time to spray your trees with Scalecide. The world's best dormant spray. The great tree saver. Write for booklet. It's free.

Good Seeds—Good Crops, we handle only the best field and garden seeds. All sold in bulk at saving prices. Write for catalogue of garden seed. Let us quote you on high grade Timothy, Clover, Sapping, Alfalfa, Red Top, Seed Oats, etc. A Postal Card May Save You Dollars.

GOLDEN BLEND COFFEE. Grows more popular every day. Our sales increase, our friends increase. Send a dollar bill and we will send you 4 lbs. by mail. Do it now.

A RARE TREAT IN STORE

For The People in This Community.—Lecture at Court House April 2d.

The local Club that guaranteed the financial success of the last Lyceum Course given in Burlington this past winter came out behind and the Lyceum Bureau, desiring to assist the Club, has offered to send Dr. Ray to us on April 7th to deliver his celebrated lecture, "Through Five Republics on Horseback," on a Fifty-Fifty basis without any regular amount guaranteed.

This is a higher priced Lecture than Dr. Evans, our last number, the regular price being \$60 for one lecture of Dr. Ray's, and it is hoped every one will hear this great lecture.

General admission 35 cents Children 25 cents.

Dr. Ray lectured in Scotland, Ireland, Wales, Honolulu, Australia, New Zealand, Canada, Alaska, Mexico and the United States. In these lecture tours he carried with him Indian curios and relics that cost a king's ransom to collect. The official club of death, the only one in civilization, and many other strange and weird legends of the savages of Central South America. He also speaks of the marriage customs, domestic life, peculiar dress, burial rites of these strange people and many other strange customs of these savages. He believes these tribes are the direct descendants of the ancient Incas, and supports his theory with excellent reasons.

Dr. Ray is known to scientific men as "The Livingstone of America." To the literary world he is known by his book "Through Five Republics on Horseback." This book is now in the hands of the public, having had a remarkable sale.

Dr. Ray is English by birth, a cosmopolitan by instinct. He was educated in London, Montreal and Chicago. Taught Spanish in the college of Argentina. Served as special correspondent for the Buenos Ayres Herald. For a number of years was official explorer for the Bolivian government. On a private expedition of exploration into the interior of Paraguay he discovered the Cingwa Indians, who had never before been visited by a white man. He spent some months with them, living on serpents, parrots, monkeys and other Indian delicacies.

He was adopted by this strange tribe of savages and named "Wan-gan-pang-kling-tha." By this method he became thoroughly conversant with their government, customs, strange religious rites and ceremonies. He found that the old men and women of this tribe were usually buried alive. No family was permitted more than two children, the witch doctor killing the others shortly after birth. The insignia of his office being, "The Club of Death," with which he executed the unfortunate children.

Not only in Paraguay, but in the dark forests of Brazil, Argentina, Uruguay and Bolivia, Dr. Ray spent years of exploration among the savage Indians. Adventures that have been the experience of few, if any, men in modern times became common occurrences with him. Neither the wealth of educational matter he gathered nor the stories of personal adventure that befell him can be found in geographies, encyclopedias or text books. His lecture, which is called, "THROUGH FIVE REPUBLICS ON HORSEBACK."

An Old Time Bank Robbery.
O. P. Phillips brought to this office one day the past week, a lengthy account of the robbery of a bank in the fifties in Louisville. Henry L. Pope was the cashier and was overpowered at the noon hour by two men who chloroformed him. The robbers got away with \$65,000 in money. Henry L. Pope was a relative of the late Lawrence Pope of this county.

Are Well Pleased.
Burlington High School pupils are well pleased with the reception given their entertainment at Bellview last Saturday night. The hall was packed with an appreciative audience that gave the performance most respectful attention. The receipts exceeded expectations.

Parcel Post Sale and Fish Supper.
The Ladies Aid of Union Baptist church will have a parcel post sale and fish supper for the benefit of the parsonage at the parsonage, Saturday, April 7th, from 4 to 11 p. m.

Will Give Picnics Again.
Charles Clure is as full of picnic as Europe is of war, and will open the season at Harvest Home Grounds this year early in June and will keep the fun going until frost begins to fly.

J. Sam Adams having decided not to be a candidate again for jailer may result in there being quite a number of entries for that office at the coming primary election.

Dr. O. S. Crisler, who was operated on in a Cincinnati hospital one day last week, has made such rapid improvement that he will be at home in a few days.

CALLING THE ROLL

Local Happenings.

J. E. Rouse.

In its biographical sketch of J. E. Rouse, the Hampshire Advocate and Livestock and Poultry Record says:

"It was the hand of Mr. Rouse that has guided the American Hampshire Swine Record Association to the greatest success that any Association has ever attained. The membership of the Association, the breeders of Hampshire hogs, the newspapers, who have been very generous in their comments upon the Hampshire breed, have thrown almost all of their bouquets to the Secretary of the Hampshire Record Association. Little has the public ever appreciated the guiding hand of J. E. Rouse, which made possible for the Secretary to accomplish the work which Mr. Rouse always helped to plan and was the one who did the most to make it possible for great success to be attained.

"In 1893, early in the summer, it was J. E. Rouse then of Boone County, Ky., that called the first meeting of the belted hog people in the little country grocery store. Mr. Rouse who assisted in formulating the first constitution, who became the first director and continued as a director in the Association from the date of the Association's birth until the day of his death, except for the period of one year.

"In the troublesome times of 1905 to 1909, when a number of jealousies were doing all in their power to stop the progress of the Hampshire breed and the Hampshire Record Association, it was the guiding power of J. E. Rouse that held the Association steady and kept the affairs of the Association from being captured in the sea of jealousy. We believe and have thought for some years that no one has ever justly appreciated the fullest extent of the gentlemanly guidance of J. E. Rouse, more than has been appreciated by the Secretary's Office. Well do we remember in 1905, when it seemed to be almost a hopeless task to pull the Association over the rocks of jealousy and prevent a shipwreck, that it was the gentlemanly character of J. E. Rouse that caused all of the members to return to their homes feeling better than they had when they first met in their annual meeting. Again in 1909, he quieted the troubled waters and in 1907 when shipwreck seemed certain, he did everything that he possibly could to quiet the storm of jealousy and when it all seemed lost and almost every one felt that a wreck was less than 24 hours ahead, Mr. Rouse notified as many people as he dared to consider and took them into a shipwreck. This council was held behind locked doors and in absolute privacy. When the door was closed that shut out the rest of the world, Mr. Rouse opened his big heart to the members, whom he had invited into his council. He asked that every man pledge himself to vote for the good of the Association and to forget everything which was in the air and to be feared about to happen and to make it their one purpose to promote the breed. Well do we remember the breathless silence when Mr. Rouse made this statement: 'The best way to whip your enemy or to conquer any one who is trying to cause trouble is to take all of his weapons away from him.'

"At the end of this council every man pledged to Mr. Rouse that he would go into the Annual Meeting, disagree with no one, fight back at no one and that the entire company would vote as one man for the best interests of the Association, regardless of what someone else may think or do. This ballot was the turning point from an association almost wrecked and torn by jealousy to a united association, which has continued to be united even to the present day.

Readers of the Hampshire Advocate, you know now who all of these years has been the man who has guided the destinies of the Hampshire breed. During his life time, he was always too modest, and to gentlemanly to permit us to tell the whole truth. When you hear it remarked that the Secretary of the Hampshire Record Association has built up a breed superior to that of any other, you will please remove that statement from the Secretary and place it to the memory of J. E. Rouse, the organizer of the Association. It is true that each and every one of us have done our duty, we have built the best we could, but the silent hand which guided the Association and builded for its permanent future and for a greater superior to that of any other record, was the hand of J. E. Rouse.

"During the last few years, the members of the Record Association had just begun to appreciate and truly love this great gentlemanly man. In December, he held the largest meeting possibly ever held by any Record Association in the world. When the nomination for Director was opened, and the names of the retiring officers were read, the large assemblage of members arose as a single man and asked that the name of J. E. Rouse be placed in nomination for director and that he be the unanimous choice of all of the large number of members present and that he be elected by himself and to succeed himself as a special honor for the great work which he had done. Thus he was elected only a few days before he died.

"Prices of gasoline, refined and lubricating oils are certain to advance considerably this winter according to the prediction of a well known Cincinnati oil man.

EASTER

Will Come Neither Late Nor Early
This Year, April 8 Being Date.

Easter Sunday falls in this year of grace on April 8, being neither late nor early. Last year it came on April 23, and next year it will fall on March 29.

In 1913 Eastern Sunday came up on the earliest date for it in this century, March 23. Last year's Easter Sunday, on April 23, was as late as it will be before the year 2600, when it again falls on that date.

Easter is what is called a movable festival. It is always held on the next Sunday after vernal full moon, with the exception that if the vernal full moon should fall on a Sunday, then, to avoid all commingling with the Jewish practice, Easter is not kept till the following Sunday. The vernal full moon is that which either takes place on March 21 or on the next day after March 21. If the vernal full moon falls on March 21 and that day happens to be a Sunday, Easter cannot be kept till April 23, which is the latest date on which Easter can fall, the earliest being March 22.

This is certainly a very mechanical contrivance, and one which most people find difficult to understand or remember. Owing to obvious connection between Easter and the Jewish Passover, the French call the former Pasques (from the Hebrew Pesach, which means a passing over) and obvious connection with the Christian Easter, which means ours, which comes from the Saxon goddess Eostre, believed to be the same as the Byrinn Astarte and the Greek Aphrodite. Venus, who was specially worshipped in the spring season as the mother and giver of life.

From the earliest ages various customs and superstitions have associated themselves with Easter. As at Christmas, it is to be believed that all water was turned into wine and that all the keys in their stalls in adoration of the infant Savior, so it was held that at Easter the sun danced in honor of Christ's resurrection.

Again, the Professor.

The professor has not been so frequent or profuse as formerly in advice as to our place in the world's affairs, and the light of the present and possibilities for the future. But still he breaks loose occasionally. While President Wilson was preparing his last address to Congress his successor in the Presidency of Princeton University was making to a Brooklyn audience a demand for participation in the world war.

Here, then, was given to the public two aspects of the question—one from the man who during four years has been elected the president of all countries, and who seems to have earned the confidence and belief of the most of our people; the other from a man with only opportunity of the ordinary news of the day to guide his thought; this one informed merely to the extent of facts coming to the surface thru the press, and the other through the courses tapping all knowledge gained daily by means of official service.

On one side we find Prof. Hibben boldly and frankly telling the country to go into war against the Central Powers and give proof of our "international conscience." He tells us that "if we believe that the iron rule of a world empire is threatening Europe, and even America, and that the whole civilization of Europe is hanging in the balance, should not we of America have a part in this war, and not wait until we are forced into it? If we believe that the allies are fighting for a righteous cause, the cause of justice and the old decency and humanity, why should we not have a part and a lot with them?"

No doubt Prof. Hibben, when he wrote his lecture, knew that his illustrious predecessor at Princeton was about to ask Congress for powers to defend our commerce when the time should show necessity. Such request found the country almost unanimously in favor of it, without any general up or down without the extreme limit of cause.

Meanwhile Prof. Hibben has achieved greater prominence in the academic world, and so have satisfied his immediate ambition thru approval of some of his fifteen hundred hearers.

How Advertisements Pay.

"No advertiser expects every reader, or even a tenth of the readers to answer directly the ad," says Farm and Fireside. "He is satisfied if the reader simply gives his advertising message con sideration and remembers part of it so that in the future when the reader wants that particular article advertised he will know what brand to ask for and where to get it. In other words, the chief thing the advertiser hopes to get his good will, because business experience shows that people who patronize concerns for which they have a friendly feeling.

If the advertisement is in a paper toward which he feels kindly, the advertiser in it is introduced to him, you might say by a friend. That is about all there is to the whole matter. The editor tries to help your friendliness by helping you in your honesty and by entertaining you. The advertiser asks for your friendship your consideration, know you will buy from someone you like or whom are well recommended to you."

The DAIRY

MILK SUBSTITUTE FOR CALF

Massachusetts Experiment Station
Recommends Feeding Mixture Costing Three Cents Pound.

Nothing is better than milk on which to raise thrifty, growing calves, whether they are intended for the dairy, the feed lot or the show ring. The ordinary farmer often finds milk too expensive as a calf feed. The following substitute is recommended by the Massachusetts Experiment station. Twenty-two pounds ground oats, ten pounds linseed meal, five pounds middlings, 11 pounds fine corn meal, 1 1/2 pounds fine blood meal, one-half pound salt. Total cost, three cents a pound.

Prepare by adding one-half pound of meal to two quarts of boiling water for each feed. At each feeding moisten the meal first with a little cold water to prevent it forming lumps, and then pour on the boiling water, and stir well. When this is cooled down to the temperature of milk fresh drawn from the cow it is ready to feed.

It is better to let the calf have whole milk for about a week, then gradually introduce a little of the milk substitute for ten days or two weeks, when you can cut out the milk entirely. As soon as the calf will eat, let it have hay and a little of the meal dry, together with fresh water. Always have the calf meal mixture milk-warm when fed. Have the buckets clean and do not overfeed. A young calf will usually begin to eat hay at about three weeks old.

COW NEEDS RESTING PERIOD

Some Animals Maintain Good Milk Flow Right Up to Calving Time—Rest is Important.

The dairymen department of the New Jersey Experiment Station recommends that the dairy farmer should remember to give his cows a rest of six weeks or more before they freshen. Some cows may maintain a good flow of milk right up to calving time, and in such cases the dairymen hesitates to dry them off for a rest period of several weeks. This should be done, however, and the cow well fed so that she will be in good flesh when she freshens.

The work of producing a heavy yield of milk for ten months or a year is a severe drain upon the cow's strength and vitality, and a period of rest should be given her to recuperate and prepare for another lactation period. If she finishes her milking period quite thin in flesh, she should be given a longer dry period and more liberally fed. The loss of what milk the cow might produce during the dry period will be made up several times over by an increased yield during the following lactation period. A good rest and liberal feeding preceding the date of calving helps largely to bring about a good yield during the following year.

RECORD OF LEADING BREEDS

Jersey, Guernsey, Ayrshire and Holstein-Friesian Have 16,155 Animals Registered.

The following are the records of the four leading breeds of dairy cattle for the last year:

Jersey—6,143 cows registered; average yield, 7,816 pounds; average butterfat, 418 pounds; average per cent, 5.35.

Guernsey—5,061 cows registered;

Ayrshire Cow.

average yield, 8,846 pounds; average butterfat, 441 pounds; average per cent, 4.97.

Ayrshire—2,188 cows registered; average yield, 9,447 pounds; average butterfat, 372.9 pounds; average per cent, 3.94.

Holstein-Friesian—2,742 cows registered; average yield, 14,819 pounds; average butterfat, 504 pounds; average per cent, 3.4.

MILK AND BUTTERFAT FEEDS

Utilize Every Possible Morsel of Food—Teeth and Stomach Wear Out First in Cow.

Every possible morsel of food fed to dairy cows should be utilized for the production of milk and butterfat. The teeth and the stomach are the two organs of a cow which wear out first, especially the former. This is caused in great part by the cow having to eat in grain dry ground grain. "There is an old saying, 'No chain is stronger than its weakest link.' With the dairy cow also this holds true. When one organ of digestion wears out, then the whole cow is useless.

A good dairy cow should be kept as long as possible, and if she is properly fed and cared for, she will be useful for about fifteen years. Some give a nice morsel of milk at the age of twenty years.

PRODUCTION OF BLOODY MILK

More Objectionable as Matter of Appearance Than as Menace to Health—Various Causes.

Bloody milk is more objectionable perhaps as a matter of appearance than as a menace to health. Hemorrhages may occur within the udder as a direct result of a bruise caused by rapid motion, by a bad position while the cow is lying down, by the tread of a cow in an adjoining stall, or because of the breaking of a tiny blood vessel or the escape of red corpuscles through thin vessel walls. Heavy feeding may also produce bloody milk.

The remedy is careful milking and light feeding with laxative foods and repeated small doses of mild physic. When the trouble occurs with cows giving a heavy flow of milk and under heavy feed, improvement follows a marked reduction of the ration. A change of stall may give good results, if it allows a cow to obtain a better position and avoid uneven pressure on the udder while lying down. Cows with heavy udders should be driven slowly and should not be driven over high sills.

IMPORTANT FOR DAIRY CALF

Modern Experiments Show That Good Flesh is Desirable Feature—Mixture for Grain Feed.

The importance of feeding and caring for a dairy calf is emphasized by J. B. Fitch, associate professor of dairy husbandry in the Kansas State Agricultural college.

"Calves should be fed whole milk until they are one month old, when they should be changed to skim milk," said Professor Fitch. "They should be fed skim milk until they are six months old. What they are on milk they should be given grain and alfalfa hay.

"A good mixture for grain feed is four parts of corn or corn chop, one part of oil meal, and two parts of wheat bran. After taking the calf off the milk increase the grain gradually to two pounds a day in addition to silage and alfalfa hay.

"It used to be considered that good flesh was undesirable in dairy calves, but experiments show that this is not the case and that quite the contrary is the case, especially before calving.

"The heifer should be bred so as to calve when from twenty-four to thirty months of age, depending upon the breed and growth of the animal. The Guernsey and the Jersey should be bred so as to calve when from twenty-four to twenty-six months old, while the Holstein and Ayrshire breeds should be bred so as to calve when from twenty months of age. If bred so as to calve earlier than this, their growth is apt to be injured.

Guernsey is Desirable Type.

Should Be In Some Building Other Than Barn—Northeastern Exposure is Favored.

The milk room should be in a building other than the barn. It should be located if possible with a northeastern exposure. Immediately after milking the milk should be strained and put in shallow pans to cool quickly. This applies to conditions where a milk cooler cannot be used.

Where no separator is available it is necessary to cool the milk as soon as possible to enable the cream to rise. Where five or more cows are milked it is advisable to invest in a cream separator, because running the milk through a separator immediately after milking is the best way known for getting absolutely clean milk, even if the whole milk is to be used.

BE SUCCESSFUL WITH COWS

Plenty of Feed and Balanced Ration Essential—Grain Should Be Supplied in Winter.

To be successful with cows one must be a good feeder. This takes plenty of feed and a balanced ration. To get milk in winter, grain should be fed. With butterfat at 30 cents it can be fed with profit. It stings with fair corn in it is fed used enough bran and cottonseed meal or oil meal to balance the ration. Where alfalfa is fed the brand ration may be largely reduced.

Testing the Eyes
Sometime when people get glasses that suit them they go on wearing them for years without having their sight tested to discover whether any change has taken place. This is wrong. All should have their eyes tested at intervals. Glasses for old sight should be changed every two years. Whenever you feel uneasy in your glasses don't hesitate to call and see us. If no change is necessary we will tell you.

A Week's News

Have You Ever Stopped to Think

Dr. W. A. Gaines, of Cincinnati, has moved his office to 115 Broadway.

W. R. Rogers and sisters, Misses Sallie and Lizzie, spent Sunday in Walton.

Young chickens are requiring the attention of many of the good housewives.

Jeese Kirkpatrick has been erecting wire fence out on his Gunpowder reserve.

Andy Cook and family spent Sunday with relatives in Bellevue neighborhood.

The equinoctial storm was delayed a short time by, probably a blowout some where.

J. G. Renaker, cashier of Florence Deposit Bank, was in Burlington a few hours last Sunday.

Miss Mary Furlong spent last Sunday with her brother John and wife in Ft. Pleasant neighborhood.

Mrs. Mollie Clure, of Covington, is visiting her daughter, Mrs. A. L. Nichols out on the East Bend road.

Her school being out Miss Mary Roberts, who had been teaching in Petersburg, returned home last Sunday.

W. A. Gaines arrived at home last Saturday evening after a sojourn of two weeks at St. Petersburg, Florida.

Cecil Gaines has moved to the farm his father purchased recently of Miss Anna Crigler. It is located near Limaburg.

Several of the farmers in this county started their plows last week, but a halt had to be called because of the break in the weather.

For Sale—Good colt, will be year old in June. Sired by Star Boy. Barred Rock eggs \$1.45 for fifteen.

J. J. Tanner, Florence, Ky., R. D. No. 1.

There is a good lamb crop among the flocks of this county, which will bring a large amount of money to the pockets of the owners.

L. T. Clure, local dealer in fertilizer, has purchased a large lot of that goods for this season, and has same advertised in another column this week.

Chas. Beall, of Sand Run neighborhood, came in last Saturday, and put up for two towels and planked down for one new subscriber. Such visits are duly appreciated.

Edgar Riley and Jerry Fowler visited Harrison county one day the past week, going by the way of Pine Knot county and returning by way of Williamstown, Grant county.

Mr. and Mrs. Courtney Walton, of Erlanger, and Miss Lizzie Graddy, of Lexington, and Col. Carter Graddy, of Petersburg, were the guests of Sheriff W. D. Cropper and mother last Sunday afternoon.

Mr. William McGlasson, of Hebron neighborhood, was a caller at this office Monday. Mr. McGlasson is a most estimable gentleman and one of the county's oldest citizens, being 83 years old.

Edwin Gaines, who represents the National Cash Register Co. in Milwaukee, Wisconsin, accompanied by Chester Davis, cashier of the Citizen Deposit Bank, of Erlanger, were in Burlington, Sunday.

At the close of the Gallatin county circuit court on Wednesday of last week, Judge Sidney Gaines hastened to London, Laurens county, to hold a term of court at that point, at the having been assigned to duty there by Governor Stanley.

W. G. Kite, of Waterloo, attended the Kunkle & Olds sale of Jersey cattle at Springfield, O., last week and while there bought of Judge Kunkle an imported Double Mabel Raleigh cow—best quality with a test of 7.2 per cent butter fat.

Henry Lewis Tanner, of Hopewell neighborhood, was an early Monday caller at this office. He had just returned from Spring Place, Georgia, where he spent several days. He said potatoes are selling for \$1.25 a peck in Georgia.

Congressman A. B. Rouse was in Carrollton yesterday mixing with his friends. Rouse is the son of a well known family and he is always out to help a friend. Every pleasing moment adds to his popularity.—Carrollton News.

F. W. Kassebaum and son, tombstone and monument men, of Aurora, Indiana, were business visitors to this part of the county last Monday. Mr. Kassebaum has built up a large trade in Boone county, and owing to his age he desires his sons to take over his patronage in Boone county.

Mr. F. L. Powers and son, real estate men, of Covington, accompanied by T. J. Stephenson, of Erlanger, were in Burlington last Thursday on business. They called on the Recorder and Mr. Powers had his name put in the list as a reader for the next few months. Mr. Powers may have something to say to the people of Boone in the way of advertising in the near future.

Have you ever stopped to think what a queer town this would be—how inconvenient for you if there were no stores here? With the stores there couldn't even be a town. Well, the only way to make stores possible is to give them patrons.

We are not losing our heads over the mail-order danger, nor do we think it one of the seven deadly sins to buy something out of town occasionally. But we do maintain that every citizen of Boone county should make it his practice to buy of the merchants who are helping to pay our taxes, who are employing our own friends and neighbors, who are building up the town, who are indirectly making it possible for all of us to make our living!

We are gratified to learn that one of the great national magazines, and the greatest in the women's field, has decided to exclude all mail-order advertising from its columns and thus cooperate with local merchants everywhere. That this is a proper step can be seen by looking at the facts. The magazine mentioned, THE DELINEATOR, is sold locally through H. SCHANKER & SON, who also sell many of the goods advertised in its columns. Naturally, the store owners prefer that the advertising which they promote should help them, which is only fair. THE DELINEATOR recognizes this, and in spite of a loss in revenue amounting to thousands of dollars, has made the sacrifice in the interest of local dealers.

But the issue is broader than this. A store such as SCHANKER'S is a convenience and a credit to Boone county—we might even say a necessity. Now if we should divert a part of our SCHANKER'S trade to other parts of the county, we would be obliged to carry only a meager stock, and would have to realize far bigger profits on the things we had to stock there. So we congratulate H. SCHANKER & SON and THE DELINEATOR on its recent move, which recognizes that, in a broad way, retail stores are the logical channels for distributing goods and that to "trade at home" promotes the best interests of all.

You can do your part to help this town by giving your preference to those who are in the town and to that magazine which is trying to help us rather than undermine us.

To the Farmers of Kentucky.

After an earnest and careful investigation in this State and relative to the "hog" of food products, the necessities of life, the basic causes can be placed upon the fact that the farmers of Kentucky during 1916 failed to plant and produce a sufficient amount of food products, not alone to supply the local demand, but an inadequate amount for their own family consumption. Today, buyers in the open market for such. The citizens of the cities and towns are not expected and cannot afford to produce these necessities, thus raising upon the farmers, and when both country and city people become competitive buyers in the open market for these products, it is no wonder that prices soar to the present unreasonable proportions.

The first duty the farmer owes to his family is production of a sufficient amount of food products to sustain and feed the members of that household. This being done they are independent. Then conserve the products at hand. At this time there are many efforts being put forth to teach the need of conservation of home products. It is done thru organized work, thru bulletins, thru teaching and fortunate is the farmer who has learned this lesson of production and conservation. In this way he will be surprised to find to what an extent this larger production and caring for the surplus will mean in money in his pocket and sustenance to his fellow-beings.

It is for this reason that I call upon the farmers of Kentucky to materially increase their plantings this year so that the surplus may accrue which, when placed upon the market will reduce the extremely high cost of living and drive down the price of food for the starving families of this Commonwealth.

MAT S. COHEN,
Commissioner of Agriculture.

Cards of Human Skin.

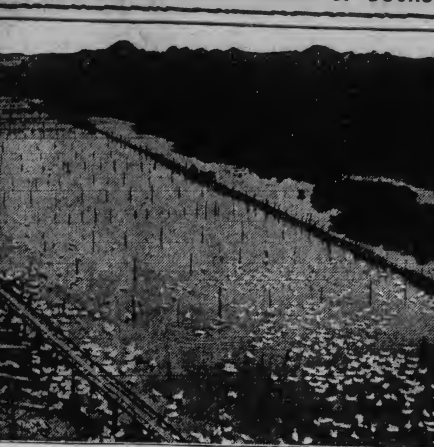

One rainy Sunday afternoon back in the mists of the seventeenth century, an Apache chieftain got trimmed in the rodeo equivalent of a poker game. To change his luck, he conceived the idea of killing a particular enemy of his, skinned him, and then going back into the game with the cards made therefrom. This rather drastic and tempting fable Fortune would not permit to remain a dead secret of the past had not the University Museum, last week, acquired a collection of Apache ethnological specimens, which include a deck of playing cards made of human skin.

These cards are curiously copied from the human skin playing cards designed in the seventeenth century. The Apaches used them for gambling purposes. The figures representing kings, queens and jacks are clearly visible, and the markings of the smaller cards are also unique; but the modern game of poker can easily be played with the human skin deck when once the players understand the Apache markings—Philadelphia Record.

Assessments Raised.

The State Board of Equalization has raised the valuation of land as returned by the assessors in Grant county, 35 per cent, and in Gallatin five per cent.

RUNNER IS MOST PROFITABLE OF DUCKS

IMMENSE DUCK FARM ON LONG ISLAND.

(By ANNA GALIGHER.)

It is only a few years since the Runner duck first made its appearance in America. They came originally from the West Indies, where they have been raised for years, chiefly as egg producers. They derive their name from their racy, upright carriage.

In color they are fawn and white, with yellow shanks and light green bill; the latter being sometimes splashed with black.

The body is long and narrow and is carried in an almost upright position. Neck is long and thin, with finely formed head.

The Runner is, we think, not only the most beautiful but also the most profitable of all the duck family. They have the Pekin beaten a mile, and are steadily gaining in favor.

The Runner is rather small, fully matured ducks weighing from four to five pounds; drakes from five to six pounds, live weight. But they grow very rapidly while young and are easy to raise. What they lack in weight is more than made up for in their other good qualities.

To begin with, they are very prolific layers, beginning when they are about six months old. Their eggs are pure white and a little larger than a Plymouth Rock hen's.

Eggs are Superior.

They are superior in quality to any duck's eggs that we have ever eaten, and as a rule they bring a better price in the markets.

The ducklings reach a marketable size about twelve weeks old. When forced they will weigh four to five pounds at two months.

The meat of a Runner is of superior quality, fine in grain, juicy and excellent in flavor.

The eggs are in great demand also. In winter when eggs are high, the Runner is "on the job." Any enterprising person can work up a trade among hotels and restaurants that should prove highly profitable.

There is no danger of strong competition, as comparatively few poultry raisers have taken up this branch of the industry, notwithstanding the fact that nearly all kinds of poultry products are bringing unheard-of prices in the open market.

Duck culture in the past has been more or less neglected, owing to the general belief that ducks cannot be successfully raised without a stream or pond of water. The fact is, however, that the Runner requires only sufficient water to drink.

They are small feeders as compared with other ducks. One Pekin will consume as much feed as two Runners, and then not be satisfied. Unlike the former, they are great foragers.

In summer the Runner, when given free range, will find the greater part of his living in the fields. But of course, when being fattened for market, they need some grain. It would be well to say right here that for best results the grain should be either ground or cooked.

Duck Raisers Fail.

A great many would-be duck raisers fall because they insist upon feeding the ducks, both old and young, whole grain.

The matured birds can get along, but the young ones most certainly cannot. Don't try to raise ducklings on whole wheat, cracked corn and "chick feed." They simply cannot digest it. About the only kind of grit that a young duck will eat is sand, and whole or cracked grain requires something sharper than sand to grind it.

Those who have Runner ducks would do well to keep them over winter and see what they will do toward keeping the egg basket filled when biddy is on a strike.

Begin by culling out all surplus drakes and undersized specimens. If the ducks are expected to furnish eggs for hatching purposes, now is the time to procure drakes from some other flock.

It is not a good plan to keep closely related birds. One drake for every seven or eight ducks is about right. Drakes may be kept for about seven, but ducks will lay so well when they are young that duck raisers care to keep old drakes unless they happen to be high-priced birds.

In many sections Runner ducks are so scarce that good specimens bring almost any price asked.

A house 15 by 20 feet, with a yard attached, will be large enough for thirty-five or forty ducks to stay in at night, and during the cold days in winter.

Inexpensive House.

If there is no suitable house on the place, a duckhouse can be built at small cost. Rough lumber may be used for the floor and siding. The rafters, plates and posts may be made of poles cut to the woods. Any kind of roof that will turn water will answer.

If the house is to be used for young ducks during the spring and summer months, there should be two large doors, one at each end of the house, or a door at one end and a window at the other. Some duck houses are built with the entire south side open.

Small-mesh poultry netting is nailed to the posts, and a heavy curtain is attached inside. The curtain is to be used in cold weather. As the snow is liable to drift in, it will sometimes be necessary to nail or tack the curtain to the floor and also to the sides.

Keep plenty of straw on the floor. If it is several inches deep, it need not be renewed every day. We take a pitchfork and turn it, or remove that which is badly soiled. It is best to keep everything as clean as possible, then there is less danger of disease. Ducks are not troubled with lice, and as a rule they are very healthy.

A flock of laying ducks should be fed four times a day when they have to be kept housed.

Their food should consist of both raw and cooked vegetables, cornmeal, bran, beef scraps, steam-cured clover, etc. The ground grain should be moistened with milk or water.

Several Principles Must Be Adhered to if Success Is to Be Attained—Avoid Cold Drafts.

Artificial incubation is used in hatching eggs several principles must be adhered to if success is to be attained. The incubator room and incubator must be well ventilated. The atmosphere in both the incubator room and incubator must be kept moist. It is, of course, possible to go to extremes with each of these requirements.

A room in which strong drafts prevail is not a good incubator room because of the difficulty thus encountered in maintaining an even temperature. A room too moist will cause molding of the eggs and one too dry will cause excessive evaporation, either of which will kill many chicks in the shell and cause the hatching of many weak chicks which will die at an early age.

Two Feeds Daily Necessary.

Mangels, Carrots and Cabbage Make Excellent Green Food—Cut Fresh Bone Is Very Good.

Hens need some green food in winter if they are to lay well. Mangels, carrots and cabbage are good. Hang them up so that the hens can just reach them nicely. Sprouted oats are also good. Alfalfa and clover leaves and lawn clippings carefully dried can be soaked up and fed to good advantage.

In the summer when the hens lay well they have bugs, worms, grasshoppers and other insects. In the winter they need something to take the place of this kind of food. Cut fresh bone is very good. Half an ounce daily per hen supplies all she needs of this food. High-grade beef scrap is good and is in a very convenient form for feeding.

FRESH AIR VERY NECESSARY

Without Proper Ventilation Poultry House Is Neither Dry Nor Sanitary—Bad For Health.

Fresh air is very necessary in the poultry house. Without ventilation the poultry house is neither dry nor sanitary. Chickens in a damp house are more liable to colds and roup than in a dry house. One of the best ways to ventilate in winter is by having an opening covered with muslin. An opening on the south side, 2 by 3 feet for each 8 or 10 feet of length of house. A good way is to put the muslin on a frame which can be on hinges so that it can be raised on warm days, to allow more air to enter.—North Dakota Experiment Station.

Easter Greetings

WHEN WE THINK OF EASTER WE THINK OF CLOTHES.

New Clothes—Clothes that Wear—Stylish Clothes that fit your figure and your pocketbook.

The point we want to emphasize is their reliability—Suits that are designed and manufactured by the country's foremost tailors.

We also carry a wonderful line of Pants and Overalls.

"Our Customer First."

See Our Display in Men's, Young Men's and Boys' Clothing. We are glad to show you our splendid new Patterns and Styles.

Careful Car Drivers Economize on Gasoline.

Soft tires require more power for the propulsion of the car and add to its repair bill. If the motor is left running idle, the amount of gasoline used is about the same as that used for propelling the car at the rate of fifty to ten miles an hour, says the Automobile Dealer and Repairer.

There is an art in driving a car, and good drivers are those who can drive farthest on a given amount of gasoline. Stopping the motor while coasting down long hills adds to the cost of motoring and saves gasoline as well as wear and tear on the motor. If the motor is stopped some time before making an intentional stop the car can be allowed to coast to a gradual stop, thus saving wear on brakes and tires, as well as saving gasoline.

There is a good average speed at which every car can travel most economically without wasting fuel or time. It is to be determined by test and practice, just what this speed is for his own particular car. It is often more economical to stop the car and start again than to drop into second gear and partially close the throttle than to attempt to force the car up steep hill on high gear with the throttle wide open.

Good drivers walk the road far ahead and by skillful planning utilize every drop of gasoline to the best advantage. This is a test of the driver's motive that forms a game well worth playing.

A Bill We Can't Pay on Pay Week

A ten year old boy overheard a conversation about certain bills to be paid, and conceived the idea of making out a bill for his own expenses. So the next morning he laid this statement of account on his mother's breakfast plate:

"Mother owes Willie for carrying him down stairs two times, for bringing water lots of times, thirty cents for going ten errands, fifteen cents." His mother read the bill but said nothing about it. That evening Willie found on his plate the 75 cents and also another bill which read as follows: "Willie owes mother for his happy jump ten cents; nothing for his food and clothing; nothing for nursing him thru a long illness, nothing to eat, nothing to drink. When Willie was a little boy he was pleased, but when he read his mother's bill his eyes grew dim and his lips quivered. Then he took a key to his mother, threw his arm about her neck and begged that she would let him do lots of things for her. Mother rarely presented him it will pay each person to think it out and over for himself and then pay it in love and service.

Breakfast.

(Vale Review.)

Breakfast is the poetry of eating. Strong with the invigorating of sleep, still animated by the intimacies of soup and water, a man comes to his breakfast like a boy; a boy comes down like winged Mercury, and takes his seat; he is alighted on a heaven-kissing hill. Breakfast is the harbinger of Lucifer, Son of the Morning, and no doubt caused the arrogance that wrought his fall. Freshness sits at your right hand; the dust of the day has not yet settled on your soul, and you meet your fellows like morning stars shining at each other's feet. "What a delightful greeting!" Did a "good evening" ever sound so musically as "good morning." When the first fragrant of coffee, muffins, and honey laves upon the anticipatory nose. Tripping down stairs is almost like flying, and pulling out one's chair gives the last thrill to appetite. Everything is welcome and welcome. The dog wags his tail with more than his usual cordiality even to a stranger who sits up for a morsel with an expectant supplication. The cat purrs loudly than ever; even summer flies lose a portion of their repellent abominability. Porcelain turns a translucent check toward the sun's kisses and crockery makes high resolutions of lightness and fragility, while silver gleams and glitters.

Last week J. C. Browning purchased in Cincinnati a box of nut chocolates and brought them home to his family. On the bottom layer, Mrs. Browning found a piece of candy encased in a web of cocoon. Mrs. Browning opened the cocoon, and to her great surprise, a beautiful butterfly flew out. This is the only instance of the kind we have ever heard of, and the only way it could have been made possible was for the egg to have been laid in the blossom of the nut, and as the nut ripened it was encased in the shell. When the nut was prepared for the candy the egg was imbedded in the kernel, and after being dried in the candy, hatched out, and spun a cocoon about itself, and there remained until the larva emerged as a perfect butterfly.—Falmouth Outlook.

At last President Wilson has taken a step which can hardly mean less than war within a few days, and the country is well pleased. The sooner the United States goes into the vast conflict the sooner it will be over and the task of rebuilding and repairing the havoc wrought. Events have proved that there is nothing to be gained by temporizing. The way to move is straight ahead let the consequences be what they may.—Cleveland Leader.

For Sale—Good top spring wagon—used made and good as new. Also rubber, tired Pontiac buggy, good condition. Fred Morris, Burlington, Ky.

SOLDIERS DO NOT FEAR DEATH DURING BATTLE.

(London Spectator.)

If a man feared death in battle one could not be surprised, and yet in the present war hundreds of thousands of men have gone to meet practically certain destruction without giving a sign of terror. Their emotions seem to be of a different kind. They are not of a kind which would ordinarily produce intense pity, sorrow or dread have no effect on them at all, and yet never was their mind clearer, their sight and hearing more acute. But with the issue before them, with victory or death the prospect of eternity, their mind's blankly refuse to come to grips.

It is before an attack that a man is more liable to fear—before his mind is clear, while he still has leisure to think. The trouble may begin a day or two in advance, when he is first told of death to himself and so many of his chums. One indulges in regrets about the home one may never see again. One is rather sorry for his self, but such self-pity is not wholly unpleasant. One feels mildly heroic, which it not wholly disagreeable either. Very few men are afraid of death in the abstract. Very few men believe in hell, or are tortured by their consciences.

The vast majority experience more or less violent shrinking from the pain of death and wounds, especially when they are obliged to be physically inactive, and when they have nothing else to think about. This kind of dread is in the case of a good many men, intensified by dizziness and suspense, and by the deafening noise and shock that accompany the detonation of high explosives. But it cannot properly be called the fear of death, for it is a purely physical reaction, which can be, and nearly always is controlled by the mind.

Last of all, there is the repulsive and loathing for the whole business of war with its bloody ruthlessness, its fiendish ingenuity, and its insensate cruelty, that comes to a man after a battle, where the tortured and dismembered dead lie strewn about the trench and the wounded groan from No Man's Land. Neither is it the fear of death, but a repulsion which breeds no larger more often than could fear, reckless hatred of life more often than abject clinging to it is generally not death that they fear. Their fear is a physical and instinctive shrinking from hurt, shock and the unknown, which instinct obviates the man's will only thru surprise, or thru the exhaustion of the mind and will or through a man being exhausted by a death rationally considered, but an irrational physical instinct which all men possess, but which almost all can control.

Compensation.

At a meeting of fashionable women in New York a resolution was passed, calling upon the women of America to follow the example of the women of the belligerent countries in the matter of curtailment of the expenses of dress. Purveyors of women's clothes were addressed in the resolution in the interest of desired co-operation to make possible the economy of the war effort. Proposed radical changes in style were frowned upon as means whereby women would be forced to buy new outfits.

It is curious how the resolution should become the spirit of the women in America, many women would be glad of release from the necessity of adopting changes in the form of their apparel every year. The war would not be without compensation.

Dressing among women is highly competitive. There may be no desire for the mellow skirt, or the peg top because of its style, but because it is the style. Mrs. A cannot be without it when Mrs. B, or C has procured it and flaunted it at the last tea.

Competition between men in the matter of dress hardly exists. The man who does not wish to be bashful, or who wishes to dress disconsistently, and who is not concerned about the relative elegance of his and his friends' clothes. The man who is content to dress in accordance with the average man—does not care, he averages whether someone else at the club is better dressed. He does not feel that it is a social failure at the poker party or seen to disadvantage at the wrestling match, or disgraced at the ball game, because he hasn't a brand new hat in the last two years, or that Nile green. He is comfortable at the musical comedy in an evening suit six years old if it is not slouching, shiny and comfortable it is to be comfortable about such matters!

If war could be made an excuse for slackening the tension in feminine minds, it might be, but it is not exactly "heavenly" at least less infernal than war as Gen. Sherman saw it.

A declaration of war will clear the air and end the argument for and against this course or that. Treason will become known by the name of treason, and can be dealt with effectively. Our enemies at home will be rendered unable to carry on their present legitimate intrigues against the national welfare. Hearing this declaration from its Government the whole nation will shake itself free from entanglements of partisanship and conflicting sympathies, from half-truths and a sturdy heart with clear vision and a sturdy heart upon the high adventure of the hour.—Boston Transcript.

The Maelstrom.

(Cincinnati Enquirer.)

We are now beginning to feel the terrific suction of the great whirlpool in whose outer circles we have been slowly and almost unconsciously revolving ever since the war began.

So little experience have we had as a nation in the mighty movements of life in the great outside world that we did not recognize those slow and terrible gyrations by which we were being sucked toward the huge abyss. Only the most salacious felt the ominous movement. With intuition keener than our own they realize that the moment the German army invaded Belgium we were predestined to participate in the struggle, because of the principles on which our government was founded.

The breaking of an obligation as sacred as that of the preservation of a pledged neutrality was a challenge to our national sense of honor. We were spiritually allied with the nations who presented this injury. Every fact of our history and every consciousness of our mission bound us together in an solemn effort to restore the sacredness of the word of honor among nations. It is true that this sense of moral obligation gripped us very weakly. It is also true that the active force which seems about to make us take the plunge is resentment for injuries done ourselves. It is no less true, however, that it was our sense of the sacredness of a nation's solemn oath and our resentment of Germany's contemptuous declaration that it was nothing but a "scrap of paper" which pushed us into the outermost curves of the maelstrom.

In what long, terrific circles we have been revolving! How mighty are the forces of which we feel the grip! How unshakable is the abyss into which we are being drawn!

No matter! We cannot fall back now. The ocean is too great. We have only to draw a long breath, to take the plunge and commit ourselves to the keeping of the infinite power that controls the destinies of the universe.

Let us not, however, forget that we have an intelligible right to take in the pyrotechnic struggle which is going on. The forces are not the blind, impersonal energies of Nature, like those of an earthquake, which sweep the tops of human minds and cities. Thus these eternal gods are working out some grand design, no less visible than the universal establishment of democracy, or the "parliament of nations" and the federation of the world.

Millions have been other maelstroms, and each has threatened to engulf the civilization by whose agitations it was originated. Instead, however, of disappearing forever in the abyss, each age has debouched, redeemed from ancient curses. And so, in truth, will ours.

Children and Trees.

Every child should own a tree. A tree is a symbol of life. It lives. It stands for everything that is noble. It is rooted in the soil and stretches its limbs toward heaven. It stands for patience, humility, persistence, beauty, courage and God. The child should plant the tree himself and there after watch it grow year by year. He should put his hands on its rough bark and say "This is my tree. I will stand by it, and live up to it."

It is curious how blind we are to certain ideals because we cannot attain to them. We need something to strive for, and the invisible but none the less potent and formative word of aspiration and inspiration. What could be more noble than a tree.

There is something about the silent beauty of a tree that casts over us a spell of calmness and in its simplicity the storms of life may sway us and break our branches; the grim and melancholy autumn may strip us of our brilliance, but the spring will come once more and clothes us in a new glory. So we go on fulfilling the majesty of the law.

If your child owns a tree, the tree will be a benefactor to the child's mind, and the child will be a benefactor to the tree.

—Country Gentleman.

Urged to Raise Vegetables.

Louisville canners and picklers are urging to farmers to truck more about Louisville to raise plenty of those vegetables that are "put up" for winter consumption. The local factories are prepared to offer what they declare to be unusual prices this summer for corn, beans, tomatoes, etc.

It is said by representatives of the canners that they are compelled during the summer season to go to Northern states to get their products, having them shipped to Louisville to be put into cans and glass. They say that enough of the vegetables can be raised in this section of the country to keep the canneries busy during their season. Farmers will devote their attention to that feature of farm work.

April a War Month.

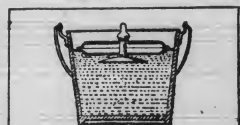

(Commerce and Finance.) If there is anything in April being America's war month, April, 1917, will bring us into conflict with Germany. It was on April 19 that the battle of Lexington (which brought on the War of the Revolution) was fought. It was on April 12 that Congress put the embargo on British trade that ushered in the War of 1812. It was on April 30 that the war with Mexico began. It was on April 11th, that the Union surrendered and the Civil War started. It was on April 11 that we declared war on Spain.

DAIRY FACTS

CALF-FEEDER IS ARTIFICIAL

Combination Pacifier and Nurse Bottle Attachment for Milk Pails Is Shown in Drawing.

Who has not more than once angrily kicked a calf "in the slats" while trying to teach it to take its liquid dinner from a pail instead of from its mother's udder in nature's well approved manner? But the new efficiency movement in the business of farming has approved the artificial method of feeding the calves so as to increase the income to be obtained from milking their mothers. Some ingenious son of a farmer seems to have set himself the task of devising some method of making the calf wait to drink from the

New Calf-Feeder.

pail rather than simply, and more or less forcibly, making him drink from it. The result of that thinking is the combination pacifier and nurse bottle attachment for milk pails shown in the accompanying drawing. It consists of a metal float carrying a teatlike attachment on which may be placed a rubber nipple. This arrangement lets the calf butt and suck all it wants to, but still forces it to draw its nourishment from the pail instead of from its mother's udder. All you have to teach it is to stick its nose downward instead of upward in order to get hold of the nourishing teat.—Farming Business.

DAIRY COW AND HER PRODUCT

Every Animal in Herd Should Be Tested Annually for Tuberculosis—Uss Concrete Floors.

It is a good rule to have every cow in a herd tested at least once a year for tuberculosis.

To insure steady motion, a separator must be fastened to a solid foundation. A concrete floor gives this better than anything else.

Sometimes lack of exercise causes barrenness in dairy cattle. It is never well to allow the dairy cow to take on much fat. Always give her plenty of exercise.

The average cow in full milk flow will consume from 30 to 40 pounds of silage to advantage. Add to this some 10 pounds of dry fodder, and the rationage feed is complete.

Only concrete floors should be permitted in a dairy barn. They cost more, perhaps, originally, but they are the cheapest in the long run. For one thing, they make it possible to save some of the liquid manure, a very valuable item.—Glenison College Bulletin.

SIZE OF DAIRYMAN'S INCOME

Noticeable Increase Where Purebred Bulls Are Maintained—Scrubs Do Not Pay for Keep.

Figures recently compiled by the University of Illinois seem to show that there is a direct ratio between a good bull and the size of the dairyman's income.

On 124 dairy farms where purebred bulls were kept at the head of the dairy herd, the average farm income was \$11,022 after deducting the taxes, interest on investment, etc.

On 106 dairy farms where a grade bull stood at the head of the herd the farm income was found to be \$7,374 per year, and on 83 farms where scrub bulls were used the farm income was \$2,437, or failed by \$243 to pay interest on the investment, to say nothing about pay for the owner's time.

FEEDING COWS WHOLE BEETS

Somewhat Larger Yield of Milk and Milk Fat Obtained Than When They Were Chopped.

In a foreign experiment with dairy cows it was found that the feeding of whole beets produced a somewhat larger yield of milk and milk fat than when chopped beets were fed. The increase probably being due to more complete mastication and utilization.

FARMERS' SLICE QUITE THIN

Not Much Money Left for Producer After Creamery Man, Railroad and Retailer Get Theirs.

By the time the creamery man gets his slice out of the milk profits, the railroad gets its share, the commission man still another and the retail dealer his, the slice that is left for the man who ought to have the biggest slice of all is pretty thin.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

WATERLOO.

Orville Kelly has measles. Born, to Ben Cook and wife. A. Alice Pearl. Noah West moved to Mode Scott's place Thursday. Mrs. Arthur Houston lost a valuable cow Thursday. Cause unknown. Harry Murray and wife spent Saturday with her parents, Mr. and Mrs. Robert Bradford. Everett Ryle spent Monday with Lewis Stephens and family. He expects to start in a few days to Colorado. Several from here attended the play given by the Burlington Junior Class at Bellevue, Saturday night.

HEBRON.

Milton Aylor purchased a horse in Cincinnati last week. Allen Goodridge and family spent Sunday at Robt. Aylor's. Mrs. Laura Conner is spending several days with Robt. Aylor and family. Mrs. Maggie Jackson and son, of Camden, Ohio, are guests of her parents, Mr. and Mrs. Bullock. Mrs. Mad Aylor and Mrs. Lillie Conner were visiting relatives at Francesville, one day last week. Miss Harriet McGlasson, of Maclean, Ind., is visiting relatives at her place and attended church Sunday afternoon. The Hebron school will give an entertainment at the Hebron Hall Friday and Saturday evenings March 24th and 25th. Admission 35 cents each night. Proceeds for the benefit of the school.

DEVON.

Robt. Northcutt—Sunday at Benjamin Bristow's. Charles Miller, of Big Bone, was a visitor here Sunday. Bank Bristow's Coach Stallion, Stanley Wilhoit, of Covington, was a caller at this place Saturday. Mrs. Clarence Rector was the guest of Mrs. Ben Wayman, Tuesday. Mrs. Lucien Ryle and son were guests of friends in Newport, last Sunday. Clarence Rector and son, Douglas, attended the sale of David Rector. Mr. and Mrs. Ernest Hartman, of Walton, were guests of Miss Beanie West Sunday. Mr. and Mrs. Louis Lampton, of Bath Lick, Sunday with Ben, Bristow and family. Russell Miller and family, of Covington, were week-end guests at Theodore Groeger's. Miss Mary Kincart, of Ft. Mitchell, who was the guest of friends here, returned home Monday. Mr. and Mrs. Ambrose Easton had for their guests Sunday Mr. and Mrs. Rothman and family, of Covington. Mr. and Mrs. Jas. Dobbins passed thru this place enroute to Mr. Elgie Hogrefe's, where they spent Sunday. Mr. and Mrs. Jeff Hutsell had for their guests Sunday Mr. Sam Taylor, Mrs. Annie Kenney and son Roy, of Beaver. Mrs. Blanche Bagby left Saturday morning for Cincinnati, where she visited relatives, returning home Monday morning. Mrs. Lawrence Kenney and Mrs. Jeff Hutsell, of Devon, and Mrs. Annie Kenney and son, Roy, of Beaver, were shopping in the city, Thursday. Misses Leta and Julia Rice and Bro. Ryle, of Covington, came out Saturday evening and remained until Sunday evening guest of their parents, Mr. and Mrs. W. A. Rice. Ben, Wayman, who was operated on at the Booth Memorial Hospital recently, has returned home, and her many friends will be glad to hear that she is improving nicely.

VERONA.

R. O. Coffman has sold his stock of merchandise to Ben, Stanifer, of Bracht. Quite a number of our citizens attended the theater in Cincinnati last week. Jesse Wilson's little son is in a hospital in Cincinnati undergoing treatment for some ear trouble. Flooding and making plant beds are the order of the day here. There will be a big crop of tobacco grown here. Rev. G. F. Eads, of Louisville, who has been called to New Bethel Baptist church, filled his appointment last Sunday and accepted the call. Bro. Eads is a talented gospel leader. Through the kindness of our local merchant, J. N. Powers, and by direct attention of the Standard Oil Co. the Domestic Science Class of Verona High school, has received as a free gift a New Perfection coal oil stove. This is a four burner and completely equipped. Our class is excited over the prospect of becoming good house wives.

GUNPOWDER.

The sick in the neighborhood are improving. B. L. House sold to Menter Martin 19 sheep a few days since for \$15 per head. Geo. Barlow and Henry L. Tanner spent a couple of days at Spring Place, Ga., last week. Geo. W. Stevenson, lineman for the Mutual Telephone Co., was doing some work on our ridge last Monday. Bert Clore and wife visited her sister, Mrs. Myrtle Marshall and Mr. Marshall near Grange Hall, Friday of last week. Al Doty had a telephone installed in his residence the first of this week and is now in touch with the outside world. J. H. Tanner was called last Friday to Camden, Ohio, to the bedside of his mother-in-law, Mrs. Lizsie Quick, who is seriously ill at the home of her daughter, Mrs. House. A strange man created some excitement in this neighborhood last Saturday. He entered several houses and it seemed that the only thing he wanted was something to eat as he didn't molest anything outside of the kitchen. The sheriff was summoned and he was taken into custody last Sunday morning.

PETERSBURG.

The river is receding, having done only little damage. L. S. Chambers is attending auto mobile school in the city. J. W. Botts and son are building a garage for E. A. Stott & Son. Raymond Drake and wife are visiting his father and brother here. W. H. and Thompson shipped their last lot of tobacco to Louisville, Sunday. Several families have left Petersburg and gone to the country to work in farms. Mrs. L. E. Keim and Mrs. H. E. Arnold were visiting in the city, Thursday and Friday. James Lyons who is at the hospital, is improving very nicely since an operation was performed. Several of the boys from here who worked in Lawrenceburg, have quit their jobs and are ready to join the army. The Petersburg coal yards are empty. The Petersburg Co. disposed of several thousand bushels the past week. J. B. Berkshire, Gaines Wingate, B. H. Berkshire and A. C. Stott went to the city last Wednesday in Stott's auto. Mrs. Elizabeth Weindell returned last Friday. She is spending several months with her son, Dr. W. J. Weindell, in Speedway, Va. Miss Lizzie Walton assistant cashier of the bank has had charge of the bank the past week, while Mr. and Mrs. C. S. Watts were visiting in the country. Mr. and Mrs. Harry Morand and Mr. Edward Wicham were guests of their father, Eugene Wicham, Sunday. There will be special services Easter morning at the Christian church and the Endeavor societies will have charge of the services Easter night. Rev. and Mrs. R. H. Carter, Mr. and Mrs. J. B. Berkshire, R. Z. Berkshire and family, Mrs. Mary Snelling and Miss Mary Roberts, were Sunday guests of Mr. and Mrs. R. H. Berkshire. Rev. R. H. Carter gave a stereopticon lecture Sunday night at the Christian church. "A trip to California" via Santa Fe route was several side trips, was enjoyed by a large audience. The Missionary societies of the churches of Petersburg will observe week of prayer. Services will be held at the Christian church Monday and Tuesday of Friday afternoons of the week of April second. There are hundreds of thousands of "Christians" who have caught no vision of the waiting world and who have no realization of the meaning of Christ's Commission. Easter week, Passion Week, commemorating Christ's last week of sacrifice and suffering for us has been set aside as a week of Prayer and Self Denial. We are urged to use this time sacredly in strengthening our own Christian faith and in arousing others to the fact that the world needs prayer and love, the prayers and their gifts. You are urged to attend these meetings.

BIG BONE.

John Rust visited his sister, Mrs. Polk Hamilton, Sunday. A Hamilton is able to get out after several weeks' of typhoid fever. Russell Miller and family were guests of their mother here part of last week. Mrs. Velma Loomis and brother, Orville, entertained a number of their young friends Sunday. Congressman A. B. House will leave next Saturday night for Washington, D. C. to be at his post of duty when Congress convenes in special session, April 2.

PT. PLEASANT.

Gordon Souther and Mr. Fisk are hauling hay from Vasilas. Kenneth Tanner and wife are again residents of this neighborhood. Sterling House will assist John Furlong with his farm work this year. Mrs. Ottilie Aylor, of Hebron, spent last week with Claud Stephenson and wife. B. H. Tanner and wife entertained a number of their relatives last Sunday. Henry Southwell and family of near Bullittville, spent Sunday with his parents here. Mrs. Walter Gordon and family were recent guests of residents in this and Hebron neighborhoods. Pt. Pleasant S. S. will observe Easter Sunday, April 22, as Rally Day. Everybody is urged to come out and assist in the good work. Geo. Kottmeyer and wife, of Constantine, entertained Rev. Simmons and W. Riggs and wife, last Sunday. Mrs. Howard Tanner and daughter and Keene Souther and wife, were guests of the "Birth of a Nation" at the Grand last Saturday. A heavy wind and rain storm visited this section last Friday afternoon. The ground was washed badly in places but no damage otherwise has been reported.

FLICKERTOWN.

Miss Laura Smith does not improve much. The wet weather has delayed the making of plant beds. Leslie Sebree sold his old family man to a Cincinnati party. Miss Sarah Ryle was week-end guest of Miss Kathryn Sullivan. Willie White has a good work man for sale. Price reasonable. Woopler creek was higher Friday than it has been for several years. F. M. Voshell and son Leslie, visited Mrs. J. W. White, last Thursday. Bolivar Shinkle spent Saturday and Sunday with Truman Riggs below Rising Sun. J. W. White and daughter, Alice, visited his mother Saturday and Sunday, on Gunpowder. Matt Smith has sold his interest in the Barton homestead to his nephew, Grant Williamson. Those who saw "Higbee of Harboone" by the Juniors of Boone High School, pronounce it good.

IDLEWILD.

John Finn got badly hurt at school one day last week. Dr. Johnson was called to dress his wounds. Mr. J. E. Botts and sister, Miss Pearl, entertained the following guests Sunday: W. T. Ryle, Miss Artie Ryle, Mrs. Ryle and family, Mrs. Mae Sullivan, Miss Kathryn Sullivan, Miss Sarah Ryle, and Willis and Joe Berkshire. The Ladies' Aid Society of Bullittville held an all day session Wednesday at the home of Mrs. Geo. Kreylich. Mrs. W. Lee Cropper entertained Mr. and Mrs. Lacey Cropper and little daughter, Aurora Ferry at dinner, Sunday. Miss Maud Norman Asbury came down from Lexington, Friday, and remained until Tuesday with her parents, Mr. and Mrs. James Asbury. Messrs. R. E. Grant and E. O. Norman attended a meeting of the Milk Producers Association at the City Hall, Cincinnati, last Saturday. Mrs. Mary M. Terrill and daughter, Misses Nannie and Johnnie Baker, motored to Walton, Sunday, and spent the day with Mrs. S. C. Chambers.

BUCKEYE CORNER.

The Death Angel has again entered our community and taken from our midst John Elmer Rider, son of James E. and Minnie Catherine Rider, who died March 19th. Johnnie, as he was known, was born Sept. 23, 1886. He leaves behind him to mourn his loss his parents, three sisters, Mrs. Chas. Rex, of Latonia; Miss Edna Rider, of Clover, O.; and a brother, Clove O. Rider, an agricultural mother and a host of other relatives and friends. He died of paratyphoid fever, a wholly unexpected and a wholly unexpected death to the community. He had been in apparently good health and a jovial frame of mind that morning as he left home and went to Patriot. About noon, as he was at work on Mr. Rea's boat, he was taken violently sick, and all that a physician could do was to prove unavailing and just as the boat was entering into the mouth of Big Bone creek his little body was killed silently and gently. He was a good, kind boy and had done many an act of kindness and helpfulness for his friends and relatives. The funeral was held at Paint Lick Baptist church by Rev. H. H. DeLoose, who rendered a beautiful and touching tribute to the memory of the dead, after which the remains were laid to rest in the cemetery there to await the resurrection morn.

HUMS.

The backwater is falling. John Plancher made a business trip to Big Bone Springs Saturday. Arch Noel broke bread with A. A. Alpha and family Saturday. Russell Sparks and wife were guests of M. R. Rendown, Sunday. Russell and Orval Robinson were guests at T. B. Roberts' Wednesday. Mrs. Lizzie Noel made a business trip to Verona, last Wednesday. T. B. Roberts made a business trip to Patriot, the first of the week. Mrs. Lute Abdon and son visited her daughter at Hamilton, last week. Mrs. Martha Noel has returned from a visit with relatives near Beaver Lick. Mrs. W. T. Stewart, of Patriot, visited relatives here the first of the week. Charley Davis, of Walton, was visiting cattle at the West farm Saturday. Miss Mary K. Binder returned to the city Tuesday after a visit with her parents. R. Swick, John Finnell and John Binder made a business trip to Verona Thursday. Roads are almost impassable to Hebron and South Fork. Get busy and jeta have a pick. The sick are all improving, but there are some cases of measles still in the vicinity and some mumps. Mrs. Jerrie Dempsey, who fell from a horse and sprained her foot, last week, is getting along nicely and will be off her crutches in a few weeks. Mr. and Mrs. Swinke entertained the following guests with an elegant goose dinner on Sunday March 25: Mr. and Mrs. Arch Noel, Mrs. Baker, Mr. and Mrs. E. Kraus, of Big Bone, and Mrs. B. Swinke and Mrs. Penno and John G. Finnell and his best girl.

RABBIT HASH.

J. Colin Kelly, who has been very sick, is able to be out again. Large number of our people attended Jockey Day at Rising Sun, Monday. J. E. Hodges and wife and Chas. Badie, Jr., made a business trip to Burlington, Saturday. Mrs. Mary McMurray, of Rising Sun, attended the Pythian Sisters' love, Sunday. Mrs. Ella Fisher and daughter, Miss Clara, of Rising Sun, were guests of Mrs. S. W. Riggs, Sunday. Robert Roberts, agent for the Boone County Fire Insurance Co., was here Monday looking after policies. C. K. Beard and family, of Ohio county, Ind., spent Sunday with Mrs. Beard's parents, Mr. and Mrs. Noah West. Kenneth Ryle, student of a veterinary college at Cincinnati, spent Saturday and Sunday with home folks. He will graduate April 11. Lightning struck R. M. Wilson's barn, last Friday afternoon, and did considerable damage, but luckily did not set anything on fire, although it went through a pile of loose hay. Cleveland Baker and Miss Mary Sullivan, of Gunpowder neighborhood, were married at Rising Sun, last Monday. The bride is a daughter of the late Judge E. H. Baker and is a prosperous young farmer. The bride is the oldest daughter of Mr. and Mrs. Ed. Sullivan and is an accomplished young lady, well known and well liked. Their many friends extend best wishes.

ERLANGER.

Rev. Elmer Lucas and family spent last Sunday with friends in Florence. Mr. and Mrs. C. W. McCollum entertained Sunday for the Rev. W. B. Garriot, of Walton. The parcel post and box social affair, the members at the Elsinore Chapel last Saturday was very much a success. Misses Margaret Terrill and Alice Walton spent the week-end with Mrs. Ed. Sullivan and family at their home, Lexington. Mr. and Mrs. J. W. Shearer have sold their place and will move to the Robt. Dulany home, recently vacated by Joseph Hartke, who has moved to his new home on Turkey Foot road. Mr. and Mrs. Chester Davis entertained Sunday for Miss Lizzie Graddy. Other guests were G. C. Graddy, of Petersburg, and Mrs. J. T. Gaines, of Idlewild and Mr. and Mrs. Courtney Walton.

Appointed Veterinary Inspector

A Washington dispatch dated March 26th, announced the appointment of Dr. J. W. Shearer, of Bullittville, this county, a veterinarian in the Bureau of Animal Industry, Department of Agriculture. His headquarters will be in Chicago. The position is one of civil service. The appointee is a son of Mr. and Mrs. H. G. Cropper. The young man has many friends who congratulate him upon his appointment.

Public Sale!

To close out a partnership, we will offer for sale at B. C. Moore's, two miles south of Beaver Lick, Boone county, Ky., on the Beaver and South Fork turnpike.

Saturday, March 31, 1917

beginning at 10 o'clock a. m.

A herd of fine Jersey Cows and Heifers—24 young Cows and 13 Heifers, all bred and raised on the farm from our best milkers, and by a No. 1 Bull.

1 registered Bull—a fine one; 1 yearling Bull.

A fine opportunity to get some good Cows. Six of these Heifers will be fresh by day of sale, and others in April and May.

One 2½ horse power Gasoline Engine and Blue Bell Cream Separator equipped for hand or power, Babcock Tester.

Six brood Sows, eligible to register, 3 of which will farrow before day of sale, and 3 in May, 9 Shoats.

Three/draft Mares, 2 in foal.

Wagon, Riding Cultivator, I. H. C. feed Grinder and Cutter, one 2-horse Corn Drill and other articles too numerous to mention.

TERMS OF SALE.

All sums of \$10 and under, cash; on sums over that amount a credit of nine months without interest will be given, purchaser to execute note with approved security before removing property.

C. C. SLEET & MOORE BROS.

W. B. JOHNSON, Auctioneer.

LUNCH ON THE GROUND

Big Corn Crop Needed.

There ought to be a big crop of corn produced this year. The present and prospective shortage of the winter grain crops makes a big corn crop almost essential to well-fed live stock and people in general. We would not advise any reader to plunge into corn any more than any other crop. Readers to give the corn crop the best possible show this year and to endeavor to produce an abundant supply for their own needs and at least a little surplus for sale if this is at all practical. No reader should forget however, that corn is a rich land crop and that it seldom pays to plant it on poor ground. Corn will remain our greatest crop, but we are not as dependent on it as we once were. Land that cannot reasonably be expected to produce twenty-five bushels of corn to the acre had better go into soy beans.—Southern Agriculturist.

The Wool Pool a Good Thing.

The wool growers of Boone county are to be congratulated that it is to their advantage to pool their wool which is sold by the lump while the delivery is made by the individual owners who receives their money at the time of delivery. The cost of conducting the pool is merely nominal, and there are no unnecessary delays in the transaction of the pool's business and no big salaries to pay.

A Big Land Deal.

Last Tuesday the Beemon Bros. sold to John V. Ryle, three 63 acre farm on the Florence Pike, and a half out on the Florence Pike. The consideration is not known, but understood to be close to \$5,000. On this farm is a good, two story residence, good tenant house and many other necessary out buildings, all in good repair. Beemon Bros. bought the farm of W. T. Davis about two years ago.

The Mercury Seesawing.

The mercury went up to 74 Monday and men were going about in their shirt sleeves, but Tuesday it fell to 41, and these men were wearing their overcoats, and 4:30 p. m. snow was falling, Wednesday dawned bright, some ice being formed Tuesday night.

Tobacco Brought Big Money.

According to the best figures obtainable Boone county's 1916 crop of tobacco brought the growers \$250,000 while the speculators pulled down a good, liberal commission.

Farmers are Behind with Work.

Very little plowing has been done and a small per cent of tobacco beds have been sowed, while encouraging in present crop conditions.

Putting His Wireless in Shape.

Harold Conner is getting his wireless apparatus adjusted to be ready to capture some of the war messages that may pass this way in the near future.

Next Monday is horse show day

in Burlington, but indications are it will be a small affair again this year. Trot out your good horses boys, and let the people of the county look them over. Everybody is talking war, and by the way it looks as if much like this country will be taking a hand in the world conflict in a few weeks.

Prospects of getting \$10 a head

for lambs and 50 cents a head for wool make flock masters feel very kindly toward their sheep. Not many of the Burlington gardeners got their potatoes planted during the dark of the moon in March.

"SPEECH CORRECTION."

Everybody, even including those who do not stammer, knows the inconvenient and disagreeable moments passed with those afflicted with speech halting. But that this inability to get one's ideas "over" has a great economic disadvantage is a quite modern way of looking at it. Dr. Ira S. Wile of the New York Board of Education, believes that "stuttering" causes great losses in this country, says Boston Post. "The economic cost of speech defects," he says, "is reflected in the limitations of occupations that are available for individuals who have speech deficiencies. The more pronounced the defect the more limited the field of activity. The actual cost of speech defects to society cannot be estimated at the present time in dollars and cents. The limitation of self-expression is a loss to the individual and to the community. Speech defects which interfere with the fullest expansion of consciousness along the lines of culture and industry are anti-social. They decrease the social worth of the individual and rob the community of the full fruits of human mentality. They retard and pervert economic power." Doctor Wile adds that stammering is always curable, and he is firmly of the opinion that the state or community ought to compel such cure in every instance.

When men come to be renters in habit, that is, when they grow willing to depend on some other hand to provide and maintain their homes for them, society loses much of that individual independence; that personal initiative, that self-reliance which differentiates a great people from a mere human mass. For two hundred years America has led the world in individual initiative, says Columbus Dispatch. The fathers pulled out of the European huddle for the sake of standing alone, and when they reached America they had to stand alone. However we may excuse ourselves for inclination toward the easy comfort of the quarters, it must still be admitted that our inclination is a symptom of a phase of social degeneracy, a drift toward the huddle, the beginning of an abandonment of that vitalizing independence of which the onward, detached home is pre-eminently the symbol and support.

The formidable peak known as the Matterhorn long remained unconquered. No less than eight attempts were made by Edward Whymper alone. The ninth was successful, but was marred by a terrible catastrophe. While descending, soon after leaving the summit, Hadow, one of the party, slipped, dragging four others with him. The other three were well placed and managed to save themselves by holding firmly to the rocks. The rope between them, however, broke, and they saw their unfortunate comrades disappear over the edge, to the depth of one mile to the glacier below. This was two generations ago. Now scarcely a summer day passes in times of peace when a dozen mountaineers, men and women, do not reach its summit.

Safety on the public streets depends upon a fifty-fifty division of watchfulness, courtesy and responsibility between the driver and the pedestrian, says Cincinnati Times Star. Even under such an ideal arrangement accidents will occur, for those are times when human care will not avail. But, to quote a New York policeman, it is "the man who waits until he is in the middle of the street before he tries to get across" who is responsible for many a needless casualty.

Sometimes a man can give his soul a pretty good square meal by slipping a dollar to a widow with seven children, and you can hardly get him to part with it; but when old stomach signals to him he comes across with \$4 and regrets that he can't hold any more.

The automobile takes first rank as the greatest manufacturing industry in the United States, as shown by the latest figures from Washington. This is the same contraption that was a "fad" eight or nine years ago.

Help mother do the housework is the slogan of the Homemakers' Guild of America, which is the case in most families. Mother does the work while the rest of the family furnishes the criticism.

It takes mighty close listening to catch the cheer for peace and world disarmament that are going up from munition makers, armor plate officials and gun builders.

There was more for during 1918 than any previous year, according to federal statistics. The statistics did not refer to Washington, D. C. only.

The new half-dollars wouldn't stick, says an exchange. We'd like to have had enough of them to have discovered that fault ourselves.

European capitals are frowning upon an evening dress. Another credit mark for the war!

DAIRY**BALANCED RATION FOR COWS**

Feeding Should Be Governed by Animal's Capacity to Produce Milk—Good Rules for Winter.

The feeding of the dairy cow should be governed by the cow's capacity to produce milk. By keeping a daily record of each cow's production, the skillful feeder soon finds that some cows in the herd respond to an increased allowance of feed and return a good profit on it, while others are limited in milk capacity and overfeeding them is unprofitable. Profitable feeding requires a thorough knowledge of the individual cows as well as of the values of feeds.

The following general rules will be found invaluable as a guide for winter feeding by the inexperienced feeder:

Mature Ayrshire Cow With Record of 11,708 Pounds of Milk and 536 Pounds of Butter.

ter feeding by the inexperienced feeder:

1. Under most circumstances the cow should be fed all the roughage that she will eat up clean, adjusting the grain ratio to the milk production. Only when the cow tends to become overfat should the quantity of roughage be restricted.

2. A grain mixture should be fed in the proportion of 1 pound to each 3 pints or pounds of milk produced by the cow, except in the case of the cow producing a flow of 40 pounds or more, when the ration can be 1 pound to each 3 1/2 or 4 pounds of milk. An even better rule is 1 pound of grain each day for every pound of butterfat produced by the cow during the week.

3. Feed all the cow will respond to in milk production. When she begins to put on flesh, cut down the grain.

TREAT CALVES TWICE YEARLY

Don't Wait Until Animals Commence to Die of Blackleg Before Administering Treatment.

(By G. H. GLOVER, Colorado Agricultural College, Fort Collins.)

Calves should be vaccinated for blackleg twice a year, making it a regular chore, and do not wait until they begin to die before getting ready. The period of ordinary susceptibility ranges from three months to two and one-half years. Most of the vaccine on the market is reliable and the unsatisfactory results are usually due to carelessness on the part of the farmer in not following directions in using it.

The agricultural college distributes the government blackleg vaccine free to farmers of Colorado. Orders for vaccine will not be filled promptly, however, unless the applicant states that he has a vaccinating outfit, which is in this form: A pellet injector will not do, neither will a hypodermic syringe, without the remainder of the outfit, for placing the vaccine in solution.

HIGHER QUALITY OF BUTTER

Article Made by Farmer Should Top the Market—Creamery Has Little Control of Cream.

There is no reason in the world why the farmer cannot make butter of higher quality than that made at the creamery, according to N. E. Olson, instructor in dairy husbandry in the Kansas state agriculture college. "The farmer can keep his cream in excellent condition," says Mr. Olson, "while the creamery man has little control over the cream he buys—hence the farmers' butter should top the market."

"The first step in the making of good butter is the production of clean milk. If milk contains no putrefactive and gas-forming bacteria, butter can be produced which will be free from odors and which will not putrefy, if proper precautions are taken with the cream and with the butter after it is churned and packed."

PUREBRED BULL IS FAVORED

Keystone of Herd Improvement Is in Swatting Scrub Sires—Specialization Is Basis.

The keystone of herd improvement is in swatting the scrub and using a purebred sire. The bull is more than half the herd, for with good judgment in mating and culling, all his progeny will "take after father" in a few generations.

The purebred makes better gains for the amount of feed consumed because it has been developed along lines of specialization. Specialization is the basis of profit in every industry. The more highly specialized a machine or an animal, the more efficient it is and the easier it meets competition and success rests upon this ability to compete.

FARM POULTRY**EGG-LAYING AGE OF PULLETS**

Light Breeds, Such as Leghorn, Minorca, Hamburg and Ancona Mature at About Six Months.

Different breeds mature and commence laying at slightly different times. In general, under a utility classification pullets of the egg breeds, such as Leghorn, Minorca, Hamburg and Ancona, mature early and begin to lay eggs at four or five months under favorable conditions. Where the conditions are not favorable to induce early egg-laying, six months is probably a nearer average for the time to commence laying. Meat types, such as Brahma, Cochins and Langshans, are slower in maturity, taking six to eight months or longer for a pullet to get into egg-laying condition.

General purpose types, such as Plymouth Rock, Wyandotte, Rhode Island Red, Orpington and Dominique, mature more quickly than those of the meat type and the pullets may be expected to lay at from five to six months, although some may mature at four and a half months. There are cases on record where individuals of the early maturing egg breeds have begun to lay in about three months, although this is in special cases.

CHANGE MALE BIRDS YEARLY

Most Successful Breeders Do Not Advocate Practice—Immature Fowls Not Desirable.

Rhode Island Red.

Many people get the idea that it is always best to change male birds every year. The most successful breeders do not advocate this yearly change. Good male birds may be kept profitably for two or three years. The use of immature males eventually will result in reducing the size of the stock in general.

CARE FOR DROPPING BOARDS

Regular Attention Should Be Given and Accumulation Avoided—Clean Once Every Week.

The dropping boards should have regular attention. It will not do to let the droppings accumulate. In warm weather they should be cleaned off three times a week, and at least once a week in cold weather. A short-handled hoe is fine for cleaning the dropping boards. They can be scraped off into a tub or box in a very short time, with no very great amount of work.

KEEP POULTRY IN CONDITION

No Economy in Feeding Hens Less Than They Require—Material for Making Eggs.

There is no economy in feeding hens less than they need, or in feeding on only one or two grains or kinds of feed. A variety and plenty of it, is necessary to keep the fowls in good condition and provide the material from which to make eggs.

QUARTERS FOR THE PULLETS

Best to Keep Them Separated From Old Hens and Feed Them for Egg-Laying Season.

It is usually advisable to keep old hens and pullets in separate quarters and feed them separately because the pullets often need more food to finish their development and prepare for the egg-laying season.

SISTER BELL FIXES UP

By JANE OSBORN.

Sister Bell knew when she started out to the city to "fix things up" in Benson's apartment that she would get in in some way, but it was really an easier matter than she had hoped.

"In Mr. Benson's sister, and I want keys for his apartment," she told the woman who came up from the basement in answer to the ringing of the bell marked "Janitor." "I've come in in his absence to fix his place up. He forgot to send me the keys."

Of course Benson had never had any intention of sending the keys, not remotely dreaming that any of "the folks from home" would make him a visit in his new city abode. He had gone away on an extended business trip and Sister Bell had chosen the time as opportune for her fixing-up process.

Fortunately the janitor's wife was new and green and unsuspicious. "It's the third floor front," Sister Bell told her, and that was enough. She got the keys and mounted the stairs to the wee three-room-and-kitchenette apartment.

The place was small—disappointing, by so—she felt at first, but at least it was full of conveniences. There was one bedroom just large enough for a three-quarter bed, a chair and a bureau. No curtains hung at the window—how Sister Bell rejoiced at her scheme when she saw all these omissions. The only pictures to be seen were two that stood on the bureau—her own and another, "Benson's latest girl, of course," divined Bell. Though but eight years older than her twenty-two-year-old brother, she felt and acted the mother to him.

Sister Bell had arrived at ten in the morning. At four she had her task mapped out and went in search of meat and drink for her solitary supper. With arms full of bread and lettuce and eggs and milk bottles she made her way back up the two long flights of stairs for the third time that day. It was on the last flight that she turned and looked back at the man who had been following her up the stairs. She dropped the loaf of bread and he picked it up for her. Then while he was still standing holding it for her, she opened the door of the apartment and stood to take it from him.

There was a look of momentary surprise in the face of the man which was explained to Sister Bell's satisfaction when he said: "So you are Benson's sister. I have seen your picture—in his room. He's a great boy and I have been big-brothering him around a little." At this Sister Bell shifted some of her parcels, held a hand out to him in gratitude and they were friends. "I've been fixing up his place," she said. "Since the poor lad has to live in such close quarters I might as well have it cozy. For instance, you will find in a sometime this evening and tell me whether it is progressing to suit a bachelor." The newcomer promised and fumbled in his pocket, then turned and went downstairs with the excuse of having mislaid his key and needing to get a duplicate from the janitor.

That evening Martin Stowe kept his promise and made his visit of inspection.

Every evening, and sometimes in the morning besides, Mr. Stowe made at excuse to come and see how the work progressed. Sometimes it was also to borrow one of Benson's books, some times even to get something out of his trunk that he had left in Benson's dining room, and as the dining room shaped itself with inexpensive but effective furniture he took the trunk back into his own narrow back apartment—a mere bedroom with a bath. It was his wish to live in cramped quarters, he told Sister Bell.

The day that Benson came home Mr. Stowe met him at the station. He asked Sister Bell to go with him but she said she would rather stay home and have the kitchenette dinner ready for them on their return. A week had passed since she had come and there had been many changes.

When Benson and Stowe returned from the station the explanation was not long in coming. Of course it hadn't been Benson's apartment at all. It was Stowe's, and of course, Stowe should have told Sister Bell to begin with. But, manlike, he had not wanted to tell Benson's sister that the brother was living in a one-room back apartment when the sister was disappointed at the smallness of the larger one in the front.

When he realized what Sister Bell was really doing he didn't want to disappoint her. He hoped somehow that by the time Benson came back he would be able to afford the larger apartment.

"And then I thought that perhaps Sister Bell might consent to stay here with us," he said. "What a trio we would be! We'd eat breakfast breakfasts with us, too, wouldn't we?"

Sister Bell was still in a daze, rehearsing every event of the wonderful days to make sure that she had not at some time been very blind not to see the situation. "But I was so sure," she said. "Why, just seeing my picture on Benson's bureau made me sure. And the other girl—I thought that was Benson's new girl!"

"It is," Stowe assured. "It's his girl and my kind sister. The duplicate is on Benson's chest of drawers. But Benson had put one picture of you, so I took that. That was before I had seen you, and I knew even then."

(Copyright, 1917, by the McClure Newspaper Syndicate.)

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power, strength—extra capacity for your excess load. And it saves repair and upkeep expense with its long-stroke truck motor—nickel steel construction—deep channelled pressed steel frame—every supporting part a forging or pressed steel—Republic Torbenston Internal Gear Drive—heat treated, drop forged 1-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750.
1 1/2 Ton Truck \$1375. 3 Ton Truck \$2630.

BOONE HIGH SCHOOL

**all Team Will Open the Season
at Home Today, with Wood-
ward of Cincinnati.**

The local high school from all appearances will have the best baseball team in its history. Six members have played together for four years, and the coach, Mr. H. H. Wingers, will put up an article of faith that should carry them through to victory in a majority of the games. This year the whole team will have been drilled and drilled hurriedly, one that is superior in many ways. A hardy manager, Brown, the wife and sons have been arranged to play in the games. The boys have even played by Boone High any department of athletics. The first team to be met will be the team from Cincinnati. The school always has ranked high among the schools of Cincinnati, putting out good athletic teams. The team from Cincinnati is the champion of this year. If one Hi wins this game it will mean that we have a team second in this part of the state. Those who are interested in the game are: Booneburg Hi. one with Newtown, two with Williamstown and three with the Ohio Mechanical Institute. The game will be open today, April 28, with a crowd Hi as the attraction. It will not fail to see this game. Come and see the game. The game will be held at 3:30. Admission free. The game will be held at 3:30. Admission free.

Following is the complete sched-

California Letter.

Santa Rosa, Cal., March 23.—A battle between a giant buzzard and a 15-year-old boy clinging to a willow root four hundred feet up a straight ledge of rock was won by the boy, who is now recovering from an experience that would have killed him.

The boy is Hans Mierbach, and he hung high above a pile of jagged rocks for four hours. He was a weak, nervous, pale-faced, pale-skinned, nervous little fellow, and he fell over. Twenty feet below he caught a root and hung on. With his hands he held on to the left wrist to the root and then wrote a note to a boy friend, bidding him farewell and saying that no one was responsible for his predicament.

Just as he finished writing the giant buzzard came down upon him, and he started to break his head and body. The hungry bird inflicted deep wounds in the boy's chest. Young Mierbach fought the buzzard for an hour and a half. Over an hour. He had been a tor-

Spring is a Dangerous Season. Spring is the dangerous season for the beekeeper. He must overcome by feeding with the division board feeder. Feed early in the spring before warm weather comes. Keep the colonies clean, bright and in a box on a good stand. The bees will shed, out of the reach of suckers. For the bees to work on every flower, the pollen must be plentiful. Collect in place of the rye flour. This will help to prevent spring diseases. The bees will be busy in the March, April and May. The bees that are subsistent in producing strong colonies and abundant surplus of honey. Irons, Cut out drone comb with the bees.

Is in a Critical Condition.
Clinton Gaines, who, about two years ago had one of his feet amputated as a remedy for an at-

ack of gangrene, had his other
not amputated about two weeks
ago for the same purpose, but at
last accounts he was not doing
very well, and because of his age
and emaciated condition he worst
s feared. It will be remembered
that Mr. Gaines was first attacked
while looking after his real estate
in Texas, and was in a very it

condition when he reached Louisville, the home of his daughter, Mrs. W. M. Randall. Mr. James has not been able to visit his county since he returned to Louisville.

and performing similar farm operations according to superstitious signs" or according to the moon are not based on facts, according to the College of Agriculture. This statement is made following inquiries and the annual publication of such information in numerous other printed matter widely distributed during the year.

and spring months

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. Kate B. Rice of Georgetown spent the past week here with relatives and friends.

Eugene DeMoisey, of Ludlow, spent the first of the week here with relatives and friends.

Seed Corn For Sale—Premium yellow seed corn for sale, 25 per bushel, John L. Jones, Landings, Ky.

Mrs. M. V. Cline of Rogers Gap, spent the past week here with her parents Mr. and Mrs. P. C. Youell.

Lost—Feather Box, in colors, 12, Walton, Return to owner Mrs. Neander Stephens or leave with Mrs. D. M. Bagby.

Perry B. Gaines of Carrollton, was the guest of his cousin W. Lee Gaines and family last Saturday and Sunday.

Mrs. E. P. DeMoisey and daughter Miss Helen of Ludlow, spent the past week here with her sister Mrs. J. W. Houston.

For Sale—Holsteins, Two high grade male calves and one heifer Address or call at farm, Chas. H. Young, Elliston, Ky., R. D. 2.

Judge J. G. Tomlin returned last Friday from Indianapolis where he underwent an operation for the removal of affected tonsils, and he is now much improved.

A. M. Edwards is remodeling his stable for the purpose of opening a garage, the livery business being a back number and the automobile traffic growing constantly.

Miss Marie Menefee of Covington, spent from Friday until Monday here, guest of Mrs. C. C. Rose Gaines, who accompanied her home for a short visit.

House For Rent—Five room two story house on High Street; cellar, coal house, meat house, large garden, grape arbor; house electric lighted, Call on Alex Crisler, Walton.

John Carroll Hamilton of Warsaw, spent Sunday here, guest of his daughter Mrs. A. B. Tompkins, enroute to Roanoke, Va., on a visit to his daughter Mrs. Neils and family.

Miss Lottie Williams who is attending college at Georgetown, spent part of the past week here with her parents Mr. and Mrs. J. E. Williams, having a vacation at the college.

Samuel S. Spradling has purchased the farm of W. T. Turner near Crittenden for \$4,500, and the Rose farm adjoining, getting immediate possession the Mr. Turner will continue to reside on the farm.

W. Delaney Johnson who went to Covington some time ago accepted a position on the street cars returned last week and will not be as the street car work was not congenial and affected his nerves.

Rev. A. K. Johnson and family moved to Ghent last week where he has taken charge of the Baptist church as pastor, and they are well pleased with their new home, Rev. Johnson will make them a fine pastor.

The members of the Walton Christian church contracted with David Wolfe of Georgetown, Monday night to erect their new church building at a cost of \$11,000, the work to begin at once.

It will be a very handsome structure and will be erected on the lot where the parsonage is located, nearly opposite the Baptist church.

The sale at the farm of Joseph Readnow last Thursday when he sold some of his surplus stock was only fairly attended and only moderate prices prevailed. None of the jacks or ponies were sold. There seems to be an impression that Mr. Readnow can go to give up his live stock business and move from his farm, but such is not the case as he intends to remain and continue the live stock breeding.

Walton Lodge, K. of P. was represented at the big meeting at Burlington last Saturday night by S. W. Beavary, W. O. Rouse, W. D. Kennedy, W. E. Dixon, Carl Neumeister, John Thomas, E. Curley and Bruce Davidson. They report an elegant time and excellent work by the team from the lodge at Newport, about a dozen candidates receiving the degrees. Burlington people always do the clever thing and on this occasion they surpassed themselves.

N. C. Ridgeway, of Falmouth, spent Saturday here attending the closing sale at the Walton loose leaf market. Mr. Ridgeway has been prominently connected with the tobacco trade for many years and was the owner of the loose leaf warehouse at Falmouth which was destroyed by fire a couple of months ago. He was accompanied here by J. Curry, a buyer who has been buying on this market for the Lorillard Tobacco Company and one of the best buyers on the market and very popular with the trade generally.

Last Sunday evening about 7:30 o'clock, the fast southbound train on the Q. & C. Railroad struck a team car on the track near the Southern depot and hurled it through the window of the residence of Harry Simmons, striking Mrs. Simmons who was sitting on a piano stool playing the piano. It knocked her almost insensible, and Dr. J. W. Daugherty was called and administered the necessary medical attention and found her suffering from internal injuries and severe nervous shock. She is now much better and no serious results are apprehended. It is thought that other persons may have been placed the milk can on the track or the wind blew it there, but the distance it was

thrown through the window was all of 50 feet and that will give a slight idea of the force with which it was thrown.

A Comic Opera—Prince Charm or the capture of the Queen of Hearts will be presented at the Verona auditorium Tuesday evening, April 10th, under the direction of Mrs. Louise Blessing. The plot, "Prince Charm" has a dream; he imagines himself in Cloudland. He falls in love with a beautiful girl whom he sees coming down "The Milky Way" in an auto. Unfortunately Jack and Jill stumble in the path of the car and his "Dream Girl" is upset; he finds she is a maiden and determines to win her. He engages the services of Jack and Jill. Indians are introduced to frighten the maid and induce her consent. Next a Valentine party is planned; the valentines bind her with ribbons. She surrenders and confesses that she has always been her intention to marry the Prince.

The Walton Loos' Leaf market held its closing sale last Saturday when about forty thousand pounds of tobacco was sold at fifteen dollars and 52 cents. The market showed as good tone as at the opening sale and in fact a number of the purveyors declared it to be the strongest market of the season. The sales aggregated 2,500,000 pounds and averaged in the neighborhood of sixteen cents per pound. All of the tobacco in this quarter has been marketed with the exception of a few thousand pounds that had not been stripped in time for the closing sale. The management of the warehouse has given universal satisfaction to both buyers and sellers, and the buyers frequently asserted that this market was one of the best in the State. Some alterations and improvements will be made for the next season's business at the warehouse so as to handle the tobacco with better facilities and if justified three sales per week will be held.

J. Wm. Houston who has been ill with a stomach affection for several months past, died at his home here Sunday afternoon. His condition had improved somewhat and he was entertained of his recovery, but he suddenly took a fainting spell about 5:30 and passed away in a few minutes. Mr. Houston had been a very robust man up to about a year ago when a stomach affection developed and he has steadily declined since. He was born and reared near Walton, and for about 31 years has been connected with the Louisville and Nashville railroad and was the superintendent of the bridge and carpenter work between Cincinnati and Louisville at the time of his death. He was about fifty-five years old and leaves a wife and three children, Harry, Bessie and Mary. His wife, Mary, was a most kind and affectionate husband and father and their hearts are broken over his death.

Mr. Houston was a good citizen, a kind and obliging neighbor, and had a host of friends who esteemed him for his many excellent qualities, having a kind and cheerful disposition, and being public spirited was always willing to lend a helping hand to every worthy object. His death brings sorrow to many hearts. The funeral took place last Wednesday from his late home, Rev. E. C. Lacey of the Christian church paying a beautiful tribute to the memory of the deceased after which the Masonic order of which he was a member, being a Master Mason and Royal Arch Mason, took charge and rendered their ritualistic service to the dead, the body being laid to rest in the Baptist cemetery. A large number of sorrowing friends were present.

Plans for raising and training an army of 1,200,000 men were to be laid before the House Military Committee yesterday by the Secretary of War. The first step will be to recruit the regular army and national guard up to war strength, when the country will have 700,000 fighting men in the field. Then the call to the colors under the Universal Liability to Service Bill will bring an additional 500,000 men, apportioned among the various states. Mobilization of the naval militia and naval reserve is the only big move that remains to be made for the Navy Department in preparation for war.

As the Recorder goes to press looking for another bad spell of weather keeping up on this part of the country.

Mr. and Mrs. L. C. Hempling announce the arrival of a son on March 10th, weighing eight pounds, Vaughn Carlton.

"Through Five Republics on Horseback" is the name of Dr. Ray's lecture at the Court House Saturday night April 10th.

A large number of persons called in last Monday and left with support another year.

Harmon Jones and wife visited relatives in Petersburg last Sunday, making the trip in their machine.

Uncle Sam will be wrapping to beat the band in another month unless all signs fail.

You will miss a good lecture if you fail to hear Dr. Ray Saturday night.

For Sale.

50-light Pilot Gas Machine for light and cooking purposes, complete, good as new, pipe and connections, only used a short time, price reasonable. Address T. J. McNEAL, 24 Canal street, Ludlow, Ky. ap12

Attractive Designs In

Wall Paper (Properly Priced)

It's like trying to paint the rose to try to describe in cold type, the many pretty and dainty patterns awaiting your selection. You must see them to appreciate their easy and distinctive effect.

The three sample books, which arrived just a few days ago, embrace every new idea from the simplest to the most elaborate and the only difficulty you will have will be in deciding which is the prettiest.

OUR PRICES

EASILY STAND COMPARISON

We can quote you as low as \$1.25 per room. But in comparing prices we urge you to compare the cost on the complete job so as to include the cost of the border.

May we expect you this week?

L. A. BENTLER, DRUGGIST

Eranger, Kentucky.

Elected Officers.

Boone county Wool Growers Association met last Monday in Burlington and elected the following as officers:

J. H. Stevens, President.

L. T. Clore, Secretary.

Geo. McGlasson, Solicitor.

C. C. Roberts, Treasurer.

J. W. Conner, Editor.

Rev. Chas. H. Clendenen, Chaplain.

W. E. Walton, W. B. Arnold, Joe W. Cleck.

These officers have wool should receive one of the soldiers and pool at once as the pool will close May 10th.

This association handled 32,300 pounds of wool last year, which was sold at 42 1/2 cents per pound, bringing over \$13,500, at a cost of handling same of one-third of a cent per pound.

L. T. CLORE, Secty.

The press report of President Wilson's "state of war" message reached Berlin at 10 o'clock last Monday. It is declared there that there would be no change in the German attitude even if Congress adopted the President's views.

Germany will not declare war nor take any step to wage war against the United States.

The submarine war will be continued as it has been conducted since February 1, but this, declare the officials, is not directed more against the U. S. than any other neutral.

It is also declared that there will be no change in the treatment of American citizens in Germany, who now have the same freedom as all other neutrals. But Germany expects that the United States will continue the same treatment of Germans in that country.

For Sale—Jersey bull from a good line of butter makers. This registry is good. Also a nice calf. Price reasonable if taken at once. Address either W. T. Conner, Grant, Ky., R. D. 1, or Ben Harris, Rising Sun, Indiana.

C. G. Riddell, of Rabbit Hash, spent Wednesday in Burlington.

Don't Depend on the Uncertain Hen

Many a housewife's high hopes have gone glimmering, just because an erratic Hen laid eggs when she pleased, and eggs were almost due to hatch. That doesn't pay.

BUCKEYE INCUBATOR.

Don't buy a hen that lays eggs. Buy a Buckeye incubator. The Buckeye incubator is a reliable, sure, and sure thing to lay eggs. It is a sure thing to lay eggs. It is a sure thing to lay eggs.

Seven sizes 10 to 20 and sold as low as \$8.50.

Come in and get a copy of "The Verdict of the Buckeye," backed by affidavit. Then you'll know.

Incubators \$8.50 and up—freight paid.

Now is the Time to spray your trees with Scalecide. The world's best dormant spray. The great tree saver. Write for booklet. It's free.

Good Seeds—Good Crops, we handle only the best field and garden seeds. All sold in bulk at saving prices. Write for catalogue of garden seed. Let us quote you on high grade Timothy, Clover, Salspin, Allalfa, Red Top, Seed Oats, etc. A Postal Card May Save You Dollars.

GOLDEN BLEND COFFEE. Grows more popular every day. Our sales increase, our friends increase. Send a dollar bill and we will send you 4 lbs. by mail. Do it now.

ARCADE FLOUR—The World's whitest and best Winter Patent.

KANSAS CREAM—The Perfect Bread Flour, makes more and better bread. Ask those who use it. They know.

GROCERIES FLOUR SEEDS MEDICINES

19-21 PIKE ST. 18-20 W. 7TH ST.

COVINGTON, KENTUCKY.

Why Not Buy a Buckeye Incubator and raise chickens the modern way? Why let a hen set three weeks and then run 6 to 8 weeks with a litter of chickens and come through that 10 weeks and hatch the chickens in a Buckeye and raise them in a Buckeye Brooder. Say you had 10 hens engaged in hatching and raising chicks, that equals 100 a week at the best laying season which would easily equal 40 to 50 dozen eggs.

THINK IT OVER.

Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their superiority over all other makes. More sold than all others combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

 post at \$1.00 for 15.

MRS. JAMES W. HUEY,
 Union, Ky. R. D. 1.
 Bath phones. 601 and 4.

DR. T. B. CASTLEMAN,

DENTIST
 Will be at Burlington every Monday
 prepared to do all dental work—
 painless extraction, bridge and plate
 work a specialty.

All Work Guaranteed

Bentler's Economy Drug Store.

Attractive Designs In Wall Paper (Properly Priced)

It's like trying to paint the rose to try to describe in cold
 type, the many pretty and dainty patterns awaiting your
 selection. You must see them to appreciate their easy and
 distinctive effect.

The three sample books, which arrived just a few days
 ago, embrace every new idea from the simplest to the most
 elaborate and the only difficulty you will have will be in
 deciding which is the prettiest.

OUR PRICES EASILY STAND COMPARISON.

We can quote you as low as \$1.25 per room. But in
 comparing prices we urge you to compare the cost on the
 complete job so as to include the cost of the border.

May we expect you this week?

L. A. BENTLER, DRUGGIST Erlanger, Kentucky.

Elected Officers.

Boone county Wool-growers As-
 sociation met last Monday in Bur-
 lington and elected the following
 as officers:

J. H. Stevens, President.
 L. T. Clore, Secretary.
 Solidists,
 Geo. McHasson,
 C. C. Roberts,
 J. W. Conner,
 Geo. Powers,
 W. E. Walton,
 W. B. Arnold,
 Joe W. Cleck.
 Those who have wool should see
 one of the solidists and pool at
 once as the pool will close May
 10th.
 This association handled 32,300
 pounds of wool last year, which
 was sold at 42¢ cents per pound,
 bringing over \$13,000, at a cost of
 handling same of one-third of a
 cent per pound.
 L. T. CLORE, Secty.

The press report of President
 Wilson's "state of war" message
 reached Berlin at 10 o'clock last
 Monday. It is declared there that
 there would be no change in the
 German attitude even if Congress
 adopted President Wilson's views.

Germany will not declare war nor
 take any step to wage war
 against the United States.
 The subject of war will be con-
 sidered as it has been conducted
 since February 1, but this, de-
 clare the officials, is not directed
 against the U. S., than any
 other neutral.

It is also declared that there
 will be no change in the treat-
 ment of American citizens in Ger-
 many, who now have the same
 freedom as all other neutrals. But
 Germany expects that the United
 States will continue the same treat-
 ment of Germans in that country.

For Sale—Jersey bull from a
 good line of water makers. His
 registry is good. Also a nice
 cow. Price reasonable. If taken
 at once, Address either W. T. Con-
 ner, Grant, Ky. R. D. 1 or Benj.
 Harris, Rising Sun, Indiana.

Don't
 Depend
 on the
 Uncertain
 Hen

Many a housewife's high hopes
 have gone smothering, just because
 an erratic hen went to work hunting
 when thirteen costly eggs were al-
 most due to hatch. That doesn't
 pay, does it?

BUCKEYE INCUBATOR.

on the job and it reeled. The Buckeye
 incubator, for 14 years, and it stands
 strong as a rock. The Buckeye
 incubator is the only one that guar-
 antees the Buckeye to hatch more and better chicks
 than any other incubator, regardless of price.
 Buckeye chicks, 10 cts to 100, and sold to you
 as \$1.00.

Come in and get a copy of "The Verdict
 of the Buckeye" backed by affidavit. Then
 you'll know.

GROceries, FLOUR, SEEDS, MEDICINES
 19-21 PIKE ST. 18-20 W. 7th ST.

COVINGTON, KENTUCKY.

Why Not Buy a Buckeye Incubator and raise chickens
 the modern way? Why let a hen set three weeks and then
 run 6 to 8 weeks with a litter of chickens and come through
 with a half dozen chickens, when you could keep her laying
 that 10 weeks and hatch the chickens in a Buckeye and
 raise them in a Buckeye Brooder. Say you had 10 hens
 engaged in hatching and raising chicks, that equals 100 a
 week at the best laying season which would easily equal
 40 to 50 dozen eggs.

THINK IT OVER.
 Incubators \$8.50 and up—freight paid.

DeLaval Cream Separators have demonstrated their su-
 periority over all other makes. More sold than all others
 combined. Don't be penny wise and pound foolish.

LET US SHOW YOU.

Now is the Time to spray your trees with Scalecide. The
 world's best dormant spray. The great tree saver. Write
 for booklet. It's free.

Editor W. L. Ridgell, Burlington, Ky.

Managing Editor W. L. Ridgell, Burlington, Ky.

Business Manager W. L. Ridgell, Burlington, Ky.

Publisher W. L. Ridgell, Burlington, Ky.

Owners: W. L. Ridgell, Burlington, Ky.

Known bondholders, mortgagees, and other security holders, holding 1 percent or more of total amount of bonds, mortgages, or other securities—There are none.

W. L. RIDGELL.
Sworn to and subscribed before me this 20th day of March, 1917.
N. E. Ridgell, Notary Public.
In and for Boone County, Kentucky.
My commission expires Jan 18, 1918.

ANNOUNCEMENTS.

For Sheriff.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Member Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

WYOMIE F. ROBERTS, of Balesview precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election—August 4th, 1917.

For Sale—Eight Shepherd pups. Apply to Thos. Hafer, Hebron.

The Cincinnati horse buyers who were in Burlington last Monday made several purchases.

Remember Dr. Ray's lecture at the Court House next Saturday night April 7th, Admission 50c.

Reuben Hager, who has been employed in the Overland automobile factory in Detroit, Michigan, has been promoted to assistant boss. Reuben is climbing.

The sudden fall in the temperature, Monday, made it very uncomfortable for the crowd on the street, and it was not an April court day of yore by any means.

Keep in mind that a very interesting lecture will be given at the Court House next Saturday night. It will be the last lecture of the season and probably the best. Go and hear it.

The farmers who were in town Monday were somewhat discouraged over the delay in their spring work. Not many reported that they had begun breaking land for corn, but from their talk it appears that a great many tobacco plant beds have been prepared and sowed.

The fiscal court was in session last Tuesday with all the members except Esq. Redinger being present, he being ill. Not much business was transacted other than taking over the Price pike, and ordering a bike built from Big Bone Baptist church to intersect with the Huey pike.

The RECORDER carries the announcements of the following candidates this week:

L. A. Conner and B. L. Cleek, for Sheriff.

Harry W. Riley, J. S. Cason and Boone Rogers, for Assessor.

J. C. Gordon for County Superintendent of Schools.

Will have more to say about these gentlemen next week.

William Batterson, until a few years ago a citizen of Hebron neighborhood, was buried at Cleves, a few days since. He was an old soldier and died in the soldier's home in Ohio. Mr. Batterson was a stonemason and a master of his trade. He had the happy faculty of making friends of all with whom he became acquainted, and his demise is a cause of much sorrow to many persons. He is survived by a son, Add.

Miss Nellie Rouse gave a recital for her pupils, last Saturday afternoon, at her lovely home in Florence. Several friends of hers were rendered by the pupils. A biography on the life of Bach was read by Mrs. Nellie Carpenter, which was followed by a solo written by Bach, played by Miss Georgia Yuley. About twenty were present and prizes awarded those who gave the names of the most famous musical composers. The prizes were won by Mrs. Nellie Carpenter and Miss Alma Schwilke. After a delightful violin solo by Miss Georgia Yuley, Miss Nellie served a lovely lunch to the guests.

PROUD MEN I HAVE MET

We will send you this churn on 30 days trial, if you do not find it satisfactory, we refund transportation charges. Churns and works from 3 to 100 pounds of butter according to size.

B. E. AYLOE,
Burlington, - Kentucky.

Started a Big Thing.

Kentucky started a bigger thing than she knew when she started the campaign against illiteracy. The South Carolina Legislature has just created an Illiteracy Commission to stamp out illiteracy from that State first, then moonlight schools out in a few counties and found they could wipe out illiteracy. Now, they are going at it in earnest.

Florence Coming to the Front
If the town of Florence will contract with the electrical company for eight street lights at a cost of \$200 per lamp, the company will extend its line from Erlanger to Florence and take the chance of working up a patronage on the part of the citizens of the town. Of course the town council will be required to grant the light company a franchise for a term of years.

Frank Jeffries Found Dead.
Frank Jeffries, who, for many years, was a well known object of charity in Burlington, Petersburg, and Bellevue neighborhoods, was found dead by the side of a tobacco plant bed on the farm of Geo. Bacheler near the mouth of Woolper creek one day last week. It was thought that he had been dead several days when he was found. He was over 60 years of age and had been in a bad physical condition for a long time.

From the Sunflower State.

Renewing her subscription, Mrs. E. Conley, of Coffeyville, Kansas, writes:

"We have been living in Kansas, the 'Sunflower State,' little over a year, having come here from La., in Jan. 1916. The climate here is very good only rather dry, having had no rain since last fall until two weeks ago, two good rains fell in this section. We had very little snow, so you may imagine we are indeed 'home dry' in climatic conditions, as well as other ways. But, for all that, the wheat and alfalfa came out looking fine and the fields look beautiful now with the waving alfalfa, wheat and oats, the last named being sown in February.

Gardens were made and potatoes planted the latter part of February and the first week in March. We live near the city of Coffeyville, which has 19,986 inhabitants and is quite a thriving city and is being built up all the time. It has three oil refineries, three brick yards, a smelter, a glass factory and several other mills, also three railroads. H. C. L. has caused nearly all the nooks and corners to be spaded up about Coffeyville and planted in something.

There are a great many oil and gas wells here and in driving out one can nearly always see a drilling rig at work. This part of the country is level and the roads are kept in No. 1 condition.

Kansas ranks as the sixth State in the number of motor cars, having last summer 89,199 motor cars and 1,887 motor cycles, while there has been a great many more purchased since that time.

Kansas is 'home dry' in name, but not in reality, and is also a woman's suffrage state. It is right to call it 'Sunflower' as in the fall of the year a great many small sunflowers can be seen about two to three feet in height.

We have already had some warm weather, the mercury standing at 85 last week. The wind does surely blow here. We often think of our old friends in Kentucky and hope we will see them again some time.

For Sale—Black Bull Angus male calf about 10 months old of C. T. Kason, Burlington, K. Y.

Personal Mention

A. J. Dorden was a business visitor to Lexington, Saturday.

James Beall, of Francesville, was a caller at this office Friday.

Mrs. Eliza Rouse is the guest of her sister, Mrs. F. P. Walton, of Covington.

Robt. Moore, of Idlewild neighborhood, was a caller at this office Tuesday.

Mrs. Mary Latham, of Ludlow, is the guest of her daughter, Mrs. L. A. Conner.

Mr. and Mrs. Dudley Blyth's little son has recovered from an attack of German measles.

Benjamin Eggleston, of Francesville neighborhood, was a business visitor to Burlington yesterday.

Mrs. Jas. Snelling, of Petersburg, widow of John Snelling, died suddenly of heart disease last Sunday.

Mrs. J. G. Furnish and daughter, Miss Sarah Gayle, were guests at Mrs. Laura Martin's, last Sunday afternoon.

Mrs. J. G. Fennell, of Mudlick neighborhood, was the guest of her sister, Mrs. Mary Hume, several days the past week.

Mr. Ray Edwards, a student of Perdue University, was the guest of his sister, Mrs. G. W. Tolin, several days the past week.

Galen Kelly is being instructed in the mysteries of banking by Wallace Rice, assistant cashier of the Boone County Deposit Bank.

Harry Hartke, president of the Milk Producers Association, was in this part of the county hunting milk cows to purchase Monday.

Miss Emma Welsh, of Florence neighborhood, was the guest of Mrs. Kirby Tanner and Miss Mary Furling, several days the past week.

Dr. O. S. Crisler arrived at home, Sunday, guests of their daughter, where he underwent a surgical operation a week or ten days ago.

Elmo Gaines, claim clerk in the Auditor's office in Frankfort, came down last Saturday and remained until Monday. He is looking fine as a fiddle.

Dr. J. G. Furnish, of Covington, was in Burlington, last Sunday afternoon, calling on some of the sick being looked after by him and Dr. E. W. Duncan.

W. M. Green, Jr., of Rising Sun, is making a drive for an increased volume of Kentucky trade this year. By persevering in the campaign he has begun success is his.

Mr. and Mrs. John M. Botts, of Petersburg, were Saturday night and Sunday guests of their daughter, Mrs. Dudley Blyth. Mr. Botts attended the big K. of P. meeting held here Saturday night, being a member of that fraternity.

E. Walton and H. L. Tanner, of Point Pleasant, neighborhood, Frink Allen, of Big Bone church neighborhood, John W. Hogan and Clarence Norman, Frogtown decided to walk home from Florence, but were picked up at Limburg by the mail auto, which landed them at about 7:30 a. m., they having been out all night.

In the Kentucky Egg Laying Contest, in progress at the Experiment Station, Lexington, Circuit Clerk Charles Mander's pen of Single Comb White Leghorn pullets laid 141 eggs in one week, taking only one egg of being a perfect layer. The record in this contest to date.

Only two horses were exhibited on the streets last Monday.

Rotation for Tobacco Farmers.

A good rotation in tobacco farming is important for the good of the tobacco. The soil and the farmer. The pests of tobacco are less troublesome where rotation is followed and the crop needs the increased fertility that a proper succession of crops can give. The farmer needs the rotations because his tobacco should be a surplus crop and not one with which to buy food for his family and feed for his live stock.

The rotation should provide winter covers on the land each time, or one more soil-improving crops, grain and hay crops for the live stock and preferably other crops to set or to feed to live stock to put on the market. Some farmers may choose to have a separate rotation for the corn so that tobacco is not grown on the land that is used to corn.

In the dark tobacco district little fear is felt so far of getting the soil too rich for producing tobacco. The crop is given the best place in the rotation and the poorer parts of the field are treated with stable manure. Experiment station tests indicate that on an average the fertility of the soil has not been brought high enough yet for the greatest yields compatible with good quality. More manure, more legumes and more green manure can still be used to advantage.

The weakest point in the rotation is the uncertainty of clover after the small grain. Of late years it has more often failed than it has succeeded. As a result, the nitrogen supply of the soil is not kept as high as it should be.

To make clover sowing lining of the land is advisable, and the clover should be sown alone or with a light seeding of rye on a well prepared seed-bed in August or early September. These two changes will make it many times more certain that the increasing of the manure supply and getting this on the land as near the clover as practical will make clover nearly as certain. The grass can be sown at the time the clover is seeded and both will do to cut the next year after seeding. No time will be lost by delaying seeding from spring to late summer or early fall.

In managing the clover and grass so that the soil will get most benefit from the second growth should not be taken off for hay, but should be pastured moderately and a good surf allowed to stand over winter. The second year it can be treated the same way or pastured all summer if the first crop is not needed for hay. It could still be pastured another year, but will be ready to put in tobacco or corn if needed for that.

Some farmers may not care to raise more corn and tobacco than the soil can produce. In that event they will select the soil for each crop that find suits them best. Others want more of these crops than can be grown on the soil and will cultivate for two years, following tobacco with corn or corn with tobacco. Where the land is cultivated two years a cover crop of crimson clover or rye should be sown between the cultivated crops to plow under in the spring.

Wheat or other small grain should follow the second cultivated crop—corn or tobacco. Then the clover and grass will be sown on the especially prepared seed-bed in the late summer or early fall after the wheat is cut. This rotation calls for two or three years in clover and grass, one or two years in cultivated crops and one year in small grain. It also provides pasture, hay corn silage or corn silage to feed the stock and to be used in the manure that manure can be made to help keep up the fertility of the soil.—Southern Agriculturist.

Won a Handsome Prize.

In its account of a recent tourist party in this city, the St. Petersburg, Florida, Independent, says: "Automobile No. 37—Mr. and Mrs. J. M. Lassing, Newport, Ky., decorated with white roses and bearing a cup—\$150 in gold and loving cup for best decorated automobile in parade." The Independent describes the automobile thus: "The car driven by Robert Lassing, with his wife, who was Miss Jennie Mae McCall, on the seat with him, was beautiful. This automobile was a mass of white paper flowers with red peonies scattered over the outside. The automobile was hidden from view by the paper flowers. On the back was a cupid holding white streamers. Mrs. J. M. Lassing and several children occupied the tonneau.

Henry Balked.

Monday night a party of Burlington young people went to the city to see "The Birth of a Nation." On their trip home their Henry balked on the Willow Run bridge. One of the cars, a Lincoln, they turned the machine around and backed up the hill, and finally worked their way as far as Florence, where they abandoned the machine which refused absolutely to go further, notwithstanding the supply of gasoline had been replenished. They attempted to walk home from Florence, but were picked up at Limburg by the mail auto, which landed them at about 7:30 a. m., they having been out all night.

In the Kentucky Egg Laying Contest, in progress at the Experiment Station, Lexington, Circuit Clerk Charles Mander's pen of Single Comb White Leghorn pullets laid 141 eggs in one week, taking only one egg of being a perfect layer. The record in this contest to date.

Only two horses were exhibited on the streets last Monday.

Ladies' Coats and Suits
For Spring 1917.

The vernal atmosphere of bursting buds, fresh foliage and joyous blossoms is crystallizing in the new Spring Coats and Suits as portrayed by Bischofs.

The grace of lines and array of colors are a delight to the eye. A visit to our store and an inspection of these charming models will delight you.

See the New Suits with the new silhouette. The new pockets and the new belt effects. Inspect the new coats in this array of startling color combinations. This line represents a triumph of Bischofs' art. We believe you will be pleased with it.

The Bischofs Garments not being excelled by any in the Central States, we are always pleased to show the workmanship and style in the Bischofs Coat and Suits.

We now have the most complete assortment of Spring Dress Goods and Trimmings we have ever shown. We invite your special attention to our fine line of Silks either Taffeta, Messalin or Beldacines, plain or fancy striped or plaids.

Don't fail to see the new Kabo Corsets.

For the best makes of Shoes sold in Aurora call here.

Present This Advertisement and it will be accepted in payment for One Dollar (\$1.00) on any Coat or Suit in the Store, if presented before April 8th, 1917. FRANK RIEMAN

FRANK H. RIEMAN

Aurora, Indiana.

GRAY LEAF No. 4716

Will make the season of 1917 at my place, Maple Grove Stock Farm, three miles from Florence on the Price pike, 2 miles from Limburg and 3 miles from Anderson's Ferry, will be Florence Road, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible for any that may occur.

Gray Leaf is 17 hands high, weighs 1800 lbs., is a dapple grey and a model draft horse. Foaled May 12th, 1902; bred by Samuel Meeks, of Galveston, Cass county, Indiana; owned by H. Bridges & Co., of Crawfordville, Montgomery county, Indiana. Got by Printemps 1866 (2102), he by Saint-Germain 6232 (4215), out of Biche (1801), etc. Saint-Germain 6232 (4315), by Avanta 1906 (912), he by Nogen 738 (729), he by Vidocq 438 (732), he by Coco II (714), he by Vieux Chaslin (713), he by Coco (712), he by Mignon (715), he by Jean-le-Blanc (739).

THE FINE YOUNG JACK,

Will make the season of 1917 at the same time and place as Gray Leaf, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible should any occur.

Bob Glass, 5 years old, is 15 hands high, is black with white points, heavy bone, good style, and said to be the best young Jack in the country. Bob Glass was won by Jerry Glass, he by Ben Glass, one of the finest breeding Jacks in Northern Kentucky. Ben Glass was by R. B. Lee's fine Jack, he by Wm. Nichol's and Warrick's Imported Spanish Jack that cost \$4,000, out of dam by Younger Pitt's Jack that cost \$4,000. This is the same strain as the celebrated Ellington Jacks. The dam of Bob Glass is by the fine Spanish Jack Alexander, Jr., a black Jack 15 1/2 hands high, and a premium getter wherever shown.

For the official pedigrees of the above stock call on the undersigned. B. H. TANNER and IRA WALTON, R. D. No. 1, Erlanger, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVile, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS.

Bob Starlight and Jim,

The fine young Jack Bob Starlight, will make the season at my stable at McVile on the same terms as those of Magnette.
The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.
In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.
No business done on Sunday.
XEN SCOTT, Grant, Ky., R. D.

Stick to First Principles.

Don't forget your freight against the middleman and his toll.
You never could get a good price for your country butter because there were too many middlemen taking a profit, and now since most of the producers have gone to selling cream they appear in the guise of cream buyers or station men who make a commission on the cream they buy, which comes out of the producer's pocket.
Sell your Cream Direct to Tri-State Butter Company, Cincinnati, Ohio, the Time Tested Market of Over 20,000 Producers.
Your money is SURE—your shipment SAFE. No shipper ever lost a dollar dealing with the TRI-STATE and every can is guaranteed against loss or damage in transit.
Ask any Tri-State patron what he thinks of us, or let us send you Free Trial cans if you have no cans of your own.

DAIRY FACTS

TO OBTAIN HEALTHFUL MILK

Cows, Barns and Yards Must Be Kept Clean—Small Top Pails Keep Out Foreign Matter.

(By V. R. JONES, Dairy Husbandry Department, South Dakota State College.)

Cows must be healthy and kept clean.

Barns should be kept clean, well lighted and ventilated.

The barnyard should be kept clean and properly drained.

Udders should be thoroughly washed and scalded or steamed and kept in a clean room.

Cows should be fed good wholesome food and pure water.

Milkers and attendants who come in contact with the milk should be healthy and clean.

Cows should not be fed at milking time or immediately before. But from feed falls into the milk and contaminates it with germs.

Wipe the udder and side of cow with a damp cloth and milk with clean, dry hand.

Use small-topped milking pail. This helps to keep foreign matter from the milk.

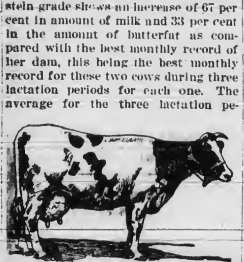

Remove the milk immediately after milking to a separate room from the barn to be strained and cooled. Cool milk to as low a temperature as possible without freezing. Forty or fifty degrees F. retards growth of most germs, and particularly those that cause milk to sour quickly.

SCRUB COWS AND DAUGHTERS

Iowa College Makes Interesting and Instructive Comparison—Record of Holstein Grade.

A very interesting and instructive comparison is made between the records of individual scrub cows and their own grade daughters as shown by experiments at the Iowa college.

The best monthly record of one Holstein grade showed an increase of 67 per cent in amount of milk and 33 per cent in the amount of butterfat as compared with the best monthly record of her dam, this being the best monthly record for these two cows during three lactation periods for each one. The average for the three lactation pe-

Holstein Dairy Cow.

riods shows that the Holstein cross had an increased production of 100 per cent in milk and 33 1/2 per cent in fat as compared with her mother, which was one of the original scrubs.

One Guernsey cross showed an increase of 110 per cent in milk and 107 per cent in quantity of butterfat as compared to the corresponding best month of her mother, whereas her average increase, that is, her increase in total amount of milk and butter for the entire period of lactation, showed an increase of 131 per cent in milk and 136 per cent of butterfat as compared with her mother.

EARLY AND GENTLE TRAINING

Task of Halter-Breaking Heifer Calves Cannot Be Begun Too Early—Handle Them Daily.

Halter-break all the heifer calves before they get very large. Can't do it too soon. No matter whether you ever lead your cows or not you want them broke to lead. Handle the calves daily as they grow. Rub them, foot around their hind quarters so that they will not be scared or ticklish the first time they are milked.

FOR PURE DAIRY PRODUCTS

Clean Milk, Quick Cooling and Prompt Delivery Are Factors of Much Importance.

The number of bacteria in milk depends largely upon cleanliness of milking and handling, temperature at which milk is kept and age of milk. Therefore, clean milk, quick cooling and prompt delivery are very important factors in producing pure dairy products.

PRODUCT OF IMPROVED COW

Wild Animal Gave Only Enough Milk to Nourish Its Young—30,000 Pounds Yearly Now.

The wild cow gave only enough milk to support its young. Proof of what man has been able to do in improving dairy cattle is found in the fact that production is more than 30,000 pounds, the present world's record for milk per year.

OPUM AND OLIVIA

By DOROTHY DOUGLAS.

As young Doctor Rylance stepped swiftly out of his office, a shining lambo caught his eye with its glint in the bright morning sunshine. He stooped and picked it up.

Even in his eyes, lenient as to the price of feminine adornment, the tocket fairly screamed aloud its worth from the costly mass of jewels in the gold frame.

There was a mysterious catch that gave the doctor no little amusement and trouble before he could open the tightly closed locket. When his fingers discovered the secret and the locket flew open his eyes expanded, then contracted, in professional scrutiny.

The locket was filled with tiny opium pills!

"How?" muttered the doctor. Involuntarily he sighed. There was so much wreckage floating about the world. Here was startling evidence of human tragedy. Some wretched woman was no doubt suffering the tortures of the condemned because she had lost her opium.

His lunar conviction was that the woman, whoever she might be, would never claim the locket for fear her ghastly skeleton should become public property.

Skeptical though he was as to re-mits, he inserted a well-worn advertisement in his papers.

When Olivia Weston found the advertisement she had been seeking, her eyes lighted in triumph until they switched with excitement.

She arose and took up the telephone. The number she called was the one given in the advertisement.

Doctor Rylance was in his office. When he took up the telephone receiver a little snarl of song was wafted along the wire. After that delightful sound Olivia's voice reached him.

"I am most anxious about my locket," she said.

"I am sorry I opened it," Rylance said to her. "But as you may know, a man's curiosity is a thing quite beyond his power to control." He up-pressed the little laugh that bounded along the wires. "When can you call for the locket?"

"I will call this afternoon," Olivia said eagerly.

The growing tone in her voice caused the doctor to sigh as he hung up the receiver. It was evident that she was joyous over the prospect of regaining her lost property.

When the next little nurse who acted as office attendant ushered in Olivia it was nearing the twilight hour. The doctor was forced swiftly to his feet. Having expected human wreckage in one of its most terrifying forms, the sight of Olivia was frightfully un-derstanding.

"It was silly of me to lose my precious locket," she said. "I don't know how it happened. It is usually so secure." She gazed calmly, if admiringly, at Rylance.

"You don't look like an opium fiend," was his startled comment.

Olivia laughed gracefully.

"Neither am I," she told him. "I am only a poor, harmless writer whose brain has been squeezed dry of every plot that it ever possessed. I hadn't written a story for ten whole days."

She turned her eyes full upon Doctor Rylance without heeding the effect on his masculine senses. "I deliberately lost my locket—just to see who would find it and—"

"But what thieves are you associated with from whom you obtain opium?" he questioned. "It's a crime, you know."

"My brother," said Olivia loftily with flaming cheeks, "is a chemist."

"And a fool if he gives you opium to make him feel sorry for you."

"He didn't give it to me. I knew where it was kept. He glanced up swiftly in defense of her brother.

"He thinks me all kinds of a foolish person because of the things I do to get atmosphere for stories."

Doctor Rylance was looking at her in a way entirely unaltered for, considering the newness of the acquaintance, Olivia feared, from the manner in which her heart had taken to beating, that something other than a short story was going to be the outcome of her act. Never had it acted in this unusual way in the search for material.

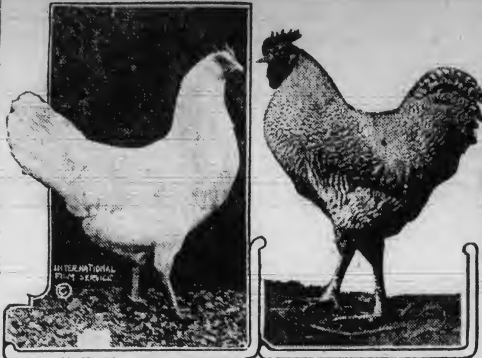

"You may be silly," Rylance finally voiced some of the thoughts running riot in his brain during that long meeting with Olivia's eyes, "but you are also many other things—of much nobler order." He rejoiced at the swift flash of color into Olivia's cheeks. "I don't get much time to read the magazines, but I suppose they occasionally take a story of love at first sight. If you want any facts or suggestions regarding the emotions of a man who has fallen suddenly, unexpectedly and completely in love at first sight—just you come to me—will you?" There was a pleading below the laughter in the doctor's voice.

"My imagination is rather good," Olivia told him. "So I think it will not be difficult to weave some kind of story out of this situation."

The doctor smiled knowingly and Olivia made good her escape. It would not be long, he thought, before he would be able to tell her the story of her life.

OREGON IS NEW GENERAL PURPOSE FOWL

BARRED ROCK COCKEREL AND WHITE LEGHORN HEN.

A new breed of poultry has come out from the west and demands the attention of practical poultry keepers. The Oregon being the name of the new breed, it is hardly necessary to say that it had its origin in the state of Oregon.

The crossing of White Leghorns and Barred Plymouth Rocks produced the original Oregon, which have been bred up to the present type by introducing much more Leghorn blood.

Prof. James Dryden of the Oregon Agricultural college, where the work was done, says that egg production was the first consideration in the making of the new breed, but that another purpose was to develop an all-around type of bird that would meet the market demands.

The Oregon is medium in weight between the Leghorn and Plymouth Rock, making it a good general pur-

pose fowl. At the same time, its laying qualities are very high. Several hens of the new breed have records of over 300 eggs in a year. This tendency to heavy egg production is not simply the result of crossing two established breeds, however, but results from the selection of heavy layers as breeding stock, trap nests having been used as a basis.

In color the Oregon is white and they are rather close feathered, like the Leghorns, with medium-sized combs, yellow legs and a yellow skin. They lay a white egg. Yellow-skinned birds that will weigh four or five pounds and that are heavy producers of white eggs should meet the requirements of a great many poultry keepers, both amateurs and professionals. It is likely that much more will be heard about the Oregon in years to come.

OBTAIN WINTER EGGS

Make Conditions as Near-Like Summer as Possible.

Sprouted Grains Furnish Easiest Solution of Problem—Oats Rank Higher Than Corn—More Fat Than in Wheat.

(By C. S. ANDERSON, Colorado Agricultural College, Fort Collins, Colo.)

Many people believe that if they furnish a reasonably comfortable house, and supply a little corn, or whatever grain happens to be available, that there is no expense for their hens not filling the winter egg basket.

Spring and summer seasons are the natural times for hens to lay, and if they are made to lay through the winter, conditions must be made as near like their natural laying season as possible.

Sprouted grains furnish the best solution. As a protein or egg-producing feed, oats rank much higher than corn and contains more fat than wheat. Its high proportion of hull to kernel makes it bulky and unpalatable. Sprouting overcomes this difficulty, and also furnishes the green feed so essential. Oats can be sprouted and fed at 4 to 6 inches high, more economically than roots or vegetables can be produced. The time required for the growth is short, the amount of succulent material is large and increased egg production is invariably the result. One hundred pounds of oats can be increased to 350 to 400 pounds of succulent feed.

It is an easy matter to construct a home made sprouter, but unless a warm room is available, and if many birds are to be fed, it is advisable to purchase one of the several reliable sprouters now on the market.

RATS IN THE CHICKEN YARD

No Trouble in Getting Rid of Them by Poisoning with Cornmeal and Sugar of Lead.

Rats cause great losses in many poultry yards. There is no trouble in getting rid of them by poisoning with a mixture of two parts cornmeal and one part sugar of lead. The hand should not come in contact with the poison feed, and all other feeds should be removed so the rats cannot get them.

The poisoned feed may be kept away from the chickens by putting it in a tray, nailed to the middle of the bottom of a box at least a foot square and six inches high. The box should be closed on all sides except for a number of inch and a half holes bored through the sides near the bottom.

Burn or bury the dead rats so that chickens cannot eat them. The decayed flesh of even unpoisoned rats is likely to cause limber neck, as ptomaine poison is called in chickens.

FEED HOPPER IS IMPORTANT

Arrange Feed Box So That Material Will Not Be Scratched Out by Fowls and Wasted.

In all well managed poultry houses the dry feed hopper plays an important part. It is therefore important that these be put in order or new ones built as may be required.

In the construction of new hoppers so arrange the feeding box that feed will not be scratched out and wasted.

BREED FOR EGG PRODUCTION

High-Laying Hens Cannot Be Depended On to Produce Chicks as Good as Themselves.

The results of breeding for egg production at the Ontario experiment station are an interesting supplement to the work so long carried on at the Maine station. It will be remembered that the conclusion of the Maine station was that hens with high laying records cannot be depended upon to produce chicks as good as themselves, even when the males of the flock are of the same stock.

The Ontario station concludes that many 200-egg hens are not worth much as breeders of 200-egg pullets, but a few appear as if their pullets were out of the ordinary and some of their sons have been very good breeders.

In other words, the power of transmitting the heavy-laying quality is possessed by some individuals, but not by others. This is essentially the idea on which the Maine station is now working with the aim of selecting and using the birds which have this transmitting quality.

It was found by the Ontario station that the chicks hatched from these selected birds began to lay much earlier in the fall and laid in November about five times as many eggs as common pullets. Their excellence was largely due to their power to lay eggs in the fall and winter. In the summer the common pullets were considered about as good layers as the others.

CUT BONE ENCOURAGES EGGS

Lessens Death Rate in Chicks, and Keeps Old Stock in Healthier Condition in Winter.

(By WILLIAM JACKS.)

When I commenced feeding green cut bone, about the first thing I did was to find its feeding value by actual test. Hens under like conditions, with fresh-cut green bone added to their feed laid nearly twice as many eggs in the winter season and a third more in the summer season than did the lot without the bone.

Fifty-eight chicks hatched at the same time from the same kind of eggs were divided into two lots and treated the same, except one lot was fed some extra. The lot with bone extra to their feed grew much faster and at the end of 13 weeks, the end of the test, a person would never have thought the two lots were the same.

The lot fed the bone were not only larger, but had clearer and brighter plumage. The lot that ate the bone went through the test with the loss of but one, while the lot without the bone sustained a loss of five. This, with other observations, leads me to believe feeding bone will lessen the death rate in chicks and that old stock will be healthier.

CORN GLUTEN FOR CHICKENS

Makes Excellent Addition to Ration—Is Highly Palatable and May Be Fed in Dry Mash.

Corn gluten feed makes an excellent addition to the ration and may be procured through almost any feed store. It is highly palatable and may be fed to advantage in the dry mash with other feeds, such as follows: One hundred pounds of cornmeal, 100 pounds of bran, 100 pounds of white middlings, 100 pounds of corn gluten feed, 100 pounds of meat scrap, 14 pounds of charcoal, six pounds of salt.

We Can Make Immediate Deliveries.

This truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power—extra strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pressed steel frame—every supporting part a forging or pressed steel—Republc Torbenston Internal Gear Drive—heat treated, drop forged 1-Beam—un-qualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750
1 1/2 Ton Truck \$1375. 3 Ton Truck \$2650

Hal McGregor

Record (2) 2:26 1/2, will be allowed 15 approved mares at \$20 to "insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.

Hal McGregor (2) 2:26 1/2 by Hal Dillard 2:04 1/2, 1st dam by Wistar 2:17 1/2; 2nd dam by Oscar Williams 2:12 1/2; 3d dam by Ohio Volunteer 2:28 1/2.

The sire of Hal Dillard is Brown Hal 2:12 1/2 (world's record when made); also the sire of Star Pointer 1:59 1/2, the first horse to beat 2:00.

Do not miss a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:08 1/2, Fannie Dillard 2:03 1/2, Hal B. 2:04 1/2, Hal C. 2:05 1/2, Hal Leaf 2:07 1/2, Hal Chipper 2:07 1/2, Cinnamon 2:07 1/2, Dillard Online 2:07 1/2, Butter Bowl 2:08 1/2, Cambria Maid 2:08 1/2, Rook Dillard 2:08 1/2, Ellen D. 2:10 1/2, Young Hal 2:10 1/2, total 90 standard time.

Sons of Hal Dillard sired Hal Boy 2:01 1/2, Hal B. Jr. 2:02 1/2, Hal Raven 2:03 1/2, Halcutt 2:05 1/2, Hal R. 2:06 1/2, Hal McKinney 2:06 1/2, Ed-die Dillard 2:06 1/2, Hallie Loo 2:07 1/2, Hal Grey 2:08, Hallock M. 2:09 1/2, Vera B. 2:07 1/2, Hal Grey 2:08, Hal-jack M. 2:09 1/2, Dillard S. 2:09 1/2, Hal J. 2:09 1/2, Jerry Dillard 2:09 1/2, Della H. 2:10, Dillard Onward 2:10 1/2, Helen B. 2:10 1/2.

Hal McGregor with only 70 days track work last year trotted one-eighth in 16 1/2 seconds, 1/4 in 34 seconds, and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training then.

Care will be taken to prevent accidents but I will not be responsible for any that may occur. Will farm a few good mares.

HANDS, ARMS, LIMBS ASLEEP

And Was Run-Down, Weak and Nervous, Says Florida Lady.

Five Bottles of Cardui Made Her Well.

Kathleen, Fla.—Mrs. Dallas Price, of this place, says: "After the birth of my last child, I got very much run-down and weakened, so much so that I could hardly do anything at all. I was so awfully nervous that I could scarcely endure the least noise. My condition was getting worse all the time."

I knew I must have some relief or I would soon be in the bed and in a serious condition for I felt so badly and was so nervous and weak I could hardly live. My husband asked me about my taking Cardui. He said, 'it's a good medicine, and good for that trouble,' so he got me 5 bottles. After about the second bottle I felt greatly improved, before taking 4 my limbs and hands and arms would go to sleep. After taking it, however, this poor circulation disappeared. My strength came back to me and I was soon on the road to health. After the use of about 5 bottles, I could do all my housework and attend to my six children besides."

You can feel safe in giving Cardui a thorough trial for your trouble. It contains no harmful or habit-forming drugs, but is composed of mild, vegetable, medicinal ingredients with no after-effects. Thousands of women have voluntarily written, telling of the good Cardui has done them, should help you, too. Try it.

HUMAN ELEMENT IN ACCIDENTS.

Close observers are not astounded by the statement made at a "safety" meeting that 10 per cent only of industrial accidents are due to machine failures, the remaining 90 per cent being wholly chargeable to "man-failure." Students, however, will not be satisfied with the simple statement, but will want to know something more, especially as to conditions that contribute to this appalling large percentage charged directly to man's share in the fault. It will not do to say that in each instance wanton carelessness is blamable, says Omaha Bee. Psychologists are no longer content with that explanation, but are going deeper into the causation of accidents, seeking to determine just why the normal mental processes at times break and the interrupted co-ordination between brain and body ends in disaster. In the matter of interpreting railway signals, for example, it has been set up that registered impressions vary as to individuals, and that likewise individuals react in different ways to the impressions given. Emergencies invariably arise in the operations of modern industry similar to those in the transportation service, and while the safety device may work with mechanical accuracy, the human factor cannot be depended upon.

Every few seconds we wink both our eyelids at once, although not purposely. If we stop winking, our eyes become uncomfortable and gradually cease to work as they should. When the eye is open the front of it is exposed to dirt and dust and is apt to become so dry that a painful stinging sensation results or would so if constant moisture were not provided to cleanse and soothe the tissues. As a matter of fact, each time we wink we wash the eye, says Popular Science Monthly. Up above each eye is a tiny water bag called the tear gland, and all the time we are awake it makes tears. When the front of the eye feels itself becoming a little too dry or dusty a communication is sent for a supply of moisture. The eyelid then comes down with a tear inside it to wash clean the front of the eye. This is the most gentle and perfect washing in the world.

A writer in an English newspaper is outspoken in demanding that the hyphenated designation of Anglo-Saxon be kicked out of use as misleading and erroneous term because, he says, the Saxon race in the British Isles have long since ceased to exist. He says the term Anglo-Saxon is like a pestilence to a Scot (he is evidently a Scot), a Welshman or an Irishman, and that these Celtic races know, however much Englishmen may try to obscure the issue, that it is the enterprise, imagination and idealism of the Celts that have built up the mighty force called the British empire. He says that as far as this misnamed Anglo-Saxon race is concerned it has only been the financial partner, while the Celtic races have supplied the brains and muscles and that there should be no Englishmen, Scotsmen, Welshmen or Irishmen, but all should disappear in the title of Briton.

The \$10,000,000,000 worth of gold produced since 1492 is not, however, to be taken as a measure of the quantity of gold now available for currency purposes. The world's consumption of gold for industrial purposes alone now exceeds \$175,000,000 a year, to say nothing of the loss by abrasion, and the amount which disappears by the "hoarding" process. As a result the latest compilation of the world's stock of "old money" is but about \$8,500,000,000, or but little more than one-half of the actual value of the gold known to have been produced since 1492.

In California they are going to teach children courtesy in the public schools. And we rise to remark that neither the law nor the church nor the schools can ever take over successfully the function of the home, says Houston Post. Home is the place where children should receive their instruction in courtesy and if they do not get it there they are not apt to get it at all.

While much interest is being taken in the census for a 25-cent-a-day scale of cost of living, it may be remarked in passing that with the majority they are for publication only and by no means as an evidence of the popular good faith.

Notwithstanding the high prices of foodstuffs, city people continue to resist the temptation to go into the country and become producers.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of April 12th, 1877

Solon Early, R. D. Carter, D. B. Tilly, Wm. McWethy and J. E. Terrell were elected councilmen for Petersburg at the annual election last Saturday.

Reuben Cumber, of Litchwood, sent thirty-five 450 pound hogs to market a few days ago.

A few nights since a steam boat, upon which Dr. L. C. Cowen, of Rabbit Hash, had a patient, drifted against the bank a few feet from his office where it laid until he got up, dressed and went on board.

Esq. James N. Early died on the 4th inst., at his home in Petersburg, after a long period of suffering. The funeral was in charge of the Odd-Fellows and Masons.

At the last term of the county court A. A. Bradford was appointed guardian for William R. and Lamora Bradford—Merchants' it—Curley, of Walton. W. Riley was appointed administrator of John Riley M. S. Rice, Joseph Riddell and S. Hury were appointed to divide the lands of the Bradford heirs.

W. J. Rice will build the bridge on the Burlington and Bellevue pike.

There are 32 appearances on the equity docket and 23 ordinary appearances for this April term of circuit court.

A large acreage of potatoes is being planted in East Bend bottoms.

M. Hamilton was elected president and W. M. Conner, Saml. Cowen, T. W. Finch and N. E. Hawes were elected trustees of the National Institute of Agriculture, at its annual election last Saturday.

Proctor Knott is a candidate for U. S. Senator.

One hundred and twenty negroes were baptized last Sunday at Hopkinsville.

One night last week dogs killed 19 sheep belonging to Oscar Huey, of Big Bone.

THE WORLD'S FOOD CROP SHORTAGE.

Rome, April 5.—The world's food crop is deficient and the situation is becoming alarming, according to David Lubin, American representative to the International Institute of Agriculture. Mr. Lubin is here to report the facts to President Wilson thru Ambassador Page and is urging the imperative necessity of a mobilization of American farm resources. To a correspondent Mr. Lubin said: "For the first time in many years there exists a deficit in the supply of corn, wheat, rye, barley and oats, estimated at a total of 130,000,000 bushels less than the normal requirements for countries open to trade. The situation is worse than was expected last October. The institute's report indicates that a surplus of more than enough to feed the world until August of this year, when the new crops begin to come in. "We may profit by Europe's experience before war tickets become necessary. We can avoid high prices by the elimination of waste, by the growing of more food, and the effective mobilization of our food supply, which is more important than getting men into the army."

Washington, April 5.—Experts in the Department of Agriculture are devoting themselves to the food stuffs in question obtaining from all sources throughout the country information of supplies, crop prospects, means for preventing waste, intensifying production and even regulations for preventing manipulation. Under direction of Secretary Houston, several of the department's most able men are devising their most effective problems and the Secretary is probing the information before the Council of National Defense, of which he is a member.

Counterfeit Money in Circulation

There has been a large amount of counterfeit money circulated in Falmouth and Pendleton county during the past week, Sheriff Cummins has sent several specimens to the U. S. authorities. No arrests have been made, but the authorities believe they have a clue. The counterfeit money which has been passed is in quarters and half-dollars. It is thought that the money has been purchased by persons at a distance and is being passed on our citizens by someone in the county. This is a serious offense, and if the guilty party is found, he will not doubt be in the stripes.—Falmouth Outlook.

THE OLD LUTHERAN CHURCH

The above is a picture of the Hopeful Lutheran church building, which was erected in 1837, and will be razed in the next few weeks to make room for a more modern and commodious structure.

It was at a special meeting held by the congregation March 18th, in regard to raising the church building, that the decision was made to replace the log church building with a brick building thirty-five by fifty feet. The vestibule in front of the building was added within a few days, and is probably thirty years old. The Hopeful church was among the early religious organizations

in this county, and has always been the home of a frugal, industrious and worthy class of members, the ancestors of whom came to this country when yet but little better than the wilderness. Long may the Hopeful church, in its new building, continue the good work in which it has so long and successfully been engaged. The farewell sermon was preached in the old church last Sunday, and it was a solemn occasion with those present, as they were parting with a building in which they had grown up in the service of the Master.

An Eccentric Old Woman.

Whitesburg, Ky., April 5.—One of the most eccentric old women in the mountains today is "Aunt" Christie Stalton, who, at the age of her last year, this month, is her quaint old log cabin home, near Hilliard, on Colly creek, about seven miles above here. For over half a century, since the death of her husband, "Uncle Jimmie" Stalton, "Aunt" Christie has lived alone—living the simple life, as a result of which, she says, she has enjoyed almost perfect health. She never has been under the attention of a physician, a record of which she is proud.

During all the years that "Aunt" Christie has lived alone she has managed her affairs even better than the average man, cultivating the hillsides and narrow strips of bottom, raising corn, oats, potatoes and garden vegetables—all in such abundance that she has a quantity. She also raised poultry and livestock, and always managed to get the best prices obtainable. She still uses the spinning wheel and other old-fashioned things. She never saw a railroad train or an automobile.

Her hearing has been good, her eyesight almost perfect. She can read small print, and she spends much time in reading the old family Bible. She has many descendants. Several days ago "Aunt" Christie suffered an accidental fall and is now confined to her bed.

State News.

Carlisle, April 5.—Miss Clice Cooke Kennedy, while on her way to school at Moorefield, this county, was bitten by a dog. As soon as it was discovered that the dog was affected with rabies she was rushed to Bowling Green, where she will take the Pasteur treatment.

Paducah, April 5.—President H. S. Wells, of the Board of Trade, has issued a call for a conference of farmers, bankers, business and professional men next Monday afternoon to form a co-operative movement to insure the largest possible production of agricultural products the coming season.

Hickman, April 5.—The State Board of Equalization has decided to raise the lands in Fulton county 30 per cent, above the value reported by the County Board of Equalizers. This is considered a large increase, as the county was raised 20 per cent, last year on both land and personal property. The land owners of this county will make a vigorous protest against the proposed increase, which would mean the payment of an additional \$8,000.

Mt. Sterling, April 5.—Work on the rebuilding and reconstructing of the turnpike from Montgomery county under the State aid will be begun at once and the Paris and Levee pikes completed under the State aid fund. It is the purpose to build two new pikes, one from Camargo to the Spencer pike and extend the Jeffersonville road, it is likely that all told the county will spend approximately \$200,000, which will bring them up to an excellent standard.

An Easter Wedding.

An Easter wedding was solemnized at the court house last Sunday afternoon by Rev. Edgar C. Riley, the contracting parties being Albert W. Deikman, of Cincinnati, and Miss Ella L. Nixman, of Newport. They had the proper credentials from the parents of the bride and letters of introduction from a party known by the deputy clerk, Miss Lizzie Rogers.

War Correspondence.

Last week Garnett Tolin wrote Gen. Tamm Ellis in regard to raising a company here for service in this war with Germany, and the answer is—

State of Kentucky
Adjutant General's Office, Frankfort
April 7, 1917.

Mr. Garnett W. Tolin,
Burlington, Kentucky.
Dear Sir:

I have your letter of April 6th, in regard to the organization of a Company. I will be glad to take this matter up with you in case a call comes for volunteers, or in case of a vacancy in either of the regiments. At the present time there is no vacancy in any of the regiments. I would like very much to see a company organized in Boone county and will be glad to take it up with you. In case the Company is organized it would be necessary to get the consent of the County Judge to arrange Armory for the Company and have sixty-five men that could pass the proper physical examination and forward to the Governor.

Yours Very Truly,
T. TANDY ELLIS,
The Adjutant General.

Courtney Pope Badly Hurt.

Courtney Pope, who moved recently from near Burlington to the Rogers farm in Richwood neighborhood, got his collar bone broken, one knee dislocated, while he was considerably bruised and scratched at Limburg, Wednesday of last week. He was driving a spring wagon drawn by two horses, and in making a turn the wagon turned over, catching him beneath it. The horses began running, the wagon dragging Mr. Pope, having run but a short distance the horses turned around in the pike which lifted the wagon and ran to Florence with them on and released Mr. Pope, otherwise he would have been killed. The horses tore the pole and the front wheels loose from the wagon and ran to Florence with them before they were stopped, meeting several teams and machines on the road between Florence and Limburg. Mr. Pope was called and rendered medical and surgical aid, after which Jack Eddins took the unfortunate man home in his machine.

He Never Locks that Door.

Jailer Sam Adams had occasion to open a door at the bastille Monday morning, one which he said he never locked. The door refused to respond to his repeated efforts, when he called to his assistance two very able bodied neighbors, who tried with all their power to open the door, but to no effect. Finally one of them suggested it must be locked, when the jailer inserted a key a single turn of which brought results, and Mr. Adams made a very emphatic remark and his assistant had the laugh on him. This is another instance which proves you can never be certain of anything.

Flags, Flags, Flags and Flags.

Old Glory has appeared in every direction in Burlington, the largest flag being that suspended over the street between the Hiddell and Kelly stores. The talk of organizing a company in Burlington has been heard on every hand the past week quite a number having signified a willingness to shoulder guns upon Uncle Sam's call.

Bazaar and Oyster Supper.

The Ladies' Missionary Society will give a bazaar and oyster supper at Richwood school house, Saturday, April 14, at 2 p. m. All are invited.

Letter From Long Island.

Thinking that perhaps another letter from the aviation field at Mineola, Long Island, N. Y., might be interesting to your readers I am availing myself of the opportunity to send you a few of my observations.

This island is about 15 miles wide and about one hundred and fifty miles long, and contains four counties, viz: Kings, Queens, Nassau and Suffolk. The land is perfectly level for a stretch of two miles, and nearly all of the islands is one sandy plain. The soil is very poor, though there is an enormous lot of garden truck and corn grown here, and especially Irish potatoes, being noted for the fine quality of tubers. Thousands of tons of fertilizer, commercial and stable, are used, and from now until planting time haul ing stables manure from New York City will be the principal business of the railroads. Many car loads have already passed to the Long Island farm. The island is a continuous web of railroads, Mineola, where I am located, is the county seat of Nassau county and is twenty miles east of New York City. The town is a beautiful, magnificent structure that cost \$300,000. Mineola is located in the broadest part of Long Island, and one mile south of it is a beautiful place, and one mile south of that is Hempstead, the oldest settled city on the island, in which there are fine buildings over a century old, built in the colonial style of architecture. There are many pretty little towns all of which have been visited, and on a recent Sunday I visited Long Beach on the Atlantic side of the island. It is a great summer resort, and many fine buildings and mansions—some of them now and the place has the air of Longfellow's deserted village. There will be a million people there at the height of the season as an effort is being made to rival and exceed Atlantic City as a summer resort. There is a board walk erected there about ten feet above the sea level, and the walk is about thirty feet wide and extends for several miles. One enjoyed every minute of the trip, going through Central Park to Riverside Drive to the monument erected in memory of the soldiers who died in the civil war, and then to General Grant's tomb, looking over the railing and seeing the caskets holding the remains of Gen. Grant and wife. I also visited a fine fish hatchery where every kind of fish in the world can be seen; one having the face of a woman. The Museum of Natural History is a wonderful fund of information as it is a little world of its own. The smallest thing I saw there was the skeleton of the first of the largest of the stuffed hide of a whale. The Botanical Gardens at Bronx Park and the Grand Central Palace are worth a visit to call the floral world, very especially the latter.

Of the fifteen thousand miles I have traveled in the tropics and all the floral gardens I have visited all the other did not equal this wonderful display of beautiful flowers embracing every kind from the tiny moss to the great orchids of the tropics, and roses and ferns by the millions. I also visited the obelisk, the 70 feet high granite monument erected to the memory of New York by Ismail Pasha Khedive of Egypt in 1877. It was transferred from Alexandria to Egypt twelve years before the birth of Christ, and was brought to New York at the expense of John J. Astor, and erected in Central Park which has a view of 317 acres.

We came to the aviation field Dec. 7th, and have completed the aviation barracks, and several other buildings, and we now have a building on eight big towers, at the feet and as there is every prospect of our getting the contract it means we will be here 4 months longer.

March 21st one of the best aviators died with pneumonia. He was 30 years old and resided at Hempstead. At the burial twelve aviators in their machines flew about the field many times and then to Hempstead and then to the cemetery and each aviator dropped flowers from their machines on the grave, eleven dropping directly on the grave, but one bunch on the side of the machine.

Several of the aviators are flying at a height of two hundred feet and at a high rate of speed. The deceased was one of the best of aviators. I witnessed one of his marvelous feats, at a height of 2,000 feet he looped the loop, and turned a somersault several times and ran his machine over a wire like the twist of a corkscrew.

Today one of the officers ordered a wheel trucked to a truck and sent it in charge of two men to go where they pleased and as fast as they desired as the bird might would be after them in an hour. At that time I saw twenty-five machines in the air, going in every direction, and in one hour Lieutenant Worley returned and was one of the best of aviators. He was making a circuit of the home to Cincinnati if the people about Walton would like to hear an interesting lecture about this part of the country and will be able to do so. I will try to entertain them.

A. H. STEPHENSON.

Bolin Journals Bitter in Attack

Perin, April 5.—Bitter criticism of what was termed President Wilson's "bad faith," charges that England "commanded" the indictment of the Kaiser's dynasty and insistence that there is no cause for war between Germany and America featured Berlin newspaper comments today on the American executive's speech, just received.

Particularly violent antagonism was expressed against the president's separation of the German government from the German people. The semi-official Lokai Anzeiger said:

"Therefore his speech contradicts his principles—because America is not fighting for American lives and interests.

"We must give a reasonable answer to the question of why he surrendered to England's prohibition of American trade. He is unable to. Therefore this war is without reasonable cause."

"History will condemn this deed of a stubborn fanatic in worse degrees than any Italian or the Rumanian braves."

"President Wilson's assertion that the war is not against the German people, but the German government will not lessen German anger, because it is untrue and dishonest and Wilson knows it."

"History records no war like this of a whole people fighting for their existence in a war created by the hatred of the whole world."

"Those who formerly doubted President Wilson's bad faith can no longer do so," declared the Berlin Vossische Zeitung. "His efforts to disassociate the German government from the people are perfidious. His statement that the Kaiser started the war for dynastic reasons is equally untrue."

"We trust the American people will discern Wilson's error and that this unjust quarrel between America and Germany will be settled by a vigorous command."

Answering President Wilson's remarks, the "Differences" between the German government and the people," the Berliner Tageblatt commented:

"While the fact that hundreds of thousands of critics of the German regime are fighting in the trenches doing their duty for the fatherland is a fact."

"We trust the American people will discern Wilson's error and that this unjust quarrel between America and Germany will be settled by a vigorous command."

"America cannot harm Germany any more as an enemy than she has as a neutral," declared Count von Reventlow in editorial comment in the Berlin Tageblatt.

"President Wilson," explained the Berlin Morgenpost, "has decided to end the war simply because, if the entente is ruined by the conflict, it would be unable to pay debts which it has contracted in America."

Tributes of Respect.

Hall of Walton Lodge, No. 719, Ft. and A. M., Walton, Ky., April 4th, 1917.

Whereas, the Death Angel has again invaded our mystic circle and taken from us to the Celestial Lodge on high our beloved brother J. Wm. Houston, and rowing over our loss and desiring to show our fraternal appreciation of his worth and merit the following resolutions were adopted as a tribute to his memory:

Resolved, That in the death of Bro. Houston the lodge has lost one of its most valued members, one to whom the principles of masonry were a part of his life in the practice of charity, friendship and brotherly love, and whose death we sincerely deplore.

Resolved, That to the bereaved widow and children and the beloved father we tender our heartfelt sympathy and commend them to the Great Father who assures a joyful and never ending reunion with their loved one.

Resolved, That these resolutions be spread on the minutes of the lodge, a copy be presented to the family of the deceased brother, the usual badge of mourning be worn for thirty days, and the resolutions be printed in the Boone County Recorder and Walton Advertiser.

Respectfully,
D. R. Wallace,
L. W. McElroy,
R. D. Stamler, Committee.

Base Ball Today.

The Burlington High School baseball team will play the Woodward High School here this Thursday afternoon, the game being postponed last Thursday on account of the weather. Tomorrow, Friday afternoon, the Walton High School baseball team will be here to play the Burlington school team.

Has Her Spring Stock on Hand.

Mrs. Geo. Ossman, of Beaver, has had an unusually beautiful stock of millinery this spring and invites you to call and inspect it. No trouble to show goods.

The Boone County Deposit Bank installed two pieces of hand saw oak furniture last Monday, and they are very much appreciated by assistant cashiers—Hess.

A. R. Johnson, clerk of the Walton loans leaf tobacco warehouse, has a caller at this office last Monday.

Fruit are approaching the market of April and have not been able to do so any place to speak of.

BOONE CO. RECORDER
W. L. RIDDELL, Publisher.

Sworn to and subscribed before me this 29th day of March, 1917.
N. E. Rid dell, Notary Public.
In and for Boone County, Kentucky.
My commission expires Jan 18, 1918.

ANNOUNCEMENTS.

For Sheriff.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Member Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY, of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

WALTON.

A. M. Edwards and son Adolphus spent Monday at Williamstown on business.
Dr. and Mrs. J. G. Slater of Ludlow, spent Saturday and Sunday with his cousin, J. C. Miller and family.

Mr. R. Rogers and sisters Misses Sallie and Lizzie of Burlington, spent Saturday and Sunday here with relatives and friends.

Claude L. Carlton of Glencoe, spent part of last Saturday on business here relating to his undertaking establishment recently opened at Glencoe.

Geo. B. Powers, the real estate agent, sold to L. Matt Rouse, of Grant-co, the house and grounds of Rev. A. K. Johnson, who recently moved to Ghent; the purchase price being \$2,200.

Sunday, during the snow storm, two autos driven by two men of Georgetown, collided with an auto driven by a colored man of Williamstown in front of the Methodist church and all of the machines were badly wrecked.

Benj. F. Stanister of Brauch, was here Tuesday celebrating with Grandpa Geo. B. Powers, the arrival of a fine son at Mr. Stanister's home last Sunday, and it has been agreed that the boy is to be named George Elmer, part of it being in honor of Grandpa Powers.

Another Terrible Disaster.

Chester, Pa., April 10.—One hundred and twelve persons, most of them women and girls, are known to have lost their lives and 121 were injured by a series of terrific explosions today in the shrapnel-building of the Edystone Ammunition Corporation at Edystone one mile from this city. Many of the injured men were mortally hurt, and it is feared the final death list will reach 150, while others probably will be maimed for life.

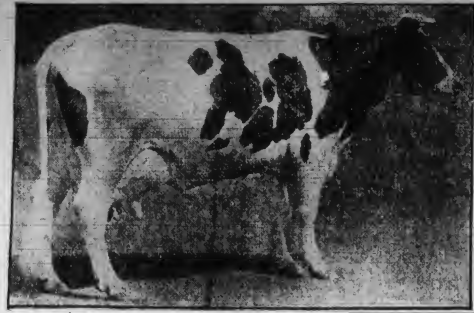

How any of the 300 or more employees in the building, in which was stored approximately 30,000 shells, escaped is almost beyond conception, as there was scarcely a fragment of the structure left intact. Fire added to the horror, and most of the bodies were so badly charred that identification was impossible.

In the absence of any official statement many theories as to the cause of the disaster, one of the worst ever experienced in this section, were advanced. Rumors of plots and arrests of persons both inside and outside of the plant were numerous, but all lacked confirmation.

Hon. A. A. Alphin, of Ryle, Galatin county, attended court yesterday and viewed his sick sister, Mrs. Mary Hume.

War gave way to base ball. Cincinnati, yesterday, everybody going to see the opening of the national game.

Mrs. C. F. Roberts has been quite ill since Monday.

A new world's record for all breeds for butterfat production in the seven day division was established by the purebred Holstein-Friesian cow, Segis Payne Johanna 11103, in a test ending January 8, 1917. This remarkable cow produced 5648 pounds of butter in seven consecutive days, and the official test was conducted by supervisors from the New York State Agricultural College, Ithaca, N. Y.

Segis Payne Johanna, by her wonderful achievement, is now the most talked of cow in the world, and her sensational record marks a signal triumph in the forward march of the Holstein-Friesian breed.

She was bred by A. A. Cortelyou, of Somerville, N. J., and her present owner is Oliver Cabana, Jr., proprietor of Pine Grove Farms, Elma Center, N. Y., at which noted establishment four other world's holders have been developed during the past six months.

The new world's record holder (freshened at the age of 8 years, 2 months and 17 days. She is four-fifths white, weighs about 1450 pounds, and is sired by King Payne Segis 4678. Her dam is Virginia Johanna 6438, a daughter of Johanna Rue 3d's Lad and Virginia O'Connell.

The test was made under perfect conditions, absolute quiet, systematic feeding and milking, and a roomy stall constructed of clean white enameled walls.

Segis Payne Johanna's 7-day production of over 5600 pounds of butter surpasses that of Hester Aaltje Korndyke, the previous world's record holder, by 294 pounds. In their present warranted state of duration, enthusiastic Holstein-Friesian breeders over the dairy world at large now marvel at the accomplishment of what was almost impossible to ask, "where will it end?"

Mr. John Conner is the guest of relatives in Indianapolis.
Harry Aulridge and family will move to Covington, this week.
Chas. Castleman, of East Bend, is the guest of his parents, Dr. and Mrs. T. P. Castleman.

Mr. and Mrs. Alvin U. of Dayton neighborhood, spent last Sunday with Mrs. Armina Pearson.

Mrs. Phil Lambert had as her guests last week her sister, Mrs. Feltman and children, of Covington.

Miss Janie Cook, of Erlanger, spent Saturday and Sunday with her grandmother, Mrs. J. R. Whitson.

Mr. Geo Goodridge, spent from Wednesday until Saturday with his brother, John Goodridge, of Richmond.

Henry Fisher and daughter Miss Hannah, spent Easter Sunday with Charlie Osler and family, of near Covington.

Mr. and Mrs. Arch Lucas and daughter, Arch's Mary, were the guests of their son, Elmer Lucas, of Erlanger, recently.

Miss Sadie Snyder, of Richmond, this State, arrived home Saturday for a visit with her mother, Mrs. Effie Snyder and other relatives.

Mr. and Mrs. Joe Baxter entertained Sunday, Mr. and Mrs. Emmet Baxter and children, Mr. and Mrs. Will Taylor and son, Roy, William and Edward Baxter and Miss Mamie Bohr, of Reading, O.

Mrs. Ed. Snyder was given a surprise Sunday in honor of her birthday. The guests, children and grandchildren of Mr. and Mrs. Snyder brought well filled baskets and an enjoyable day was spent. Present were Mr. and Mrs. Chas. Zenger, of Cincinnati; Mr. and Mrs. Charles Ayler and children, of Erlanger.

Frank Bauers, who has been quite sick with rheumatism, is recovering.

People are trying to get some gasolene, but with the heavy rains little or no progress is made.

Mrs. Anna Crigler and brother, John Wile, who have been quite indisposed since their return from Hartwell, are recovering, much to the delight of their many friends who are glad to have them with them again.

An ice cream parlor will be opened here as soon as the season will admit, under the direction of our enterprising young citizens, Russell Mitchell and Chas. Corbin.

It will surely be a very convenient enterprise and something we all long for when the hot days of summer come.

The members of Hopeful church will begin holding their meetings the 2nd and 4th Sundays in each month in the Presbyterian church building in Florence soon, and continue until their new church is completed, which is to be a handsome \$8,000 structure. Wish they had more time.

The people of Florence have something to be very thankful for and should encourage it by a liberal bus run by our enterprising citizen, Mr. Phil Lambert. It makes hourly trips from Florence to Ft. Mitchell car line, giving to service almost equal to the car line service. He has a nice waiting room for passengers.

Several of our citizens are showing their loyalty to our country and President by hanging out the stars and stripes. Surely every patriotic citizen will do this. Our dear President to the call of our great distress in him while the cry of War! War! is heard on every hand.

FLORENCE.

THE FINE SADDLE HORSE

Harrison Prince No. 3340

Will make the present season at the stable of G. T. Gaines one mile from Burlington, Ky., on the Petersburg pike at \$10 to insure a living colt. I will not be responsible for any accident that may occur. Harrison Prince is a chestnut stallion, 16 hands high, 8 years old, has a large blaze face, two white feet, and is a perfect type of a saddle horse with a fine finish and action, a champion in his class from a colt. His sire is Dandy Jim, the well known show horse. For official pedigree call on the undersigned.

FOR SALE.

Seven years old Shetland Pony with buggy and harness. Reasonable price. Over 100 set to select from. Call and see.

FOR SALE.

Good buggy, single wagon, double team and farm harness. Reasonable price. Over 100 set to select from. Call and see.

EGGS FOR SALE.

Single Comb Rhode Island Reds; full blooded; \$1.00 per setting of 15. Bait chicks 12 cents a piece. Apply to Mrs. J. A. HUEY, Phone Beaver 101, Union, Ky. June 1.

The Fine Belgian Stallion,

Don Degoze

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Hebron, Boone county, Kentucky, at \$10 to insure a colt to stand up and suck money due when colt comes or the mare is parted with or leaves the county. Don Degoze, despite his great size and weight, is well balanced, tough, and perfectly proportioned, and symmetrically built. He has as light action as a stallion of much smaller type, and his disposition is much better than is usually found in a horse of his blood. He is a beautiful dark sorrel, 17 hands high, weighs 1,800, has a broad foot, heavy bone, fine style and action. For official pedigree call on the undersigned.

FOR SALE.

Rhode Island Red eggs, 15 for \$1 or \$5 for 100. Stock from prize winners at the big shows. Mrs. J. M. ROUSE, Union, Ky. Phone Beaver 806. June 1.

FOR SALE.

DR. T. E. RANDALL of Petersburg, VETERINARIAN, is now ready to answer calls day or night. Charges reasonable.

The Fine Percheron Stallion,

PRINCE OLSEN

Will make the season at my farm two miles from Walton, Ky., at \$10 to insure a living colt. Prince Olsen is a beautiful black and is a model in his class, and is one of the best breeders in Kentucky. He weighs 1,700 pounds, holds a high head, and has short coupling and good action. He has taken a number of first premiums at the fairs.

FOR SALE.

At the same time and place my two fine big Jacks

BEN AND DEWEY

will make the season at \$10 to insure a living colt. They are two of the finest Jacks in Kentucky, and both are excellent breeders. Persons parting with mares forfeit the insurance money. A lien is reserved on the colt until the season is paid.

FOR SALE.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur. JOE READNOUR, Walton, Ky.

For Sale.

50 light Pilot Gas Machine for light and cooking purposes, complete, good as new pipe and connections, only used a short time, price reasonable. Address: T. J. McNEAL, 24 Central street, Ludlow, Ky. ap12

Personal Mention

Mrs. P. E. Cason continues to improve in health.

Mr. and Mrs. Gene Long were guests of her parents, Mr. and Mrs. R. S. Crister, Tuesday.

John Rogers, of Bellevue neighborhood, was in Burlington a short time last Saturday afternoon.

James L. Riley and wife, of Ludlow, were Saturday afternoon guests of Rev. and Mrs. Edgar C. Riley.

Mrs. Mary Hume's condition has changed very little, if any, for the better during the past several days.

J. W. Conley, of Beaver neighborhood, and county surveyor, was a business visitor to Burlington, last Saturday.

Bennett Stewart, of Patriot, Indiana, was the guest of his sister, Miss Katie Stewart, several days last week.

Miss Bessie Kirkpatrick returned Tuesday from a visit of several weeks with her sister, Mrs. Albert, of Cincinnati.

Miss Alberta Kelly was assisting with the clerical work in County Superintendent Riley's office last week.

W. F. Grant, who lives near the church on Gunpowder creek, was a business visitor to Burlington last Friday.

Mr. and Mrs. C. C. Roberts spent last Saturday night and Sunday with relatives in Walton and Verona neighborhoods.

Mrs. L. L. Campbell, of Lexington, delivered a very interesting address at the M. E. church last Sunday afternoon.

County Clerk W. R. Rogers was in Walton the latter part of last week looking after his farming and political interests.

Wallace Rice was the guest of his uncle, L. P. Rice and wife, of Idlewild neighborhood, last Saturday night and Sunday.

W. W. Grimley has moved from Walton back to his old home at the mouth of Gunpowder creek, having grown tired of city life.

Deputy Sheriff Connor was in Petersburg precinct last Thursday cleaning up the sheriff's circuit court business in that section.

Stanley Parker, who has a position in an ammunition plant at Erie, Pennsylvania, was visiting his grandmother, Mrs. Nancy Adams, the past week.

D. B. Wallace, cashier of the Equitable Bank and Trust Co., attended court last Monday, being a witness in the suit of Larrymore, etc., against Fred Wayland, etc.

Mrs. Nancy Adams, who resided at the first toll gate on the Bellevue pike for several years, went last Monday to Bellevue to make her home with her sister, Mrs. Eliza Riddell.

R. J. Akin, who resides over on Dumbell creek, was in Burlington last Saturday afternoon, at which time the sun was shining brightly and weather conditions were about all that could be desired, but he called to mind the old saying that "the direction from which the wind blows Easter Sunday will be continued for forty days." If the adage is verified this year it will be awful indeed.

Had Splendid Luck.

John Delahunty, of Beaver, was caller at this office Tuesday. Mr. Delahunty has at times that have so much having not lost a hunt this year. He has been offered \$2.00 for his hounds and fifty cents for his wood, but refused both offers.

B. L. Cleek.

B. L. Cleek, who was a candidate for the Democratic nomination for the office of Sheriff four years ago is a candidate again. Mr. Cleek served the county one term as Assessor and made a most efficient—prompt, painstaking and conscientious official. He is a very quiet gentleman, smooth mannered, but can cover as much political ground in a day as any man.

He has a large array of friends who will stay with him to the last ditch, and those candidates who enter the race for Sheriff will soon find out that Cleek is one of the strong contenders. He has designated Master Martin as his deputy and he being a very popular young man will bring to him an element of strength with which other candidates will have to reckon. As the entries for Sheriff now stand it is a horse race.

So far as this country is concerned there has been very little change in the war situation, preparation for an active campaign being made as fast as possible, but Europe it looks like—the Germans have lost their grip and the English and French are driving them back and capturing many prisoners, munition of war, etc.

When a portion of both the farmers and the farm help in this country go to the front nations will soon begin to develop a shortage, as farm labor is now at a low ebb.

The Burlington Baptist congregation will hold a meeting at 2:30 p. m., next Saturday. Business of importance requires the presence of every member.

John Graves, young colored man, has a very severe case of pneumonia at the home of his kinsman, Wallace Cleveland, in Burlington.

Jesse Kirkpatrick is having considerable trouble with the basement for the building he is erecting for Mr. Buchert. It caves badly.

The fruit crop in this part of the country was knocked out entirely by the cold weather last Sunday night.

Mrs. Walter Brown, of Hamilton, this county, died last Sunday night after an illness of about two weeks of paralysis.

Atty. C. C. Adams, of Williams-town, D. E. Castleman and O. M. Rogers, of Erlanger, are attending court.

Thomas Rouse, of Mt. Healthy, Ohio, came over yesterday to attend court a few days.

Clyde Berkshire made a considerable delivery of fruit trees here last Saturday.

The final survey of the East Bend road is being made for the pike.

Hope that this country will not experience seven Sundays such as last.

Gardens can not be put in condition for planting this week.

Gardens were in cold storage last Monday morning.

Court is not being attended by a very large crowd.

Everybody is talking war.

Eggs For Sale.

Thoroughbred Barred Plymouth Rock eggs, 15 for 5 cents. Apply to Kate Arnold, Petersburg R. D. 1.

Boone F. Rogers.

Boone F. Rogers, candidate for Assessor, is Assessor W. P. Bermon's deputy, and has made good as such. He is a gentleman of the old school and deservedly popular among those with whom he is acquainted, which, with an experience of three years as deputy, should make him a strong candidate with the voters. Mr. Rogers was born and raised on a farm and has been engaged in that business all his life and is especially familiar with real estate values, and would bring to the office a mature judgment, the result of his many years' intimacy with that element. If elected Mr. Rogers will keep Boone in the list of properly assessed counties in this State.

Harry W. Riley.

Harry W. Riley, who came second in the race for Assessor four years ago, has his hat in the ring again, and will make the man who beats him out know that Riley was after him. Mr. Riley is thoroughly competent for the position and if he gains the office he will perform the duties thereof with out fear or favor. This race he has won four years ago indicates that he knows how to appeal to the voters in an effective manner, and the friends he made then indicate a loyalty yet that will give him a good send-off in the campaign.

L. A. Conner.

L. A. Conner, candidate for sheriff, is well known in the county, having served as deputy for four years under B. B. Hume when he was sheriff and three years and over under the present sheriff, W.

D. Cropper, consequently he is familiar with the duties and responsibilities of the office. Mr. Conner has been the local buyer of tobacco for many years and his career as such has been entirely satisfactory with the growers whose product he has handled. Mr. Conner is strictly a business man but as a mixer he has few equals and soon acquires the friendship of new acquaintances and is bound to be a formidable opponent for those who enter the race for sheriff.

Made Two Trips.

A prominent citizen of Union, bought several days in advance, a ticket to "The Birth of a Nation," and when the day for him to attend, arrived he started to the city, and at Florence he discovered he had left his ticket at home. He hastened back home and got his ticket and yet had time to reach the show, but on the night of the show he was punctured, which delay caused him to enter the show when about half over, but the part he witnessed pleased him so that he purchased a ticket for another day and being disappointed in the time for the extra exhibition he started from home shortly after an early breakfast.

J. C. Gordon.

J. C. Gordon, principal of the Christian School in this county, was born and raised near Hebron. Mr. Gordon is now principal of Walton High School which has been placed in the front rank of that class of educational institutions in Northern Kentucky, having brought to his assistance his successful experience of several years as principal of a large school in Henry county, this state. Mr. Gordon is an educator of ability and puts his whole soul in his work, and if given charge of

Boone county schools he will give them his best endeavors, which is saying a great deal. Mr. Gordon is in the prime of life and has an intense interest in educational matters has the attributes necessary to a successful administration of so important an office as that of County Superintendent of Schools. Owing to his duties in the school room he will not be able to make his appearance at the political arena for several weeks.

J. S. Cason.

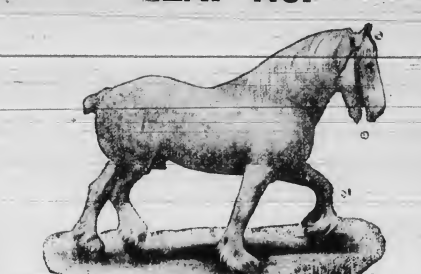

J. S. Cason, candidate for Assessor, has a large acquaintance in the county by reason of the fact he has for some time been engaged in a business that brought him in contact with the people, and his conduct has been such as to gain for him the confidence of all with whom he has had deal-

ings. Unfortunately Mr. Cason has lost a portion of one arm but this does not, in the least, disqualify him for the duties of the office as the business in which he is now engaged is more exacting physically than are the duties of an Assessor. He is a pleasant gentleman and quick to grasp a business proposition, and if he is elected Assessor he will make the county a faithful and competent official.

Frankfort, Ky., April 1.—A "supper" of 1000 of German "donkey" was held in a package near the L. & N. bridge across the river, and on investigation it was found to be a collection of "donkey" local officials tried to apprehend him but so far he has escaped. He is not known who he is.

GRAY LEAF No. 1716

Will make the season of 1917 at my place, Maple Grove Stock Farm, three miles from Florence on the Price pike, 2 miles from Linaburg and 3 miles from Anderson's Ferry, on the Florence Road, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible for any that may occur.

Gray Leaf is 17 hands high, weighs 1800 lbs.; is a dapple grey and a model draft horse. Foaled May 12th, 1902; bred by Samuel Meeks, of Galveston, Cass county, Indiana; owned by H. Bridges & Co., of Crawfordsville, Montgomery county, Indiana. Got by Printemps 13666 (21002), he by Saint-Germain 6232 (4215), out of Biche (1800), etc. Saint-Germain 6232 (4315), by Avata 1966 (912), he by Nogen 738 (729), he by Vidocq 483, (732), he by Coco II, (714), he by Vieux Chaslin (713), he by Coco (712), he by Mignen (715), he by Jean-le-Blanc (739).

THE FINE YOUNG JACK,

BOB GLASS

Will make the season of 1917 at the same time and place as Gray Leaf, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible should any occur.

Bob Glass, 5 years old, is 15 hands high, is black with white points, heavy bone, good style, and said to be the best young Jack in the country.

Bob Glass was sired by Jerry Glass, he by Ben Glass, one of the finest breeding Jacks in Northern Kentucky. Ben Glass was by R. B. Lee's fine Jack, he by Wm. Nichol's and Warwick's imported Spanish Jack that cost \$4,000, out of a dam by Younger Pitt's Jack that cost \$4,000. This is the same strain as the celebrated Ellison Jacks. The dam of Bob Glass is by the fine Spanish Jack Alexander, Jr., a black Jack 15½ hands high, and a premium getter who never shows.

For the official pedigrees of the above stock call on the undersigned.

B. H. TANNER and IRA WALTON,

R. D. No. 1, Erlanger, Ky.

Whisky Tax Passes the House.

Frankfort, Ky., April 10.—Dry members of the House passed a \$1,000,000 whisky tax bill at six o'clock tonight after an afternoon of fiery debate. The measure received an almost 3 to 1 vote after its author, Representative Thomas Spruiell, of Grayson county, accepted an amendment cutting the amount of the special license tax on distilled spirits from 10 to 5 cents a gallon.

Twelve wet members voted against the bill and ten drys did likewise, disclosing the queerest lineup of wet and dry forces seen in many a day. Ultra dries and certain wet leaders united in waging a bitter fight on the bill, but the "base" of an overwhelming majority of drys overcame the House divided the House.

Paint Your Autos and Buggies.

I have a first-class painter and will do you first-class work at reasonable prices; will also furnish you Rubber Tires, Wheels and anything you want about that line. Blacksmithing and wood work done promptly. E. H. ERNST, Hebron, Ky. o June 12

on 30 day trial free.

B. E. AYLOR, Burlington, Ky.

ONE WAR AT A TIME.

The gentleman who is eager to prepare America for the next war, that is, for some conflict in the far distant future, is overlooking the immediate danger which he is creating for himself. We cannot by any system of universal military training, recruit the army to the proportions which ever they are, the government will require in order to confront Germany.

The duty that first imposes itself upon the government is the preparation of the army and navy, of the fortifications, and of the incomes for this German conflict. Measures relating to these affairs should be carefully considered and promptly enacted.

We can, then, postpone for the future the suggestion of a compulsory universal military training. It is probable that after our war with Germany—which is the war which we are making now—there may be a revolution in Persia and Vienna, like what is in Petrograd, and the whole system of military command and control may be so completely changed that any training and compulsory service will collapse.

If this be a true conclusion, it will be a lamentable conclusion of this conflict, and we should rather be the chief opponent of militarism and its consequences.

As to this universal military system, it has failed abroad, and it will fail at home, judged by the highest standards of efficiency and success.

We do not have an army for the purpose of training citizens in warfare; we have it for the purpose of justifying the citizens in their rights of life, liberty and property.

Peace, says Cicero, is liberty in tranquillity, and there is no other peace. For this peace we organize an army.

The United States is to enlarge its regular army in accordance with the demand of the times. It is possible to raise it to a force of 300,000. If that is not sufficient, then there is the militia of the different states, nationalized under recent laws and not yet working smoothly under those laws.

The National Guard has demonstrated its patriotism and its readiness to fight in the Mexican campaign. Every State can be brought up to the high standards of New York and Massachusetts. With their citizen soldiers, the Legislature will avail themselves of the provisions of the recent act of Congress nationalizing the militia.

There is in the regular army and among even in the National Guard some opposition to this measure; but it is born more of a spirit of militarism than of good citizenship. We are not satisfied that the militia ought to be Federalized, and that there ought not to be a double allegiance of this body to the State and to the nation.

There is a double system of courts, and the juror who this month serves the State, next month may be called to serve the Federal government.

There is such a double allegiance running throughout American life. We are all citizens of the Federal government of the United States, but we are primarily citizens of the State in which we live. In our public duties we are voters in a double capacity, we are taxpayers in a double capacity, and there is no reason why the militia should not be organized on the same basis.

Otherwise, we must have two militas; one to answer the demands of the State, for the maintenance of order and the suppression of insurrection, not only to deal with labor difficulties, as some of the militarists seem to think, but to protect the courts and to support the sheriff and to do exactly for the State what the army does for the nation.

Not once in a generation do we have a foreign war; but we frequently have domestic disturbances. The man who answers the call of the Governor is just as much a loyal servant of the people, just as much entitled to honor and consideration, as the man who answers the call of the President to face a foreign foe. —Louisville Evening Post.

ALMOST COMPLETED.

Frankfort, Ky., April 8.—Beginning tomorrow the eighth week of the special session of the Legislature, the members have the satisfaction of knowing that most of their work has been completed. An adjournment sine die this week would not come as a surprise to many of the legislators. The three administration bills, the state tax commission bill, the classification of property bill and the bank tax bill have been passed. The state tax commission bill probably will go to Governor Stanley the first of this week for his signature and become a law. It carries an emergency clause.

Henry Hines, of Bowling Green, has been mentioned as the Democratic member and Thurman Dixon of Scottsville, the Republican member of the commission.

The classification of property bill and the bank deposit bill are before the House to concur in the amendments of the Senate. Action will be taken on them the first of the week.

There remains only one bill of importance to be acted on. It is the Spanish measure providing for a tax of 10 cents a gallon on spirituous liquors. It is likely this measure will come up for passage the first of the week.

For Sale—Three year old mare, has been worked everywhere \$100; also thoroughbred Foxterrier pups, \$3 and \$5. T. B. Sattlemas, Florence, Ky.

Destruction of a Noted Hotel.

The destruction of the Capital Hotel in Frankfort is a loss to Kentucky. Architectural landmarks are few in this State. The venerable stone hotel in Frankfort was one of the city's picturesqueness. It had been for a long time one of the chief points of interest upon the State. The destruction of the hotel is a loss to the city. Had it not been destroyed, it would have been of interest to countless travelers over the Jackson Highway and other interstate highways which will share the State pike between Louisville and Frankfort.

It may safely be assumed that when the Capital Hotel is rebuilt in a more conveniently arranged, a more commodious building, and, needless to say, it will be erected on its site. But if its ruins should survive in making a new hotel as attractive as the old one, it would be a great improvement on the old one. This modern hotel building is so governed by the demands of utility and economy that the finest of hotels is hardly more elegant than others the latest of office buildings.

Many of the real-estate men who were the minor houses of Central Kentucky plantations in the days of stage coaches survive. Rarely are modern residences built as tastefully unless they are built by architects who can be persuaded to imitate without variation the simplicity of design which governs the old buildings. In the Bluegrass, seventy-five or 100 years ago, but comes its architecture, in the country, still is unhampered by the value of ground calculated upon a basis of return on foot. The reverse is true of commercial building in cities, large or small. The tendency is to escape the skins with practical upper stories rather than to graze the view with handsome buildings.

The bill on the second floor of the Capital Hotel was sacrificed some years ago to a need of more business. The Assembly hall was given in the dining room. The bill of the room could only talk of the day when grand dames of the military school in the billiard room took to the floor to dance till daylight. There will be a better hotel, no doubt, but perhaps a better dining floor, too, will be nearer approach to the method and the mood of the most successful hotels in the world. The bill on the second floor of the Capital Hotel is a loss to the city. Had it not been destroyed, it would have been of interest to countless travelers over the Jackson Highway and other interstate highways which will share the State pike between Louisville and Frankfort.

Deadly Lily of the Nile.

One of the very unusual flowers of the world is the lily of the Nile, a member of the Araceae family. It is not uncommon in Egypt, where it grows in the marshes and stagnant water. But not many people living in other parts of the world have seen the flower; even the best botanists get little or nothing about it.

Merely to handle the peculiar and treacherous plant is to risk poisoning your skin, and to take any part of it internally would be certain death. A skillful and careful botanist who preserved a specimen that grew in a Los Angeles private garden was given a severe headache that lasted for a week.

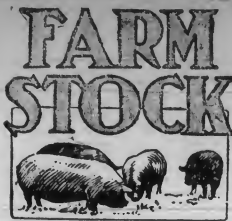

The bulb at the base of the flower, as large as a croquet ball, is a bowl of rank poison. The food of the plant is not drawn from the water and damp earth in which it roots so much as it is from its insidious life. It is a magnificent "poison" and often alive. It is said that the plant actually assimilates mice.

Fortunately it blooms only once a year. And to imagine that it is a snow white lily rising from the black soil. Instead it has an immense gorgeous purple velvet and shades of red spathe that surrounds a tall club-like spadix as thick as a woman's wrist. The shape of the whole is like that of the little jack in our first nature study days. The big leaf spreads and crinkles like a wonderful shell of royal purple velvet and shades of red down in the heart of the bloom, and the rigid, upright "club" in the center is as smooth as a spot and as repulsive as a snake. Snake-like, too, it sheds its skin when the blooming is over.

But the worst thing about this poisonous lily, aside from the odor that rises from its opening, is that it is shaking out a fine black powder—its own spores. It is the odor of the lily that attracts the carrion feeding insects.—Youth's Companion.

Gratitude.

McKinney, Texas.—A number of years ago a young man named King accepted the hospitality of the home of Tom Shewmake, a workingman of modest means, and lived with him for several years. King left the Shewmake home about a year ago, going to California. He returned to McKinney the other day and visited his old friend, Shewmake, whom he found to be a man of small means and a hard worker. King spent the night with him and while downtown together with a check for \$25.00 as a mark of appreciation for the kindness shown in their younger days. King has mining interests in California and is reputed to be a millionaire.

PLACE FOR FARROWING SOWS

That Animal May Not Be Disturbed She Should Be Kept Separated From Other Swine.

The less a sow is disturbed at farrowing time the better, and for this reason she should be kept separate from the other swine. While someone should be on hand, unless she needs assistance, it is best to keep away from her. If it does become necessary to help, do it as quietly as possible. As the pigs are not able to take much milk, the flow should not be stimulated for a few days. Give the sow plenty of water, as she is in feverish condition, but take the chill off of it if the day is cold.

It is not necessary to feed the sow for a day or two, and the first feed given should consist of a small amount of thin slop, which she should gradually increase as the pigs become able to take more milk. In two weeks time she should be on full feed, which should consist of a good, laxative, milk-producing ration. There is no better way of feeding the pigs than through the mother, so feed the sow for the greatest amount of milk.

Sow in Healthy Condition.

amount of thin slop, which she should gradually increase as the pigs become able to take more milk. In two weeks time she should be on full feed, which should consist of a good, laxative, milk-producing ration. There is no better way of feeding the pigs than through the mother, so feed the sow for the greatest amount of milk.

ARRANGE QUARTERS FOR RAM

His Rough Treatment of Ewes Is Source of Great Loss to Farmer —Keep Him Separated.

Allowing the ram to stay with the ewes through the winter and spring until lambing or shorn time is not always the best practice. It's good for the ram in case the ewes are well fed; he will get the lion's share, occupy the space for three ewes at the trough and rack, and grow fat and abusive. He will choose to feed where the ewes have peacefully lined themselves up rather than take an open place where feed is untouched, writes A. A. Hayne in National Stockman and Farmer. He stalks about and bunts the ewes out of his way on all occasions.

His rough treatment, bunting his way and crowding up to feed racks is a source of abortions and premature births.

Sheep values justify every care to increase numbers and values of next year's lamb crop.

Better arrange to put his ramship in other quarters than the ewe fold. That doesn't mean to isolate him in some small, dark, damp corner of the barn basement or to exile him to a back lot without shelter or regular feed.

ERADICATE ALL OX WARBLES

Hides Are Lessened in Value and Milk Production Decreased by Presence of Grubs.

When you find small lumps on the back of an animal with round spots in the hide, squeeze them and the grub that burrows under the hide will be found. These are ox warbles. Kill them, for they are one link in the life cycle of the ox warble fly.

Hides are reduced in value from 1 to 2 cents a pound by the presence of ox warbles. Flesh is sometimes so damaged as to be unfit for sale. Milk production is lessened by the presence of numerous grubs. Cattle in general are annoyed seriously by these warbles. Removing and destroying all the grubs from infested cattle will reduce the number of egg-laying females for next summer.

SUBSTITUTE SILAGE FOR HAY

Can Be Safely and Profitably Done in Rations for Horses and Mules, Says Missouri Station.

Silage can be safely and profitably substituted for a part of the hay in the ration for work horses and mules at the rate of two pounds for one pound of hay. In the conclusion reached by the Missouri station after two years' trials.

HORSE CARE IN WET WEATHER

First Scrape Animal, Then Blanket Him, Giving Good Rubbing—Keep Legs Warm and Dry.

When the horse comes in wet with rain, first scrape him, then blanket him, and rub his head, neck, joints and legs. If the weather is cold put on an extra blanket in 30 minutes. Change the wet blanket when the horse dries. It is important to have the legs warm and dry.

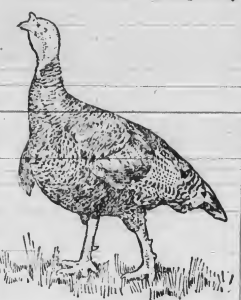

MOST PROFITABLE SIDE LINE

Cost of Raising Turkeys Is Small Where Free Range Can Be Given —Some Important Factors.

For those who are favorably situated for raising turkeys, a more profitable side-line can hardly be found. Given plenty of range where the turkeys can find grasshoppers and other insects, green vegetation, the seeds of weeds and grasses, waste grain, acorns and nuts of various kinds, the cost of raising them is very small and the profits large.—first and stock farms are particularly well adapted to turkey raising, and it is on such farms that most of the turkeys are found. Little has ever been done in the way of raising turkeys in confinement, and where it has been tried the results have been discouraging. Plenty of range is essential to success in turkey raising.

In selecting turkeys for breeding, the most important factors to be considered are vigor, size, shape, bone, early maturity and color of plumage. The body should be deep and wide, the back broad and the breast round and full. The head should be of good size and of a clean, healthy appearance. A strong, well-made skeleton is shown by thick, sturdy shanks and straight, strong toes. It should be the aim of every turkey raiser to have a flock of purebred turkeys, even though they

Bronze Turkey.

are sold at market prices. The male at the head of the flock should be by all means be a purebred of the best type obtainable. The male is one-half the entire flock, and by continually selecting the best females of a similar type and mating these with a purebred male, one can soon have a flock of uniformly large, early-maturing, strong-boned, long and deep-bodied turkeys of the same color.

Fifteen turkey hens can safely be mated to a vigorous tom. If 25 or 30 hens are kept, two toms should not be allowed to run with them at the same time, but one should be confined one day and the other the next. When two toms are allowed to run together during the mating season they fight badly and the stronger does practically all of the mating.

DISPOSE OF DEAD CHICKENS

Practice of Permitting Carcasses to Lie About Premises Is Poor One —Burning Is Best.

The practice of allowing dead chickens to lie about the premises or in the brooders and of throwing them over the fence for the hogs to eat, are decidedly bad, and directly responsible for large losses each year by causing and distributing disease, writes M. H. Becker in Farm and Home.

Burning is the safest and easiest method for disposing of dead fowls. The coal-burning brooder stoves will take care of any losses among small flocks and where considerable numbers of fowls are kept a small laundry stove or air-tight heater set up in the feed house or tool room will prove very satisfactory.

PREVENTING WASTE OF FEED

Give as Much Mash as Fowls Will Clean Up in Ten Minutes—Scatter Grain in Litter.

Feed as much mash food at each meal as the fowls will eat up in ten minutes, and remove any that remains. Give as much grain as they will work hard to scratch out of a deep litter. More feed than this is wasted, and spoils the appetite of the fowls because it is constantly before them.

REMEDY FOR FROZEN COMBS

Thaw It Out With Snow, Rub Briskly With Alcohol and Later on Apply Vaseline.

When a fowl freezes its comb, if the comb is still full of frost, thaw it out with snow, rub it briskly with alcohol and later apply vaseline. If the comb has thawed out when discovered, apply carbolized vaseline or even ordinary vaseline twice a day.

A Week's News

The Legislature will not adjourn before the expiration of 60 days.

Charles Birkle has a fine crop of onions coming on. He planted very early.

The common schools in the county have completed the 1917-18 school year.

The Lower House in the Legislature defeated Hon. F. C. Greene's preparedness bill.

Some fields of wheat in this county are said to look well while others are worthless.

W. L. Kirkpatrick has sold a large lot of wire fence this spring and it continues to go.

It is said the Bullittsville and Dry Creek turnpike is in better condition than usual this spring.

Officers in Nebraska are required to arrest any man upon whose breath there is the odor of whiskey.

Not often in the past has there been as little garden work done in Burlington at this time of the year.

One good day followed by two bad ones is about the way the weather has been performing this month.

If crop reports that are being published are wholly reliable the entire world is on the verge of a famine.

A large volume of water fell last Thursday, and rivulets became destructive streams in many instances.

The big coal fleets that use to be seen so often going down the Ohio river at this time of the year are now a curiosity.

The electrical company has been granted a franchise along the Lexington pike from the Boone-Kenton line to Florence.

The High School baseball team did not meet the Woodstock team as advertised last Thursday afternoon, the weather being too bad for outdoor sports.

He who makes two potatoes grow where only one potato grew before is a more valuable beligerent than a Theodore Roosevelt.

The supply of coal in Burlington is getting very short, and such days as Sunday make housekeepers have nervous chills when they take a survey of their supply of fuel.

The lecture at the court house last Saturday night was attended by a very small crowd, but those present were entertained and given considerable interesting information by Dr. Ray who has traveled extensively.

Last Saturday Mrs. Mary Ryan, 78, of Mudlick neighborhood, was tried before Judge Cason and a jury and found to be incompetent to manage her business affairs. Some time since Mrs. Ryan fell down stairs, since which time her mind in a manner has been blank.

Renewing his subscription to the Recorder Dr. L. C. Owen, of Rising Sun, writes: "I notice in a recent issue of your paper that shade trees will be planted along the Dixie Highway. I would suggest that they plant fruit trees instead so that wayfaring man can enjoy the fruit also the shade."

Dr. Bryan, of Louisville, occupied the pulpit for the local Baptist congregation last Sunday. He was a guest of the regular pastor, Rev. DeMoisy, of Walton, and came with him to the morning services. Dr. Bryan's discourse was liked by all who heard it. There were no services that evening.

At a recent session of the Gallatin county Fiscal Court a committee composed of R. B. Brown, W. H. Ross and W. P. Crouch, was appointed to confer with a committee from Boone county relative to the building of a joint bridge over South Fork creek between Gallatin and Boone counties.

A Cincinnati cop pulled Dudley Blythe last Friday because the number on the license tag on the rear end of the truck he was driving was obscured by mud. He was required to put up five dollars as bond for his appearance in the police court Saturday morning at 10 o'clock when he was dismissed and his V returned.

Congressman A. B. Rouse has secured Edwin Duncan's appointment to a cadetship in the Annapolis Military school, and he expects to take the examination some time next June. He is the son of Dr. and Mrs. E. W. Duncan, of Burlington, and a member of this year's graduating class of the local High School. The young man is very popular and has a host of friends who wish him all kinds of good luck at Annapolis.

Sunday was a white Easter and an ideal winter day, the wind coming from the west in a rush and the snow falling fast, but, happily, melting all the while, otherwise, it would have acquired a depth of about three inches. It was a bad day for the display of new military goods, and a good day for staying in doors. The old inhabitant had seen just such an Easter has not been located yet.

Dangers in Flying Machines.

From leakage of petrol spray the pilot may become dizzy, and the exhaust gases from the engine-carbon monoxide and dioxide-may cause headache, drowsiness and malaise, says a writer in the Lancet, discussing the danger familiar to airmen. The rarefied air at great elevations may induce the symptoms well known in balloons, and Wells refers to a case of frostbite in an airman who had been exposed to 34 degrees of frost at an elevation of 15,000 feet. Psychasthenic symptoms-namely, loss of self confidence and the resulting mental worry aerosthenia-are not uncommon, and prove that the victim has mistaken his sphere of activity.

Flying is undoubtedly the job of a young man under thirty years of age, and not every young man is temperamentally or physically fitted to carry it through. Perfect eyesight is necessary to insure safe landing, correction with glasses being not without its dangers; perfect hearing is essential to detect the first indications of engine defect, and free movement of the joints of the limbs to control the steering gear. Fits and tendency to faint absolutely deter the aspirant from the air. In one remarkable instance at Hants an airman who fainted, with the result that the airplane dived nose down ward 1,200 feet into a plowed field, escaped with such minor injuries that he was at first extremely loath to give up this branch of the service.

Our Plain Duty.

At last we are facing war, and there seems no honorable way in which we can avoid it. We, therefore, must fight.

But with the conflict a reality, it will be well if we as a people are disposed to profit by the experience of the nations across the water.

It is like a prosaic matter for discussion, but really one of the greatest factors that will enter into the matter is our food supply.

It is already faced with prices as high as it can stand, and we can possibly endure with a pronounced shortage in many lines of products; and if a large army and navy are recruited from our industrial workers, the situation is liable to become serious.

It is, however, fortunate that the crisis should come at this season of the year, when the people can plan to meet the situation. The farming season is just opening, and every man, woman and child in the United States should be brought to feel that on his or her shoulders rests a very tangible portion of the responsibility of the fact that the nation.

Our people must be fed. In an ordinary year this matter would automatically take care of itself. But not so in this instance. Aside from the fact that thousands and thousands will be drawn from the ranks of the workers, we will have also to reckon with the realness and excitement that will inevitably prevail throughout the country.

This is not conducive to successful work.

What our people must realize is that no calamity can be allowed to touch us as a whole. An army may be mobilized, the navy strengthened, but affairs will move along in the same groove in all lines of industry. Hence with the influx of men from the front lines that are sure to come, the first thought of all the people should be to see that every available foot of tillable soil is made to produce a crop.

And this should not only apply to farmers. Millions of people in the cities and towns can contribute largely to the result. Unused back yards, vacant lots, fallow fields, even railroad rights of way can be made to add to the quota. Every dweller in a city or town who can by any means secure a plot of ground should do so and devote a portion of his or her time this season to producing something to eat. None should evade this duty, for a DUTY it is.

Let none delude themselves with the belief that there will be any material lowering of the prices of foodstuffs unless an increase in production. There are yawning markets the world over for every bushel of wheat, corn, potatoes, or any other article of food that we can produce, and even if we should escape a long war, at least as long as the conflict continues in Europe that demand will be urgent.

We can, we should, we MUST make of ourselves that which we glory in proclaiming-a nation of farmers.

Sim Jacobs, on his way home from Cleveland, Ohio, last Saturday, experienced a little taste of war with Germany, when he attempted to walk across the C. & O. railway bridge between Cincinnati and Covington. He was halted by Uncle Sam's soldiers, and before he could proceed he was requested to give his history from the time of his birth up to the present, and where he lived and where he had been visiting. Sim said he told them he was from Kentucky from the sweet clover country of Pendleton, and always voted the Democratic ticket and was with Uncle Sam until he was fished over, and the only kind of bombs he carried in his grip was brandied "Old Tub Power." The Captain told him his record was clear, and he could pass on to the promised land, where milk and honey flowed and the milk maidens its flavor. Pendleton Outlook.

The Licking Valley Christian Sunday School Union will be held at Palmyra, Pendleton, April 13-15th. The Union is made up of the churches of Boone, Campbell, Kenton, Pendleton and Grant.

RAISING OF WILD GAME IS ENCOURAGED

The raising of "wild game" is a comparatively new industry in this country, but has been making remarkable strides in the last twelve months, according to the report of the Game Conservation society, says New York Times. The society's membership includes many breeders who have established game farms for the purpose of renewing the country's supply of game food for table consumption. This supply, according to members of the society, was rapidly diminishing until a year or so ago, and many of the most delectable forms of wild food that had formerly been plentiful in this country had become rare dishes even for epicures.

Wild ducks and pheasants are among the varieties of fowl that are being raised by the breeders at the present time, and according to the society's report the former have become so plentiful through this method in some states that they have appeared on the menu at prices which place wild duck within the range of the public generally instead of the rich alone. In Minnesota, the report states, wild duck sold at \$1 each this year. It is suggested that our members have over 1,000,000 game birds-there were fewer than 100,000 reported last year-and that they have several times as many deer and elk as they had last year. The membership of the society has doubled during the year, and our list shows a very rapid increase.

"The breeding of quail and grouse has been started in the Western states, and there is much interest in quail breeding in the Southern states, which are well adapted to the production of quail in large numbers.

"Despite the fact that hundreds of thousands of pheasants have been raised by the breeders," the report says, "the prices have continued to rise because importers have been prevented from bringing these birds from foreign countries.

"It is evident that comparatively little of our vast territory will be needed to make America the biggest game-producing country in the world. Since game overflows from the many breeding grounds and re-stocks large areas where it has become extinct, the sportsman in all localities find they are benefited.

WILD GEESSE, CRANE LAKE, SASKATCHEWAN.

geared in the report that at the present rate wild duck and other formerly rare fowl may actually tend to lower the cost of the more commonplace meats of daily consumption.

Favorable Laws. "Thirty-five states now have laws permitting the breeding and sale of all or certain species of game, and many game farms have been started in other states in anticipation of laws encouraging the industry," the annual report says. "Reports coming to our game census

indicate that our members have over 1,000,000 game birds-there were fewer than 100,000 reported last year-and that they have several times as many deer and elk as they had last year. The membership of the society has doubled during the year, and our list shows a very rapid increase.

"The breeding of quail and grouse has been started in the Western states, and there is much interest in quail breeding in the Southern states, which are well adapted to the production of quail in large numbers. "Despite the fact that hundreds of thousands of pheasants have been raised by the breeders," the report says, "the prices have continued to rise because importers have been prevented from bringing these birds from foreign countries. "It is evident that comparatively little of our vast territory will be needed to make America the biggest game-producing country in the world. Since game overflows from the many breeding grounds and re-stocks large areas where it has become extinct, the sportsman in all localities find they are benefited.

WINTER EGGS FROM PULLETS

Must Be Hatched Early Enough to Reach Degree of Growth Necessary to Lay in Autumn.

Pullets will always be the main force in producing winter eggs. As in the case of the hen, however, winter laying is not natural, and their tendency toward spring laying must be offset by hatching them early enough to reach the degree of growth and maturity necessary for egg production in the fall.

Pullets that have not sufficient development to begin laying before the severe winter weather starts will almost invariably not lay before February or March.

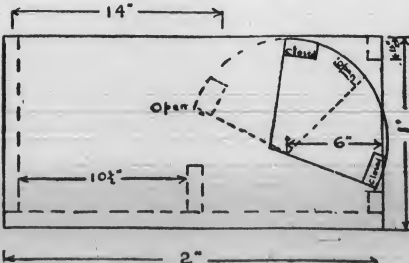

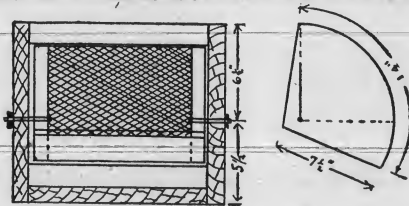

GEESSE REQUIRE MUCH SPACE

Fowls Should Be Confined as Little as Possible-Water for Bathing Is of Importance.

Geese should be confined as little as possible, as they need plenty of room to walk about. While it is not strictly necessary to have a pond or other water for them to swim in, bathing is very beneficial in keeping them clean and in affording exercise to prevent overfatting.

When geese are within range of water and are suffered to roam at large they usually discover it and daily resort to it afterward. But notwithstanding their fondness for water their sleeping places must be kept dry.

FEW TRAP NESTS HELP BUILD UP FLOCK

DETAILS OF SERVICEABLE TRAP NESTS.

Why not install a few trap nests and next year at this time know the actual production of each hen? It is the one certain way of eliminating the low producer and building up the flock. By observing the illustration shown herewith and following directions given, any poultry man handy with tools, may make a simple and serviceable device.

Dotted lines show the position of the revolving door when open, and solid lines when closed. The lower drawing shows the nest from the side, while the front view is given in the upper left hand figure. The revolving door is easily forced shut by the back of the hen. The next keeps her trapped until someone lets her out, and so finds out which hens are laying the eggs.

ABOUT YOUR BOY.

The father and son movement is one of the best and most sensible things we have heard of for a long time. That is because it proposes to accomplish results through using natural human instincts, says Milwaukee Journal. It appeals to the deepest of human feelings—love. It goes about to remind fathers of something they may have forgotten and to tell boys something they may not have known. You can get at this better if you sit down and talk confidentially with some other father's boy. He will tell you things your own boy cannot. In his wistful earnestness, you will discover that there are times when a boy has a real notion of grave importance to him that finds his father too busy to be bothered. It will make you stop and think as you realize that this little fellow couldn't come to any other conclusion than that his dad was indifferent. Fathers know better; fathers remember pretty well when they were boys, but they don't remember just how sensitive a boy is to the worst of rebuffs, that of being thought silly. Now, the boys need to be told this about their fathers, that they are not indifferent. But after all the biggest thing is to tell fathers, for it is their business to understand and theirs is the responsibility.

They are striking figures that the bureau of education gives in its report on the schooling of the American people, says New York Mail. They show that 24 per cent of the population, a trifle less than one-fourth of the American people, are in school, either as pupils or as teachers. Schooling, it thus appears, is our greatest national industry. And the proportion of brains, hearts and souls that this industry absorbs, in comparison with the three other leading countries in the world, is an inspiring revelation of America's thirst for knowledge. In Germany, the country that ranks next to the United States in the scope of its educational equipment, 20 per cent of the population are in school; in Great Britain, 17 per cent; in France, 17 per cent; in the United States, there are 23,500,000 persons enrolled in various educational institutions. When an average of hope that is the only that will create and guard America's future.

A home-owning, hard-working people is the best asset that any nation can have. From time immemorial the strength of the nation has been in its sturdy yeomanry. The home-owning, law-abiding, self-respecting farmers have furnished the backbone of patriotism which has stood fast against the assaults of foreign assailants and the attacks of the more dangerous enemies at home. The sturdy arms and stout hearts of the farmers have made every country great, and the moment the welfare of these people is attacked, the decadence of the nation has begun. The history of Greece, of Rome and a dozen other world powers that have been, testifies eloquently to this fact and warns against any nation of today permitting it.

It is announced that the price of celluloid collars has advanced 30 per cent. Celluloid collars are not worn by "fifty" young men; linen is prescribed in elite circles. Moreover celluloid collars are not the safest things in the world. A spark might ignite them and cause them to burn fiercely if not to explode. There have been serious accidents to youths wearing celluloid collars. All this goes to show that the 30 per cent enhancement in the price of celluloid collars cannot be entered under the head of high cost of living, but may be classified with items referring to the high cost of dying.

"After the war," says an eastern statistician, "the cost of necessities will be still more increased, with wages elevated in proportion." We may expect eventually to see the worried laboring man, undecided whether to sink his week's wages in a pair of shoes for his wife or a couple of hundred dollars' worth of bread for his hungry children.

A young man in California in a court case declared he was mentally incompetent. If many others were as clear-sighted as he to the same fact in themselves, the world would be much wiser and happier.

Again an eminent doctor says cancer is easily curable in the early stages, but as cancer lurks ever in the recognized by the doctors until the incurable stages, so it doesn't make much difference in the statistics.

A university professor says that much of the efficiency of the French and German armies is caused by applied psychology. But a portion of the credit is due to the heavy guns.

We haven't been able to figure out yet whether the expert who is going to Africa to study the higher apes is a trapeze performer or a telegraph lineman.

A new dance invites its courtesies to toddlers. It is to be hoped that its first move is not in connection with today.

BOONE CIRCUIT COURT

The Wheels of Justice Running Smoothly.—Business Will Carry the Term Into Next Week.

The April term of the Boone Circuit Court convened at 9:30 Monday morning, Judge Gaines presiding and Commonwealth's Attorney John J. Howe, present, as were all the other court officials. The first business was the organizing of the grand jury, which is composed of the following gentlemen:

John W. Early, Petersburg, W. L. Cropper, Idlewild, W. M. Adams, Union, F. O. Norman, Idlewild, A. B. Myers, Verona, Andrew Cook, Burlington, F. E. Long, McVie, C. C. Stephens, Plattsburg, Henry Dixon, Richmond, B. C. Graddy, Buftsville, Henry Holworth, Union, Lute Bradford, Florence.

The grand jury was given a comprehensive charge by the court, some of the offenses being referred to at length, John W. Early, of Petersburg, was appointed foreman. Shortly afterwards there was a considerable number of witnesses from Bellevue and McVie in waiting to go before the grand jury among them the most prominent citizens.

Most of the court's time the first day was consumed in hearing the suit of Larrymore, etc., vs. Fred Wayland, etc. The court had not rendered a judgment in the case when this report closed.

Upon the call of the docket cases were set for trial as far ahead as the 8th day of the term, which is Tuesday of next week.

Attys. Harper Rucker and W. W. Dickerson, of Cincinnati, were on hand early last Monday to participate in the court proceedings.

Judge Adams had everything about the court house in readiness for the beginning of court Monday morning.

This public park was organized last year and is composed of the following:

John Early, Petersburg, W. L. Cropper, Idlewild, W. M. Adams, Union, F. O. Norman, Idlewild, A. B. Myers, Verona, Andrew Cook, Burlington, F. E. Long, McVie, C. C. Stephens, Plattsburg, Henry Dixon, Richmond, B. C. Graddy, Buftsville, Henry Holworth, Union, Lute Bradford, Florence.

John Early, Petersburg, W. L. Cropper, Idlewild, W. M. Adams, Union, F. O. Norman, Idlewild, A. B. Myers, Verona, Andrew Cook, Burlington, F. E. Long, McVie, C. C. Stephens, Plattsburg, Henry Dixon, Richmond, B. C. Graddy, Buftsville, Henry Holworth, Union, Lute Bradford, Florence.

The court has been having trouble with refractory witnesses called by the grand jury. In some instances a lecture by the court was sufficient to make them talk, while in others the threat to be marched across the street and were about to enter the jail before they saw the error of their way, while on spent several hours beneath the protecting roof of the jail over night.

T. M. Horton was tried Tuesday for the scrap he had with Omer Adams, of Hathaway. The jury returning a verdict of acquittal.

The damage suit of T. M. Horton against O. B. Adams is on trial before a jury as the Recorder goes to press.

JUST PLAIN AMERICAN

Bentler's Economy Drug Store.

Linseed Oil - - Per Gal Market Price Today.

HERE'S HOW I DO IT.

Early last fall I merely moved the calendar up a year and took a glance at what the market might be today for Linseed Oil. It was easily seen that unless conditions were greatly changed, prices would continue to advance. The odds were in my favor so I bought 1000 gals. The price I paid permits me to offer it to you at \$1.07 per gal. (which is the market price in barrel lots) and still retain a legitimate profit.

I never give anything away, but always take advantage of every opportunity to serve you—give you an exceptional bargain once in a while.

White Lead Anchor Brand

A slight reduction is also offered on White Lead (pure Anchor Brand.) As this paper goes to press the market quotation is 11c per lb. My price will always be in the same proportion as it is today—rising and falling with the market, but always giving you the best possible price you can get anywhere.

spent Saturday with friends at
Beaver.

Miss Nellie Jones is the guest
of her sister, Mrs. Chester Stephens,
of Covington.
H. L. Jones and wife were busi-
ness visitors in Covington, one
day the past week.
The Modern Woodmen of Grange
Hall, who were visitors to that
order here, Friday evening.
Mrs. L. R. Miller and Miss Nellie
Jones were guests of Miss Eliza-
beth Hodges, recently.
The Ladies' Missionary Society of
the M. E. Church was entertained
by Mrs. Peter Kraus, Friday.
Little children were here the
past week on business portin-
ing to this week's court and also
putting in a word for himself.
Hert Smith, of East Bend, spent
Saturday and Sunday here at the
beside of his father, Uncle Dan
Smith, who has been very ill but
seems to be somewhat improved.

DEVON.

Sunday presented a picture more
for Christmas than for spring.
Mr. and Mrs. Jeff Huttel were
in Erlanger, Saturday afternoon.
Charles Reeder's family, who
have been sick with tonillitis, are
improving.
Mr. A. Taylor, of Covington is
moving to the farm in the neigh-
borhood recently purchased of W.
A. Murray, Sr., of Cincinnati.

If You Really Want to Reduce the

Cost of Living!

Don't forget that you need a Fresh and Cured Meat
Market in your home town. Consider quality and
I can serve you daily with these articles.

TO THE FARMERS:

If you have cured meats or lard get my prices before selling,
as I have orders daily for this line of produce, and pay the
highest prices for all kinds of farm produce.

FARMER'S SUPPLIES

A nice line such as Farm Fencing, Farm Gates, Cement,
Lime, Tiling, Poultry Netting and Farming Implements
such as Hoes, Rakes, Shovels, Post Diggers, Forks, Gar-
den Plows and other articles of this kind.

AUTOMOBILE SUPPLIES.

Automobile Tires, Inner Tubes, and Painting Outfit for
your car. Don't be afraid to get my prices. Let me sell
you a few gallons of Moore's Gasoline and note the differ-
ence in the running of your car.

If you want to keep your Oil Stove in perfect condition
fill your oil tank with Independent Oil--That's the good oil.

HARNESS OF ALL KINDS

Such as Back Bands, Backing Straps, Check Lines, Hame
Straps, Halters and others pieces you may want.

I am on the job daily with my truck moving goods to and
from the city and will fill your orders with goods
that I do not carry in stock.

A nice line of the BEST OF FEEDS on hand at all times.

SEED OATS, GRASS SEEDS of all kinds, and
GARDEN SEEDS, the very best at a reasonable price.
Try a Bbl. of Liberty Bell Flour, every lb. guaranteed.
Fresh Groceries of all kinds, prices right.
A pound of Nobecker Coffee, 25c lb. give it one trial.

W. L. Kirkpatrick,

Burlington, Kentucky.

CONSTANCE

Mr. and Mrs. A. F. Milner enter-
tained Bro. Carter and wife, Sat-
urday evening.
Bro. Carter filed his regular
appointment Saturday night and
preached an excellent sermon to a
large and attentive audience.
The Ladies Aid met at the home
of Mrs. Della Milner last Thurs-
day. There was a full attendance
and all enjoyed the day very much.
Death entered two homes in Con-
stance in the month of March.
March 2nd Mr. Joel Peeno, an old
pioneer resident of this neighbor-
hood died of blood poison after a
short illness. He was 76 years old.
He leaves to mourn his loss a
wife, 10 children, 4 grandchildren
and great grandchildren. In his
early manhood he was married to
Miss Mary Jane Barlow, who died
33 years ago, and left four sons
to survive her. Thirty-one years
ago he married Miss Margaret War-
ner, who with six children, four
daughters and two sons, survive
him.

Death came to the home of Mrs.
Dena England March 24th, and
said unto her "your work on earth
is done, come home and enter into
the rest prepared for you." Mrs.
England was born in Oldenburg,
Germany, in 1818, coming to this
country when a child. When quite
young she was married to Robt.
England, who, with nine children,
five sons four daughters, 1 brother,
niece, came home and enter into
the rest. A good wife, mother and
friend has gone on before. Her
place in church, Sunday school
and Ladies Aid is vacant. We all
miss her kindly smile and greeting.
Blessed are the dead which die
in the Lord from henceforth, that
they may rest from their labors,
and their works do follow them."

GASBURG.

Wheat looks very badly and can
only make a high yield.
A large acreage was seeded to
rye most of which is looking well.
This reporter sold Wm. Rogers,
of Bellevue, a cow and calf last
week.
Very little work has been done
towards raising a crop. No oats
have been planted in the sand here
a couple of weeks ago.
Phillip Kloppe has moved back
from Lawrenceburg to the old
Frank Kloppe farm on lower Wool-
per.
Mr. and Mrs. Rowland McCarty
gave the young folks a dance
Friday night. Spinnery Smith and
son, made the music.
Word from A. E. Parker, of near
Los Angeles, California, is to the
effect that he is very feeble both
physically and mentally.
If not aided by the freeze Sun-
day night there will be a partial
crop of peaches on the last ground
--tens at all on the high.
Miss Lizzie Barker came down
from Saylor Park Friday and vis-
ited home folks until Sunday. She
reports the Kentucky colony there
is well and prospering.
The weather here been very fine
since Monday morning having a
slight coolness.

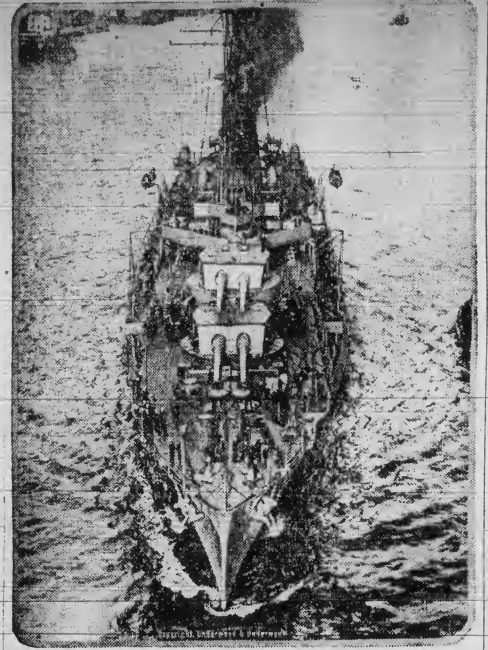

GUNPOWDER.

Linnie Busby and wife enter-
tained the young people with a
dance, last Saturday night.
Dogs made a raid on Miss Lizzie
Dorsey's sheep last week and did
considerable damage to the flock.
With a heavy gale from the East
and about two inches of snow
fall last Sunday gave the day a
wintry appearance.
P. Barlow and Beemon Bros.
shipped some nice porkers to the
market last week, and the prices
received were very satisfactory.
The members of the Presbyterian
church here have kindly of-
fered the use of their church build-
ing to the Hopeful congregation
in which to worship until the new
church is completed.
On account of the inclement
weather only a few persons at-
tended the farewell services at
Hopeful last Sunday, that being
the last meeting that will be
held in the old church.
Billy Busby, who enlisted in the
U. S. Army several months ago,
visited his parents, L. H. Busby
and wife, last Saturday night. He
has been on the Mexican border
and his company came to Cincinnati
it recently to await further or-
ders.
The new board of directors for
the Mutual Telephone Co. met
last Saturday and organized by
electing N. C. Tanner, president;
J. M. Hays, secretary and R. N.
Head, treasurer. The board is
well organized and the future pros-
pect for the company is very en-
couraging.

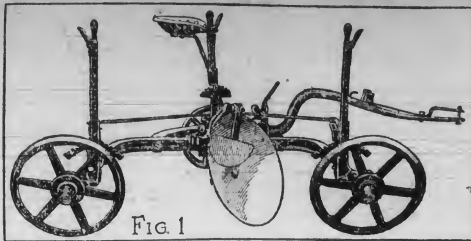

PETERSBURG.

Mrs. Louis Geisler was in town
Wednesday.
John McWethy arrived Saturday
for a visit with his sister, Mrs.
Mary Yerkes.
Mrs. Geo. Ruth and Mrs. Myrtle
Jarrell, spent Wednesday with Mrs.
Fleet Hoffman.
Mrs. and Mrs. Sam Ellington, of
Lawrenceburg, were the week-end
guests of Mrs. Mary Sturgeon.
Miss Ormal Kloppe, brother,
Rutherford, were Sunday guests at
the home of Mr. Eugene Witham.
The Easter exercises which were
to have been held at the Chris-
tian church, were postponed until
Sunday evening, April 13th. Ev-
eryone is invited to be present.
Mrs. Jane Snelling, wife of John
Snelling, died at her home last
Sunday evening. The funeral was
conducted Wednesday afternoon at
the Petersburg cemetery by Rev.
R. Carter. The large crowd of
people present testified to the
fact that Mrs. Snelling had many
friends. The sympathy of the
extended to the bereaved hus-
band.
Card of Thanks--I desire to ex-
press in this feeble way my heart-
felt thanks to the kind friends
who have done so much for me
my hour of sorrow. I feel so
feeble, and I know God will re-
ward each for their kind offices.
I desire to especially thank Rev.
R. Carter for his kind consoling
tribute to my suffering wife,
and for the expressions of sym-
pathy to me in my dark hour.
Also to Mr. John H. Stetson, under-
taker, for his efficient services
rendered.
John Snelling.

UNITED STATES BATTLESHIP NORTH DAKOTA

PREPARE CORN LAND IN THE SOUTHEAST

ADAPTED TO SOUTH ATLANTIC STATES.

(Prepared by the United States Department of Agriculture.)

Nothing will do more to economize the labor of tilling corn land and to prolong the good effects of tillage than the presence of an ample quantity of humus in the soil, says Farmers' Bulletin 726 of the U. S. Department of Agriculture, which deals with corn culture in the Southern states. All land, the bulletin points out, intended for the profitable cultivation of corn should be stocked with humus as soon as possible. This can be accomplished by growing as preparatory crops legumes such as cowpeas, velvet beans, vetch, the clovers and beggarweed. By the use of such crops and the incorporation through this means of vegetable matter, the capacity of the soil to hold moisture is much increased and, in addition, a part or all of the nitrogen necessary for the corn is ob-

tained. Manure is of the greatest value in this connection, but in the cotton belt at the present time so few animals are kept upon the majority of farms that the supply of manure is inconsiderable.

Another factor of great importance in enlarging the capacity of the soil for moisture is the depth to which the land is plowed. The most advantageous depth, it has been found, is from 8 to 10 inches. If the land is in a poor

state of cultivation, at first only that part which is already in good condition may be turned and the rest of the depth loosened with the subsoil plow. This will be most efficient when it is made to follow in the furrow of the turnplow. In succeeding seasons the land may be turned deeper, the increased depth varying with the quantity of vegetable matter incorporated in the course of the last preparation. When a soil of the required depth has been established the turnplow may be run from 6 to 8 inches deep and the subsoil plow only as often as seems necessary to prevent the formation of a compact layer.

Plowing is best done when samples of the soil crumble readily in the hand. This condition, however, frequently does not last long enough for all of the land to be prepared. By thoroughly pulverizing the surface with the

Fig. 2

ESPECIALLY VALUABLE ON STEEP HILLSIDES.

disk plow as soon as it is dry, the period for efficient work with the plow may be greatly extended.

Types of plows well adapted to the soils of the South Atlantic States are shown in Figs. 1 and 2. Fig. 1 illustrates a disk plow that reverses so that the furrows may all be turned in one direction. It is especially valuable on steep hillsides and in places where it is necessary to avoid open furrows.

brushed out with washing powder and water and then rinsed. After washing they may be steamed by a spray of steam.

Some of the largest machines are fitted with powerful pumps, the cans in an inverted position being run through the machine and sprays of soap and water, rinse water, hot water, and steam successively forced into them under considerable pressure. They are then dried in the same machine.

CARING FOR CANS

Thorough Washing and Sterilization Is Necessary.

DIFFICULT JOB FOR FARMER

Dairy Division of Department of Agriculture Points Out Advantages of Having This Work Performed by Dealers.

In justice to the farmer, milk dealers should give considerable attention to the question of washing the cans before they are returned. If the cans are allowed to go back unwashed to the farmer, it is a very difficult task for him, with his limited facilities, to clean them.

In a circular letter recently sent to milk dealers by the dairy division of the department, it was pointed out that bacterial counts made from cans which had been washed and rinsed in the ordinary manner showed that there were from 200,000 to 18,000,000 bacteria in each can, with an average of 4,000,000. If 10 gallons of milk were put into one of these cans there would be added more than 100 bacteria to each cubic centimeter of the milk.

That is to say, this is the least number that would be added. Whereas, it was pointed out, with a little steaming these same cans could have been rendered practically sterile.

Bacterial Counts.

One dealer who recently installed a modern washing machine employed bacteriologists to test the results. It was found that less than 200,000 bacteria were in a can, and among them were no undesirable types. Bacterial counts of cans treated by a less efficient steaming device which this dealer had formerly employed ran as high as 20,000,000 bacteria to the can, including some undesirable kinds.

There are a number of different types of cleaning machines on the market. The aim of all the efficient ones, however, is the thorough cleaning with washing powder and water, rinsing, sterilizing with steam, and rapid drying. After this the cans should be covered and kept from contamination.

One of the simplest of the machines is a jet device, by means of which sprays of cold and hot water and of steam are successively forced into the cans. This type also is equipped sometimes with a drying attachment by means of which a draft of dry air is forced into the can. Another type is the brush machine, in which cans are

brushed out with washing powder and water and then rinsed. After washing they may be steamed by a spray of steam.

Some of the largest machines are fitted with powerful pumps, the cans in an inverted position being run through the machine and sprays of soap and water, rinse water, hot water, and steam successively forced into them under considerable pressure. They are then dried in the same machine.

Drying Is Important.

The drying of the cans is an important factor, for it not only leaves them in a much better condition, but it tends to prevent rust. The cover also must not be neglected. It is as important that it be as thoroughly cleaned and sterilized as the can itself. It can be left in the latter is quite dry. In the interval the can should be kept in a clean place where there is no dust or contamination.

On the farm, cans, pails, and other utensils may be sterilized very efficiently with an inexpensive sterilizer which is fully described in Farmers' Bulletin 718. This bulletin may be obtained upon application to the department.

AIR DRAINAGE IS ESSENTIAL

No Farm Crop Can Endure Wet Feet—If Land Is Not Worth Draining It Is Not Worth Keeping.

Air drainage is as essential as soil drainage. It is not always the high places that are free from frost. Frequently there are pockets among the hills where crops and fruit suffer late in the spring and early in the fall from the ravages of the frost deposit. On low lands there also seems to be places which frost apparently avoids at unreasonable times. These locations have well-established boundary lines which are known to people of the community. No fruit can endure wet feet. This principle obtains in all farm crops. If your ground is not worth draining, it is not worth keeping, much less establishing it to fruit.

DAIRY PRODUCTS IN DEMAND

Only Way New Districts Can Be Supplied Is by Breeding Up Herd by Use of Good Bulls.

The great demand for dairy products has caused the price of good dairy cows to be very high. Reports from many points of dairymen show that it is impossible to buy first-class dairy cows at even \$80 a head. With such a demand for cows in all dairy districts, there will be few good cows moved into new dairy territory. So, the only way new districts can be supplied must be by breeding up the common stock by the use of good dairy bred bulls.

We Can Make Immediate Deliveries.

This truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickle steel construction—deep channeled pressed steel frame—every supporting part a forging or pressed steel—Republic Torbenson Internal Gear Drive—heat treated, drop forged 1-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

Hal McGregor

Record (2) 2:26, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.

Hal McGregor (2) 2:26 is by Hal Dillard 2:04. 1st dam by Wilstar 2:17; 2nd dam by Oscar Williams 2:14; 3d dam by Ohio Volunteer 2:24.

The sire of Hal Dillard is Brown Hal 2:12; (world's record when made); also the sire of Star Pointer 1:59; the first horse to beat 2:00.

Be not misled a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:03, Fannie Dillard 2:03, Hal B. 2:04, Hal C. 2:05, Hal Leaf 2:07, Hal Clipper 2:07, Cinnamon 2:07, Dillard Online 2:07, Butte Bowl 2:08, Cambria 2:08, Vera R. 2:07, Hal Grey 2:08, Hallock M. 2:09, Dillard S. 2:09, Hal J. 2:09, Jerry Dillard 2:09, Della H. 2:10, Dillard Onward 2:10, Helen B. 2:10.

Hal McGregor with only 70 days track work last year trotted one-eighth in 16 seconds, 1/4 in 31 seconds, and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training.

Care will be taken to prevent accidents but I will not be responsible for any that may occur. Will farm a few good mares. W. B. ARNOLD, Petersburg, Ky. R. D. 1

Keep Well

Do not allow the poisons of undigested food to accumulate in your bowels, where they are absorbed into your system. Indigestion, constipation, headache, bad blood, and numerous other troubles are bound to follow. Keep your system clean, as thousands of others do, by taking an occasional dose of the old, reliable, vegetable, family liver medicine.

Thedford's

Black-Draught

Mrs. W. F. Pickle, of Rising Fawn, Ga., writes: "We have used Thedford's Black-Draught as a family medicine. My mother-in-law could not take calomel as it seemed too strong for her, so she used Black-Draught as a mild laxative and liver-regulator. We use it in the family and believe it is the best medicine for the liver made." Try it. It is in the genuine Thedford's. 25c a pack.

WALTON.

Miss Sybil Hurt spent part of last week with relatives in Covington.

Roland Glenn of Covington, with relatives and friends.

Miss Ella Crisler of Sparta, spent part of last week here with relatives and friends.

Miss Lou Allen of Petersburg, spent last week here with relatives and friends.

Mrs. Katie B. Rice, of Georgetown, spent last week here with relatives and friends.

Allen Smith, of Covington, spent part of last week here with his grandfather, A. W. Smith.

Mr. and Mrs. Ernest DeMoisey, of Ludlow, spent Saturday and Sunday here with friends and relatives.

Benj. Norman of Latonia, spent Friday here looking over some real estate with a view to purchasing.

Mrs. C. H. Spencer Chambers and little daughter of Covington spent the past week here with friends and relatives.

Mr. and Mrs. Craig and son Robert Craig spent part of last week with relatives and friends in Covington and Cincinnati.

Geo. Stamler spent part of last week in Lexington the guest of his brother Ed, Stamler, driving thru in his new Ford car.

Alphyn & Dugdon took a truck load of hogs to Cincinnati, last Friday that averaged \$1.50 per 100 pounds on the market.

Jos. Reed spent the past week at Nicholson doing some artistic painting and decorating for contractor Geo. P. Nicholson.

R. H. Shinkle of Huntsville, Ala., arrived here last week on a visit to his parents Mr. and Mrs. Chas. Shinkle, and will probably make his home here.

R. W. Jones, agent for the Buick automobiles sold a Buick four to Jos. C. Hughes of Richmond, and a fine Buick car to Jerry C. Griffith of near Beaver Lick.

Miss May Nicholson entertained the Camp Fire Girls last Saturday evening at the home of her parents Mr. and Mrs. Geo. P. Nicholson.

Wm. Ackman attended the funeral of his uncle Geo. S. Thompson at Corinth last Monday.

Mr. Thompson died from a heart affection and was in his 85th year.

D. G. Laws who has been handling the tobacco purchase of Glascock & Co, here the past season, returned to his home in Covington, having completed his work here.

Mrs. Jos. Baker of Columbus, O., and Mrs. E. W. Stallard and little daughter of Toledo, O., spent the past week here with their parents, Judge and Mrs. Thos. P. Curley.

Two young men from Toledo, O., were here last week, enroute to San Francisco, Cal., making the trip on a motor cycle, and spent a day here on account of the inclement weather.

Boone Fennell who has been ill for some time was taken to a hospital in Covington last Saturday by his nephew W. R. Rogers who believes that by proper treatment Mr. Fennell can be restored to health.

Rev. A. K. Johnson of Ghent, spent Thursday here with friends and relatives. He is well pleased with his new location at Ghent where he is the pastor of the Baptist church and is giving good satisfaction to his new charge.

Samuel S. Spradling purchased from W. T. Turner last week his farm of ninety acres near Crittenden for \$4,500. Mr. Turner will reside on the farm this year. The Mr. Spradling will have control of the land.

Circuit court convened at Burlington on Monday and the hon. attorneys Judge J. G. Tomlin, J. L. Vest and Judge Chas. Strother, and quite a number of litigants and witnesses have been in attendance from the Walton precinct.

Clarence Newton of Cincinnati, visited friends here last Saturday, coming to bid good-bye as he has answered the call to the colors and enlisted in the U. S. Cavalry. He expects to be sent with his troop to the Mexican border.

James E. Young, the tobacco buyer, of Verona, spent last Friday here closing up his business for the past season. He has about 20,000 pounds still on hand and expects to reduce this part of his business at Bank Lick. He intends to buy extensively next season.

C. W. Bradshaw, supt. of the L. & N. Railroad, Joseph McCormack agent at Lexington, and James Gayle of Carrollton, attended the funeral of J. W. Houston last Wednesday. About fifty of the employees of the L. & N. Railroad also attended the funeral, marching in a body.

Tuesday a detachment of twenty soldiers of the first Kentucky Regiment were stationed here to take the place of the citizen watchmen who have been guarding the railroad bridges in this locality. The soldiers are in command of Lieut. J. R. Gray of Louisville.

Evan Hance, 16 year old son of Mr. and Mrs. A. R. Hance, broke both bones in his forearm just above the wrist while attempting to crank the Ford machine belonging to Thos. Percival. The machine, either kicked or back-fired and the crank struck his arm.

Real Estate Agent Geo. R. Powers sold the farm of Jas. Sturgeon consisting of about fifteen acres near Walton. The farm was owned by Geo. Knoxbill, Pendleton-co., and sold to Jas. Sturgeon the Addie Morris house and lot belonging to W. C. Moxley and both parties will move to their respective purchases at once.

O. O. Zehring of Germantown, O., was the guest of Mr. and Mrs. M. L. Lucas at Bank Lick, part of last week. He owns a large dairy farm in Ohio and came to purchase a Holstein cow he sold Mr. Lucas about a year ago, and stated that a daughter of the cow with her first calf, made 23 lbs. of butter in seven days, and 78 lbs. of milk per day, and is the best milk cow he ever owned and the best in the world. Mr. Lucas declined to sell the cow though offered a greatly increased price.

The remains of Mrs. Mary Ann Johnson (Cooper-Hastings) were brought here from Greenfield, Ind., Saturday and laid to rest in the Salem Primitive Baptist cemetery. Mrs. Cooper was the daughter of the late Benj. Johnson and was born and reared near Verona, and died at Greenfield, April 4th, in her 74th year. W. B. Johnson and A. R. Johnson went there and accompanied the remains here as did also her son Allen Cooper and wife Rev. E. C. Lacy of the Christian church conducted the services at the grave.

Twenty of our public spirited citizens entered into a contract this week with the James-Curtis Lyceum of Paducah, Ky., for a lyceum course for the winter of 1917-18, consisting of five high class attractions, to be rendered about a month apart, one of the numbers to be given during the Christmas holidays. This should furnish the people of this vicinity with a high class amusement during the approaching winter and should be liberally patronized. The program has been carefully selected by the ministers of the different churches.

At the annual meeting of the stockholders of the Equitable Bank and Trust Company held last Saturday at a month apart, one of the old directors was elected as follows: Chas. L. Griffith, A. M. Edwards, A. B. Tompkins, Jno. L. Vest, Jno. C. Miller, E. P. Northcutt, Jno. E. Williams, D. L. Wallace, of Walton; R. B. Smith, of Warsaw, Jno. W. Sauer of Elliston, W. T. Loomis, of Independence. The bank made an excellent showing the past year, having a month apart, one of the old directors was elected as follows: Chas. L. Griffith, A. M. Edwards, A. B. Tompkins, Jno. L. Vest, Jno. C. Miller, E. P. Northcutt, Jno. E. Williams, D. L. Wallace, of Walton; R. B. Smith, of Warsaw, Jno. W. Sauer of Elliston, W. T. Loomis, of Independence. IDEAL HEN.

That is good news which comes from the government farm at Beltsville, Md. It is announced that the ideal hen is about to be produced. If there is anything the country needs it's an ideal hen. One that won't go on strike when eggs are scarce and prices are high, one that is not as temperamental as a prima donna, as unreliable as a European war communique. What we need is a hen that will stay on the job all the time, performing the humble yet important routine of her daily life in an earnest, conscientious manner. According to advance predictions, this remarkable fowl is to have the beautiful lines and plumage of the Leghorn, the roost pan filling dimensions of the Plymouth Rock and the producing proclivities of the mint, says St. Louis Post Dispatch. Her legs are to be yellow and plump; her corn lobes are to be a satisfactory crimson. Nothing is said about her voice, but if she comes up to the other specifications nobody will care anything about her body. She can cackle raucously or melliflously as she pleases, provided only she actually does something to cackle about. The only thing one can reasonably ask at this time is that her arrival is not too long delayed.

A recent ebullience of a contributor to a federal public health service bulletin has fallen under criticism from the Pittsburgh Dispatch. The official bulletinist, sounding a warning against the bad habit of worrying, said that no bird ever tried to build more nests than its neighbors; no fox ever fretted because he had only one hole to hide in; no squirrel ever died of anxiety lest he would have only enough nuts for one winter instead of two, and no dog ever lost any sleep over not having any bones laid by for his old age. Was it wise to exhort worry by disparaging thirt? The Dispatch calls attention to the fact that speakers at the recent life insurance convention in New York city pitched into this as the most extravagant of notions. The Dispatch concludes by conceding that birds, foxes, squirrels and dogs may avoid a lot of worrying to which human beings foolishly surrender, but suggests that it must be remembered they have no government health service to worry them.

The Edinburgh Scotsman commenting on the fact that the world's use of rubber has more than doubled in the last eight years and will yet be increased enormously notes that seven tenths of the present supply comes from plantations under British control. The ability to absorb such a vast and rapidly increasing production is not attributable to ordinary motor traction demands but the great war has indirectly greatly increased the consumption in the United States. As to the war, an enormous quantity of rubber has been absorbed in the manufacture of airplanes, subsea boats, electrical plants, surgical appliances, tires for the motor ambulances, etc. Much rubber has gone into boots worn by the men in the trenches, while waterproof coats and sheets are necessities in a campaign. In the hospital the floors are now provided with rubber sheetings. This is for the purpose of deadening sound and for the relief of the sick and wounded by preventing vibrations.

Woman knew the uses of the hairpin before she became acquainted with the button, according to Prof. Charles C. Torrey of Yale in a lecture at St. Louis university. Professor Torrey said that hairpins had been found in a rock stratum lower than those in which buttons were found. The oldest style of hairdressing was the braid, according to the professor. Ringlets, popular among young women and some not so young were in high favor with the belles of Babylon 4,000 years ago, he said.

The department of labor, it is announced, is to take measures to raise the dignity of housework. But the reformers in the matter being men, cannot understand the colossal work they have cut out for themselves in persuading the average woman to see the innate ennobling of dishwashing and the moral uplift of the washboard.

A California Judge tells an abandoned husband that the way for a man to keep out of a row with his wife is to kiss her. That plan might work in some cases, but we fancy that there are wives to whom a kiss would be such a surprise they would drop dead.

After wearing a snow-dog collar all day one envies the villain player who is permitted to tuck a soft handkerchief in his neckband.

BASE BALL.

Woodward High School Defeats Burlington 6 to 3.

Which Defeat Was Evened Up When Burlington Cleaned Up Williamstown 5-3.

Woodward High of Cincinnati tossed out the Burlington High School team here last Thursday afternoon in the opening game of the season. Considering the fact that it was the first game which the local team has engaged in this season, it was a very well played game and Woodward grabbed the large end of the score because of the weakness of B. H. S. in the box and their not having gained their "batting eye" as yet. The game started with Brown in the box for the home team and for three innings excellent and high-class ball playing was indulged in, but in the fourth inning the city team got the winning run by the home team, connecting with the ball for two triples in succession and the beams were spilled. Before the inning was closed Woodward had five runs across the plate. Kelly relieved Brown during this inning and on account of wildness allowed the opposing team one run, forcing a man home on a base on balls. The score at the end of the game was six to three, but as Kelly settled down and really pitched good ball for the remainder of the game the Burlington team should have gathered in some runs but it was evident they were too weak at the bat to do so. The fielding on both sides was all that could be expected, all plays being handled in creditable and swift style. The fact that Woodward had engaged in two games before this was easily discernible as they displayed slightly more confidence in their batting, and if B. H. S. develops any batting strength, which she should and will undoubtedly do, the local team will have a game well fought battle with the city team. It may be that Woodward slightly out-classed the local team but it was a game well fought and it is to be regretted that the Burlington boys were lacking in some of the essential points of batting and fielding. Something which can be acquired only by actual playing and it is an assured fact that they will deliver higher class ball in the future. There is no reason why the school cannot have a good clue for there is good material on hand. It needs only judicious and efficient handling and they have in Principal Caywood an experienced and practical coach, it is to be expected that the Woodward team will have more accurate and have been disclosed by this encounter with Woodward will be eradicated in the near future. The Woodward team was composed of a fine lot of boys.

Williamstown High School base ball team came to Burlington last Friday afternoon and gave the local High School team a pretty lively tussle, which would have resulted in a much closer score had the visitors been more accurate in their throwing. Brown was in the box for the home boys and went the whole distance in good form, and while the support given him, was not quite as good, by considerable, it surpassed that which the visiting boys could have given. The boys were on their toes all the time and several long flies to the out field were captured, while the infielders gave a high class amateur exhibition. The team's work this season stands fifty-fifty, and it will go to Williamstown next Friday afternoon and hopes it will give the visitors another victory. The Williamstown team is composed of good material and will be found in the front ranks before the season closes. The pitcher who pitched here last Friday works easy, fanned several batters and kept the hits within a reasonable number, Score 5 to 3 in favor of Burlington.

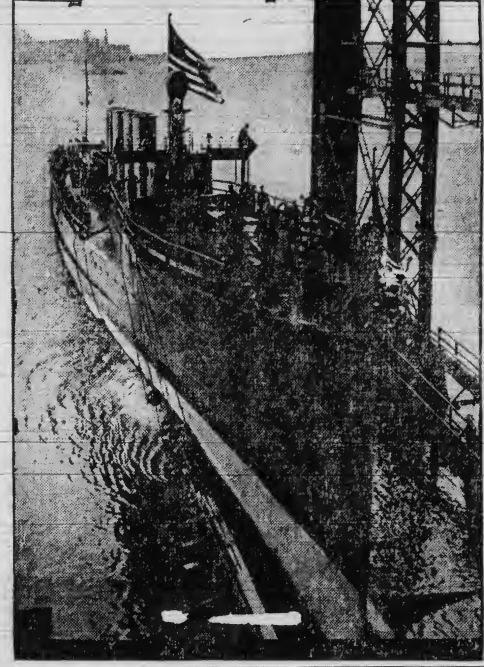

Kill the Flies.

Everybody should wage war on the fly as soon as possible. April, May and June are the best months to conduct an anti-fly campaign. The fly has no equal as a germ carrier, as many as five hundred million germs have been found in and on the body of a single fly.

Take five cents worth of oil of lavender, mix with some quantity of water, pour in a common glass atomizer and spray it around the rooms where the flies are. In the dining room spray it lavishly over the table linen, the odor is very disagreeable to flies but refreshing to most people. Mix together one tablespoon of cream, one of ground black pepper and one of brown sugar. This mixture is poisonous to flies. Put in a saucer, darken the room except one window and in that set the snare.

Owingsville, — At Preston, four miles south of here, Ashton Thomas, a merchant, and John Schultz, a pistol, died of a wound which Thomas was severely wounded in the shoulder and Schultz in the left side, probably fatally.

UNITED STATES DESTROYER JACOB JONES

Postmasters in the Civil Service

President Wilson has removed from politics 10,217 postmasters of the first, second and third classes, and has placed them in the Civil Service Commission, which shall direct that these postal appointments in the future be made in accordance with the fitness and qualifications of the applicants, to be determined by a civil service examination and not on the recommendations of members of Congress. Hereafter when a vacancy occurs in the position of postmaster of any office of the first, second or third class the result of the examination of the applicants shall be the basis of the recommendation of the First Assistant Postmaster General, approved by the Postmaster General, to the effect that the efficiency of the applicant is such as to require that a change shall be made, the Postmaster General shall certify the fact to the Civil Service Commission, which shall forthwith hold an open competitive examination to test the fitness of such applicants to fill such vacancies. Unless it is ascertained that the applicant is a person who has been recommended for removal from the service, the examination shall be held and the papers in connection therewith have been rated, the said commission shall certify the result thereof to the Postmaster General, who shall submit to the President the name of the highest qualified eligible for appointment. The President shall then appoint the sixth birthday shall be given the examination herein provided for.

As a result of President Wilson's order, practically the entire postoffice machinery is now under the civil service. Assistant postmasters in large cities and all clerks were placed under the civil service when the postoffices were reorganized some time ago. President Taft, just before leaving the White House, placed the fifty-five thousand six hundred and ten fourth-class postmasters under civil service, an order later revoked and then reissued by President Wilson.

Control of publicity in connection with the government's war activities have been placed by President Wilson in the hands of a committee of public information whose task it will be to safeguard secrets of value to the army and at the same time to see that all affairs of the nation are before the public. The committee will be composed of Secretary Lansing, Daniels and Baker with George Creel as civil information head.

The bill authorizing the issue of \$7,000,000,000 of bonds and certificates to finance the U. S. part in the war and to afford a \$3,000,000,000 loan to the Entente Allies was adopted unanimously by the House of Representatives at Washington Saturday. The measure had been described as the greatest authorization for bonds ever contained in a bill submitted to any legislative body in the world.

The War Department has reversed a previous ruling and announced that under existing law, it has the right to organize new units of the National Guard. This opens the door to expansion of the existing force of about 125,000 men to 100,000 if need strength or more than 600,000 on war footing.

The Invincible Armada.

Germany military experts have scoffed at the American army with out taking into consideration the possibilities of this country as a supply base for the Allies. Their eyes will be opened by the news of the plans for the fleet of small wooden merchantmen which will be built to aid Great Britain in defeating the purpose of the submarine. There is every reason for believing that the American merchant fleet will prove an invincible armada. Every man who volunteers his service as a laborer in the shipyards, in which these ships are to be built, will be serving his country as truly as if he had volunteered as a soldier, a marine or a naval sailor. The labor problem solved the success of the plan seems assured. Materials we have in plenty. The transportation channels will be guarded sufficiently against German plotters. Many more ships can be built than Germany's diminishing fleet of highly expensive submarine craft. It is wisdom in the plan of making the units of the armada small, it will require as much ingenuity, as much ammunition, as much fuel for Germany to sink a 2,000 ton wooden ship as were required to sink the Lusitania or the Laconia. The small naval unit as an agent of destruction will be met by the small merchantmen unit as a means of supply. Instead of sink 20,000, 30,000 or 40,000 tons at a stroke the submarines will sink 2,000 or 3,000 tons on the decks of the American ships do not succeed in defending their steam engines.

The number of effective guns that will be mounted upon the armada of 2,000 American ships will be in themselves no small obstacle to the progress of "intensive" submarine warfare. The Germans will learn that Americans are excellent gunners, and not a few of their costly submarines will be destroyed.

Maj. Gen. Gonthals, builder of the Panama Canal, is the man of all men for the work of building the armada. That is what he will command all of the labor that is required hardly can be doubted. Can any patriotic American laborer fail to the prospect of having a hand in the construction of the wooden fleet that will whip the Germans.

The Government's plan to build a vast fleet of wooden cargo ships to transport supplies to the Allies and thus defeat the submarine campaign of the Germans was put into effect last Monday. Monday, when a \$3,000,000 corporation was formed by the shipping board to operate the vessels.

Despite disavowal by Gov. Stanley, there is a strong rumor in Frankfurt that a special session of the Kentucky General Assembly will follow on the heels of the present extraordinary session for the purpose of appropriating funds for Kentucky's share in the war on Germany.

U. S. Building 300 Ships to Aid the Allies.

Washington, April 12.—To smash Germany's U-boat blockade the U. S. virtually will bridge the Atlantic. Plans for construction of 3,000 small wooden ships—the most tremendous merchant shipbuilding program ever undertaken—have been approved by the president. The boats will be used to transport food and supplies to entente ports. This is America's answer to Lloyd's (German) appeal: "The ultimate success of the allied cause depends, in my judgment, on our solving tonnage difficulties, which which we are confronted." Gen. Gonthals who directed the construction of the Panama canal, will superintend the construction of the "tinny fleet." The government shipping board has sent out 1,000 lumbermen and woodworkers to begin at once. Congress has authorized \$50,000,000 to start the program, and will be asked for \$30,000,000 more. The first 1,000 ships are to be completed within 18 months, and thereafter 2,000 more will be ordered. Each vessel will be of 3,000 tons, with a speed of 10 knots. It is the purpose to run them in such fashion that they will constitute a veritable pontoon bridge across the sea—one boat every three miles. The tremendous number is expected to exhaust efforts of U-boat commanders to cut off supplies from England and France. Work on ways for the ships has already begun at Jacksonville, Fla., Beaumont, Tex., and a half dozen other points. Each ship is to be manned by a gun crew and equipped with anti-submarine guns and wireless. Commencing November 1, three ships a day will sail.

SIX TO ONE AGAINST GERMANY.

More than half the human race is now ranged in war against the Germans. The main strength of the Teutons is outnumbered six to one by the forces. Omit all of India, and the Allies, backed by the United States, still have four times the population to draw upon than stands behind the Kaiser. Subtract all the wealth of all the German fund from the wealth of the United States and there still remains more than fifty billion dollars. American farms grow more than all the farms of Germany, Austria, Turkey and Bulgaria combined. The U. S. alone can make more steel and all products of steel than the whole Germanic league. Our mines yield ten times as much gold, far more silver, twice as much lead and many times as much copper as the entire group of Central Powers. Germany's national debt is now nearly \$200 per capita. Ours is only \$10. To pay a year's interest on his share of his nation debt costs a German thirty times as much as it costs an American. William Hohenzollern can no more whip a united world than Napoleon Bonaparte could defeat a united Europe, and it requires the latter only 400 days to throw a bridge from Elba to St. Helena. Philadelphia Public Ledger.

About General Wood.

The Boston Transcript has about decided to secede. It wanted war and denounced the President in unmeasured terms because he tried to avoid war, but now that war is here, the Boston newspaper is determined not to help because the President shows no intention of giving Gen. Leonard Wood the prominence the Transcript believes should be accorded him. We learn from this authority upon international matters that Gen. Wood is "recognized by our allies and by Germany as the ablest American soldier of our day." Who said so, and what do they know about it? We doubt if the German staff knows the difference between Wood and Bell, and certainly there is no line to support the association that the military authorities of Great Britain, France and Russia know anything about the comparative merits of American officers. As a matter of fact, Gen. Wood has had no military experience whatever in a wide field. He was an army surgeon before 1898. He commanded first a regiment and then a brigade in the Spanish war. Later he was Military Governor of Cuba, and since that time he has held various administrative posts. He follows on the heels of the army. To call him the "ablest American soldier of our day" is simply to use a phrase sustained by no proof. General Wood is not fortunate in his supporters. Having the name of Major General in his title is not improbable that he will be employed in some important duty before the war is over, but when partisan papers such as the Transcript, start out to make a martyr of him before the war begins, they go far to put him in the class of the political general.

What Women Can Do.

Washington, April 12.—Women can do "a good 50 per cent. in fighting the war" in the opinion of Secretary Lans, by conserving good and encouraging patriotism among the men. He sent this telegram in response to a query from the General Federation of Women's Clubs, in convention at New Orleans, asking what women can do for the country. If the women of America can do no greater work at this time than to raise their own vegetables, can their own fruit, prevent waste in their homes and give impulse and enthusiasm to the men of the land. If they do this they will be doing a good 50 per cent. of the work of fighting the war to a finish. "Why not organize all the women's clubs of the U. S. into a single body to Wilson League, whose business it will be to carry on a propaganda for the things the nation will need—soldiers' ships, which pigs, beans, peas, the women would also make it their business to let every farmer know that his patriotism is to be judged by his own hands, and let every railroad man know that he is serving his country by moving the nation's traffic quickly and well, and himself secure that the boys and girls are in a great maintenance crop of the nation by putting in their time feeding the chickens, canning surplus fruit and vegetables. They can count themselves among the saviors of liberty and civilization because this war has now come down to a matter of work and sacrifice. "I have just talked with a woman fresh from Belgium. When she left her peasants gathered around her and kissed her skirts in gratitude. Practically all of them have American flags in their homes which are looked upon as sacred relics and the Belgians, many of these flags have been made by the women themselves. All Europe must be made to feel that the spirit toward America, and this cannot be done unless our women give us the support of their enthusiasm and free for action at the front as well as a proportion of our food and labor as is possible by forethought, sacrifice and energy."

Our War Finance.

The President stated in his war address the correct principle of all war finance; the largest reproductive energies of the people would stand with the smallest expenditure of money that emergencies would permit. Yet at once there is a clamor for bonds and treasury notes; for an inflation of credit, which means an inflation of prices. The Prussian financial policy has been to meet the needs of the government by paper credits and forced loans. Until now little revenue has been derived from taxes. The delusion prevailed among the believers in Prussian efficiency that the financial and industrial problems confronting other nations would not afflict Germany. They were hypnotized by that magic word "mobilize," her gold was mobilized; her food, her clothing, her materials for clothing and her raw materials out of which clothing and war supplies were made were all mobilized, so international commerce was unnecessary, and prices could cut off figure. There is a disposition to adopt the Prussian principles and practices here in America, with the idea of avoiding the hardships of war. The Federal Reserve Bank has "mobilized" the gold of the country and looks with longing eyes on what remains. The country is asked to gaze with wonder on the resources of the Federal Reserve Bank and see how easy it is to get something out of nothing and all very good. The Federal Reserve Board has no free resources. It is the custodian of the reserves of other banks, delivered in March in the banking business. Its scale of expenses is widely extravagant. Its financial theories are largely illusions, and its declared judgments, delivered in oracular utterances, are usually mischievous. For instance, it warned the banks in December against the purchase of foreign securities; in March it withdrew its warning; declared it had been misunderstood, and that the investments in question were all right.—Louisville Post.

Eleven members of the Third Ohio infantry under Lieut. Homer C. Spahr arrived from King's Mills Ohio Saturday evening, and have since been on duty at the rear guard of the B. and O. S. W. and Big Four bridges over Tanner's creek. The men are armed with their big rifles which will carry a ball 300 yards more than two miles. This is about the distance from Walnut street to Fort Hill, C. S. W. The chamber is being used as temporary sleeping quarters for the soldiers.

Stanford, George, Golds and his wife, who were visiting in town, find their child, a boy, dead in his cradle. The child had been suffering from measles. The husband was a nearby neighbor, to the woman's home, and when he returned, found his wife had dropped dead. The suspicion is that the shock of the child's death was too much for the mother.

BOONE CO. RECORDER
W. L. RIDDELL, Publisher.

ANNOUNCEMENTS.

For Sheriff.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY, of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS, of Bellevue precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

WALTON.

Chas. Marston of Owen, spent Saturday here on business.

Miss Edna Gordon has been quite ill the past several days.

Joseph Hennessy of Covington, visited friends here Saturday and Sunday.

Miss Anna Brock spent the past week at Latonia visiting relatives and friends.

Geo. W. Winters and Clarence Newton of Cincinnati, visited friends here Sunday.

Kirtley Norman of Covington, spent Sunday here looking over his farming property.

Mrs. Marshall Foley of Lexington, was the guest of Mrs. Edith Baker part of last week.

Mr. and Mrs. W. L. Johnson of Covington, spent last Sunday here with relatives and friends.

Joseph Gardt of Verona spent Saturday here closing up the sale of his farm to Richard Henry.

Mrs. Mammie Smith and son Allen of Covington, spent Sunday here with friends and relatives.

Mr. and Mrs. T. O. Ballard spent part of Easter with his parents on the farm in Nelson county.

Mrs. Chas. H. Young of Folsom, Grant county, spent Saturday and Sunday here the guests of friends.

W. E. Vest of Covington, spent Saturday here in regard to some real estate deals he had on hand.

Mrs. Sarah Percival has been very ill the past week with stomach affection, but is now some better.

Everett L. Aylor has about recovered from a severe attack of lagsipne and is able to be about again.

Prof. A. Limburg of Big Bone Springs, was a visitor here Monday. He is slowly regaining his health.

Geo. Pitcher of Landing neighborhood, and Col. J. Mit Baker of Big Bone Springs, were visitors here Saturday.

Wallace Shinkle of Montgomery, Alabama, arrived here last week on a visit to his parents Mr. and Mrs. Chas. Shinkle.

FOR SALE—Two incubators, Cephers and Prairie State, \$10 taken both or will sell separately, C. S. Boles, Richmond, Ky.

Samuel C. Hicks of Union, was here Saturday closing up some sales for the Ford automobiles for which he is agent.

Mr. and Mrs. George L. Miller of Big Bone Springs, arrived here last week on a visit to their son Jno. C. Miller and family.

John E. Williams who has been suffering with a severe cold and confined to his home a part of the time, is now much improved.

Fred Miller is assisting his uncle Chas. Slater in his grocery store at Ludlow, the man he had employed enlisting in the U. S. army.

Hon. W. N. Hind of Covington, spent Sunday here with relatives and friends, and visited his extensive farming interests near town.

Geo. L. Vest sold his Saxon runabout to his brother Hugh Vest of Verona last Saturday and purchased a new car for his own use.

Rev. E. C. Lacy delivered his lecture "Are You Married?" at the Christian church at Sparta, last Saturday evening, to a large and appreciative audience.

Mr. and Mrs. C. L. Young moved from Grant county, near Crittenden, to the Brittensham place last week, recently occupied by Wm. W. Grimsley and wife.

Mrs. Mary Ryan who has been ill for some time at her home in the hospital at Covington, last week where it is believed will improve in health.

Thomas John C. Bedinger who has been confined to his home the past two weeks with a severe attack of influenza, has about recovered and is able to be about looking after his business interests.

Stephen Ingram who suffered a severe strain in the heavy jostling on a freight train at Erlanger a couple of weeks ago, is much improved, after a confinement to the house the past two weeks.

J. M. Reed of Lexington, was here a part of last week and rented the property of Mrs. J. D. Matson at Kensington, and will move there this week to remain a year, and expects by that time to purchase a farm in this locality.

Dr. and Mrs. W. P. Foreman and their daughter, of Corinth Grant county, spent last Wednesday here with friends. Dr. Foreman is well pleased with his new home and is getting a good practice in his profession.

The brick work of the Walton Light Plant has been completed and the machinery will be installed in the building in a short time, and the light will be turned on in a couple of weeks in a far better system than heretofore.

Miss Nell Williams will address the Richwood, Kennington and Frog Town people on Consolidated schools at the Richwood Presbyterian Mans, Saturday, April 21st at 2:30 p. m., and everybody is most cordially invited to attend the meeting.

Walton Lodge No. 718, F. and A. M. had a very fine meeting last Friday night, when the conferred apprentice degree was conferred on A. Record Johnson and Oswald E. Peterson. There was a good attendance of members, and among the visitors was Bro. A. F. Cooper of Greenfield, Indiana.

Mr. and Mrs. Wm. W. Grimsley moved back to their farm near Hamilton last week after a residence of about six months in Walton, but the fascination of the river scenery was too great for resistance during the summer months. We regret to lose these good people from our community.

Mr. and Mrs. Oswald E. Peterson who have been at Akron, O., for several months arrived here Friday to spend a couple of weeks with her father Chas. L. Griffith, and expect to go to Utah shortly to complete a contract that Mr. Peterson has with the building of an irrigation ditch.

Robert C. Green, of the Walton Bank and Trust Co., who is the president of Group Six of the Kentucky Bankers Association, spent Thursday in Lexington attending a meeting of the Executive Committee, and arranging for the annual meeting, which will be held at Newport, Tuesday, May 22nd.

The Ridgeland Stock Farm, J. B. Woolery and Omer B. Johnson, proprietors, sold from their farm near Crittenden last week, a fine short horn bull to J. C. Poor of near Williamstown, for \$100, and recently added to their fine swine herd several fine registered Duroc Jersey gilts purchased from a high class breeder in Southern Kentucky.

Richard Henry of Covington, was here Saturday and bought the farm of Joseph Gardt consisting of about 20 acres for \$1,500. The farm is the one bought from the M. T. Wilson estate and is known as the A. W. Smith place. Henry expects to move to the place at once so to cross this year. He was in partnership with Jos. Hennessy last year in the purchase of tobacco in Campbell county, and made enough to buy a farm.

Walton Chapter Order of Eastern Star had a delightful meeting at the Masonic Hall Monday night when the degrees were conferred on Dr. and Mrs. G. F. Howland in a very impressive manner. The Grand Worthy Matron Mrs. Emma Menefee of Covington, was present and in the work and made a very interesting talk of her recent visit to the mountains of Kentucky, inspecting the Chapters of that section, and at Whitesburg, Kentucky, where the Grand Chapter meets in October. Mr. and Mrs. C. M. Menefee of Crittenden were also in attendance and contributed to the success of the evening.

At a meeting of the stockholders of the Walton Lumber Co. held at its office last Thursday all of the officers were elected as follows: A. A. Edwards, President; Vice President, Dawson Chambers; Secretary, Robert I. Kettling; Directors, A. M. Edwards, Dawson Chambers, John C. Bedinger, H. C. Diers, Ed. Wm. Brittenhelm, E. P. Northcutt. The business of the Company which is the percent earning to justify the directors in ordering and declaring a six percent dividend, payable June 1st. The business prospects are very good, but the price of lumber is so very high that margins of profit are small.

Mr. and Mrs. Len J. Stephenson and Mrs. and Mrs. Wilber Z. Wade, who formerly resided at Walton, and moved to near Ravenna, Ohio, have been spending the past several months at Morristown, New York, and Mr. Stephenson writes they had a very enjoyable and congenial climate of that section very much, and adds that it is a pretty country, and fine grazing land, and the cattle look much better than his cattle that have been fed all winter on their Ohio farm owing to better weather conditions. The farmers there are making a specialty of raising beans and are having good success. They send their kindest regards to all of their Walton friends.

Last Saturday evening the social circle was greatly agitated by the marriage of J. Clifton Mayhugh and Miss Anna C. McClure, who were both residing in the county and being tied in the county court at Independence by Rev. Olaus Hamilton pastor of the Walton Baptist church, the groom's two sisters, Misses Zula and Jennie, being the only attendants. The bride is the daughter of Mr. and Mrs. Horace McClure of Leitchfield, Tirascon county. Mr. McClure

being prominent in the jewelry business there. Miss McClure was a frequent visitor here to Mr. and Mrs. E. P. Northcutt and while here about a year ago was met by Mr. Mayhugh, and being a very charming and lovable young lady of many attractive qualities, the old, old story of love and happiness together was repeated, and when Miss McClure returned here recently on a visit her wooing suit prevailed on her remaining here as his bride. The groom is an excellent young gentleman of the highest type of morals, and is at the head of the clerical department of the Mayhugh Lumber Company. After a brief visit to friends in Cincinnati the happy young couple returned here and for the present are receiving congratulations at the residence of Mr. and Mrs. E. P. Northcutt whose guests they will be for a while until they make other arrangements.

DEVON.

Mr. and Mrs. Theodore Groger were in Covington, Friday, April 20th, on business.

Ben Norman and family, of Latonia, will move here next week to the farm purchased of Theo. Groger.

Mrs. John Easton was the guest of Mrs. Sarah Rector and Mrs. C. D. Carpenter, Thursday.

Miss Schwind closed her school here Friday afternoon. She is a very pleasant little lady and made many friends while here.

Mr. and Mrs. Arthur Taylor, who recently moved to this neighborhood from Covington, were guests of Mrs. Benjamin Bristow, Saturday.

Mr. and Mrs. Jeff Hutsell, Mrs. Perry Dixon and daughter, Miss Mae, attended services at Florence Sunday, where Bro. Carter preached an excellent sermon.

UNION.

A fine black stall belonging to Robt. Dickerson, got its leg broken.

Frank Afterkirk, wife and little son were guests of his brother, William, Sunday. Henry Afterkirk, of Cincinnati, was the guest of his parents, W. J. Afterkirk and wife, last Friday and Saturday.

Graded School Election.

To the Sheriff of Boone County Kentucky:

You are directed to hold an election in the town of Richwood Boone County Kentucky on Saturday, May 19, 1917 at some place in said town to be designated by you according to the provisions of school election laws of this State. This election shall be held for the purpose of taking the sense of the legal voters of this district, hereinafter described on the question, "Are you in favor of levying a tax of one cent on each \$100 worth of property in this Consolidated School district for three years for the purpose of erecting a school building in said school district?"

The boundary of this school district is as follows: Beginning at Mary Fields place leaving it out, thence with the Richwood and Walton road to Robinson & Barlow's place including it, thence to Agnes Roberts line including it, thence to Tod Toole place, including it, thence to Elsie Garrison's place leaving it out, thence with the Union Graded School line to J. J. Sommer's place including it, thence to William (Gleason's) place including it, thence to Theodore Carpenter's place excluding it, thence to Wm. Smith's place including it, thence with the Kenyon county line to the place of beginning. This sub-district contains sub-districts Nos. 13, 18 and 36 of Division 1.

This is done in accordance with the action of the Boone County Board of Education held on the first Tuesday of April 1917. Certified to the Sheriff April 13, 1917. EDGAR C. RILEY, County Supt. of Schools and Chairman of Boone County Board of Education.

I designate Robinson & Barlow's store in Richwood as the place where this election shall be held. W. D. CROPPER, Sheriff of Boone County.

Examined the Banks.

The Tri-State Butter Co., of Cincinnati, is paying 47 cents a pound for butter fat this week, which is the high water mark price.

The seven billion dollar war revenue bill was passed unanimously by the Senate. It is the largest single war budget in the history of any nation.

Robt. W. Jones, of Walton, passed through Burlington Wednesday morning enroute to Rabbits Hash to sell an automobile.

Dr. H. H. Hays and Col. William Watie, of Bullittsville, were interested spectators at court yesterday.

American soldiers must be sent abroad as soon as possible in the opinion of Major General Leonard Wood.

The sale of the Colium land in Pt. Pleasant neighborhood, was set aside by the court.

Some of the shade trees in Burlington have leaves on them.

Bentler's Economy Drug Store.

Quality at Cut-Rate-Prices

What the word "Economy" implies in relation to this Store

The Cincinnati Wholesale Economy Drug Store first employed the use of the word "Economy" as a part of their trade name to further the teaching of their policy toward the public.

This policy was to make it possible for the consumer to purchase at the least possible price all articles handled by a drug store.

In order to realize such a policy it is obvious the first step was to get unusually low jobbers prices. This they did thru buying in large quantities (supplying 150 retail stores.)

Then the next step was to place these goods in the hands of the Retail Economy Drug Stores at a reduced wholesale price so that he (the retail druggist) could offer them to you at a reduced price. Thus is their policy realized to the utmost.

Such a policy is economy and resulted in the adoption of this word as a part of the trade name of both the wholesale organization and its retail stores.

My store, being one of a hundred and fifty (150) buying thru this great wholesale organization offers you this policy. My prices cannot be beat anywhere and in very few instances can they even be met.

My Policy to you is "Economy." May I serve you?

L. A. BENTLER, - Druggist

Local Happenings.

Personal Mention

Paul Baker was annihilating time and distance in his new Maxwell last Sunday.

Dr. Omer Henry, of Minerva, Mason county, was in Burlington one day the past week.

Leonard Kite and wife, of Waterloo, were Sunday guests of Mr. and Mrs. R. S. Cowen.

State Bank Examiner Settle was in Burlington, Tuesday, and inspected the two banks.

Bert Smith and family, of Newport, were Sunday guests of relatives in this neighborhood.

Martin Michaels and son, Ben, of Erlanger, were business visitors to Burlington, last Saturday afternoon.

Dr. L. H. Crisler and family, of Covington, spent Sunday with his sister, Mrs. Fannie Rice, near town.

R. C. Gaines and daughter, of Erlanger, are home from St. Petersburg, Florida, where they spent the winter.

Mr. and Mrs. B. E. Aylor, who reside in Woolper neighborhood, entertained friends from the city last Sunday.

Mr. and Mrs. Allen Cooper, of Greenfield, Indiana, were guests of Miss Sallie Rogers last Sunday and Monday.

B. B. Allphin and wife, of Walton, were Sunday afternoon guests of his sister, Mrs. Mary Hume, who has been quite ill for some time.

Prof. R. H. Carter, of Petersburg, came up last Friday afternoon and saw the Burlington High School baseball team play rings around the Williamstown aggregation.

W. G. Kite, of Waterloo, was a visitor to Burlington last Saturday afternoon. Mr. Kite's eyes have been very weak for a year or so but he thinks they have begun to improve.

R. S. Cowen and wife, who spent the winter very pleasantly at St. Petersburg, Florida, arrived at home last Wednesday night. Mr. Cowen increased his weight about ten pounds while in the South.

Courtney Pope, who was involved in a serious accident at Lima-burg about two weeks ago in which his collar bone was broken and he was badly injured otherwise, has been improving as rapidly as could be expected.

Col. G. C. Graddy, of Petersburg, was a guest at the Boone House last Sunday. The Colonel looks well, and is in fine spirits, both of which are in perfect keeping with his youthful appearance. He came over from Erlanger, where he had been visiting his daughter, Mrs. Courtney Walton, for several days.

Several Burlington people attended the school entertainment at Bellevue last Saturday night, and praise highly the performance they witnessed.

The green hanters are abroad in the land with baskets and knives.

The petit jurors were discharged about noon Tuesday.

The mercury stood at 79 at 6 p. m. Tuesday.

Mrs. Rouse is a Town Booster.

According to what the Recorder has heard, Mrs. Emma V. Rouse of Florence, is the kind of a citizen to have in a small town that is making an effort towards progress. It will be remembered that this proposition of electric lights is the paramount issue in Florence just now, and Mrs. Rouse, who, not long since installed an electric light plant in her handsome new residence, beside gladly paying her taxes for town purposes, is proposing to maintain one street light for the town in order to encourage the installation of electric lights. Mrs. Rouse evidently recognizes the prominence which the town should command when the Dixie Highway is completed and wants to see it in a class with other progressive towns along that thoroughfare.

Ford Roadster Turned Turtle.

A Ford roadster driven by a representative of the White River Creamery Co., Cincinnati, left Burlington dusk last Monday and when near J. J. Tanner's out on the Florence pike, the machine turned turtle, the rear part of it landing on top of the fence at the roadside. The machine was badly damaged, but strange to say the driver escaped without a scratch. The foot accelerator had stuck and the driver was trying to release it and took his eyes off of the road and the machine flew the tank instantly. When he left Burlington he was going at a high rate of speed, which he probably maintained until he accident.

Keep the Streets Clean.

Numerous strangers visit the town of Burlington every Sunday that the weather is good, and as the season is at hand when nature will do its part in making the town inviting to the stranger, the citizens should do their part towards making it preactable in every particular possible, and especially by keeping the streets cleared of fragments of paper and other objectionable materials that appear to find their way into the streets in unlimited quantities. If every one will see to it that the street in front of his premises is kept clean no one person will have much to do in the clean up business.

A Season of Small Potatoes.

This is a season of small potatoes, and the question is already being asked, if these small potatoes are suitable for yield. The season's seed. The real objection to the use of small seed is not the size of the tuber, but the coming which means that in a few seasons the small tubers thus selected will come largely from hills producing small tubers, and so greatly reducing the yield. If your crop consists largely of small tubers this season, have no fear in using them for seed. But do not make it a practice to select small potatoes on your following another, Bi-Weekly Farm Bulletin.

Borax is especially valuable around farms and out of doors. One pound of borax is 12 bushels of minnows will be found desirable as a poison without injuring its natural qualities or farm. Scatter this borax over the pasture and sprinkle with water.

M. S. Rice's Old Compass.

Kirtley Rice was placed on exhibition at the court house the compass which his father, the late M. S. Rice, used as far back probably as 75 years ago in making surveys of land in this county. Mr. Rice was a very popular man and considered an accurate surveyor by a generation or two that have gone before, and the compass above referred to was used in its time to survey, no doubt, every parcel of land in this county during the period of usefulness, but like many other things the old compass is a back number and has taken its place as a curiosity.

What About Oiling the Streets?

It is evident that dust, and lots of it, is going to be an uncomfortable element with which the citizens of Burlington will have to contend this summer unless the main streets are oiled, and the sooner the matter is taken up the better. Experience shows that oiling the streets not only eliminates dust but protects the streets as well by making them impervious to water. Can the town council assist or will the work have to be done by private subscription?

Wool Pool is Crowding and the Price is Approaching 60 Cts.

J. H. Stevens, president of the Boone County Wool Growers Association informs the RECORDER that the pool is making very satisfactory progress, and the indications are the pool will contain nearly a thousand pounds more wool this year than it did last year, and he would not be surprised if the pooled wool brought close to if not 60 cents a pound.

Buying Land on Woolper.

Ex-Mayor Pat Phillips and brother, of Covington, are now owners of what is known as the Coleman place--the Bruce mill farm--on Woolper creek. It is a very picturesque location, and the old mill hard by the residence is one of the ancient land marks in this part of the county. It is not known whether the ex-Mayor contemplates becoming a citizen of this county or not.

Bank Statements Next Week.

As some of the bank statements did not reach this office in time to be handled this week, the publication of the statements has been deferred until next week, that they may all appear in the same issue.

Kicked by a Gasoline Engine.

Wilber Rice, of Idlewild neighborhood, was cranking his gasoline engine one day last week, when it back-fired, causing the crank to strike him under the chin and cut a very ugly gash.

And the Lid Went On.

The local Sunday only in a case of administering to some person who was ill could a merchant be induced to make a sale.

The Olham Era gives this advice: "Better plant that garden and get it in shape before you are called off to the war. The wife and kids can finish it and they may need it."

Carrollton is erecting a handsome and modern school building.

WOULD CLOSE BREWERIES AND DISTILLERIES

Kansas Agricultural authorities, according to St. Louis reports, are taking steps looking to a "food reserve." The closing of breweries and distilleries to save grain, and increase of bread, cut out through the milling of wheat to 81 per cent flour instead of 73 per cent as at present, were among suggestions for food conservation made at St. Louis, Mo., Monday, by Henry J. J. Waters, president of the Kansas State Agricultural college, before a conference called by Secretary Houston of the United States Department of Agriculture to consider the food situation of the nation. The advanced percentage in milling of flour would increase the production by 18,000,000 barrels. President Waters said, while the shutting down of breweries and distilleries would save annually 518,505,095 bushels of grain suitable for fattening stock, we are entering upon one of the greatest wars," he continued, "and a spare year in accumulating a reserve in preparation for emergency. This country's visible supply of food will be consumed before another harvest—should we have an unfavorable season the United States would face the greatest food shortage since the civil war. Army men said—hard tack, pork and beans—must at once be increased. More beans must be raised, and hog raisers must look to increase in the pork output."

Increased gardening, rapid extension of community canning clubs and an increase in potato acreage were among the other conservation measures advocated by President Waters.

Russia's Peace Terms.

A difference of opinion has developed between two of the leading men in the revolutionary government of Russia, but the correspondents are unanimous in stating that the situation is not of such a nature as to hamper the government.

The discussion has arisen in regard to the terms of peace Russia should insist upon. Foreign Minister Milyukoff insists that Russia will not make peace except in conjunction with her allies, and he announces what he thinks Russia should demand for when peace comes. What he asks for is, in brief, the reorganization of the Austrian empire and Constantinople for Russia.

Minister of Justice Kerensky has other ideas. He, too, stands firmly on Russia's pledge that Russia will not negotiate peace with Germany except in conjunction with her allies, but he contends that Russia should not demand territorial aggrandizement as the price of peace. He proposes that the Dardanelles be internationalized and that no territory be taken from Austria except Polish Galicia.

Mr. Kerensky's program is more acceptable in some ways to the German and Austrian people, but it is accompanied by a rider that will not make for an early peace. Mr. Kerensky insists that the German people be treated generously, but that Russia shall continue the war until the Kaiser is dethroned and the House of Hohenzollern deprived of its heritage. Eternal justice, Mr. Kerensky says, demands that the Kaiser must go—Ex.

"Put the Sunday Lid on," Saith the Grandjury.

A recent decision of the Court of Appeals interpreting the Sunday closing law has caused rural store keepers some concern in as much as the decision declares that a single sale, no matter how small, makes a merchant liable to indictment. Having a knowledge of this decision of the highest court in the State, the grand jury in session in Burlington last week thought it proper that the merchants in the county should be informed as to the law before indictments were returned against them, and with that view of the situation, it had the merchants summoned before it for a conference in the matter, which conference resulted in the several merchants returning to their homes determined to clap the Sunday lid on, in ability to make purchases on Sunday will be a considerable inconvenience to a great many until they adjust themselves to the conditions, but there are many localities and towns in Kentucky where the Sunday law is obeyed strictly and the people of these communities seem to get along as well as those where everything is wide open. In most instances the merchant will gladly keep his store closed in order to relieve his mind from the worries of business one day in every seven, but the fellow who on Sunday is in need of some article and cannot be served is the one who may say things that would not look well in print. The grand jury that produced the Sunday law flury now is composed of men from many sections of the county and their neighbors, it is supposed, desire to see the laws of the land enforced and that is the function of a grand jury.

Fleming Elds, son of Mr. Mary E. Fields, who resides north of Walton on the Lexington pike, joined the U. S. Marines in the naval service in Cincinnati this week. He will go to Cincinnati Monday where he will join his recruits and will probably be sent to Norfolk, Virginia, where he will be placed on a training ship preparatory to being placed in regular service. Quite a number of our young men have the patriotic feeling and may also enlist.

State News.

Paducah.—In an effort to have flyless city the City Commissioners purchased 200 fly traps.

Benton.—At a meeting of the Swinkarmir lumber mill, was killed to death by a mule at his home in this city.

In many places fairs are being planned in the near future, but the celebration of the Centennial in Owenenton will not be disturbed in this manner and consequently the lovely symposium will grow as of old.

At a meeting of stock breeders in Louisville last week the Kentucky Purebred Live Stock Association was organized. P. H. Gaines was elected a director and made chairman of the Southwestern Sheep Committee—Carrollton News.

Winchester.—Charles Bidmut, a shoemaker of German descent, appealed to the police for protection, claiming that threats of mob violence had reached his home because of alleged disloyal utterances regarding the U. S. government. A number of native born American citizens and disclaimers any feeling or utterance of disloyalty.

Hopkinsville.—Chas. W. Horn, 37 years old, who resided in flames which burned the residence of his son, R. L. Horn, at Lafayette. The son was badly burned while the father escaped. Several of the occupants of the house, a two-story frame building, had narrow escapes. Charles W. Horn was the oldest Mason in Christian county. He leaves a widow and two sons.

Whitesburg.—In his efforts to put a check on the whisky traffic in Letcher county, Judge John F. Butler instructed the grand jury in session here to return indictments against express companies for frequent deliveries in quantities amounting to bushels. At the last term of the circuit court a number of fines were assessed against the carrier companies for large deliveries.

Versailles.—McKee Brothers, of Forest Home Farm, this county, sold for \$1,500 cash to a Western Buyer-Defender Major, a Defender of the army, a very fine horse. McKee's are sons of the late Dr. McKee, who was a breeder of thoroughbreds. The boys decided to breed hogs instead of horses, and the wind waves cut off the animals at some later time. To this end the posts should be firmly set, preferably in cement, and the upper framework should be snugly bolted or spiked together.

If the three inclosed slides are composed of loose boards, set on end at an angle of 45 degrees and banked in place with straw, about the worst place with which could accomplish work to "blow out" the slides. Little damage to stock would be likely to occur in such an event.

A shelter of this kind, with its top as well as its sides heavily straw-covered will for all practical purposes be as permanent as though its sides had been nailed firmly in place. With its open side toward the south it will prove weather-proof, warm and quite adaptable to creature comfort.

FEEDING SALT AND CHARCOAL

Needed Mineral Matter Is Supplied by This Practice—Self-Feeder Prevents Waste.

Salt and charcoal should be provided to furnish hogs with mineral matter, according to Ray Gatewood, instructor in animal husbandry in the Kansas State Agricultural college.

"Salt should be available at all times, preferably in an open shed where it can be protected from the weather," said Mr. Gatewood. "Charcoal is best fed from the hopper or self-feeder, so as to prevent waste."

"It is a common practice to burn coals until the cob is well charred, and then the fire is smothered and the hogs are given access to this. Some people char their cobs in a pit, and when the fire has gained good headway, the top of the pit is covered with a piece of sheet metal, and then covered with coal then be used as it is needed. It is advisable to add salt to the charcoal as it makes it more palatable, and is also especially good for the hogs."

MURDER PROFITS IN PIG PEN

Success Assured Only When Animals Are Comfortable and Have Liberal Supply of Feed.

A happy hog is a help to humanity, but a pessimistic porcine is the epitome of despair. Melancholia murders profits in the pig pen and icicles are cold comforters.

FARM STOCK

GRINDING FEED FOR HORSES

Improbable That It Pays Except Where Animals Are at Hard Work or Have Poor Teeth.

Answering the query as to whether it pays to grind oats or corn for horses, and which would give best results, Prof. B. E. Carneal of the Ohio experimental station makes the following reply:

"It is improbable that grinding either corn or oats for horses will pay excepting in cases where the horses are at very hard work or have poor teeth. Even in instances of this kind it is not at all certain that profit will always result from this rather expensive operation. Soaking corn that is exceedingly dry and hard is advisable. As a general thing it seems that it is safe to regard our corn and oats, both of good quality, approximately equal in feeding value per pound for horses."

"If there is a tendency to swallow the feed without thoroughly chewing, it would be worth while to devise a method of feeding that would render it difficult for the feed to be eaten so rapidly. Mixing a small amount of bran or chaffed hay with the grain might be of assistance, or the same result might be accomplished by putting large pebbles in the feed box. It is well to determine whether the teeth are in good condition, whenever there is evidence that the feed is poorly masticated."

WIND-PROOF STOCK SHELTER

It Should Be Made Strong Enough to Withstand Any Wind—Set End Posts in Cement.

In constructing a stock shelter in an open field particular care should be taken to make it substantial enough to withstand any wind short of a tornado. A little foresight in this regard may save the loss of valuable animals at some later time. To this end the posts should be firmly set, preferably in cement, and the upper framework should be snugly bolted or spiked together.

If the three inclosed slides are composed of loose boards, set on end at an angle of 45 degrees and banked in place with straw, about the worst place with which could accomplish work to "blow out" the slides. Little damage to stock would be likely to occur in such an event.

A shelter of this kind, with its top as well as its sides heavily straw-covered will for all practical purposes be as permanent as though its sides had been nailed firmly in place. With its open side toward the south it will prove weather-proof, warm and quite adaptable to creature comfort.

KEEP ALL SWINE CONTENTED

One of Most Difficult Animals to Control Once It Gets Habit of Breaking Out of Pasture.

When a hog once gets the habit of getting out of its yard, pasture or whatever its enclosure may be, it is one of the most difficult animals to control. You can stop a brachy horse or cow if you build a fence high enough, but a hog goes through it.

There is no hole in the fence it makes one. Of course if the fence was so tight at first that the hog could not get through, it won't bother you the second and forty-ninth time.

Insufficient or irregular feeding, or failing to supply something which the animals crave in the feed makes hogs restless and ready to take the first chance of exploring the outside world in hopes of finding what they failed to find in their troughs.

It says time and patience to keep them contented and at home.

COMFORTABLE PEN FOR SOWS

Cheaper to Warm Animal With Reasonably Good Building Than to Furnish Alfalfa.

Do the hogs have warm, dry beds? Remember that it is a matter of economy in rearing hogs to provide them with comfortable quarters. It is cheaper to warm a hog with a reasonably good building, with straw and litter, than to burn alfalfa hay and 60-cent corn in maintaining the heat of the animal body.

PERMITTING RAM WITH EWES

Not Advisable to Let Him Run With Flock Longer Than Six Weeks to Prevent Accidents.

Never let the ram run with the ewes any longer than six weeks, for he will kill, maim and cause them to lose their lambs.

They will mostly all get with lamb sooner than this, but it is best to keep him in long enough to be sure.

LIVE STOCK

USE OF BACTERIAL VACCINE

Vaccination as Preventive for Strangles and Distemper Being Extensively Employed.

The vaccination of horses as a preventive for strangles or distemper is being extensively employed. It has been found that the cause of the disease warrants the use of a bacterial vaccine. The efforts of protection and for the logical means of preventing strangles as well as other diseases caused by specific organisms.

The outcome of the vaccination of horses has in some instances been disappointing. It is possible that in such cases the bacteria has deteriorated or become ineffective, or that the results are complicated by secondary infections. In the latter case it is advisable to use bacterins that will combat the secondary infections. These are called mixed bacterins, and contain a variety of killed bacteria commonly encountered in such diseases.

In case distemper appears, all healthy animals should be immediately injected with streptobacterins. The administration of bacterial vaccines should be made by a competent veterinarian, as improper administration may not provide proper protection and so result in irregularities. Bacterins can be obtained from manufacturers of various biological products.

CLIPPING HORSES IN SPRING

Heavy Coat of Hair Causes Much Sweating, Which Is Enervating to Work Animals.

A good many horses come through the winter season with heavy, rough coats that are not shed when spring work begins; the result is they are uncomfortable when at heavy work. A heavy coat of hair causes much sweating, which is enervating to the horse and consequently produces an unnecessary drain upon his strength and vitality. Nor is this all. A horse that sweats freely during the changing weather of spring is very apt to take cold. Rough, shaggy coats should be clipped in the spring before heavy work begins.

There are excellent clippers on the market for this purpose, and they can be bought at very reasonable prices. A good clipper will pay for itself in a single season on almost any farm, and sometimes it will do much more than that. If a team is laid up with a bad cold for a few days when work is pressing the loss of work may become very expensive. This should be avoided by the use of a clipper and incidentally also make the horse more comfortable.

Commissioner Cohen

in Covington.

(Kentucky Post.)

Describing the food situation in the country as serious, Matt S. Cohen, Kentucky state commissioner of agriculture, urged Covington citizens to make personal sacrifices as a means of relief, in an address to community luncheon at the Covington Industrial Club, here Thursday.

Cohen said he had just returned from St. Louis, where agricultural commissioners of 38 states and representatives of more than 50 land grant colleges had conferred with Secretary of Agriculture Houston about the food problem.

As reports of grave conditions all over the country were heard, the meeting took on the serious aspect of funeral, Cohen declared.

All citizens at once must organize for their best efforts and curb their appetites to meet the prevailing food scarcity, Cohen asserted.

Cohen advised every man to hold a council of war with his family and discuss plans for combatting the situation.

One means urged by the commissioner was for every property owner to cultivate land to supply his own household.

"Enough food can be raised on a plot four feet to feed six persons for a year," Cohen said.

"It is a patriotic duty for every citizen to have his own garden, and the situation calls for extreme efforts. Every man should get up an hour earlier, if need be, to cultivate his garden," Cohen declared. Another method of meeting the crisis would be to curtail consumption of food stuffs, Cohen indicated, even at the cost of some hardships.

"We are coming to the time when every person must drink less, eat less, wear less and work more," Cohen declared.

He endorsed the suggestion of Ogden Armour, Chicago meat packer, that each family have at least one meatless day a week on account of the meat shortage. Cohen said there should be not only one, but two and even three meatless days a week for each household.

Cohen said there is another way in which business men can help in the situation, and that is to appeal to farmers to quit producing money crops and produce food for humans and animals.

"It is the duty of every business man to encourage the farmers to increase food crops," Cohen asserted. "If intensive farming is not practiced rigidly this year, there will be people starving within the next fortnight of the Covington Industrial club next winter," Cohen predicted.

Cohen told of appeals he had received from mayors of eastern cities for food and clothing, which could not meet because of crop shortages.

He branded as a falsehood the popular belief that high prices are due to the manipulations of food speculators.

He said Kentucky reports show there are 5,000,000 less sheep, 28 per cent less corn and 25 per cent less wheat produced in Kentucky now than in 1918, although the population has increased greatly.

Cohen predicted the country would see \$20 hogs, \$15 cattle and lambs at no price before September. Cohen said he had received a message from Gov. Stanley ordering him back to Frankfort for a conference upon the labor situation.

"There have been 30,000 laborers leave the state since last September," Cohen said.

What is to be done in case thousands of men are called away to war, is the problem before the state administration, Cohen said.

He urged farmers to remain at home and bend every effort to produce bumper crops.

"It is just as patriotic for a man to remain in the fields and produce food as it is to fight in the trenches," Cohen declared. Pointing to a large picture of President Wilson upon a background of national colors, Cohen said he could not blame a man for responding to the call when looking into the face of such a man, backed up by Old Glory.

Cohen said he thought he was doing his duty to his employers by revealing the facts on the food situation.

"Kentucky tax payers hired me to look after their interests from the agricultural standpoint. I have tried to become the best informed man in the state upon such matters, and from what I have learned about food conditions, I am justified in making the statement that the situation is very serious."

PUTTING AWAY WIN-

TER CLOTHING.

It is none too early to talk about the work of the coming spring time, because spring is now but a short time away, and we should make our plans to meet the odd moments which may find between times. Of course we shall wear the clothing for some time yet, but when we are ready to put the garments, woolsens, blankets, etc., away, be sure to remove every bit of dust you can, clean all soiled spots, and have them as clean as possible. Mends and stains may be removed, greasy, dirty clothes. All sticky places should be cleaned with pure white soap or soap jelly and water, then every bit of the soap sponged out of the fabric. There are many good ways of putting away the heavy garments so the moth can not get to them, without filling them with deerskin odors. Be sure to fold the garments properly, so as to avoid unnecessary wrinkles. Study up these things while you have time, and begin early to avoid the moth.

A Pendleton County Hermit.

Taylor White, who for the past twenty years has led the life of a hermit, in an old abandoned log barn on the farm of Henry Biddle, near Cado, was forced by sickness, caused from exposure and old age, to abandon his solitary abode last week, and was taken to the home of his sister, Mrs. Margaret Miller.

On Thursday night last, the ancient vermin-infested hut, together with its meager contents, was destroyed by fire. It is not known how the fire started, but it is probable that some one purposefully applied the torch.

Taylor White was born almost seventy years ago, and has spent his entire life in Pendleton county. He was happily married many years ago, and lived and prospered until his wife was called away, about twenty years ago. He owned a small farm near Cado, but disposed of it after the death of his wife.

Grief stricken and broken-hearted, he betook himself to an old log hut in a secluded spot on the headwaters of Red Eagle Creek. He scarcely had a piece of furniture or any of the necessary comforts of life. During his years of hermitage, he had not a single companion, save three hounds. For a means of livelihood he chose the most primitive means of trapping and fishing. He seldom left the vicinity of his hut, and seemed more contented with his life of seclusion than in company. Several years ago he consented to pose for a photograph, and the picture shows him, his three hounds and his rude log pen which they called home.

At the time the hut was burned it was nothing more or less than a log pen. It had decayed and crumbled during the many years the old-fashioned clap-board roof had rotted off, and the chinks between the logs had decayed and fell from their places, leaving the lonely occupant and his canine companions exposed to the wintry blasts and all sorts of weather.

There was no floor in the house, and for a bed White had constructed a rude bunk, and had boarded it up next to the outer logs, which protected him to some extent from the elements. The bunk was filled with straw, with but little bedding. It is a remarkable fact that a man of his great age could stand the exposure and the privation of his hermit life or how he could have procured sufficient food to sustain his body. It is said that he refused to be helped, and leave his solitary abode and live elsewhere. He seemed content with his choice and probably would have refused the entreaties of friends this time, had his physical strength been great enough to resist them.

The winter had been too severe for him, and his frail body could no longer stand the exposure to his winds. White is now at the home of his sister, and is rapidly regaining his strength. Falmouth Outlook.

The Corrupt Practice Act.

The corrupt practice act passed by the legislature of this State, March 13, 1916, has the candidates and their friends up in the air, so to speak, Section 3 of the act is as follows:

"It shall be unlawful for any person who is a candidate for nomination or election for any State, county, city, town, municipal or district office, to expend, pay, promise, loan or become pecuniarily liable in any way for money, either directly or indirectly, or to agree to or enter into any contract with any corporation, association or person, to vote for or support any particular thing or measure in consideration of the vote or support, moral or financial, of any such corporation, association or person, and it shall be unlawful for any corporation, association or person to demand that any candidate for office shall promise or agree in advance, or shall make any declaration or give any support any particular individual, thing or measure in consideration for the vote or support, financial or moral, of such corporation, or person in any election, primary or nominating convention, that no expenditure made by any candidate or other for him for the purpose of employing and paying clerks, stenographers, or for printing or advertising or in securing halls for public speaking, or suitable headquarters, stationery and stamps, or actual traveling expenses, shall be deemed illegal, and any person, corporation or company violating this section shall be fined in any sum not to exceed \$5,000, or may be imprisoned in the county jail not to exceed six months, or both."

Further, a candidate is required to submit a written itemized statement of his expenses, and take the following oath:

"I do solemnly swear (or affirm) that the statement herewith filed embraces all money spent by me, or in my behalf with my knowledge, by me or by others; that I have neither, directly nor indirectly, arranged for or encouraged the spending of any money other than that included in my statement; that I have not repaid any money so spent or claimed to have been spent; and that I will not do so, and that I have not violated any of the provisions of this act in letter or in spirit."

The entertainment given a week ago last Saturday night at Hebron, by the Hebron school, was put on at a splendid next Saturday night. It was held to be a first class amateur performance, and the play was a large audience that witnessed it. It was

IMPORTANT TO HATCH CHICKENS EARLY

MOTHER HEN AND LARGE-SIZED BROOD.

(From the United States Department of Agriculture.)

Did it ever occur to you that nature requires her children to take an annual vacation? She does, and nowhere do human beings puzzle their brains over this fact more than when the hens begin their yearly holiday. This vacation is technically called the "moulting season." It begins during the late summer. The hens stop laying, and change their suits of feathers for new ones. Usually they consume three or four months in the process. Most of us know this perfectly well, but are apt to overlook the fact that a very important feature of the moulting period is that egg-laying stops. We are unreasonably and expect the hens to lay all the time.

When we take this vacation period, fresh eggs are scarce and remain scarce until the pullets hatched during the preceding spring begin to lay.

The Remedy.

The remedy is very simple, and is under the control of the poultryman. The first step is to have chickens hatched early, so that the pullets begin to lay when the hens begin to molt. This is not difficult. Pullets of the American breeds begin laying at about seven months of age. Leghorn pullets begin when about six months old. North of the Ohio river this means that all hatching must be over by May 1 at the latest. The best plan is to have the chickens coming at intervals during March and April. The

earliest hatched pullets will, of course, begin to lay first. If any of them begin to molt, their places will be taken by the later ones and a steady supply of eggs will be more certain.

The Difficulty.

The difficulty in the way of the practical application of this matter is that so many poultry keepers are dependent on hens for hatching. As long as we have hatched chickens we will have late sitters. The poultry keeper who wants to change from late hatching to early hatching must therefore either get broody hens from someone else or use an incubator. After he has "changed the dates" on his flock he will have no trouble, especially with the American breeds.

Can It Be Done?

Every progressive poultry raiser who has tried it, every agricultural college and the government, have data showing that early hatching will produce fall and winter layers. In the government flock during the past winter the pullets of the entire flock averaged over 20 per cent egg production, and some pens made 35 per cent. That means, in plain language, that the egg production for all the pullets was one egg daily for every five hens, and for some pens one egg daily for every three hens. This, too, when fresh eggs sold up to 75 cents per dozen in Washington. This could not have been done except by early hatching.

NEW POTATO DISEASE

Prevalent Last Season in Various Sections of the East.

Applications of Potash or Manure to Soil Recommended if Either Are Obtainable—Outbreak Expected Again This Year.

(From the United States Department of Agriculture.)

A potato disease appearing on certain soils and apparently associated with the lack of potash in the commercial fertilizers used was prevalent last summer in various sections of the East. According to specialists of the bureau of plant industry, United States department of agriculture, the trouble was largely controlled by the use of stable manure. The disease may be expected to appear again with increased severity during the coming season in many potato-growing sections, from Maine to Virginia, and probably also farther south. It was first noted in scattered fields in 1915. In 1916 it became serious and general over considerable areas. Last year the disease was first observed late in June in Maryland and Virginia, and during the latter part of July in Maine. The affected plants first develop a downward rolling of the leaf margins, accompanied by a peculiar browning of the surface, sometimes mistaken for spray injury. Since it occurs on unsprayed as well as on sprayed plants, it cannot be due to the corrosive action of sprays. The foliage gradually turns brownish yellow, and the plants ripen prematurely. Death of the leaves and sudden collapse of the stems at the ground level follow. The yield, of course, is much reduced.

Where Disease Is Found.

The disease is found more commonly on fields of early-maturing varieties, but is not restricted to them. It also appears first on early planted fields.

What is more striking is the very apparent association of the trouble with certain soil types, at least in Maine, where this relation is well known. Features of the trouble, are being investigated by the department experts in co-operation with the Maine agricultural experiment station.

Soils which originally supported the growth of soft woods, or "unsprayed lands," developed the diseased condition in its most severe type, while the hard woods ridges showed it least or not at all. The trouble appeared first in the swamps or lowlands, where the natural drainage was not so good as on the higher ridge land. When the disease appeared at all on the higher ground, it was of a less severe type. Acidic lands are frequently found

on the stems of the collapsing plants, and some of these most constantly seen before the disease-producing groups. Their relation to the trouble is being investigated—but the present indications suggest that they are not the primary cause, but have attacked the plants already seriously weakened by other agencies.

Experiments in Progress.

Fertilizer experiments in progress on affected fields demonstrated that the plots receiving potash showed little or no signs of the trouble, even where other plots were entirely dead. Stable manure also held the disease in almost complete control.

Investigations of the trouble by the department are incomplete, but the present indications are that it is due to insufficient potash, or, perhaps, in some soils at least, to an excess of nitrate in the presence of a minimum potash supply. Farmers who are unable to secure potash fertilizer for their potato fields but who have stable manure may insure their crops against attack by its use. In sections where certain types of soil have been observed to suffer from the disease under discussion, and it is advisable to plant potatoes on these types next year, it is strongly recommended that potash fertilizers or stable manure be applied if either are obtainable.

CAREFUL SELECTION OF SEED

Many Corn Failures Might Have Been Turned Into Success by Using Selected Ears.

Nothing else would so cheaply turn many corn failures into successes as good seed corn.

While a knowledge of corn breeding would be helpful, any farmer can do much toward supplying himself and his neighborhood with better seed corn by starting with a well-selected variety and selecting the best ears from the best stalks every year. By so doing, natural selection assists in weeding out the unfit.

Where corn is grown for grain, there is no better locality from which to obtain seed than that in which it is to be planted.

TIME FOR CUTTING ALFALFA

Ready for Hay When Young Shoots at Bases of Plants First Appear—Blossoms Also Show.

In general, alfalfa should be cut for hay when the young shoots at the bases of the plants first appear. If these new shoots become long enough to be cut out by the mowing machine, the hay can only be badly damaged. The blossoms often appear simultaneously with the new shoots but blossoms alone are not a safe guide to the time for cutting.

CIRCUIT COURT.

The grand jury was in session four days and returned 14 indictments, several of them being found under the "cold check" law.

The case of Horton vs. Adams for \$5,000 damages resulted in a verdict of \$100 for the plaintiff. The suit grew out of a fight in which Adams knocked out some of Horton's teeth and bruised him pretty badly otherwise.

O. M. Rogers was called to the bench to preside as special judge in cases in which Judge Gaines was employed prior to his election.

To the Hon. Sidney Gaines, Circuit Judge:

We the Grand Jury of the Boone Circuit Court for the April term, respectfully report that we have been in session four days, examined 30 witnesses and have returned fourteen indictments.

We have investigated all violations of law brought to our attention and congratulate the citizens of the county upon the general observance of and respect for the law.

We have had before us many of the merchants of the county to whom we have explained the Sunday closing law as recently interpreted by the Court of Appeals, and have received assurances from most of them of their cooperation in enforcing the law strictly in the future.

We have examined the county property and find the infirmity of first-class condition except for the need of some plastering and a few window lights and some repairs on the roof of the barn. We recommend that these repairs be made.

The court house is in splendid condition and needs no attention other than a new floor in the Sheriff's office, some plastering on the walls of the County Clerk's office and the need of fixing the lightning rod on the cupola. We recommend that these repairs be made.

The jail is in its usual good repair and we have no recommendations to make.

We recommend that attachment issue for Pearl Kite and Johnnie Hartman, Jr., who were subpoenaed and did not appear without being excused.

In view of the fact that our country is at war it is the sense of this Grand Jury that the American flag should be displayed on the cupola of the court house and we recommend that the fiscal court purchase a suitable flag for that purpose.

Having completed our labors we now ask to be finally discharged.

H. L. Dixon, Clerk,
J. W. Early Foreman.

Mrs. Mary Mannin is Dead.

Mrs. Mary Dunaway Mannin was born in Carter county, Ky., Nov. 7, 1838, died in Adairville, Mo., April 4, 1917, aged 78 years, four months and 27 days. She was married to Amos Mannin in 1858. To them were born five children. The daughters, Mrs. Lee Mannin and Mrs. Scott Underhill, preceded her to the spirit world several years ago. The sons, Ulysses, Ashley and Benjamin, with the husband and several grandchildren still survive her. Aunt Polly, or grandma, as she was familiarly called, was a member of the Christian church and was a Christian in the true sense of the word. She was a loving, faithful wife and mother, a good neighbor, always ready to assist in sickness and death when her health permitted her and she always had a kind word for everybody. She is sadly missed by all and especially by her aged husband, to whom she was so devoted.

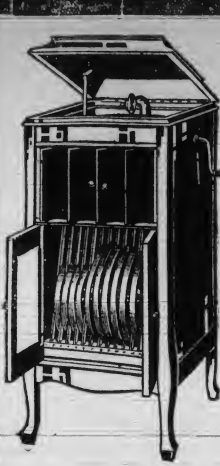

M. M. M.

Died of Pneumonia.

John Graves, 17 colored, died of pneumonia at Wallace Chevrolet's in Burlington, Wednesday morning. He was an industrious, well behaved, husky young fellow, the father, Hubert Graves, is very low with the same disease.

Buy it of Northcutt

If you want to buy a Grafonola it will be to your advantage to buy on or consignment at the Northcutt Mercantile Co., Walton, Ky. See advertisement.

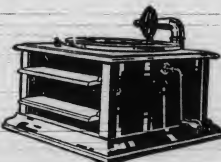

HOME SWEET HOME

Is what the Columbia Grafonola will make your home if you will let us place one in it. If you do not believe this let us send you one, or ask Mr. Smith, your neighbor, who has one, and you will be convinced. It's sweet strains are appropriate for all occasions. If you are sick they will cheer you; if you are blue they will get behind the blue cloud and drive it away as the morning's bright sun drives away the dense fogs of the night.

Increase the Food Crops. Heirs to Millions in

Washington, April 12.—The importance of increasing the acreage of food crops because of war conditions is being fully realized and action is being taken in nearly all sections of the country. Section directors of the Weather Bureau in their reports on weather and crop conditions for the week ending Tuesday noted these facts. They say farm work was delayed by cold and wet weather over a large portion of the country and vegetation is backward in most districts.

Better conditions for winter wheat were reported in the central and eastern parts of the principal wheat belt. Weather conditions generally were favorable and the crop continued to show improvement. From Nebraska southward the weather was very detrimental and the crop shows further deterioration. In Kansas wheat is very poor, although some improvement was shown in the northeastern part. Many fields have been plowed up in Nebraska. Cotton planting was still further delayed by bad weather, except in Florida, Texas and Southern Alabama.

Preparation of fields for corn and the planting of the crop were delayed by rainy weather in central and eastern sections and by dry soil in some sections of the southwest.

GUNPOWDER.

J. S. Rouse and family visited Robert Newman and wife last Sunday.

W. H. Smith and family broke bread with R. E. Tanner and wife last Sunday.

L. F. Utz has given up a good position in the city and enlisted in the army.

Wilford Mitchell subbed for J. P. Tanner on his mail route several days last week.

Meddames Fannie Utz and Emma Robbins are visiting friends in Spring Place, Georgia.

Edward Aylor and wife entertained the following guests at dinner last Sunday: Mr. and Mrs. John Aylor, of Hebron; R. H. Tanner and family and Allen Utz and wife.

Hopeful congregation will hold their first service at the Presbyterian church in Florence next Sunday at 10:30 a. m. and will celebrate the Lord's Supper at that time.

RABBIT HASH.

Billie Harts show boat is here today.

Dr. Carlyle has a new Chevrolet automobile which he bought last week of B. H. Hume.

Henry Cloro, of Bellevue, delivered 6 stock hogs here Monday to Ben Scranton, of Rising Sun.

Kenneth Ryle graduated at a veterinary college in the city last week and is now practicing his profession here.

1st "Patria" Chapter.

"Patria," a romance told of adventure, preparedness and patriotism by Louis Joseph Vance, released by Pathe, which will be shown at Bentler's Theatre, at Erlanger, beginning on Saturday, April 21st tells the story of Patria Channing, heiress to millions and the largest munition plant in the country, and her fight to save America from its enemies. Mrs. Vernon Castle, the best known woman in America, plays the leading role, supported by Milton Sills and an all star cast. "Last of the Fighting Channings," is the title of the first episode.

The Channings have always been patriots and believers in National Preparedness. Baron Huroki unsuccessfully tried to negotiate a contract with Channing for a large supply of munitions of war to be delivered secretly to a foreign country. Captain Parr of the U. S. Secret Service is keeping tab on the activities of Huroki.

The scene opens in Newport where Patria is celebrating her "coming of age" at a party given by her friend and chaperone Mrs. Wrenn. Rodney Wrenn, her son, has already proposed marriage to Patria, but she has fallen in love with Captain Parr and he with her.

When the party is at its height Patria is called to the phone by the principal trustee of the Channing estate, who tells her he is dying and that it is vitally important for her at once to go to New York. It develops that the trustee has been surprised in the secret vault of the Channing mansion where \$100,000 in gold is stored, by a spy in the employ of Huroki, and has been mortally wounded, but not before he was able to call Patria on the phone.

The Newport ferry to the rail-terminal has ceased running for the night, but Captain Parr, in whom Patria confides, undertakes to get her to the last train to New York in his motor boat. Huroki learns of this and thinking that Patria confides in him, undertakes to get her to the last train to New York in his motor boat.

He almost succeeds, and Patria is in danger of being carried off by Juan De Lima, a Mexican sailor, but she proves equal to the emergency and with Captain Parr makes the train in the nick of time.

PETERSBURG.

Glad to see E. T. Krutz able to be out again.

Only about 75 bushels of slack coal in the yards here.

J. M. Berto and son have been at work at Robert Terrill's.

Uncles Chas. Alloway and John McWethy are visiting friends here.

B. B. Hedley, of Covington, was here last Thursday night.

FLORENCE.

Miss Pearl Long spent Saturday and Sunday with Miss Leona Long.

UNITED STATES BATTLESHIP UTAH

Bentler's Economy Drug Store.

Linseed Oil \$1.12 Per Gal

Market Price Today, \$1.23

HERE'S HOW I DO IT.

Early last fall I merely moved the calendar up a year and took a glance at what the market might be today for Linseed Oil. It was easily seen that unless conditions were greatly changed, prices would continue to advance. The odds were in my favor so I bought 1000 gals. The price I paid permits me to offer it to you at \$1.12 per gal. (which is the market price in barrel lots) and still retain a legitimate profit.

I never give anything away, but always take advantage of every opportunity to serve you—give you an exceptional bargain once in a while.

White Lead
Anchor Brand 10½c

A slight reduction is also offered on White Lead (pure Anchor Brand.) As this paper goes to press the market quotation is 11c per lb. My price will always be in the same proportion as it is today—rising and falling with the market, but always being the best possible price you can get anywhere.

L. A. Bentler, Erlanger, Ky

The Blase Shop

TAILORS TO MEN

826 Madison Avenue, - Covington, Ky.

ESTABLISHED 1868.

Blase.

A well know Boone County citizen came to our Shop the other day, and while taking his measure for a suit of clothes, said he did not know we were continuing the business until some one told him a few days before of our present location. He also said, "in the past year or two several Boone county people asked him what had become of 'BLASE THE TAILOR' and suggested that we put and ad. in the Boone County paper. The conversation with this man is what prompted this ad

We want to inform our Boone county friends that in June, 1914, we moved to 826 Madison Ave., three squares up from our old place, and the "BLASE SHOP" is the continued firm of the well known H. F. BLASE. The Tailor, who has been making clothes for Northern Kentucky for the past 49 years, and the same reputation and guarantee that has made the old firm famous still goes with every order of "THE BLASE SHOP," and this shop extends you the same welcome as of yore.

Respectfully Yours, C. H. BLASE.

The name of this Boone County Citizen given upon Application.

Interesting Facts Gathered During the Week by Our Regular Correspondents.

PT. PLEASANT.

Adam Dolwick, Sr., is ill, and is unable to leave the house.
Miss Mabel Morris was the guest of Florence friends last Sunday.
Carl Clutterbuck and wife, of Oakley, Ohio, spent a couple of days at B. H. Tanner's, recently.
Don't forget Rally Day at Pt. Pleasant S. S. next Sunday. Come out and participate in the good work.
Hal Hihouse and wife, of Ludlow, and Ed. Osborn and wife, of Florence, visited Mrs. Frances Clutterbuck, Sunday.
Not much plowing has been done in this vicinity so far; no potatoes and very little garden truck planted so far as we know.
Mrs. Mamie Crigger and Mr. Emmet Wayland, were married recently and have gone to housekeeping in Erlanger. We extend good wishes.
Ossie, Werns and Adam Dolwick, Jr., found and killed a number of

spreading adders while cleaning up a field preparatory to plowing for corn.
Another very successful term of school closed here last Friday.
Miss Mamie Haley, the teacher, deserves credit for the way in which she has managed the school for the past two years.

VERONA.

Mensles are prevalent here.
Hugh Vest is now operating an auto.
Allen Baker has been quite ill the past week with an infection of the throat.
Monday was a busy day for gardeners as the ground worked nicely and many of the people here took advantage of it.
The concrete work on the foundation of Elmer Griffith's residence was laid last week. Wm. Hensler and son, of Walton, have the contract for erecting the building.

CONSTANCE

Miss Louetta Dolwick is visiting her sister in Georgetown, Ohio.
Elmer Haberle and family were week-end guests of his parents here.
W. A. and Mrs. Kenyon's Sunday guests were Mr. and Mrs. Mike Clore and family, Mr. and Mrs. Thomas Kenyon and little son and Mrs. Kate Tupperman.
Miss Ray Johnson, of east Henderson, Ave., entertained quite a number of her friends last Friday evening with a six o'clock dinner and a large party.
The Ladies Aid sent the following letter expressing their sympathy to Mr. England and family: "In behalf of the Ladies Aid of the Copeland Christian church we extend to the bereaved family our heartfelt sympathy on the death of your wife and mother. Mrs. Dona England, Mrs. Engler was a faithful member and a zealous worker in the church and we deeply regret her loss. God in his merciful kindness has brought you in your bereavement and you cannot bring her back, but we are ready to meet her in her home as our sincere wish."

News From Indiana.

(Lawrenceburg Press.)
The remains of fifteen members of the Bull and Bear families have been moved from the old graveyard to Greendale cemetery. The body of Mrs. Mary House, buried 59 years ago in an iron casket, was found well preserved and the colors of the silk dress in which she was laid to rest had apparently changed but little in that long period of time.
Victor Oberling's cannon, relic of the civil war, was brought in service late Saturday night to arouse the people of Lawrenceburg. The arousing was a success. If anybody within half a mile of the cannon slept any while the firing was going on, the Press has no information to that effect. Eighteen rounds were fired altogether. Frank Junk and Carlin Kepper, both Spanish-American war veterans, were in charge of the firing, which took place at the river front.

WATERLOO.

Joe Walton has bought a Buick auto.
Mrs. Lewis Sullivan has been quite sick for several days.
Everett Clore and wife visited Courtney Pope near Richmond last Friday.
Waller Ryle has been doing some carpenter's work for Sidney Clements.
Several here attended the play at Bellevue Saturday night and reported it fine.
Mrs. Bell Beemon is visiting her daughters, Mrs. Everett Clore and Effie Ryle, at this place.
Arthur Houston expects to move to Union in a few weeks, and this community will be without a black smith.
Robert Sullivan, 74, died at his home near here last Wednesday after a week's illness. His remains were interred in the family burying ground. Quite a large crowd attended the funeral which was conducted by Rev. Maddox. He leaves quite a large family of children and grandchildren and a host of relatives and friends to mourn his loss. Mr. Sullivan was a member of Grace M. E. Morgan's command in the Confederate army and was an excellent soldier. At the close of the war he came home and resumed his former vocation, farming, which he followed as long as he was able to work.

HEBRON.

Sunday school next Sunday afternoon at 1:30. Preaching at 2:30. Pomona Grange will meet with Greenwood Grange next Saturday. Rev. Royer and family dined with Wm. McGlasson and wife last Sunday.
Elmer Goodridge and wife entertained several of their relatives at dinner Sunday.
Mr. and Mrs. Mike Dye, of Ludlow, were guests of relatives here Saturday and Sunday.
Several here attended the school entertainment at Sand Run Saturday night and pronounced it very good.
Mrs. Maria Dye died Sunday night, April 8th, at the home of her daughter, Mrs. Jeff Cloud. She was at the age of 79 years. Three daughters and two sons survive her. She united with the Christian church at Taylorsport at the age of 17. Funeral Tuesday afternoon at 2 o'clock at Hebron. Rev. Royer conducting the services.
The many friends here of Mrs. John May, who resided at Florence with her daughter, Mrs. Mabel G. Sayre and Dr. Sayre, were sorry to hear of her death which occurred last Wednesday night. Several of her friends here attended the funeral Friday afternoon at 2 o'clock in the Presbyterian church in Florence. Burial at Hopeful.

FRANCESVILLE.

John Whitaker, of Hebron, spent Sunday with home folks.
Chas. Beall, Jr., has purchased a new five passenger Ford.
Mr. and Mrs. John Muntz are entertaining a baby girl--Thelma May.
Mr. and Mrs. Chester Utz were guests of E. J. Aylor and wife, Sunday.
The little son of Mr. and Mrs. A. J. Ogden was severely burned last Friday.
Mrs. Andy Muntz entertained Mrs. Collier and Mrs. Manley Clark Sunday afternoon.
Miss Lucy Eggleston spent Saturday night with her cousins, Misses Eluora and Ethel Eggleston.
Misses Lora and Laura McKinny have returned after a week's visit here with relatives.
Mrs. Carl Bradford and two children and Mrs. Maria Bradford, of Hebron visited relatives in this community over last week.
Mr. and Mrs. Chas. Muntz entertained Mr. and Mrs. Ad Batterson and children and Mrs. George Volmer and children, of near Chevier, Saturday night and Sunday.
Mrs. Elliot Riemann, Mrs. Joe Oatman and daughter, Miss Evelyn Marie, of Rising Sun, were guests of Misses Amanda Koons and Sadie Riemann several days last week.

The entertainment given by Francesville school Saturday evening was a great success and was attended by a large crowd. The teacher, Miss Sadie Riemann, deserves much praise for the excellent training and the pupils for the splendid manner in which they handled their parts.
Miss Christina Jones visited Miss Velma Loomis Sunday afternoon.
Jno. Loomis and family, of Beaver, visited his parents here Sunday.
Misses Golda and Mattie Black were guests of Mrs. Omer Black, Friday.
Sam Rust and family spent Saturday and Sunday with relatives near Verona.
B. B. Hume and wife, of Covington, were guests of Mrs. H. E. Miller, Saturday.

Fred Miller, mother and sister, of Walton, were guests of Mrs. H. F. Jones and daughter, Mrs. C. P. Wilken, Sunday afternoon.
Mrs. Everett Wolfe, of Richmond, visited her parents here Saturday. Miss Kate Baker returned home with her for a visit.
The remains of Mrs. Lora Robinson Brown, wife of Walter Brown, were laid to rest in North Fork cemetery Tuesday, April 9. Mrs. Brown died Sunday night of apoplexy.

If You Want to Trade at the Place to Reduce the Cost of Living

Talking will Never Do It.
Complaining Will Get You Nowhere.

Action will Accomplish Results

The Correct Action to take is to See Me.

I can lighten the burden of your table if you will buy from me. I am doing it for others every day. I am cutting the price to the quick on everything in my store.

Then, too, I am satisfied with a reasonable profit. I am not trying to get rich quick.

I want your trade and I want your friendship, and I am making the price that will win me both.

If you really want to reduce the cost of living try me next. I'm serving my trade daily with a nice line of the best fresh and cured meats.

Ice on hand for sale at all times.
I make a trip to the city daily with my Truck, and I am ready at all times to take your order for anything that I do not carry in stock.

I close my store on Saturday night at 7:30 o'clock and will not open until Monday morning at 6 o'clock.

W. L. Kirkpatrick,

Burlington, Kentucky.

HUME.

Will Abdon was in Walton Saturday.
Joe Allen was in the city Saturday and Sunday.
John Binder and wife visited his son, John, Sunday.
Willford Jones from the city is visiting his parents, Mr. and Mrs. Arch Noel, who made a trip to the city Wednesday and last Sunday.
John Finnell and Mr. Abdon were in Verona Tuesday.
R. Schwisky and family were guests at Pete Krause's Sunday.
Arch Noel and wife and Mrs. Baker visited the writer and family Sunday.
Fred Huff wife and little daughter were guests of Lute Abdon, Saturday and Sunday.
Harry Allshouse joined the U. S. M. C. I sympathize with his father and mother in their trouble.
Paddy Dempsey and his little nephew, Willie Foley, have returned to their home in Lebanon, Ohio.
J. M. Jackson and wife, Mary Maxwell and Dick Roberts visited Chas. Sisson and family near Glencoe, Sunday.
Miss Rosie Peeno's school closed last Wednesday. She is an excellent teacher and we hope she will teach here next year.
My son, A. M. Finnell, has worn the uniform of the U. S. Marine Corps since year's past October. He is in Santo Domingo, 4th Co., 3rd regiment.
Mrs. T. B. Roberts visited her daughter, Mrs. Orba Baker, Wednesday. The story presumes Mr. and Mrs. Baker with a little daughter, last Sunday.

Chapel were entertained with a Pie Social at the home of their leader, Mrs. L. F. Childress, last Tuesday evening.

An Old Soldier Gone.

Robert Sullivan, of Hathaway, who was a Civil War soldier, answered the last roll call a few days since. He was a member of Morgan's command and was brave as a soldier or carried a musket. He left a large circle of friends who sympathize with his family in their bereavement.

QUALITY OF BUTTER

Creameries Can Improve Conditions by Standardizing.

SOME COMMON FAULTS FOUND

Highly Important in Marketing Branded Product That Sanitary and Attractive Package Be Used—Maintain Excellence.

(From the United States Department of Agriculture.)
The standardization of butter packages and the production of a more uniform quality of product are two requirements of butter markets to which creameries need to give consideration if they wish to improve conditions for the marketing of their butter, say specialists of the office of markets and rural organization of the United States department of agriculture in Department Bulletin 144, recently issued. On the Pacific coast a "cube" varying in capacity from 63 to 80 pounds of butter is used. The creameries of the middle West usually use the 63-pound

Washing the Churn.

ash tub, while in New England spruce tubs varying in capacity from 30 to 60 pounds are used. On the Pacific coast a long, flat carton is used as a consumer's package, while in New England a flat, rather broad carton is used. In the middle West a standard carton 2 1/2 by 2 1/2 by 5 1/2 inches is used.

Increase of Undergrades.

At certain seasons the market specialists found on the markets an increasing quantity of inferior quality of butter which is known as "undergrades." This inferior quality, if developed, is often due to the use of cream of poor quality and, to some extent, to faulty methods of manufacture. The more common faults observed in the quality of this butter were soft, leaky, open body; too much or not enough salt; too high or too light color; metallic flavors; high acid, unclean, and old cream flavors; streaks and mottles; mold on butter; also moldy and dirty packages, butter possessing such faults, although not always classed as "undergrades," is often discriminated against by the critical buyer. During those seasons when the market receipts are heavy and the market is weak such butter

Printing the Butter.

can be moved only at low prices, and often sells at 6 to 8 cents below the better grades.

Co-Operate in Shipping.

In the shipment of butter to market, according to the bulletin, creameries situated close together may often effect economies in transportation by co-operating in obtaining special scheduled "pick-up" refrigerator service and by assembling local shipments into carload lots which may be shipped at lower freight costs.

Many country creameries, it was found, consigned their butter to wholesale butter receivers who often function as jobbers, while the tendency among the larger creameries and, to some extent, among smaller ones, is to distribute directly to the retailer. The grading and handling of bulk but-

ter would be greatly facilitated, it is pointed out by the experts, if the conservative numbers of the different churnages of a creamery were stamped on the centurials.

Butter in Cold Storage.
Approximately one-tenth of the butter received in the larger markets is placed in cold storage, the bulletin states, and is held for an average period of six months. The cost of storing butter approximates one-fourth of a cent per pound per month. In the market distribution of creamery butter there is at present a tendency toward the more general use of consumers' packages, usually of the one-pound size.

It is pointed out by the specialists that the establishment of brands is essential for effective advertising. Salesmanship is also a vital factor in successful market distribution. It is highly important in marketing a branded product that a sanitary and attractive package be used and that a certain standard of quality in the product be maintained.

NEW VARIETIES OF POTATOES

Originate From Seed Found in Bolls Produced on Vines—Plant in Hot-house or Cold Frame.

New varieties of potatoes are originated from seed which is found in the bolls produced on the vines. The seed which is light and fine should be saved in the same manner as the seed from tomatoes.
Cut open the bolls and squeeze out the seeds into a small vessel with as little pulp as possible. Add warm water and allow the mass to ferment for two days so that the little seeds will wash clear from the pulp. After being washed the seeds should be dried, in which condition they will keep through the winter. Anyone who tries to carry the seed boll through the winter will likely lose all the seeds.

Along in March prepare some fine, rich light soil that will hold moisture. Rotten cow manure several years old is better than common soil. The seed may be planted in a hot-house, cold-frame or in a box in the kitchen window. It should be covered very slightly with soil and must be kept moist by frequent watering or by covering with a piece of cloth until the seeds begin to break ground.

As they come up quickly and show a tendency to be handled like weeds they will frequently produce the first year that will weigh a pound. Each seed will produce a distinct variety. Promising new varieties must be grown for several years and tested in the fields alongside of standard sorts for at least two years before their true value can be determined.

FIRM GROUND FOR PLANTING

Plants in Loose Soil Cannot Draw Sufficient Moisture to Make Them Thrive Well.

Ground for planting, whether seeds, plants or trees, should be fairly firm. Too often the garden is plowed up late and the seeds planted in the loose soil without giving it any firming, and then the seeds are blamed because they do not germinate. Plants set in such ground are often supposed to be poorly rooted or have low vitality, when in reality neither seeds nor plants can draw sufficient moisture from the loose ground to make them grow. A garden roller is as necessary as a plow if the plan is used late.

If the ground is plowed early enough so it can settle well before being planted and then lightly cultivated on the surface to keep the weeds down and form a dust mulch until it is planted, both seeds and plants will start much better and grow faster. Deep fall plowing, with the surface left rough, and then light culture before planting in the spring, is the ideal method, provided you do not want to give it two or three plowings during the winter, with light applications of manure.

USES FOR THE DISK HARROW

One of Most Valuable Farm Implements—Indispensable in Preparing Sod for Potatoes.

The disk harrow is one of the most valued implements on the farm. It is almost indispensable in the preparation of sod ground for potatoes or corn.

One of the most important uses of this implement is to break up the surface soil a few days in advance of the plow, so that capillary attraction of moisture will be readily established with the subsoil.

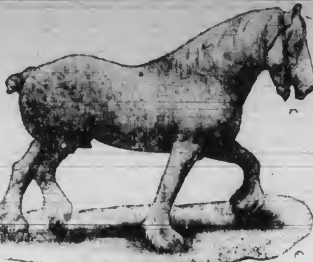

It effectually seals the surface of the unplowed land so that it will keep moist for a longer period of time, and consequently plow easier in case a drought comes on so as to seriously interfere with the work of plowing.

ACID PHOSPHATE IS USEFUL

Ohio Station Recommends Its Use to Re-enforce Barnyard Manure to Maintain Fertility.

Since phosphorus is carried off the farm in relatively large amounts in grain, straw, in the bones of animals, and in milk, soil specialists of the Ohio station recommend the use of acid phosphate rock to re-enforce barnyard manure. If the fertility of the soil is to be maintained, acid phosphate is more generally recommended, because under average conditions it is more effective and more economical than the raw rock.

GRAY LEAF No. 4716

Will make the season of 1917 at my place, Maple Grove Stock Farm, three miles from Florence on the Price pike, 2 miles from Limburg and 3 miles from Anderson's Ferry, on the Florence Road, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible for any that may occur.

Gray Leaf is 17 hands high, w. c. a black and white grey and a model draft horse. Foaled May 12th, 1902; bred by Samuel Meeks, of Galveston, Cass county, Indiana; owned by H. Bridges & Co., of Crawfordsville, Montgomery county, Indiana. Got by Prince of Peace (2102), he by Saint-Germain 6252 (4215), out of Biche (1801), etc. Saint-Germain 6252 (4315), by Avata 1966 (912), he Nugent 738 (729), he by Video 483 (732), he by Coco II (714), he by Vieux Châtel (713), he by Coco (712), he by Mignon (715), he by Jean-le-Blanc (739).

THE FINE YOUNG JACK,

BOB GLASS

Will make the season of 1917 at the same time and place as Gray Leaf, at \$10.00 to insure a colt to stand up and suck. Persons parting with mares before foaling time forfeit insurance money. A lien retained on colts until season is paid. Care will be taken to prevent accidents, but we will not be responsible for any that may occur.

Bob Glass, 5 years old, is 15 hands high, is black with white points, heavy bone, good style, and said to be the best young Jack in the country. Bob Glass was sired by Jerry Glass, he by Ben Glass, one of the finest breeding Jacks in Northern Kentucky. Ben Glass was by R. B. Lee's fine Jack, he by Wm. Nichol's and Warnick's imported Spanish Jack that cost \$4,000, out of a dam by Young Pitt's Jack that cost \$1,000. This is the same strain as the celebrated Elliott Jacks. The dam of Bob Glass is by the fine Spanish Jack Alexander, Jr., a black Jack 15 1/2 hands high, and a premium getter wherever shown.

For the official pedigrees of the above stock call on the undersigned.
B. H. TANNER and IRA WALTON,
R. D. No. 1, Erlanger, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVillie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS, Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my stable at McVillie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.
XEN SCOTT, Grant, Ky., R. D.

The Fine Belgian Stallion,

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minneola pike at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible for any that may occur.

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Hebron, Boone County, Kentucky, at \$10 to insure a colt to stand up and suck, money due when colts come or the mare is parted with or leaves the country.

Don Degezoe, despite his great size and weight, is well balanced throughout, and perfectly proportioned and symmetrically built. He has a light action as a stallion of much smaller type, and his disposition is much better than is usually found in a horse of his blood. He is a beautiful dark sorrel, 17 hands high, weighs 1,500 lbs. has a broad foot, heavy bone, fine style and action. For official pedigree call on the undersigned.

Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.
R. J. AYLER

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickel steel construction—deep channelled pressed steel frame—every supporting part a forging or pressed steel—Republic Torbenson Internal Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750
3 Ton Truck \$2650

Hal McGregor.

Record (2) 2:26 1/2, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.

Hal McGregor (2) 2:26 1/2 is by Hal Dillard 2:04 1/2, 1st dam by Wilstar 2:17 1/2; 2nd dam by Oscar Williams 2:13 1/2; 3d dam by Ohio Volunteer 2:38 1/2.

The sire of Hal Dillard is Brown Hal 2:12 1/2 (world's record, when made); also the sire of Star Pointer 1:59 1/2, the first horse to beat 2:00.

Be not misled a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:03 1/2, Fannie Dillard 2:03 1/2, Hal B. 2:04 1/2, Hal C. 2:05 1/2, Hal Leaf 2:07 1/2, Hal Clipper 2:07 1/2, Cinnamon 2:07 1/2, Dillard Online 2:07 1/2, Butter Bowl 2:08 1/2, Cambria M. 2:09 1/2, Vera B. 2:07 1/2, Hal Grey 2:08, Hallock M. 2:09 1/2, Dillard 2:09 1/2, Hal J. 2:09 1/2, Jerry Dillard 2:09 1/2, Della H. 2:10, Dillard Onward 2:10 1/2, Helen B. 2:10 1/2.

Hal McGregor with only 70 days track work last year trotted one eighth in 35 seconds, 1/4 in 34 sec. ends, and by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training then.

Care will be taken to prevent accidents but I will not be responsible for any that may occur.

Will farm a few good mares.

W. B. ARNOLD,
Petersburg, Ky., R. D. 1

THE FINE SADDLE HORSE

Harrison Prince No. 3340

Will make the present season at the stable of G. T. Gaines one mile from Burlington, Ky., on the Petersburg pike, at \$10 to insure a living colt. I will not be responsible for any accident that may occur.

Harrison Prince is a chestnut stallion, 16 hands high, 8 years old, has a large blaze face, two white feet, and is a perfect type of a saddle horse with a fine finish and action. His sire is Dandy Jim, the well known show horse. For official pedigree call on the undersigned.

It Helps!

There can be no doubt as to the merit of Cardui, the woman's tonic, in the treatment of many troubles peculiar to women. The thousands of women who have been helped by Cardui in the past 40 years, is conclusive proof that it is a good medicine for women who suffer. It should help you, too.

Take

CARDUI

The Woman's Tonic

Mrs. N. E. Varner, of Hixson, Tenn., writes: "I was passing through the city of My back and sides were terrible, and my suffering indescribable. I can't tell just how and where I hurt, about all over, I think... I began Cardui, and my pains grew less and less, until I was cured. I am remarkably strong for a woman 64 years of age. I do all my housework. Try Cardui, today. E-76"

Take your County Paper.

RAIDING THE RATS.

A vigorous campaign is being waged in Boston by the Woman's Municipal League, paralleling the efforts of Philadelphia's Civic club and other organizations to get rid of the rats. The health authorities of Philadelphia are thoroughly awake to the menace the rodents constantly present to life and property, says Philadelphia Public Ledger. This evil is forcefully reiterated in the campaign literature sent out by the women of Boston in their newest effort. Doctor Creel tells Boston that the city's 750,000 rats cost it about \$1,400,000 a year directly in destruction. If the rats should import the bubonic plague the cost would soon exceed calculation. The United States at large is supposed to lose \$182,000,000 a year to the maw of the rat, of which \$35,000,000 is ascribed to the cities; the destruction by fire is to the extent of \$15,000,000. The rat exceeds the goat in omnivorousness. "From soup-to-cream, from gas pipes to garbage, from the toughest of old leather boots to the daintiest of epicurean dishes, it is all the same to the rat." Manufacturers, fruiters, proprietors of every sort of warehouse, will fervently agree that the rat is an unqualified nuisance, an inordinate expense.

If you have \$5 or more or less, for which you have no pressing need, go and pay a debt with it. That is the best use you can make of money, unless you are naked or starving. Now is the time to obey the Bible injunction, "owe no man anything." That is in the Bible, but from the way some debtors spend money they don't seem to know "or it. If it y have a

extra, it goes for a measure or a convenience, says Olio ate Journal. The duty to pay someone they owe never occurs to them. Nor does it occur to them that every unsettled debt is a drag on a community. Everybody has to pay interest on it. People have to pay more for their sugar and coffee because other people owe the grocer and won't pay. It is one of the items in the high cost of living. And then there is a wholesome public policy in settling the money arrearage. It will help find work for some poor man and help some other debtor pay his debt. So pay up now.

Resourcefulness on the part of American chemists has made the United States one of the world's largest exporters of drugs and chemicals since the start of the war in Europe. This statement was made in a report by Secretary of Commerce Redfield, read at the annual convention of the American Druggists' syndicate, at Long Island City. Mr. Redfield added that the United States, heretofore an importing nation, will soon be able to supply the world in the drug, chemical and dye line. In 1913, \$27,000,000 worth of the products were exported by the United States. In 1916, this amount was raised to \$124,000,000. The United States is now making in large quantities certain drugs and dyes heretofore imported exclusively from belligerent countries, particularly Germany.

The paper famine has led to a plan for utilizing old records of railroad corporations which heretofore have been destroyed at certain intervals by the interstate commerce commission. Other railway records which used to be burned are now cut to shreds and in that condition disposed of to the mills. As soon as authority can be obtained from the commission this will be done with the vast quantities that now are reduced to ashes. They are on a superior quality of paper and would be exceptionally valuable as pulp in the hands of the manufacturer.

Despite higher prices, the value of food exports from the United States in the calendar year 1916 showed a falling off of \$45,000,000 compared with 1915. The decline was in breadstuffs, exports of meat and dairy products showing an increase. Measured by quantity the falling off amounted to 51,000,000 bushels of wheat and 1,800,000 barrels of flour. The only grain export showing an increase was corn.

Reins, comes the word from France, has been the target of 60,000 bombs since the war began. A medal should be struck for the man who had the hardihood to stand in the vicinity and check them up as they fell.

The man who in always waiting for something to turn up usually finds that the trump is of an entirely different suit from his hand.

Probably the ideal vacation would be one in which the vacationer could get away from himself.

UNDER HANDICAP

Farmers Start For Increase of This Year's Production of Crops.

Washington, April 18.—American farmers are starting under a handicap in their efforts to carry out President Wilson's appeal for increased production of foodstuffs. Almost everywhere throughout the country during the last week temperatures were unfavorable and the season is generally backward, according to the weekly review of the National Weather and Crop Bulletin of the Weather Bureau. Pastures and ranges started slowly, due to dry weather, and over the upper Rockies snow still remains over large areas. In the Northwestern States vegetation is still nearly dormant. Germination is slow in southern districts while the conditions of the week were favorable for sowing work in some Eastern and Southern western sections, it is generally backward.

Decided improvement was reported in the condition of winter wheat in Kansas and Oklahoma and small but steady improvement in the crop in the Ohio Valley and in most other East-Central districts. Not much improvement was shown in Nebraska and there was but little improvement in Illinois. The crop is in good condition in the central and upper Rocky Mountain region, but made little progress on the Pacific Coast, because of deficient sunshine and warmth.

Shortage in the winter wheat crop, fully as great as preliminary reports have forecast, and little increase this year in the yield of cotton are reported from every part of the country by the Farm Loan Board Appraisers. Their reports were made public today as a part of the board's program to encourage farmers to plant all acreage possible of cultivation.

Three important facts affecting the crop and food situation stand out in the reports received from the Presidents of the twelve land banks; the board's statement reads. These facts are stated as follows:

"The winter wheat crop will be short to quite as great an extent as preliminary reports have shown."

"The shortage of labor and the high price of seed will prevent a material increase in the potato acreage, commercially grown, but the increased acreage of home plots for home consumption will be a net gain."

"There is, in all parts of the United States, an organization movement on the part of communities, state governments, agricultural colleges and civic bodies to help the farmer meet the food crisis, in many sections this movement taking the form of providing the farmer with additional labor and financial loans at low interest."

"Reports from President of the various land banks are detailed by districts they state: Springfield, Mass.—The wheat crop of New York is two thirds gone. Potato crop yield will not be materially increased except in New Jersey."

St. Louis—One half the winter wheat in Illinois will be plowed and the replanting will be in corn. The same is true of North Dakota. In Arkansas wheat crop is all right, but potato crop in these states will be but slightly increased. Some sort of compensation of farm labor is suggested by President Danforth to meet the acute labor shortage."

St. Paul—But little winter wheat is grown in this section, but the grain is in excellent condition for spring planting. Potato acreage will be increased. Labor is scarce."

St. Paul—The winter wheat crop is almost a complete failure in Nebraska and Iowa and fields are being plowed up for corn and oats, mostly corn. The potato crop is slightly increased. Labor is scarce."

Louisville—Indiana wheat crop is two-thirds of the average, and many fields are being plowed up for corn and oats. The commercial acreage of potatoes has not been increased."

Houston, Texas—Wheat crop is almost a complete failure. Texas will raise hardly enough potatoes for home consumption. Corn acreage will be increased sufficiently to provide for corn export. All interests are alive to the necessity of increased production."

New Orleans—Winter wheat crop almost a complete failure and fields have been replanted in corn and peas. Southern acreage of potatoes is being increased."

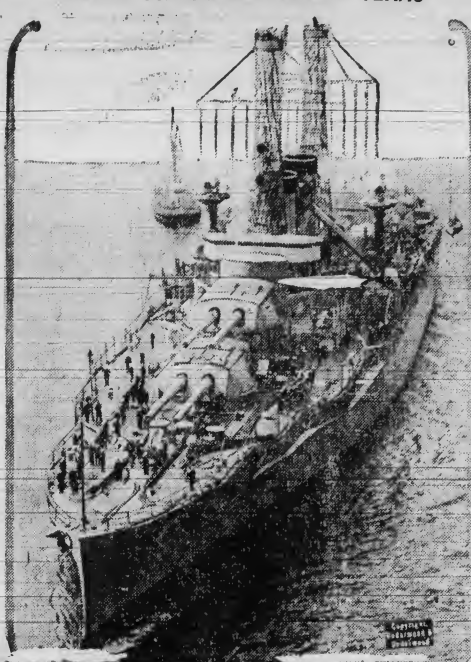

Columbia, S. C.—The wheat crop is 25 per cent less than normal; the potato acreage is only slightly increased, and while strong movements are afoot in Southern States to increase food production, the high price of cotton has proved a barrier to increased food crops."

A supplemental report from Louisiana states that the Tennessee wheat crop will not exceed 50 per cent of normal."

In every part of the country the officials are encouraging the planting of all available land with food products."

There will be preaching at Burlington Baptist church next Sunday. Everybody is invited.

UNITED STATES BATTLESHIP TEXAS

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of April 26th, 1877

Crops throughout the State are in good condition.

The first passenger train on the Southern Railroad went as far as High Bridge, last Friday.

Georgetown claims to have the finest business in the State.

The Knox county grand jury returned 103 indictments.

The city of Louisville owes \$8,330,000.

There will be a ball at Mount Pleasant Grange Hall next Friday night.

Mrs. Violet Neal, who is in her 90th year can spin six cuts of flax thread a day.

Sunday about 8 p. m. Dillon Bradley was drowned at the Petersburg wharf. Mr. Bradley, a boy and five women were in a skiff coming from Aurora, and was attempting to go around a steamboat lying at the wharf, while another steamer was passing but some distance out in the river. The waves from the passing boat assisted by the swift current cap sized the skiff. Persons saw the accident and went to the rescue and Mr. Bradley was found clinging to the side of the boat lying at the wharf. He refused assistance, saying "save the ladies first." After the boy and women were rescued, parties started to assist Mr. Bradley, but he had gone to a watery grave. At last accounts from Petersburg Mr. Bradley's body had not been recovered. He was an aged and highly respected citizen.

Few persons attended circuit court last week, but Judge Drane was kept very busy.

An order was entered in the County Fund case directing the justices of the peace to levy the County Fund tax as assessed by them in 1872.

Wm. T. Winston, G. W. Anderson, J. H. Walton, T. J. O'Neal and Alonzo Gaines, incorporators of the Minneola Turnpike Co., filed articles of incorporation.

Butter, 25 cents; bran \$18 ton; middlings, \$28 ton; coal 8 cents bushel; eggs, 10 cents dozen; flour \$6.50 barrel; wheat \$1.90 bushel; corn, 51 cents bushel; chickens, \$3.25 dozen; bacon sides, 9 cents pound; lard, 10 cents pound; sugar, 12 cents pound; cattle \$5.40 hog, 5 cents; sheep, six cents pound; veal calves, \$6.40.

Gaining Gradually.

Caddie Maurer's pen of pullets took fourth place, last week, in the egg laying contest in which they are entered at the Experiment Station, Lexington. They are very regular in their work and have a chance for first place as the contest is young yet.

KENTUCKIAN

Shot at Somme Battle, Eager to Return With U. S. Forces—Won Medal for Bravery.

Washington, April 19.—Still suffering from the effects of gunshot wounds in his thigh received during a baptism of fire in the first line trenches while the bloodiest part of the battle of the Somme was in progress, an intrepid young Kentuckian, honored by the British Government for conspicuous gallantry in action, arrived in Washington today, eager to return to Europe in command of U. S. soldiers and fight again to crush the Kaiser's forces. He is Alexander McClintock, of Lexington, the son of John McClintock, well known resident of Fayette county. He is 21 years old.

Mr. McClintock—rather—great McClintock, for that was his rank during his heroic service with the 87th Battalion, Canadian Grenadier Guards—took the oath of allegiance to the United States when he joined the Canadian forces in September, 1915. From August to December of last year the Kentuckian was in the foremost ranks of the fight in France, and while there he received the distinguished conduct medal as a result of his devotion to duty and the bravery that he displayed under fire.

It was during a night attack in an advanced trench on the Somme battle front that Sgt. McClintock was in the side by a bursting shell. Twenty-two pieces of shrapnel tore their way into his side and for three months his life was despaired of as he lay on a cot in No. 5 general hospital at Rouen. Afterward the Kentuckian was removed to the King George Hospital at London, where the King visited him on Christmas day and commended him personally for his gallantry.

One of the gruesome relics of his fighting experience abroad is a belt made of the insignia taken from the bodies of dead Boches. This he showed today, with a good deal of pride to Senator James and other members of the Kentucky delegation on whom he called, together with the following certified letter from his commanding officer:

"February 14, 1917.—Sergeant, Alexander McClintock served in the 87th Battalion, Canadian Grenadier Guards, from Sept. 1915, until November, 1916, the last four months of that time at the front in France, where he gained the Distinguished Conduct Medal for his devotion to duty and bravery under fire. As his former commanding officer, I can testify as to his good qualities and I consider he would make a valuable officer. F. S. Meighan, Brigadier General Commanding Canadian Training Division, Bramshott."

In the event the bill soon to be considered by Congress that will permit former American citizens who joined the Allied troops to regular their citizenship in America the Kentuckian desires to receive a commission as Captain in the United States army and return to France as the head of a troop of American soldiers. He will visit his home in Kentucky in a few days.

A post card from J. H. Graves and wife, who spent the winter in Florida, says, "After this and our Recorder to Erlanger."

The Farmer is at Work.

The cry throughout the country "Put the farmer to work!" If the Court knows itself, and she thinks she "do," the farmer has been at work ever since Heck was a pup. The farmer has always done his, and will continue to do so. Nine-tenths of the flower of Uncle Sam's boys are now existing as "alfalfa boys." Better get some of the bums and "small-town" thieves that raise chickens after they have already been raised. There is no use of taking only the best blood in the country to fight in this war. Mix some of the trash and flyings and then make a general average. Through course of discipline for those "no-accounts" may make men of them. The farmer will do his part. Mark our prognostication. We will have our crop yielded, and an abundance for the rest of the world. Look after the shirker and "no-account." At present he is no good as a soldier and of no account as a citizen.—E. V.

PARIS B. AKINS

A Boone County Boy Re-elected Principal of Trimble County High School.

The last issue of the Trimble County Democrat carried a picture of Prof. Paris B. Akin, accompanied by the following article:

"The School Board met Monday night and re-elected Prof. Paris B. Akin principal of the Trimble County High School and Miss Annie Agnew assistant principal. Mr. Akin was elected teacher of the primary grade. The County Board has already acted."

The re-election of these teachers will be learned with pleasure by the public. Under the principalship of Prof. Akin and his able corps of assistants the present school session has been very successful. The Professor is in love with his profession and, aside from being duly prepared and well qualified keeps himself informed on all matters of school government. Moreover, he is a Christian man whose example and influence for good is not limited to the schoolroom. The presence of such a man is a demonstration of moral power in any community. Under the instruction and guidance of a leader of such knowledge and character, the student body can not help but advance along all lines of education and in the march of intellectual progress overcome the broken forces in the trenches of ignorance and superstition.

With great things already accomplished, the Trimble County High School bids fair to continue its growth and an institution of which the county is proud. No person in Trimble needs to go out of the county for a high school education.

Prof. Akin is a son of Mr. and Mrs. B. F. Akin, who reside in the Plattsburg neighborhood.

BOOK WITH SCENES

Laid In Boone County—Rev. Edgar Dewitt Jones, Author.

It will be of interest to Boone county people to know that another book will soon be off the press with scenes laid in the "Stringtown Country." The Macmillan Co., New York, is putting out a volume next month by Rev. Edgar Dewitt Jones, entitled "Fairhope, the Amata of a Country Church." The volume is a sort of American "Beside the Sacred Fire of Briar Bush," and deals with rural religious life, the lights and shadows the humors and tragedies, which center about a country church. The scenes of "Fairhope" are for the greater part laid in Boone county, although Covington and Lexington come in for a share of the narrative. The author says that the characters are for the larger part composite, and in some of the incidents will be recognized by their residents of the county, it will be difficult to discover the point where truth descends into fiction. There is no common romance, police and love in the narrative. Dr. Jones, who married Miss Frances G. Willis in 1902 and is known throughout the vicinity for his clerical years as minister of the First Christian church at Bloomington, Ill. He is the author of two volumes of a devotional character.

Everybody Has Money It Seems.

The Recorder carries this week the statements of the nine banks in this county and the two banks in Erlanger. These statements show that this part of the country is well supplied with money. While money deposits have increased there has been a healthy growth in the amount of "loans, the department which yields the profit in legitimate banking. The money people who have not realized the advantage in doing business thru banks, and local banks have become a necessity. The country people are showing their localities their usefulness in many ways.

CLINTON GAINES

An Old Soldier Has Registered at the Eternal Camping Ground.

In the Civil War He Cast His Lot With the South, and Fought Under Gen. Morgan.

The remains of Clinton Gaines who died in Louisville, were brought by undertaker C. Scott Chambers to Bullittsburg last Saturday morning, and after a brief service by Rev. Campbell, the remains were interred in the family lot in Bullittsburg cemetery. Mr. Gaines was born in 1838 year, and is survived by one son and one daughter, Legend Gaines and Mrs. Fannie Cropper, and one son, William Gaines, of Texas, and one daughter, Mrs. W. M. Randall, of Louisville. Clinton Gaines was a son of Absalom Gaines and was born and raised in this county, where he made a success of farming and raising livestock. He served in the Confederate army during the Civil War being a member of Gen. Morgan's command. Several years ago he went to Texas and invested in a large body of land, and it was while there his health failed and he was brought back to Louisville in a critical condition, and although his health improved some, he was never able to return to this county. His wife, who was a daughter of Owen Kirtley, a pioneer citizen who resided in North Bend, died about a year ago.

BASE BALL

Burlington Hi-School Takes the Second Game From Williamstown 8 to 7.

Last Friday afternoon the local High School baseball team crossed bats for the second time this year with the team representing Williamstown High School, on the grounds of the latter. To say that the local boys won the game would convey nothing regarding the kind of a game it was nor the kind of grounds they were forced to play on.

It was an exciting game from beginning to end, first one team and then the other being in the lead. At the end of the sixth the score stood 6-4 in favor of Williamstown. In the first of the ninth Burlington by making five hits in succession scored three runs. Then in their half Williamstown scored one and tied it up. In the first half of the tenth the local boys made one hit. Williamstown was unable to score. The game ended 8-7.

Owing to the rolling and uneven ground, the boys made a number of errors that were costly. However they are playing splendid ball, using judgment and base ball sense, and best of all they are beginning to get. No team can win many games unless it can hit. The team deserves the support of all lovers of the game. It is by far the best athletic team in high school as ever produced. A number of good games are to be played yet. The next game will be played at Lexington next Saturday April 28th, with Lawrenceburg High School. Lawrenceburg has a good team and a good game is promised. Game called at 2:30. Admission 15 cents.

A "Dixie" President.

Bred from the loins of ancestral courage, well displayed at Yorktown, Bunker Hill, Valley Forge and Lexington, with a grandfather a major in the war of 1812, I myself, a private in our civil war, in secret years served close of our civil war a bodyguard of President Davis from N. Carolina to Georgia, and a Morgan raider, have been called upon to serve President Wilson in any capacity he sees fit to use me. This, and has seen my country from its foundation down to today, and if need be I will give all I possess in defense of American independence with justice to all, I fought for rights during our civil war as I saw them, with the glad fight for our beloved America as an Inbred American.

But why should a southerner be slurred by northern men, who never smelled powder? As you well know, when you need a man steady as a rock, you need a man who is not a southerner, for that man. Our Dixie boys led the way to free Cuba, and our Dixie president will guide us in our war, this time against the American Empire and eliminate the element brought over here to crush the south from 1861 to 1865, who are trying to run our government. W. C. Pitt in Chicago Daily Journal.

R. B. Huey Badly Hurt Again.

R. B. Huey, who resides four miles west of Burlington, was thrown by his horse one day last week, and hurt so badly that he was confined to his bed several days. He was mounting his horse in the barn lot when he was thrown and hurt. He is said to be about 60 years of age. Only a few months ago Mr. Huey was attacked by a vicious bull in the stable stall and was very badly hurt.

WALTON DEPARTMENT.

D. R. WALLACE, Manager.

Hand four news items to Mr. D. R. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Green Fields of Ludlow, spent Sunday here with relatives.

Jas. R. Wallace spent Saturday and Sunday in Cincinnati with friends.

A. J. Williams of Elliston, spent Tuesday here with friends and on business.

Judge and Mrs. J. G. Tomlin spent the first of the week in Lexington.

W. Lee Johnson, of Covington, spent the first of the week here with relatives.

Dr. J. G. Slater and wife of Ludlow, spent Saturday here with relatives and friends.

Mr. and Mrs. Chas. R. Slater of Ludlow, spent Sunday here with relatives and friends.

Mr. and Mrs. Albert S. Pennington of Covington, spent Sunday here with their parents Mr. and Mrs. E. P. Pennington.

FOR SALE—Two incubators, Cypers's and Prairie State, \$10 takes both or will sell separately—G. S. Bojes, Richmond, Ky.

Mrs. Sarah Percival who has been very ill with a stomach affection is much improved with the prospect of recovery.

W. Ed. Peebles sold to Samuel S. Spradling his place of 17 acres in Kenton county, near Cincinnat, at \$80 per acre.

Real Estate Agent C. E. Powers sold for Mrs. Seneca Fry, of Verona, her farm of 64 acres to John C. Miller of Walton.

Mrs. E. W. Muirhead has returned to her country home near Walton from Brantown, Florida, where she spent the winter with her sister, Mrs. J. W. Harris.

Rev. A. Kirtley Johnson of Ghent, was a visitor here the first of the week. He is well pleased with his new location at Ghent, as pastor of the Baptist church.

Mr. and Mrs. W. S. Orr of Minneapolis, Minnesota, were the guests of their nephew C. Scott Chambers and family a part of last week.

Miss Laura Frances Ruddle, a very pretty and popular young lady of Burlington, spent part of the past week here with relatives and friends.

Mrs. E. M. Johnson of Frankfort, spent the past two weeks here at the bedside of her mother Mrs. Sarah Percival who has been very ill but is now improving.

Mr. and Mrs. A. Cline Norman who recently arrived from Oklahoma, have moved to the farm of his uncle K. B. Norman, near Walton, where they will make their home.

Mr. and Mrs. Henry Kelley and children moved here from Covington Tuesday to the property of Mrs. Sarah Glenn, and Mr. Kelley expects to open a photograph gallery to do general work.

Harry Carlton who has been employed at Olive Hill Carter-co, putting in a big brick plant, spent Friday here with friends enroute to Gloucester and Warsaw to visit friends and relatives.

Mr. and Mrs. Anthony Petlock of Ludlow, spent Saturday here and sold their farm of about seventy acres in Kenton county to J. Edward Bristow for about \$75 per acre, possession given at once.

Rev. Roland A. Nichols, the talented lecturer of Ohio, will begin his "Civilization of Applied Christianity" at the Walton Christian church next Sunday, April 29th, and continue until May 11th.

During the last week Robert W. Jones, Buick automobile agent, delivered to Jerry O. Griffith of Richmond, a Buick "Six" and to Joa. C. Hughes of Richmond, a Buick "Four" and to J. H. Walton of Grant, a Buick "Four".

The Wool Growers Association of Kenton county will meet at Walton, Thursday, May 10th, at 2 o'clock to receive bids for the purchase of this wool in that pool.

Five thousand fleeces of wool in this association this year, and it is worth the attention of wool buyers.

Claude E. Harris, of Covington, was here Monday on business and stated that he expected to begin work on the Dixie Highway in Boone county, May 15th, as that was the direction given him. He has had fine success with his road building in Russell county, and has been offered a nice contract in Powell county.

The remains of Clinton Gaines who died in Louisville arrived here Thursday night and were taken charge by undertaker Scott Chambers who had charge of the funeral at Bullittsburg where the deceased formerly resided. Mr. Gaines was born and reared in Boone county and was a high class citizen. For several years past he has resided in Louisville.

Schedule Changed.

The time of departure of the mail from Walton to Beaver Lick, Big Bone, Landing and Hamilton has been changed from 12 o'clock noon, to 10:45 as soon as the north bound train on the L. & N. arrives. This schedule is far better than the old one.

Work Began on New Church Edifice

Edward Stamler of Lexington, spent part of the past week here making arrangements for the work to begin on the new building of the Walton Christian church, he being the architect, and general supervisor of the construction work. The new, story brick dwelling on the church site, known as the Arnold homestead, is being moved down this week to make room for the church edifice.

Soldier Guard Injured.

Monday night a lump of coal from a passing freight train was thrown off by the rapid motion of the cars when near the bridge east of Walton where the soldiers are keeping guard and the coal struck the guard Private Allen Matthews knocking him insensible and inflicting such injuries as necessitated his being sent on the midnight passenger train to Louisville for hospital treatment.

Judge Tomlin Gone to Frankfort.

Judge J. G. Tomlin is spending the latter part of the week at Frankfort attending a meeting of the State Tuberculosis Society, he being the chairman of the Seventh District. Judge Tomlin has done a lot of effective work in bringing this important question of the public health before the citizens of his district and has his organization in excellent condition.

Will be on the

The Walton Electric Light plant will soon be in operation as the brick building has been completed and some of the machinery installed and the only thing necessary is the installation of the engine and its proper adjustment.

The engine has been delayed in shipment but is expected to arrive here this week. The electric light plant will be far superior to the old one.

Teachers Attending the K. E.

The State Educational Association meets at Louisville this week and the Walton teachers are attending in full force, consequently there is no school in Walton this week. The teachers who attended were Prof. J. C. Gordon, Mrs. Julia Rouse, Misses Nannie Chambers, Mary West, Nell Williams, Wilhelmina Hanes, Gladys Wilson.

The pupils had a nice display of their work in the school and received many nice compliments on the excellence of the work.

Attended the Dedication at Latonia.

Sunday a great many members of the Walton Baptist church attended the dedication of the Latonia Baptist church at Latonia where there was an immense attendance. The new structure was erected at a cost of about \$35,000 and is one of the handsomest churches in the State.

Mr. C. Crume who conducted a very successful protracted meeting at the church here last year is the pastor.

Will Sue Railroad for Personal Injury.

Mrs. Harry Simmons has taken to Cincinnati last week to undergo an X-Ray examination to ascertain the extent of her injuries from being struck by a milk can that was hurled through the window at her home through being left on the railroad track and struck by the engine. The doctor says the opinion is that Mrs. Simmons suffered severe internal injuries but no bones were broken. Mrs. Simmons has employed Chas. Strother as her attorney to bring an action against the railroad for damages.

Work to Begin on the Dixie Highway.

The work on the Dixie Highway in Boone county is expected to begin in about a week. Claude E. Harris of Covington, and S. M. Billiter of Williamstown, who have the contract of rebuilding the highway, stating they would begin the work then. An arrangement is being made by the members of the Highway Association to make a tour over the road about May 23d from Cincinnati to here and hold a meeting at the latter place for the purpose of discussing such measures as would be of advantage to the highway.

Increases Capital Stock.

The stockholders and officers of the Walton Locomotive Tobacco Company held a meeting here last Friday for the purpose of going over the business of the past season and planning for such improvements to the property as was deemed expedient, and it was decided to make some additions to the warehouse and improvements to the property that will necessitate a considerable outlay and it was arranged to increase the capital stock of the company to provide the money, which stock was subscribed for once by parties interested in the trade. Those present at the meeting were from a distance were M. L. Kirkpatrick, president, and H. A. Downard, of Cincinnati; Joe C. Hughes of Richmond. Another meeting of the directors is to be held here Thursday, May 3rd.

Hon. R. B. Brown, of Warsaw, and Chas. B. Carver, of Sparta, spent Friday here attending the meeting of the directors of the tobacco company and getting some of its members interested in a loose leaf warehouse to be built at Sparta for the business of next season, resulting in an arrangement being made to have a meeting of the stockholders of the proposed company held at the office of Judge J. G. Tomlin Thursday, May 3rd, for the purpose of incorporating the company and beginning the work on the warehouse at the instance of Mr. Brown subscribed and donated fifteen hundred dollars toward the erection of the enterprise at Sparta and this amount has been paid over to the bank subject to the order of the company as soon as it is ready to do business.

Sparta is the distributing point for all of the railroad traffic to Owenton and Warsaw, and is in the heart of one of the best burley tobacco districts in the State, and it is estimated that three to four million pounds of tobacco will be marketed there in the loose leaf as the parties connected with the proposed warehouse are "live fires" and know how to get the business.

TWO BITE DUST AND FOUR HURT

In Perry County Fight—Attempt

to Make Arrest Ends in Terrific Fight.

Hazard, Ky., April 21.—John B. Feltner, a farmer, and brother of "Mose" Feltner, who was killed in Hazard last fall by a revenue officer, and Roscoe Brewer, are dead, and four others are wounded as a result of a fight at the head of McIntosh branch of Cutskin creek, on the line between Perry and Leslie counties, late Sunday night.

The wounded men are Riley Melton and Monroe Melton, brothers, and Russell Wootton, a deputy sheriff, and another man, whose name could not be learned.

The wounds of the two Melton boys are said to be serious, but it is not thought that the other two men are dangerously wounded.

Physicians were called from Hazard, but before they reached the scene Brewer was dead and Feltner only lived a short time.

Feltner and Wootton and the two Melton boys, it is said, attempted to arrest Brewer, who was under indictment with Feltner on his bond and the bond had been forfeited. When they came up with Brewer the shooting began and more than a dozen shots were fired.

Turkey has broken diplomatic relations with the United States although the effect of that move will not be perceptible in this country. Practically all Americans got out of Turkey before the break came, and there has been no commerce with Turkey for many months. The worst sufferers are the 15,000 British prisoners in Turkey, all of whom have been under the special protection of the American Ambassador since they were taken.

Versailles, April 24.—About 800 negroes of Versailles, and Woodford county gave hearty expression of their loyalty in a mass meeting tonight on the Court-house square. Dr. H. P. Taylor, presided. Speaking for his people he said the negroes of Woodford pledged themselves as willing to fight and to die with their white friends in defense of America. Roscoe Conkling Simmons, of Louisville, spoke.

Final passage of the Superior Bill, providing for a tax of ten cents the barrel on malt liquor, by the Senate and House cleared the way for a final adjournment of the extra session of the Kentucky Legislature yesterday.

The Boone County High School sent to Louisville several articles the production of its pupils skit to be exhibited at the K. E. A. meeting in session there.

Hogs were \$15.00 in Cincinnati Tuesday.

Some land is breaking hard.

Press Clippings.

His other prophecies having failed, the Kaiser might try once again and assure his armies that they would be in Berlin by Christmas—Toronto Mail and Empire.

Don't worry about the political effect of permitting T. R. to go to Europe. They may get him over there to be President of Russia—Boston Transcript.

Pompous old Carranza prates about neutrality as if he thought the United States and the government made any difference—Birmingham Age-Herald.

Senator La Follette's attitude toward the war-bond bill is announced as unknown. But who cares now what it is?—New York World.

The rules of rhetoric are fixed and that's why we must continue to spell Bill Stone's name with a capital—Charleston News and Courier.

Nivelle and Haig are eating the apple of war so rapidly that there may be no core for us—New York Sun.

There will be no let-up in the white paper shortage until laid correspondents economize on postscripts.

The high cost of killing is still worrying Europe far less than the cost of living Irish Americans.

What has become of the old-fashioned man who kept his feet warm in "arctics"?

One of the surprises of this war is the small part played in it by the American note.

C. E. STEINFORT.

N. W. Burkett, Auctioneer.

The Ladies' Aid of Union will serve lunch.

Bentler's Economy Drug Store.

PAINT VALUES

It's a wise old boy that does his painting this spring instead of waiting till next year. May be you think the present prices are high, but say, you won't be able to see them at all next spring. A thirty (30) per cent increase is putting it right modest.

A Saving of 25 to 60c per Gal.

It's just like letting me put from 25c to 60c in your pocket on each gallon you buy, and bear this in mind, too, that this cut price is made on the finest ready-mixed paint a brush was ever dipped in.

Foy's Ready-Mixed Paints Preserves as Well as Beautifies.

There is absolutely no paint on the market that has the preserving qualities of Foy's. Make your money act double. Increase the life of your home at the same time you dress it up—with the same effort, at the same price.

Remember, you save 25c to 60c per gallon on buying here. How do I do it? Why this is one of the Economy Drug Stores.

L. A. BENTLER, Erlanger, Ky.

WAR TIMES

BUT NOT WAR PRICES.

The Fine Percheron Stallion,

PRINCE OLSEN

Will make the season at \$10 to insure a living colt.

Prince Olsen is a beautiful black and is a model in his class, and is one of the best breeders in Kentucky. He weighs 1,700 pounds, holds a high head, and has short coupling and good action. He has taken a number of first premiums at the fairs.

At the same time and place my two fine big Jacks

BEN AND DEWEY

will make the season at \$10 to insure a living colt. They are two of the finest Jacks in Kentucky, and both are excellent breeders.

Persons parting with mares forfeit the insurance money. A lien is reserved on the colt until the season is paid.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

JOE READNOUR, Walton, Ky.

A Week's News

April is about gone.

Carrazza and Villa have about sided, apparently.

Don't fail to see the haymakers at Burlington May 11th.

Farmers speeded up their work considerably the past week.

Prayer meeting at the Baptist church every Thursday night.

One speeder in Grant-co, wrecked two automobiles in one week.

The new Baptist church in Latonia was dedicated last Sunday.

The Boone circuit court did not adjourn until Saturday afternoon.

Many farmers expect to finish breaking ground for corn this week.

R. Lee Huey, of Hathaway neighborhood, was a business visitor to Burlington, last Monday.

The work of reconstructing the Lexington pike in this county will begin about the first of May.

What's the matter with Mexico? Not for three weeks has a new revolution been started there.

Jesse Eddins and Benjamin Kelly each sold a milk cow, last week, to C. L. Gaines, of Limaburg.

There is some peach and pear bloom, while apple bloom indicates at least a fairly good crop.

Some of the potatoes that were planted early rotted on which account several have planted a second time.

Prince Tobbytum will make you laugh even if you are in the dumps. Don't fail to see him on May 11th.

The town was given a pretty liberal dust bath last Sunday by the numerous autos that passed through.

Preaching at the M. E. church in East Bend on the fifth Sunday in April. All members are urged to be present.

It is estimated that good food to the amount of two thousand dollars a day is thrown into the Louisville garbage barrels.

A large drove of very handsome cattle belonging to Al Rogers, of Bellevue, passed thru Burlington, Monday, enroute to market.

Miss Carrie Miller, of Bracken county, is the guest of her cousin, Dr. Yelton and wife. It will be remembered she taught school here in 1915.

Boone county teachers are well represented at the K. E. A. in session in Louisville, and very few, if any, schools are in session this week.

The biggest event of the year will take place in Burlington on the evening of May 11th. Watch the Recorder for particulars regarding it.

C. E. Steinfert, who sold his farm to Lloyd Norris, will have a sale of livestock, farm implements, etc., on the 24 day of May. The sale is advertised in this issue.

Lloyd Norris, purchased, a few days since, the 125 acre farm owned by C. E. Steinfert, 2 miles west of Union, and known as the old Henry Corbin farm. It is a splendid piece of land and located in a good neighborhood.

A musical recital will be given at the High School building next Saturday evening by the pupils of Miss Godshaw, Miss Godshaw is a splendid teacher and her pupils are sure to acquit themselves well. Admission 10 cents, Time 8 o'clock p. m.

The Recorder is requested to announce the death of Miss Hattie S. Dwyre, which occurred in Ft. Thomas, March 25th. She was near 60 years old and died of stomach trouble. The remains were taken to the farm near Hebron, Mason county, and interred.

The Cincinnati Speedway has begun its dead beat advertising campaign again, and some of the rural papers are letting it put it over on them. If the concern is not able to pay for its advertising it would better put it up the blinds.

P. S. Crisler has an old musket that was used in John Brown's scrap at Harper's Ferry, Virginia. It is a relic which he prizes very highly and takes pleasure in exhibiting. He has, also, an old flint lock which in these days of modern fire arms is quite a curiosity.

William Cason, son of the late Alfred Cason, died at Lakeland Asylum last Monday morning. The remains were brought here yesterday and interred in the family lot in the Odd-Fellows cemetery. He was in his 60th year and had been a patient at Lakeland for several years.

The Operetta "Sylvia" will be given by the pupils of the local high school at Liberty Hall on the evening of May 11. This is one of the greatest things ever undertaken by the high school. If you fail to see it you will miss something worth while. Watch the Recorder for cast of characters, argument, etc.

FRUIT AND VEGETABLE CROPS

Problems in Marketing Perishable Products Begin With Production—Important Factors.

The problems in the marketing of the vast amount of perishable food products begin, as do most marketing problems, with production. The variety of the fruit or vegetable grown and the amount of this variety available, often are important factors in shaping market demand and prices. The quality of the product, as influenced by choice of soils, fertilizers and cultural methods, is another important consideration affecting marketing success.

Since the growing of perishable fruits and vegetables is on a relatively small-scale basis, while the large aggregate demands of the great market centers have brought about the existence of dealers who handle such produce only in large lots, the questions of production which later influence marketing can be dealt with satisfactorily in most cases only on a community basis. This fact and the recognition that many other problems could be met satisfactorily only by co-operating groups of producers, has led to the organization of co-operative marketing associations in many sections devoted more or less extensively to the production of such perishable crops.

SPRAY OUTFIT IS ESSENTIAL

Many Places on Farm Where It is Needed—Valuable in Orchard, Garden and Henhouse.

No farm should be without a good spraying outfit. There are so many places where it is valuable. The orchard, the garden and the henhouse all need it. The little bucket sprayers are just an aggravation for any use where pressure and speed are needed, though they are fully as useful as one could expect them to be. For spraying one or two trees, or for the henhouse, they will do very well, but in a large field of potatoes, a large orchard of large trees, or where force enough is needed to throw the spray into dense foliage, they cannot be expected to do the work as well as a more powerful pump. The lever action of the barrel pump handle adds to the power exerted, and the larger cylinder gives a faster flowing stream and a greater pressure can be maintained with the same nozzle. A barrel sprayer, that takes a barrel without a head and is attached to the rim of the barrel, will give good service.

BALANCED RATION FOR HENS

In Experiment Conducted by Ohio Station Fowls Gained in Weight and Produced More Eggs.

Feeders of horses, cattle, sheep and hogs have claimed for years that these animals must be fed a "balanced ration. Special attention has been given to balanced rations for dairy cows. By this is meant that one feed constituent should not be fed in excess, while another is lacking for the upkeep of the animal's body. The protein must be in a certain proportion to the sugars, starches and fat in the feed. Now the hen comes in for her share in this scientific feeding.

Ten times as many eggs were produced by hens fed a well-balanced ration as by those given only corn, wheat and oats in an experiment conducted by the Ohio experiment station. The balanced ration consisted of three parts by weight of corn and one part of wheat fed twice daily in the litter, and a mash mixture of two parts moulting feed to two parts ground corn and one part bran fed in self-feeding hoppers.

The 21 Barred Plymouth Rock pullets in each lot received the same

Barred Plymouth Rock Pullet.

house space and treatment except for the difference in feed. The test period lasted 140 days.

The hens given the balanced ration ate more feed, which cost about 50 per cent more than the ration of corn, wheat and oats. However, they gained more in weight and produced ten times as many eggs, making a net profit, while the other lot was kept at a loss.

PROPER QUARTERS FOR HOGS

Animals Should Not Be Permitted to Burrow Deep and Sleep in Damp Straw—Have Pens Dry.

Hogs should not be allowed to burrow deep and sleep in damp straw under the stinks.

They come out wet and steaming into the cold air and contract cold and pneumonia. Provide dry, tight pens and make them sleep in suitable quarters.

Tremendous Sales—The Public's Answer

"Is my product right?" asks the manufacturer;
 —"the most efficient, enduring construction?"
 —"made of the best materials?"
 —"by the most skillful workmen?"

FOR BUTTER FAT THIS WEEK.

Will not go back to the Churn as Long
as I Sell Cream to the

Tri-State Butter Company,
CINCINNATI, OHIO,

SAYS MRS. CHRIS SCHNITZER

It won't be a year until the 6th of June since we went into the cream business. We only milk six cows and have sold \$288 worth of cream. I would not go back to the old time churn as long as I can sell cream to the TRI-STATE BUTTER CO.

I just love to send our cream to the TRI-STATE, and it saves the hard labor on a woman of working butter in the summer.

TRY SELLING YOUR CREAM TO

The Tri-State Butter Co.,
Capital Stock \$75,000. Cincinnati, O.

We are buying cream direct from over 20,000 farmers. No commission agents or commission men take a profit off our cream.

If You Want to Trade at
the Place to Reduce the
Cost of Living

Talking will Never Do It.
Complaining Will Get You Nowhere.

Action will Accomplish Results

The Correct Action to take is to See Me.

I can lighten the burden of your table if you will buy from me. I am doing it for others every day. I am cutting the price to the quick on everything in my store.

Then, too, I am satisfied with a reasonable profit. I am not trying to get rich quick.

I want your trade and I want your friendship, and I am making the price that will win me both.

If you really want to reduce the cost of living try me next. I'm serving my trade daily with a nice line of the best fresh and cured meats.

Ice on hand for sale at all times.

I make a trip to the city daily with my Truck, and I am ready at all times to take your order for anything that I do not carry in stock.

I close my store on Saturday night at 7:30 o'clock and will not open until Monday morning at 6 o'clock.

W. L. Kirkpatrick,

Burlington, Kentucky.

All are invited to be present at the baccalaureate services, Sunday evening, April 28th, at the Baptist church, special song program has been arranged and the address will be delivered by Rev. C. E. Baker.

Mrs. O. N. Scott brought to this office, last Saturday afternoon, a little chicken that had three well developed legs and feet, the third leg and foot are just back of the wing, and attached to the back. Otherwise the chicken was perfect and seemed in a thrifty condition.

Mrs. J. G. Smith was preparing a hen to cook, last Saturday, when she opened the fowl she discovered that it contained several small and also as large as an ordinary apple which was made up principally of fluid; the other about the size of a walnut, and was a solid substance. Dr. Richmond examined them and pronounced them tumors and stated that he never had seen anything similar to them.

By hitting the bull's-eye with unerring skill from the standing, kneeling or sitting position, Lee N. Utz of Burlington has qualified as an expert rifleman in the United States Marine Corps according to an official bulletin from Washington. He recently made excellent scores at all ranges, winning the expert medal and an increase of pay. Lee, who is a son of Edward E. Utz of Burlington, enlisted in the United States Marine Corps at its Cincinnati recruiting station Dec. 16, 1916, and has just completed his course of instruction at the training station, Port Royal, S. C. He has been assigned to duty in Company "H," located temporarily at that station.

Dozens of recruits arrive daily at Port Royal, and they take keen interest in our country's preparation for war, while training to become "Soldiers of the sea." With out a doubt the boys in Company "H" will give a good account of themselves whenever they are called upon to go into action.

ROSS E. ROWELL, Captain U. S. Marine Corps, in charge of Bureau.

Mrs. Allie Lail and Mrs. Julius Corbin, Charles Corbin, Wanda Myers and John Crouch were in Covington, visiting Mr. and Mrs. Edward Skyrin.

MEASURED BY THE
CONSUMPTION OF SUGAR.

State News.

(Providence Journal.)

It has been said that the prosperity of a country and the standard of the living of its people are measured by the consumption of sugar. Fifty years ago comparatively little sugar was used in this part of the country. Molasses was in common use in the rural districts and on the farms for sweetening purposes, sugar being reserved for special occasions and for "company." Old book accounts of less than a century ago range show an entry of sugar, the Yankee skippers sailed out of Narragansett Bay and New London Harbor with their ship loads of shoe hams and other raw England products, and returned with hogheads of molasses, but no sugar. It was in the days before the invention of the centrifugal and sugar was manufactured in the cane-growing countries in a primitive manner requiring weeks and even months of time to purify the crude forming in the liquid cane juice from the treacle which we call molasses.

In the mountains of Virginia, the Carolinas and Georgia little sugar is in daily use even now, and none at all in the cabins of the very poor. The farmers in that section of the country produce a home-made syrup called Chinese sugar cane or sorghum, and it is a very good article too.

The health and appearance of the family are a good test of the wholesomeness of their diet, according to the United States Department of Agriculture. Farmers Bulletin 585, on how to select foods. If they are strong, well developed for their ages, free from ailments, and full of energy and action, one may safely say their food agrees with them. But if they are listless and ailing, or not as well developed, either physically or mentally, as they should be, and if a competent physician finds that there is no special disease to account for these bad symptoms, a mother may well ask herself if the food is right, and if not, how she can make it so. If a little too much or too little of one nutrient is provided at a single meal or on a single day, a healthy body does not suffer, because it has ways of storing such a surplus and of using its stored material in an emergency. The danger would come if the diet taken week in and week out always provided too much or too little of some one nutrient.

Habit and custom help greatly, because they usually are based on what the experience of generations has proved is wise and healthful, the of course, there are bad habits and outgrown customs in food as in everything else. Good food habits, if they must be remembered, include more than cleanliness and order in everything that has to do with food and meals and leisurely ways of eating. Equally important are the liking for all kinds of wholesome foods, even if they have not always been used in one's home or neighborhood, and eating reasonable amounts without being either greedy or overindulgent. Every effort should be made to train children in such good food habits. Older people have learned them, they, too, should try to do so, for such things are very important not only to the health but also to economy.

To refuse to eat some wholesome dish simply because one is not accustomed to it may prevent the use of some very desirable and economical food. To feel that there is any virtue in providing more food than is needed shows poor taste as well as poor economy.

Hatch early has been the slogan for poultrymen up to the present time, and early hatching is important for eggs next winter.

On account of a war great increase in production of poultry and eggs will be necessary in Kentucky this year. Farmers are urged to save all pullets for egg production and not kill them for fryers. Keep up the hatching thru May. Help increase the poultry production of the U. S. one hundred million pounds. Let us increase one pound of poultry meat for every man, woman and child. It can be done easily and Kentucky should do her share.

Produce infertile eggs after breeding season by removing all male birds from the flock. The production of infertile eggs will mean a saving of \$15,000,000 in marketing eggs this season. Information and bulletins on housing, feeding, disease etc., of poultry and methods of home preservation of eggs may be obtained from the College of Agriculture, Lexington, Kentucky.

Three Cincinnati actresses offered to kiss the first 100 men to enter the army, but so far as we have been able to learn, there was no great rush at the recruiting station that account—Detroit Free Press.

Bryan says if he is accepted in the army he will accept all his speaking engagements that ought to land him a place whether there's an opening or not—Macon Telegraph.

The Kaiser and his six sons have been mobilized these two and a half years, but mobilized behind the firing line—Memphis Commercial Appeal.

One thing that must please Hollenback about his line is that he can take it as far back as he wants to—Johnstown Democrat.

No doubt the strikes of German munitions workers have a strategic significance of some sort—New York World.

promise them a couple of German states after the war—Louisville Courier-Journal.

Mayfield has prohibited chickens from running at large. At the kind of "chickens" that drink at the soda fountains—Elizabethtown News.

Millon—Saw a head of cattle have died in this section from blackleg. A good many cattle are being vaccinated to prevent further spread of the disease.

Mays—Maysville officials are going to enforce the vagrancy law. It is either join the army or leave the town. The plan is to organize the loafers into gangs, appoint a guardman and hire them out to the farmers during the day and put them in jail at night.

Hugh Kemp, the well known dairymen of Elizabethtown, shipped a five gallon can of cream last week which tested 22, and brought him 47 cents per pound, or \$2.71. His dairy herd is mostly Jersey stock. Who can beat this record—Falmouth Outlook.

Gregg, Hampshire, of the county, was fined \$300 by a jury in circuit court Wednesday afternoon on a charge of being an incendiary. He was charged with firing a shot gun thru a window of the Union Baptist church in Fayette county, Lexington, Kentucky.

Henderson—Wheat fields that gave little promise three weeks ago of yielding as much as five bushels to the acre, have shown wonderful growth the past two weeks. Warm weather, with local showers, has started the wheat growing, and on many farms wheat is now six inches tall.

Paducah, April 22.—Pastors of the negro churches have agreed to help the Paducah Patriotic Association, which has been organized to help solve the food problem in Paducah and McCracken county. Meetings will be held Monday night in each of the negro churches. Prominent white men will deliver addresses.

About the earliest fried chickens we have heard of in Warsaw have been raised by J. W. Abbott, who has them ready for the table. This is the earliest we have heard of from any local grower. A few have been brought in to the market, but they have been very few and very small, at best—Warsaw Independent.

John Perry delivered to J. J. Starns Tuesday a fat hog, which weighed six hundred and thirty-five pounds at \$12.00 per hundred. The hog netted the owner \$9.00 and was only a year old. If any one can beat this for a porker of the same age, we should like to hear from him—Grant County News.

Eight relatives of Mr. A. Gnadinger, of this city, have been killed in the European war. Mr. Gnadinger recently learned that the husband of his young niece had been drafted for service, leaving his wife and babies practically destitute. The fiancée of a great-niece of Mr. Gnadinger was killed after the engagement had been announced—Cynthiana Log Cabin.

Franklin, April 22.—As a result of the President's call for an increased production of foodstuffs, Simpson county farmers are planting every available acre to corn and tomatoes. Practically every vacant lot in Franklin has been given to Irish potatoes. For wheat and tobacco have been the money crops of the county, but conservative estimates place the wheat prospects far below normal.

Owingsville, April 22.—A special session of the Fiscal Court, all bids for reconstruction of the State aid road from Owingsville to Sharpshurg, and Lexington to Carlisle, the county seat of Nicholas, into a macadam road, were rejected. No bid was under \$4,000 a mile, and as the county had just completed the road to the Montgomery county line at a cost of \$2,500 a mile, the court concluded to employ labor and build the road to Sharpshurg.

There are two men in Dalton, Ga., who are not worrying about the price of silos. They are both named Joe—Joe Fain and Joe Carter. Both are mill operatives and both are one-legged. However, there is a difference in the legs, as Carter has a right leg and Fain a left leg. They wear the same size shoe and "split" their foot wear between them as ordinary men would split a bottle of beer—Harrodsburg Herald.

Glasgow, April 22.—J. L. Bryan, a cousin of William J. Bryan, for many years a dry goods merchant of this place, is "doing his bit" for the country. Mr. Bryan owns a number of soddied town lots. His has had all of these lots plowed up and every available inch planted with potatoes. Other men of the town are doing likewise, some even planting parts of their yards in vegetables. Reports from the various districts indicate that the farmers of Boone county will respond to the appeal of President Wilson to grow more foodstuffs.

In his speech at the court house Tuesday afternoon Dr. Fred Match made this interesting prediction: "Next fall when the farmers go out after game, rabbits will be more sought after than quail for it will be a question of amount of meat which we get that in serious need of it—that time and must have. And don't sell off any calves unless it is a Jersey bull calf. Keep all the others and grow them into full size beef Jersey cattle are selling in the islands for 25 cents per pound on foot for beef purposes, and it is certain that the United States has received its last importation from there. At this rate a 200-pound Jersey cow is worth \$200 for beef—Hopkinsville News Era.

With insurance equal to that of Zimmermann, Secretary Lansing might write to the Lithuanians.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

JIM WILKES,

2:17 1/4

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Threlkeld's Jim Wilkes; dam by Conner's Almont.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition: bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK,
MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS,
J. G. RENAKER, C. H. TANNER.
Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVillie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS,
Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my stable at McVillie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.

XEN SCOTT, Grant, Ky., R. D.

The Fine Belgian Stallion,

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minnesota pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE.
Prince is a handsome 8 year old black, with white star in forehead, weighs 1600 pounds, was foaled April 1908, owned by Joseph Moore, of Ottaway, Illinois. 1st sire: Voltair 1903; 2nd sire: Phoebeus 45062, 3d sire: Narcisse 21922, 4th sire: Paul Bert 34958. Dam: Fashion 40068, 2d dam: Lena B 22820, 3d dam: Action 19888, 4th dam: Pride of North 1841. B. J. & EDWARD MICHELS.

Blessed are the peacemakers, and they are likely to need that consolation.

After the war Europe will be filled to overflowing with great men who saved the day.

Copper is abnormally high, though less of it is going into brass foot balls. Take Your County Paper.

Don Degezee

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Hebron, Boone county, Kentucky, at \$10.00 to insure a live colt to stand up and suck, money due when colt comes or the mare is parted with or leaves the county.

Don Degezee, despite his great size and weight, is well balanced, tough, out, and perfectly proportioned, and asymmetrically built. He has as light action as a stallion of much smaller type, and his disposition is much better than is usually found in a horse of his blood. He is a beautiful dark sorrel, 17 hands high, weighs 1,800, has a broad foot, heavy bone, fine style and action. For official pedigree call on the undersigned.

Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.

E. J. AYLER.

The price of shoes this summer may make a man wish more than ever that he was again a barefooted boy.

One nice thing about China: The more demands that are made upon her the less she says.

Tastes on peace differ as much as allis on who started the war.

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. Hal McGregor.

Record (2) 2:26 1/4, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.

Hal McGregor (2) 2:26 1/4 by Hal Dillard 2:04 1/4. 1st dam by Wilstar 2:07 1/4; 2nd dam by Oscar Williams 2:12 1/4; 3d dam by Ohio Volunteer 2:20 1/4.

The sire of Hal Dillard is Brown Hal 2:12 1/4 (world's record when made); also the sire of Star Pointer 1:58 1/4, the first horse to beat 2:00.

Be not misled a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:08 1/4, Fannie Dillard 2:03 1/4, Hal B. 2:04 1/4, Hal C. 2:05 1/4, Hal Leaf 2:07 1/4, Hal Clipper 2:07 1/4, Cinnamon 2:07 1/4, Dillard Online 2:07 1/4, Butter Bowl 2:08 1/4, Cambria Main 2:08 1/4, Rop Dillard 2:08 1/4, Ellen D. 2:10 1/4, Young Hal 2:10 1/4, total 95 standard time.

Sons of Hal Dillard sired Hal Boy 2:04 1/4, Hal A. Jr. 2:02 1/4, Hal Raven 2:03 1/4, Haltomont 2:03 1/4, Ed R. 2:06 1/4, Hal McKinney 2:06 1/4, Eddie Dillard 2:06 1/4, Hallie Loo 2:07 1/4, Hal Grey 2:08 1/4, Hallock M. 2:08 1/4, Vera B. 2:07 1/4, Hal Grey 2:08 1/4, Hallock M. 2:09 1/4, Dillard S. 2:09 1/4, Hal J. 2:09 1/4, Jerry Dillard 2:09 1/4, Della H. 2:10 1/4, Dillard Onward 2:10 1/4, Helen B. 2:10 1/4.

Hal McGregor with only 70 days track work last year trotted one-eighth in 16 1/2 seconds, 1/4 in 34 sec and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training then.

Care will be taken to prevent accidents but I will not be responsible for any that may occur.

Will farm a few good mares, W. B. ARNOLD, Petersburg, Ky., R. D. 1

THE FINE SADDLE HORSE

Harrison Prince No. 3340

Will make the present season at the stable of G. T. Galves one mile from Burlington, Ky., on the Petersburg pike, at \$10 to insure a living colt. I will not be responsible for any accident that may occur.

Harrison Prince is a chestnut stallion, 16 hands high, 8 years old, has a large blaze face, two white feet, and is a perfect type of a saddle horse with a fine finish and action, a champion in his class from a colt. His sire is Dandy Jim, the well known show horse. For official pedigree call on the undersigned.

any of the past.

MEASURED BY THE
CONSUMPTION OF SUGAR.

(Providence Journal.)

It has been said that the prosperity of a country and the standard of the living of its people are measured by the consumption of sugar. Fifty years ago comparatively little sugar was used in this part of the country. Molasses was in common use in the rural districts and on the farms for sweetening purposes, sugar being reserved for special occasions and for "company." Old book accounts of less than a century ago rarely show an entry of sugar. Our Yankee skippers sailed out of Narragansett Bay and New London Harbor with their ship loads of shoe pegs, hams and other New England products, and returned with hogheads of molasses, but no sugar. It was in the days before the invention of the centrifugal and sugar was manufactured in the cane-growing countries in a primitive manner requiring weeks and even months of time to purify the cane juice from the boiled cane juice from the treacle which we call molasses.

In the mountains of Virginia, the Carolinas and Georgia very little sugar was used. It was none at all in the cabins of the very poor. The farmers in that section of the country produce a home-made syrup called "Chimney sugar cane" or sorghum, and it is a very good article too.

The health and appearance of the family are a good test of the wholesomeness of their diet, according to the United States Department of Agriculture. Farmers' bulletins show on how to select foods. If they are strong, well developed for their ages, free from ailments, and full of energy and ambition, one may safely say their food agrees with them. If they are listless and ailing, or not as well developed, either physically or mentally as they should be, and if a competent physician finds that there is no special disease to account for these bad symptoms, a mother may well suspect if the food is right, and if not, how she can make it so. If a little too much or too little of one nutrient is provided at a single meal or on a single day, a healthy body does not suffer, because it has ways of storing such a surplus and of using its stored material in an emergency. The danger would come if the diet taken week in and week out always provided too much or too little of some one nutrient.

Habit and custom help greatly, because they usually are based on what the experience of generations has proved is wise and healthful, but of course, there are bad habits and outgrown customs in food as in everything else. Good food habits, if must be remembered, include more than cleanliness and order in everything that has to do with food and meals and leisurely ways of eating. Equally important are liking for all kinds of wholesome foods, even if they have not always been used in one's home or neighborhood, and eating reasonably small amounts without being either greedy or overindulgent. Every effort should be made to train children in such good food habits. Older people have often learned them, they, too, should try to do so, for such things are very important not only to the health but also to economy.

To refuse to eat some wholesome dish simply because one is not accustomed to it may prevent the use of some very desirable and economical food. To feel that there is any virtue in providing more food than is needed shows poor taste as well as poor economy.

Hatch early has been the slogan for poultrymen up to the present time and early hatching is important for eggs next winter.

On account of war a great increase in production of poultry and eggs will be necessary in Kentucky this year. Farmers are urged to save all pullets for egg production and not kill them for fryers. Keep up the hatching thru May. Help increase the poultry production of the U. S. one hundred million pounds. Let us increase one pound of poultry meat for every man, woman and child. It can be done easily and Kentucky should do her share.

Produce infertile eggs after breeding season by removing all production of infertile eggs with mean a saving of \$15,000,000, in marketing eggs this season.

Information and bulletins on housing, feeding, disease etc., of poultry and methods of home preservation of eggs may be obtained from the College of Agriculture, Lexington, Kentucky.

Three Cincinnati actresses offered to kiss the first 10 men to enter, but so far as we have been able to learn, there was no great rush at the recruiting station on that account—Detroit Free Press.

Bryan says if he is accepted in the army he will cancel all his speaking engagements. That ought to land him a place whether there's an opening or not—Macomb Telegraph.

The Kaiser and his six sons have been mobilized these two and a half years, but mobilized behind the firing line—Memphis Commercial Appeal.

One thing that must please Hindenburg about his line is that he can take it as far back as he wants to—Johnstown Democrat.

No doubt the strikes of German munitions workers have a strategic significance of some sort—New York World.

promise them a couple of German states after the war—Louisville Courier-Journal.

State News.

Mayfield has prohibited chickens from running at large. Are they the kind of "chickens" that drink at the soda fountains?—Elizabeth-town News.

Milton—Saw a head of cattle have died in this section from blackleg. A good many cattle are being vaccinated to prevent further spread of the disease.

Mays—Maysville officials are going to enforce the vagrancy law. It is either join the army or go to work. The plan is to organize the loafers into gangs, appoint a guardsman and hire them out to the farmers during the day and put them in jail at night.

Hugh Kempf, the well known dartsman of Elizabethtown, shipped a live gallin of cream last week which tested 52, and brought him 47 cents per pound, or \$2.77. His dairy herd is mostly Jersey stock. Who can beat this record?—Falmouth Outlook.

Grigg, Hampshire, of the county, was fined \$300 by a jury in circuit court Wednesday afternoon on a charge of injuring church property. He was charged with firing a shot gun thru a window of the Union Baptist Church in Fayette county, Lexington on Wednesday.

Henderson—Wheat fields that gave the county's three weeks ago of yielding as much as five bushels to the acre, have shown wonderful growth the past two weeks. Warm weather, with local showers, has started the wheat growing, and on many farms wheat is now six inches tall.

Paducah, April 25.—Pastors of the negro churches have agreed to help the Paducah Patriotic Association, which has been organized to help solve the food problem in Paducah and McCracken county. Meetings will be held Monday night at each of the negro churches. Prominent white men will deliver addresses.

About the earliest fried chickens we have heard of in Warsaw have been raised by J. W. Abbott, who has been ready for the table. This is the earliest we have heard of from any local grower. A few have been brought in to the market, but they have been very few and very small, at best—Warsaw Independent.

John Perry, a farmer of Starbuck, Tuesday a fat hog which weighed six hundred and thirty-five pounds at \$15.10 per hundred. The hog netted the owner \$49.50 and was only a year old. If any one can beat this for a porker of the same age, we should like to hear from him—Grant County News.

Eight relatives of Mr. A. Gnadinger, of this city, have been killed in the European war. Mr. Gnadinger recently learned that the husband of his young niece had been drafted for service, leaving his wife and babies practically destitute. The fiancé of a niece of Mr. Gnadinger was killed after the engagement had been announced—Cynthiana Log Cabin News.

Franklin, April 22.—As a result of the President's call for an increased production of foodstuffs, Simpson county farmers are planning every available acre to corn and tomatoes. Practically every vacant lot in Franklin has been given to the war effort. Corn, wheat and tobacco have been the money crops of the county, but conservative estimates place the wheat prospects far below normal.

Owingsville.—At a special session of the Fiscal Court, all bids for reconstruction of the State aid road from Owingsville to Sharpburg, and leading to Carlisle, the county seat of Nicholas, into a model road, were rejected. No bid was under \$4,000 a mile, and as the county had just completed the road to the village of Owingsville, the court concluded to employ labor and build the road to Sharpburg.

There are two men in Dalton, Ga., who are not worrying about the price of shoes. They are both named Joe—Joe Fain and Joe Carter. Both are mill operatives and both are one-legged. However, there is a difference in the legs as Carter has a right leg and Fain a left leg. They wear the same size shoe and "split" their footwear between them as ordinary men would split a bottle of beer—Harrisburg Herald.

Glasgow, April 22.—J. L. Bryan, a cousin of William J. Bryan, for many years a dry goods merchant of this place, is "doing his bit" for the country. He owns a number of soddied town lots. He has had all of these lots plowed up and every available inch planted with potatoes. Other men of the town have done the same, even planting parts of their yards in vegetables. Reports from the rural districts indicate that the farmers of Garrett county will respond to the appeal of President Wilson to grow more foodstuffs.

In his speech at the Ford March Tuesday afternoon Dr. Wood Hutcher made this interesting prediction: "I shall tell you the number of goats out after game rabbits will be more sought after than mail for it will be a question of amount of meat, which we will be in serious need of, very that time and must have. And don't sell off any calves unless it is a Jersey bull calf. Keep all the others and grow them into full size beef Jersey cattle are selling in the Islands for 25 cents per pound on foot for beef purposes, and it is certain that the United States has needed its last importation from there. At this rate an 800-pound Jersey cow is worth \$200 for beef!—Hopkinsville News Item.

With assurance equal to that of Zimmermann, Secretary Lansing might write to the Lithuanians and

Copper is alarmingly high, though less of it is going into brass foot rails.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

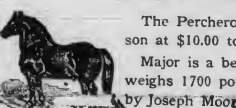

JIM WILKES,

2:17 1/4

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Thredkeld's Jim Wilkes; dam by Conner's Almont.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition: bred by Joseph Moore, of Decatur, Illinois.

THE FINE BREEDING JACK,
MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS,
J. G. RENAKER, C. H. TANNER.

Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/4 mile below McVillie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS,

Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my stable at McVillie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.

XEN SCOTT, Grant, Ky., R. D.

The Fine Belgian Stallion,

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minnesota pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible for any that may occur.

DESCRIPTION AND PEDIGREE.

Prince is a handsome 8 year old black, with white star in forehead, weighs 1600 pounds, was foaled April 1900, owned by Joseph Moore, of Ottawar, Illinois. 1st sire: Voltair 5657, 2nd sire: Phoebeus 4509, 3rd sire: Narcissus 2102, 4th sire: Paul Bert 3495. Dam: Fashion 4008, 2d dam: Luna B 2829, 3d dam, Auction 1898, 4th dam: Pride of Sarth 1841.

B. J. & EDWARD MICHELS.

Blessed are the peacemakers, and they are likely to need that consolation.

After the war Europe will be filled to overflowing with great men who saved the day.

Copper is alarmingly high, though less of it is going into brass foot rails.

Take Your County Paper.

Don Degezoe

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Hebron, Boone county, Kentucky, at \$10 to insure a colt to stand up and suck, money due when colt comes or the mare is parted with or leaves the county.

Don Degezoe, despite his great size and weight, is well balanced, tough, out, and perfectly proportioned and symmetrically built. He has as light action as a stallion of much smaller type, as his disposition is much better than is usually found in a horse of his blood. He is a beautiful dark sorrel, 17 hands high, weighs 1,800, has a broad foot, heavy bone, fine style and action. For official pedigree call on the undersigned.

Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.

E. J. AYLER.

The price of shoes this summer may make a man wish more than ever that he was again a barefooted boy.

One nice thing about China? The more demands that are made upon her the less she says.

Tastes on peace differ as much as glibness on who started the war.

BOUND TO SURVIVE.

The other day we heard two elderly men reciting the merits of their automobiles and disparaging the other fellow's, and we knew at once what they were doing and what they had been in days gone by. For their talk was the talk of the old-time horse traders, altered to suit the commodity they were dickering over, revised as to technicalities, but racy still, unexcited, shrewd, marked by that studied indifference which always misled the outsider into the notion that the last thing horse traders wanted to do was to trade. This all went to show how easily a man can deceive himself, says Toledo Blade. We had been thinking that the tribe of horse swappers was passing from the earth, sorrowfully succumbing to the new transportation. But if we had given it real thought, we would have known that that could not be. Horse traders were the most resourceful beings living. It was their business to be. They made it an art. So, of course, the automobile could not destroy them. They simply drew upon their great stock of ready, highly trained wit and adapted themselves to the new order. They trade motorcars now, and no doubt exult over victories in cunning, carry secret hopes about with them of avenging defeats, just as they used to.

A large percentage of the richest land in this country is devoted to the growing of corn. The most prosperous American farmers are those who spend considerable time improving the quality and increasing the yield of this typically American crop. But when we hear some men say that corn has ruined certain breeds of hogs, and other men call attention to the fact that their pork was produced without corn, we begin to wonder why some even came to be a 3,000,000,000-bushel crop, and why the price has gone to more than \$1 a bushel. Corn has reached its present popularity because it is exceedingly well adapted to a big section and because it is a wonderfully efficient feed. It is such a good meat producer that a good many live stock producers and feeders got the idea that corn would do the trick alone, without the necessity of any brain work on their part. And that's why a few people now are ashamed to say that their meat products were made from corn. The trouble is not with corn, says Country Gentleman. It is still the best meat producer we have. The feeder needs to know what to feed with it, so hogs and cattle can make use of even more corn. It is the great American crop and needs no apology—even when the price is only half what it is now.

The continuance of the war is resulting in a shrinking of gem supplies, according to the trade announcement of a leading firm of importers and cutters. The announcement says, in part: "The great war has brought about a scarcity in precious and so-called semi-precious stones and its continuance into the new year makes it almost certain that desirable goods will become even less plentiful. We are drawing our rough stones from primary sources and although gem mining has greatly fallen off in all parts of the world, we are occasionally receiving lots of good rough, which we cut in our New York shop. Having eliminated the European middleman and his profit, we are in a position to furnish perfectly cut stones at reasonable prices."

A number of college youths lately put forward their ideal of a "girl that is worth while," and among other things mentioned as qualifications of their ideal that she is broad-minded, sympathetic, tactful, unselfish, optimistic, thrifty, of good disposition, moderate in all things, bears reverse without worry, is modest, true, home-loving and religious. But what would such a girl want with the average college student?

A positive method of becoming distinguished as a conversationalist these days is to refrain from war talk. Arguments on the issues of the war have been exchanged until it would seem that there are no ideas, theories, convictions or forecasts, however novel or bizarre, that have not been put into words.

Someone recalls Mark Twain's advice in regard to oratory that "you ought to know a speech as you know your prayers." But there are those whom this recipe wouldn't help so very much.

Ever notice how seriously people take notices as soon as they are engaged to be married? And at that they are not serious enough.

POULTRY IN BACK YARD.

Suggestions for Care of Small Flock of Hens—Economy Depends Primarily Upon Egg Production.

From 12 to 25 hens are sufficient to provide the ordinary family with enough eggs and meat to run the keeping of the birds worth while, according to poultry specialists in the U. S. Department of Agriculture. This amount of outdoor space the flock will require may be estimated at about 25 square feet for each bird. There are instances in which chickens have thrived with much less than this, but unless the soil is especially favorable and the birds receive unusually good care, crowding is likely to prove unprofitable. Poultry specialists do not recommend, however, that every one with the requisite space at his disposal should go in for chicken raising. Unless there is a natural interest in poultry or a determination to make the flock a source of real economy, even if it does take time and trouble, the venture is not likely to prove successful. Lack of care may result in disease that will sweep off the entire flock, and it is almost certain to cause reduction in egg production that will make the birds a burden instead of a help. In some localities, where municipal ordinances may prohibit the keeping of poultry within certain limits, care should be taken that the poultry yard is not in a proscribed area.

While it is possible to get along with 25 square feet per bird, a larger space affording more green and insect food is very desirable. For one thing, the ordinary poultry keeper wishes to perpetuate his flock, and the raising of young chickens requires as much land as the keeping of mature hens. After she is two years old the best laying days of the average hen are over, and it usually pays to get rid of her. This means that the flock must be renewed each year. Since as many cockerels as pullets will be hatched and a certain percentage are certain to die, it is customary to hatch each year a few more chickens than there are hens in the flock. With a flock of 25, for example, about 30 chickens must be raised. The same space must be allowed for these as for the laying hens. The cockerels are consumed through the season, being used either as broilers when they are about three months old, as dry ers, or as roasters.

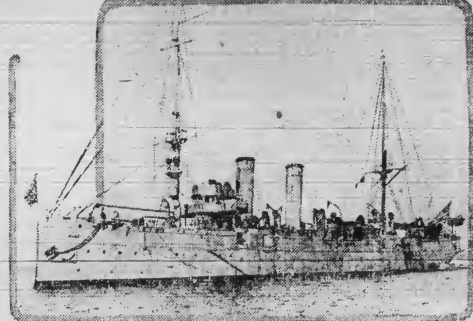

It is most desirable as a precaution against disease to divide the available area into two plots. On one of these the chickens are allowed to range while a green crop, such as oats, for example—is being grown for them on the other. The preliminary turning under of the soil, the green crop, and the feeding of chickens for a period serve to prevent the land from becoming contaminated.

An additional range, with the advantage of a large supply of insect feed for the birds, may sometimes be obtained where a vegetable garden is maintained. At different times in the growing season there are areas in the garden which are either idle or occupied only by crops that the hens regard as food. The birds, confined to these with the aid of a portable fence, benefit without injury to the vegetables.

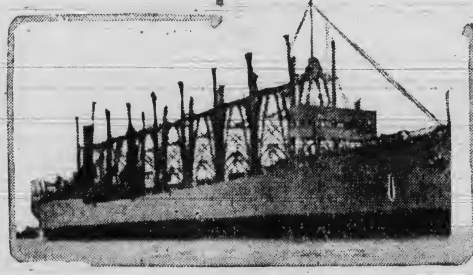

An important item to be considered in the thinking of maintaining a home flock is the cost of the house. For some part of the year, at least, in almost every section of the U. S. chickens require the shelter of a tight, dry building. In planning the house, approximately 4 or 5 feet of floor space should be allowed for each bird. The height may be determined by the convenience of the operator, for the birds themselves need only a 3 feet. Such low houses, however, are very difficult to clean, and in consequence are likely to be neglected. It is better to build them so high that a man may work in them without discomfort.

A not uncommon device is to use a piano box for a chicken house. The cost of these houses depends largely upon circumstances, but no estimate can be given. It may be possible to find one the owner will be glad to give away, and on the other hand one may have to pay \$1.50 or more for a box that is no better. By combining two piano boxes a very satisfactory shelter for a small flock can be made at little expense. Where lumber must be purchased, it has been estimated that the materials for a substantial chicken house may cost anywhere from 50 cents to \$1 per bird, and it is not likely that with the present prices of commodities of all kinds these figures will be somewhat low. Portable chicken houses are also on the market at costs varying greatly. This majority, however, will probably cost the owner from \$1.50 to \$2 for each bird sheltered by them. In any event, it is probable that unless there is plenty of land and the owner is a prospective poultryman, it is better to be a good carpenter, the cost of the chicken house will not be met by the value of the products for a year or two. The house should last, however, for a number of years, especially if painted and well cared for. Substantial pro-

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of May 3rd, 1877

Oats promise a fine crop.
Corn is being planted.
Apple trees are in bloom.
The name of Milton Hamilton is mentioned as a candidate for the legislature in the second district in Kenton county.
The assessor listed 1,720 dogs last year.
Some of the farmers are done planting corn.
R. A. Brady bought a fine iron gray saddle horse at Lexington.
L. H. Voshell and Liberty Stansifer, John Crowley and Eliza Dorsey, and Andrew J. Buchanan and Miss Frances Alloway married the past week. The first named couple married on the 28th ult.
Dr. Mc H. Raymond and wife have gone to Montana.
Mrs. Mary Runyan is visiting friends in Burlington.
E. H. Baker was in town Monday. When he left New Orleans a few days since the U. S. soldiers were marching out of town.
M. S. Rice, John Cropper and Clinton Gaines were appointed commissioners by the county court to make a division of the lands of John T. Riley, deceased.
Tuesday was pay day for the men building the Burlington and Bellevue pike.
Jerry Blyth and E. J. Butts are candidates for town marshal.
Walton-Park Holton has moved from Warsaw to the Rogers homestead. Mrs. Bruce has moved into her new house. A Sabbath school was organized at the Baptist church last Sunday.
Petersburg.—The body of Mr. Bradley, who was drowned last Sunday, was found on the 30th, floating in the river near Rabbit Hash. The inquest was held by Esq. Thomas Stephens. Shearing sheep planting corn and election evening are about equally dividing the attention of the people in this vicinity.
Rah for Green
William M. Green, Jr., comes forth in the News today with his formal announcement as candidate for this district for delegate to the Constitutional convention. The district is made up of Ohio and Deane counties. The announcement will prove a big item to Mr. Green's many friends, but few persons have known that he entertained a thought of entering the race.—Rising Sun News.

Loss Through Petty Thievery

The annual loss to the British army thru petty thievery and pilfering of stores and supplies has been estimated at \$25,000,000. Some account of the manner in which this huge sum disappears is given by the Auditor General of Army Accounts.

The supervision of the Auditor General does not extend to cases in which waste has occurred thru carrying out some approved policy. He is concerned only to point to the leakage which occurs in matters carried out contrary to or without proper sanction. He is therefore touching only the fringe of the waste, but the cases he cites cover a wide field.

The Thirty-sixth Division Ammunition Column had a lot of mules picketed at Bordon Camp in soil that was too sandy to dig the picketing gear. One night the mules broke loose and \$5,000 worth of mules were never recovered. A lot of horses mysteriously disappeared at Aldershot, leaving a deficit of \$30,000. A civilian forger at Romsey carelessly gave 13 horses an overdose of sulphur and the horses died—loss \$4,000. Pistols worth \$1750 were lost on the way to Egypt. Troops smoking in a barn in France set fire to the barn and destroyed \$2,000 worth of straw.

Plowing up Their Wheat

Much of the wheat in Carroll county was frozen out the past winter and farmers are breaking the land to put in corn or tobacco.—Carrollton News.

A Horrible Disease

We learn from an exchange that a terrible disease has broken out in the south and is coming north at an alarming rate. The progress is estimated to be fully 20 miles a day. It attacks every family in its sweep with more or less severity. It has not proven fatal in any instance, so far, but the effects are as distressingly unpleasant while they last. A remarkable feature is that it effects differently the members of the family, although all suffer tortures from its presence in the household. It affects the brain most seriously in women, and the stomach of men. Women afflicted with it are nearly insane, and unlike most contagious diseases, the doctors say the victims are liable to another attack at the same season next year. They tear off wall paper, throw dirty water over everything, sling rags, dirt and feathers, and create a domestic hell. It is called the housecleaning fever.—Ex.

UNEXPLODED BOMB

Found Under L. & N. Bridge Over Bank Lick Creek in Kenton County.

What is supposed to have been an attempt to blow up the L. & N. bridge across Bank Lick creek, in Kenton county, was discovered by a section hand last Wednesday morning, when he found an unexploded bomb beneath the bridge. R. F. DeMoisey, Walton rural mail carrier, who was a gunner's mate in the Navy in 1902, examined the bomb and pronounced it the real thing, and capable of a terrific explosion. From some cause the infernal machine had not exploded. No guards had been on duty at the bridge.

What is Man?

What is a man? How much is he worth from a scientific standpoint? According to one way of looking at it a man is worth about \$24 a day from his shoulders down and anywhere from \$2,000 to \$1,000,000 a year from his shoulders up. This may be said to be the estimate of the average successful business man. The scientist, however, looks at the question from another angle. According to him a man is worth \$24 for his lungs, \$100 for his stomach, since a man weighing 150 pounds contains about 3,500 cubic feet of oxygen, hydrogen and nitrogen. It is in this constitution, which at 70 cents per 1,000 cubic feet, equals the price above. Also a man contains enough carbon to make a 300 lead pencils; enough phosphorus to make 400,000 matches; enough to fill 500 persons, and enough water to kill a thirty-eight quart reservoir. Furthermore, it makes no difference how sour a man may look he contains about 10 lumps of sugar, a great deal of starch, chlorophyll, potassium, sodium, sulphur and hydrochloric acid in his system. There are 50 grains of iron in the blood of an ordinary man enough to make one spike large enough to hold his right leg. What is a man? This is the somewhat cynical answer of one scientific man: "Break the shells of 1,000 eggs into a huge pan or basin and you have ingredients from which to form him from his toe nails to the most delicate tissues of his brain."—Popular Science Monthly.

The Size of Jupiter.

If Jupiter were cut up into 1,300 pieces, each would be larger than the earth. All the planets together do not weigh as much as Jupiter. Only the sun surpasses Jupiter in size. A year on the planet of Jupiter is equal to 12 of our years. Jupiter is 10 times the axis in less than half the time of the earth, but because of the planet's enormous size, the rotation speed is much higher. While the earth travels seventeen miles a minute, Jupiter travels 46 miles a minute. If Jupiter turned on its axis a little faster it would burst as some flying wheels do when they exceed a safe speed. Jupiter may be regarded either as a de-caying sun or a developing earth. He has not yet had time to cool. He is a great globe of gaseous and molten matter—the most extraordinary planet in the entire solar system.—Rochester Post-Dispatch.

An Interesting Volume

The Recorder is in receipt of a volume entitled "The Floods of July 1916." It is the Southern Railway Organization Met the Emergency. It is profusely illustrated, the fine pictures conveying a most vivid idea of the devastation the flood caused to towns and railroads in its path than was possible for pen to create.

Was Pleased with the Farmers

Hon. R. E. Brown, on his recent trip to North Dakota, was much impressed with the method of farming as practiced in that country, and especially thru the State of Wisconsin. Some of the great improvements in the system over those that have long been in practice here he will institute on his farm this year.—Warsaw Independent.

BURLINGTON HIGH SCHOOL

Invited to Compete in Tri-State Track Meet at Miami University Oxford, Ohio.

Burlington High School is one of 200 high schools to receive an invitation to compete in the Tri-State Track Meet at Miami University, Oxford, Ohio, on May 12. The local boys can enter one of the two meets which will take place on that day, one meet being called a "Championship Meet" and the other a "High School Meet." The reason that Miami is offering two meets this year is because they do not wish to force boys from small schools to compete with those from larger schools, so those who do not wish to enter the Championship Meet can compete in the High School Meet with boys from other small schools. The schools winning these meets will receive handsome shields and the point winners will receive gold, silver and bronze medals and ribbons. According to the arrangements one school may enter both meets but one contestant may not enter both meets. Those who wish to enter one of these meets must register before May 7th.

The Burlington boys entering the meet will be guests of the University and will be shown every courtesy and attention. The University is making big preparations to entertain the boys, enjoy themselves while in Oxford, as well as to run off the meet in such a way as to be fair to all. Those who arrive in Oxford the night before the meet will be entertained at Fraternity Houses. The events of the day are: 220 Yards, Pole Vault, 100 yd. Dash, One Mile Run, 220 yd. Dash, 440 Yards, 880 Yards, 1,760 Yards, 3,520 Yards, 5,280 Yards, 7,040 Yards, 8,800 Yards, 11,200 Yards, 14,080 Yards, 17,600 Yards, 22,000 Yards, 28,000 Yards, 35,200 Yards, 44,000 Yards, 56,000 Yards, 70,400 Yards, 88,000 Yards, 110,000 Yards, 140,800 Yards, 176,000 Yards, 220,000 Yards, 280,000 Yards, 352,000 Yards, 440,000 Yards, 560,000 Yards, 704,000 Yards, 880,000 Yards, 1,100,000 Yards, 1,408,000 Yards, 1,760,000 Yards, 2,200,000 Yards, 2,800,000 Yards, 3,520,000 Yards, 4,400,000 Yards, 5,600,000 Yards, 7,040,000 Yards, 8,800,000 Yards, 11,000,000 Yards, 14,080,000 Yards, WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Send your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

The Walton Electric Light plant received its large engine last Saturday.

Mrs. M. C. Kirk of Mayville, was the guest of her sister Mrs. C. C. Rankins last week.

George W. Sanders of Ludlow, spent the past week here with relatives and friends at his old home.

O. C. Powers and little son, of Verona, were here Monday consulting with a doctor relative to the boy's health which has been poor for some time.

Mrs. Margaret Cloyd of Chicago, spent the past week here on a visit and was the guest of her cousin Miss Graham R. Piner, 23 years old, and Miss Leona Conley, 21 years old, both of Piner, were married in Covington, last Saturday.

Mr. A. N. Jones spent part of last week in Louisville attending the State convention of optometrists, and visiting his brother Dr. R. M. Jones.

Dr. R. M. Jones of Landing, was here Monday enroute to Dawson Springs Hopkins county, to attend the annual session of the Grand Lodge of the Modern Woodmen of America which meets there this week.

Contractor Geo. P. Nicholson is rapidly completing the parsonage of the Methodist church, and it will be a very handsome and comfortable residence for the pastor of the church, and will beautify that section of the town.

Dr. J. W. Stapleton of Youngstown, Ohio, spent part of the past week with his mother Mrs. Anna C. Stapleton on the farm near town. Dr. Stapleton has opened a dental office at Youngstown and is having a very profitable practice.

J. Cloyd Powers severely cut his foot with a grubbing hoe last Friday, and Dr. J. F. Daugherty was obliged to take several stitches to close the cut. Mr. Powers is using crutches but expects to recover the use of his foot in a short time.

Rev. Roland A. Nichols of Ohio, began his "Campaign of Christian Unity" at Walton Christian church Sunday evening, preaching to a large sized congregation. The services will be held every day until May 10th and good results are expected.

Mr. and Mrs. Oswald E. Peterson who have been here on a visit to her father Chas. L. Griffith, left Monday for Zion City, Ill., on a visit to his parents, and will then go to Downey, Utah, where Mr. Peterson has extensive ditching contracts and expects to remain until fall.

The Bracht Farmers' Club will have a meeting Saturday night, May 4th, at the Bracht school house, when Mr. Davis, of Danville, the agricultural agent of the Q. & C. Railroad, will deliver an address that will be of importance to the farmers of this section. Every body invited.

Dr. William E. Sleet, of Midway, Woodford county, was here first of the week visiting friends, and spent part of the time at Burlington arranging for the sale of the real estate of his mother who recently died, the property being located near Verona, and is to be sold at decretal sale in place of dividing the land among the heirs.

The sale of personal property at the farm of Mrs. Mary Ryan near Beaver, took place Saturday, well attended, but prices ranged low for most of the articles. Mrs. Ryan who recently returned from St. Elizabeth hospital, Covington, is much better and her recovery from the fall sustained some time ago is gradually improving.

Her condition, her daughter Mrs. Patrick Riley and three sons of Gallatin county, spent part of last week with her.

Omer B. Johnson of Crittenden, and J. B. Woolery of Falmouth, who own the Ridgeland Stock Farm near Crittenden, were at London, Ohio, last week attending a big sale of cattle and bought two dual purpose bulls for service at their farm. The investments they are making in high bred stock will make a great improvement in the live stock of this section as it is not only developing the breeding of a lot of first class stock but it is awakening the farmers to the necessity of getting the high class kind on their farms.

During the past week several of our young men have made application for enlistment in the service of Uncle Sam in the war with Germany. Charles Campbell and Vernon D. James want service in the signal corps, in the aviation department and Elmer Roberts and Ben K. Johnson want to go in the infantry. It is believed all will be accepted. Quite a number of other boys in this locality indicate a desire to serve their country in the impending struggle, and it is believed that all who can pass the physical examination will be given the opportunity.

Died—E. Guy McElroy, aged 42 years, at Indianapolis, April 22nd, after an illness of about a week, from pneumonia. He was the son of Thos. McElroy of this place and was born near Walton. He married Miss Phoebe Smartt of Sanders, and the wife and a daughter of twelve survive him, besides his father and four brothers, B. E. McElroy of Walton, L. C. and Geo. W. of Indianapolis, and John McElroy of Harrodsburg. The remains were interred in Crown Hill cemetery, Indianapolis, after service by the pastor of the Christian church of which he was a member, the funeral taking place at the Baptist church.

Died—Fred E. Nixson of Walton, Miss Malinda Mudge Muncie of Boone Springs, were united

in the bonds of holy wedlock last Sunday in Covington. The pretty bride is a daughter of Mr. and Mrs. Woodford R. Miller of Big Bone Springs and formerly carried the mail between Walton and Hamilton, but for some time past she has been filling a position in a large dry goods store in Cincinnati. The groom is a son of Wm. Holden of Walton, and has a good position in a manufacturing plant in Cincinnati. He is a moral, upright young man of industrious habits and will no doubt make a good husband. The best of good wishes of many friends is extended to the young couple.

There is no question that the General Staff disapproves any suggestion that American forces be sent abroad until they are fully trained and equipped for the task before them, with the exception of final touches to be given behind the battle lines. That has been made evident by testimony given by many staff officers before congressional committees within the last two years and by the Administration selective draft bill, under whose provisions no element of the army—regular, national guard or conscript—would be ready for service for many months.

So far as volunteers are concerned, there has been no indication that the Administration would favor the proposal that a separate provisional volunteer army be raised for early service in France. The Administration maintains that it does not include any such provision, although the request of Colonel Roosevelt to organize a

Chiefs Oppose Sending Army to Europe

Washington, April 30.—With the judgment of the French War Mission and the American Army General Staff seemingly in conflict as to when American troops should be sent to France, particular interest attached to a conference at the White House today between President Wilson and Rene Viviani, head of the French mission.

Decision rests with the President through his constitutional function as Commander in Chief of the United States army. It was generally assumed that the views of the French officials, disclosed in Marshal Joffre's statement yesterday advising that American forces be sent to the battle front soon, were formally presented to Mr. Wilson during the conference.

There is no question that the General Staff disapproves any suggestion that American forces be sent abroad until they are fully trained and equipped for the task before them, with the exception of final touches to be given behind the battle lines. That has been made evident by testimony given by many staff officers before congressional committees within the last two years and by the Administration selective draft bill, under whose provisions no element of the army—regular, national guard or conscript—would be ready for service for many months.

So far as volunteers are concerned, there has been no indication that the Administration would favor the proposal that a separate provisional volunteer army be raised for early service in France. The Administration maintains that it does not include any such provision, although the request of Colonel Roosevelt to organize a

division for immediate duty abroad was on file at the War Department when the bill was from

Stripped of all military pros and cons the proposal made by Marshal Joffre and apparently supported by members of the French mission, is understood here on providing that a small force of American troops, possibly a division numbering from 18,000 to 25,000 men, be sent at the earliest possible moment to French soil for the sentimental effect its presence would have, both upon the French and the German. Admittedly, no American forces that will be available for months could greatly influence the military situation by force of arms, and so virtually the only effect would be the moral influence on the minds of the French people, on the one hand, and the German soldiers on the other.

On the other hand stands the often repeated military precept of the General Staff that no one can be considered fit for even defensive warfare until he has had more than one year of intensive training. For offensive operations the tariff has held with the military experts of other nations that two full years of discipline would be required.

On one point there is complete agreement between Marshal Joffre and the American officers; both believe that any force sent to France, large or small, must be given additional training on French soil behind the battle lines before it should take its place in the trenches.

Orrible Weather

The weather the latter part of last week was such as to cause the hope that it was snow, hail, winter and the blackberry drizzle combined.

RABBIT HAS!

P. W. Nelson is quite sick. Geo. Banger, of Rising Sun, was here Sunday.

Gid Kite, the Waterloo merchant was here and at Rising Sun, Saturday.

Will Craig and family, of Rising Sun, were Saturday guests of Mr. and Mrs. R. M. Wilson.

Henry McKay and wife, of West Va., were here last week, looking after their farm in East Bend.

County Engineer C. W. Goodridge and O. P. Phillips, of Burlington, were business visitors here last Thursday.

Dr. and Mrs. Carlyle and Mr. and Mrs. S. N. Riggs were stopping in Cincinnati last Wednesday making the trip in the Doctor's new auto.

We have two motor trucks making regular trips from here to Cincinnati, and most of the shipping to and from this place is now done that way instead of by river as formerly.

The ferry boat, out of commission having been beached and is being thoroughly over hauled and extensive repair made. Paul Demarath, Hade Hodges and Lee Stephens are doing the work.

FRANCESVILLE.

Mrs. Sarah Scothorn is numbered among the sick.

W. H. Eggleston and wife spent Sunday at J. S. Eggleston's.

Chas. Beall, Sr., and wife were Sunday afternoon guests of Chas. Scothorn and wife.

Miss Sadie Riemann, our popular school teacher, attended the K. E. A. at Louisville, last week.

Will Goodridge and son, Chester of Hebron, were calling on relatives in this community Sunday.

B. F. Eggleston and wife, of Hebron, were Sunday guests at T. B. Eggleston's.

Frank Estes and Miss Adella Scothorn spent the week-end with Chas. Baker and family near Butler.

John Muntz, wife and children, and Miss Kathryn Estes, called on Chas. Muntz and family Sunday afternoon.

Graham Markland, of Cincinnati, was the guest of his mother, Mrs. Nellie Markland, Saturday night and Sunday.

Misses Mary and Florence Eggleston entertained Misses Lucille Eggleston and Rachel and Lila Collier, Sunday.

Harry Kilgore and wife entertained Frank Ayler and wife of Hebron; Manlius Goodridge wife and son, Raymond, Sunday.

BELLEVIEW.

J. G. Smith has a five passenger Ford.

Bernard Rogers will build a large barn.

Mrs. John Smith, Jr., has been ill the past week.

Mrs. Ed Parsons was the guest of Mrs. Belle Cason, Monday.

John Sullivan and wife were Sunday guests at Lewis Rebers.

Lewis Rebert and family spent last week with his sister in Aurora.

Will not go back to the Churn as Long as I Sell Cream to the Tri-State Butter Company.

CINCINNATI, OHIO,

SAYS MRS. CHRIS SCHNITZER

It won't be a year until the 6th of June since we went into the cream business. We only milk six cows and have sold \$288 worth of cream. I would not go back to the old time churn as long as I can sell cream to the TRI-STATE BUTTER CO.

I just love to send our cream to the TRI-STATE, and it saves the hard labor on a woman of working butter in the summer!

TRY SELLING YOUR CREAM TO The Tri-State Butter Co.,

Capital Stock \$75,000. Cincinnati, O.

We are buying cream direct from over 20,000 farmers. No commission agents or commission men take a profit off our cream.

Phone S. 1540 COVINGTON, KY.
Built by THE MUTUAL MOTORS CO., Jackson, Mich.

You get a lot of satisfaction out of your individual tailor made clothes—

They are distinctive, because they are the product of special and distinct effort—

You will experience the same sort of satisfaction in the possession of a Marion-Handley.

The Six Pre-eminent is individual and distinctive in every line and curve—in its grace and beauty—in its superb finish. Each car has the look—the touch and the atmosphere of the unusual.

When will you come in and pass judgment on it?

"THAT GOOD STORE ON THE PIKE"

Announcing a New Service for The People of Boone Co. and Vicinity.

A great number of our customers who have been unable to visit our store as often as they liked, have sent us a number of mail orders from time to time, but not having the right kind of equipment for this class of business we admit we did not give them the proper attention at that time. We are in a position now, however, to give our customers immediate service on all mail orders—that is no matter whether you live in Burlington or Walton you will get your order the same day we receive it, and, besides, we prepay postage on all mail orders. If you don't see what you want in our ads, write us and we will mail it to you with privilege of returning if not satisfactory. Do not send CASH through the mail—use P. O. MONEY ORDER or SEND CHECK.

Quigley & Beemon,
Lima, Ky.

The Fine Percheron Stallion,

PRINCE OLSEN

Will make the season at my farm two miles from Walton, Ky., at \$10 to insure a living colt.

Prince Olsen is a beautiful black and is a model in his class, and is one of the best breeders in Kentucky. He weighs 1,700 pounds, holds a high head, and has short coupling and good action. He has taken a number of first premiums at the fairs.

At the same time and place my two fine big Jacks

BEN AND DEWEY

Will make the season at \$10 to insure a living colt. They are two of the finest Jacks in Kentucky, and both are excellent breeders.

Persons parting with mares forfeit the insurance money. A lien is reserved on the colt until the season is paid.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

Take Your County Paper.

Local Happenings.

Ready to Plant Corn

Several farmers in this county were ready to plant their corn last week but had to postpone the work on account of unfavorable weather.

Lightning Rod Needs Repairs

The lightning rod on the court house cupola is broken, the break having appeared a few days since, and is at a point where the work of repair will be somewhat dangerous.

Beautify a Little for a Change

The property owners in Burlington who have no lawns in front of their premises can add much to the appearance of the town by preparing seed beds and sowing seeds thereon.

Has Planted His Corn

Eli Borders, who resides in the Pleasant Valley neighborhood, finished planting corn about the middle of last week, probably the first farmer in the county to complete that work this year.

The Mail Delayed

The mail was delayed in its departure from the Burlington office last Friday afternoon. The automobile in which it was to be taken went dead and another machine had to be secured.

Lambs in Thriving Condition

As a rule lambs in this thriving condition in Kentucky and will be ready for the market early although the larger part of them will not be ready until the latter part of June or July.

Will Organize Red Cross Aux.

A meeting will be held next Saturday at 2 p. m., at the Baptist church in Burlington for the purpose of organizing a Red Cross Auxiliary. Every lady who can be earnestly requested to attend the meeting.

Young Alphin Joined Marines

H. L. Alphin, son of Hon. A. L. Alphin, of Ryle, Gallatin county, has joined the Marines, and is located at Port Royal, South Carolina. He will have the Recorder as a weekly visitor while he is in his country. One of Mr. Alphin's other sons served in the Spanish-American war.

Supt. Riley May Resign

County Supt. of Schools Edgardo C. Riley, contemplating resigning his office to take effect the first of September. His idea is that by that time it will be settled as to who his successor will be, and he can be appointed to fill the vacancy, thereby beginning his official work with the beginning of the school year. It is understood that he will not be obliged to enter upon his duties at the beginning of the school year, but Mr. Riley is under no obligation to resign his office to give his successor that advantage.

Morgan Beemon Dead

Morgan Beemon, 70, son of the late Jordan Beemon, died at his home in Hopefield neighborhood last Friday. The funeral took place at Florence last Sunday. Rev. Royer preaching the sermon in the presence of a very large congregation of relatives and friends. Mr. Beemon had been complaining recently but was taken worse very suddenly and died before medical aid could be secured. He is survived by a widow and several children. Mr. Beemon was one of the county's good citizens and had a large circle of friends and relatives.

A Very Good Suggestion

W. W. Grimsley, who resides at the mouth of Big Bone creek, called the Recorder the other day and suggested that a meeting be held in Burlington next Monday, county court day, for the purpose of endorsing President Wilson's war program. This has been done in many cities and counties. Mr. W. W. Grimsley thinks Boone county should come to the front with a declaration of her loyalty to the President and the country, and he would be glad to see all who think as he does on the subject in Burlington next Monday.

A Pioneer Calls on the Recorder

Uncle Bert Johnson, of Erlanger, spent several days the past week with his grandson, Raymond Johnson, who resides on the P. T. Gaines' farm out on the Petersburg pike. Mr. Johnson is in his 81st year, can read without his glasses but his legs are bad. He was born and raised on a farm in this county about equidistant from Beaver, Verona and Walton, and remembers very distinctly a very little cleared land in that part of the county. He is the only survivor of ten brothers. Uncle Bert called on the Recorder Monday afternoon.

Sealed Bids Will Be Received

Sealed bids will be received by the Clerk of the Board of Trustees of the Town of Burlington, until Wednesday, May 9, 1917, at 1 p. m., for 200 gallons of road oil spread and applied on the streets of said town. The streets to be designated by the Committee on Streets. The oil to be spread and applied on or before May 19, 1917. Bids to be accompanied by certified check for \$25. The Board of Trustees reserves the right to reject any or all bids.

R. W. DUNCAN, Chairman.

NEWTON BULLIVANT, Jr., Clerk Pro Tem.

A SMALL CYCLONE

Visited Burlington About Seven O'Clock Last Monday Evening and Tore up Jack.

Shade Trees Disfigured, Buildings Partially Unroofed, and Chimneys Razed, Etc.

About seven o'clock last Monday evening a streak of wind passed through a portion of Burlington that tore many limbs from the shade trees, unroofed S. J. Adams' chicken house and a portion of Edgar Riley's barn, blew the chimneys off of some residences and carried some small out buildings from their foundations. A large pine tree in Edgar Riley's yard and two apple trees at Charles Westaby's were uprooted while shingles were scattered about town promiscuously. The wind came from the west, and struck the central part of the town from west to east. Many of the citizens were surprised Tuesday morning when they came to the central part of town and saw evidences of a small cyclone having passed that way the evening before.

Confidence in France,

We would hardly ask for more decisive evidence of the confidence of the French people in their belief that they are permanently driving the invaders of their country back east, at least beyond their own original boundary lines, than is found in the recent confirmation of report of a great movement of theirs in building temporary homes for thousands of year or more ago we heard of contracts for production from the forests of our Northwestern Pacific country, or thousands of two-room wooden houses to be framed, transported to France and placed temporarily as rebuilt there within lines already considered safe from invasion, for shelter of refugees from devastated districts.

Not only have we confirmation of this report of a year ago, but in addition the definite statement that a firm of New York bankers has been commissioned by the French government to provide for reconstruction of many buildings of fine architecture in several cities, as in Verdun, which have been destroyed by heavy bombardment, and in the Argonne and Meuse campaigns. The first contract calls for an expenditure of \$100,000,000, or more, for the beginning of this rebuilding.

American capital and energy are to provide for expenditure of vast sums of French gold in replacing many of the edifices in the territory which has been recovered, from the invaders. A Government commission at Paris has worked out the plan and the Bank of France will finance the enterprise.

Nothing could more strikingly illustrate the recuperative power of the French nation, following the awful sacrifices of the French people, than this evidence—one of many evidences of their emergence from horrible disaster, and this is another sign of supreme confidence in France that there is no danger that the foe can "come back."—Ex.

Plant Bed News.

In Bath county the crop will be somewhat curtailed. The recent frost in Nicholas county did not injure the plants which are growing rapidly.

Plants in Bracken county are coming up nicely, and some growers are still sowing beds for late setting. In Fayette county plants have grown up to a good size, but the cool weather of the past week retarded them to a certain extent.

Tobacco plants are coming up nicely in Jessamine county, and the acreage will be large although growers are planting more corn than they did last year.

The warm weather last week put the growers of Montgomery in an excellent humor and enabled them to finish up all work of sowing, and those whose beds had already started to grow had the opportunity to weed. This warm weather gave planters good opportunity for growth and development.

TO THE LIVE STOCK SHIPPERS

OF BOONE COUNTY, KY:

I beg to announce that on April 16, 1917, I organized a Live Stock Commission Business under the firm name of Wagers, Conner, & Company.

I have a thoroughly competent and experienced staff of salesmen and buyers in all departments, who will look to the shippers' interest at all times, and I will guarantee that all consignments will be properly fed and watered before crossing the scales, and sold to the very best possible advantage. "Service and Fair Play" are our Watchwords. For good live stock consignments to shippers to Wagers, Conner & Co. Trusting to be favored with your business.

We remain Respectfully Yours,

A. B. WAGERS,

KIRBY CONNER.

The H. School graduating class is sending a list of which is preserved for future reference.

STATE SENATOR EXPELLED FOR WORDS ABOUT WILSON.

Wisconsin Socialist Say He Was Not Given Fair Hearing.

Madison, Wis., April 26.—Frank Raguse, Socialist member of the State Senate from Milwaukee, was expelled from that body tonight for having made what thirty of the thirty-three members believed were unpatriotic remarks on the floor of the Senate last Tuesday. The remarks were made in course of debate on a resolution to print and publicly distribute fifty thousand copies of President Wilson's "state of war" message. Raguse objected to the measure and declared:

"This resolution is to create patriotism, but it will not do it. You cannot create patriotism in a country where 85 per cent of the people do not own land. The way to create patriotism, as I understand it, is to do as was done when the Maine was blown up from the inside and property and lives both were destroyed. In order that the members of the Maine should be heralded over the country and the people would be aroused to patriotism."

Before the adoption of the final resolution Raguse declared he had not been given a fair hearing and challenged "any able-bodied man."

The remarks were made in the U. S. army with him and there prove their patriotism.

Raguse, who is 32 years old, said he would be a candidate for reelection.

In the Recorder's mail one day the past week two letters and a post card were received, each being from a subscriber in arrears on subscription. Each of the letters contained a check for the arrearage and an expression of the subscribers' appreciation of the indulgence; but not one with the post-card, which was a cold request to "not send it any longer." A notice of the date of any intention to pay what is owed. There is no excuse for not keeping the amount owed on subscription as the paper contained each week for the whole period of arrears; a notice of the date to which it was paid for. Even once in a while a subscriber with no appreciation of indulgence is discovered, a list of which is preserved for future reference.

The Stigma Removed

The passage of the Selective Draft Bill removes the stigma from the name of the drafted man. When conscription is resorted to after everyone who is willing to serve has volunteered the drafted man is not always a slacker. He may be one who is patriotic and brave, but whose divided allegiance has inclined him to the view that he owes a duty to his dependents that may not be overlooked, or one who believes sincerely that he is doing more good at home than he could do in the firing trench. But when the army making begins under the draft system no man is dishonored or discredited by the draft. The drafted man is a selected man. He is chosen because he is wanted, and not drafted because he has not shown willingness to serve.

The duty of drafting young men for military service is not one which Americans undertake with complacency. There is little romantic interest in war nowadays. The minds of exceptional and adventurous spirits to whom all excitement and all opportunities for patriotic service are romantic. A very considerable majority of Americans look upon war as a condition wholly undesirable, and upon military service as a hardship, not without consolatory phases, and not without the reward of consciousness of doing one's duty courageously and uncompromisingly, but nevertheless a duty less desirable than the duties of peace. To have to send men to war is lamentable, but to allow them to go as volunteers unprepared would be more lamentable.

The principle of the selective draft includes no assumption that the average man eligible for military service will not volunteer. When the selection of men begins no man who is called to the colors will go feeling that he cannot support the uniform of his country and march behind its flag in the serene consciousness of patriotic service.

In the war with Germany the drafted man will be a man who was chosen because of fitness. Those who have volunteered, or who will volunteer before the draft begins will have the right to rest with pride to the fact, but there will be no rush to volunteer that account, regardless of one's circumstances, which will be a terrible and cruel thing.

ENLIST NOW!

We want you to enlist in the army of satisfied Chevrolet owners. We will be in Burlington all day Monday, County Court Day, to show you the new 1918 Models;

Roadsters \$535.

Touring Car \$550

F. O. B. Flint, Mich.

We will also have some used cars for sale.

Come around and look them over.

L. A. BENTLER, B. B. HUME.

L. A. BENTLER, Sub-Agent, Erlanger, Ky.

The Mail Order House.

When the catalogue comes from your mail order house draw any easy chair to the table where the light will shine full upon the page and put on your glasses that no bargains may escape your eye. What a wonderful book it is to your depot? How much tax will they pay to support your schools and educate your children, for improving roads and bridges, the support of the poor of the county, for exposure of running the business of township, county and State? On what page is their offer to contribute money to the Church? What line of credit will they extend to you when your crops are poor and money gone, when through illness and misfortune you are not able to send cash with order for your groceries, clothing, farm tools and cookery? Where is their offer to contribute to your entertainment next year? But they do it best year? In short, will they be anything to

provide a market for what you have to sell, and, thereby, keep up the value of your estate? Will they do anything for socials, churches, schools, or government support, or do they take your dollars out of the community with no return except the goods you buy, and do they give you any better goods for the same money than your home merchant?

For Sale—Two quarter Holstein heifers with 4-weeks old calves; three good horses unbroken, Draft stock, Ben F. Bedinger, Richmond. For Sale—Eight stock hogs—will average 100 pounds or more, Elmore Ryle, Burlington R. D. 2. For Sale—Four sows and pigs, William Stephens, Petersburg. For Sale—Sow and pigs, Ralph Z. Cason, Petersburg R. D. 1.

Lost—Pink Camo stone either in or between the Baptist church and Mrs. Nannie Maurer's residence in Bellevue, Findler please notify Gwendolyn Goodridge, Burlington, Ky. Phone No. 138.

For Rent—Blue Grass pasture on Gunpowder creek, known as the old Wilson farm. Address L. W. Stephens, 410 Columbia Ave., Lexington, Ky.

For Sale—Fresh cow and calf, Edgar Herkshire, Burlington R. D. No. 1.

A Week's News

Next Monday is county court day.

Don't fail to see the haymakers at Burlington May 11th.

The storm Monday night carried off the Recorder's flag.

Warmer weather is needed badly to make vegetation grow. It being late in the spring.

The Boone County High School always makes its presence known in public contests in which it participates.

Prince Tobittum will make you laugh even if you are in the dumps. Don't fail to see him on May 11th.

Manley, Ryle, of Lucas Grove, and Jeff Williamson, of Beech Grove, were business visitors to Burlington, Monday.

Monday morning the farmers had visions of good weather ahead, but before noon it had begun raining again.

Just as might be expected, some of the local gardeners are telling about how fast their vegetables are growing.

If you wish to know more about your family ancestry, subscribe to Everybody's Ancestry, 708 N. New Jersey Street, Indianapolis, Indiana.

Dr. W. E. Sleet, hailing from the Blue Grass, looked in upon the Recorder, Tuesday, long enough to say "howdy." He is looking fine as a French general.

W. P. Sullivan has discovered a large deposit of something which he hopes will prove to be gold. He was over in town, Tuesday morning, exhibiting a sample of the deposit.

E. K. Stephens, of Bullittsville neighborhood, Monday, Mr. Stephens looks rather drowsy, having had a pretty good time the past winter with an attack of rheumatism.

Walton Denny came home from Lexington, last Friday, where he was attending State College. He was accompanied by some business calculated to assist Uncle Sam in his scrap with Germany.

Pepper Smith and Ephraim Clow of Bellevue, were in Burlington, a few hours one day the past week. Not being accustomed to the pure, up land air they hastened back to the river breezes and scenes.

M. F. Wingate and son, Gaines, of Petersburg, were mingling with friends in Burlington a few hours last Thursday afternoon. They were traveling in a handsome Allen runabout, for which Gaines is an agent.

John M. Finch and Frank Bauer, two prominent citizens of the vicinity of Florence, were transacting business in Burlington Tuesday, and incidentally called upon the Recorder for a glad to see you, boys, Come again.

County Attorney N. E. Riddell is in receipt of a letter from Overton Hogan, Assistant Attorney General of this State in which the opinion is given that the designation of a for Sheriff or Assessor is not in violation of law. He says further:

"It is somewhat hard to tell just what is the meaning of the Corrupt Practices Act, but I judge from its title that its purpose is to promote pure elections, etc. In order to carry out this purpose, I think the purchase of cigars, or soft drinks, or the giving of money or any other thing of value for the purpose of influencing votes would be in conflict with the purpose of the act. However, if I should be in error in regard to this construction, then in making out the expense account, under Section 4 of the Act, and also Section 6 thereof, I believe that the candidates would be required to should make out the statement of the cigars or soft drinks purchased, the date of the purchase, the amount of the purchase, and from whom purchased and perhaps the purpose for which purchased."

State News.

Newcastle.—A verdict for \$15,000 as damages for the death of Oscar L. N. killed while crossing the L. & N. tracks at Campbellburg, was awarded against the Louisville & Nashville Railroad Co.

Berea.—Berea College, with its 1,600 students from the mountains of the Southern States, has been transformed into a military training camp. A number of the students have already enlisted and practically all of the others are now drilling on the campus. Each of the five departments of the institution including the college, normal, academy, vocational and foundation, has its own company.

Henderson.—Alleged that he was arrested and placed in jail and kept over night on the false charge of stealing a package from the American Express Co. William Bellows, negro minister, filed an affidavit with the clerk of the county court for \$1,000 and the company for \$1,000 as damages. The company states that after a search of the records it found no record of a package being stolen. It found the package under a pile of bundles in the express office.

NOTICE TO GERMANS IN MEXICO

Forbids Their Concentration Near American Border
Washington, Oct. 11.—Advices to the State Department say the Mexican government has warned Germans in Mexico that any concentration of Germans near the American border will be followed immediately by their arrest.
In conveying this notice the Mexican authorities explained that they could do no less, in view of the fact that a state of war exists between Germany and the United States.
Officials of the American Government were gratified by this first practical manifestation of Mexico's proclaimed neutrality. Suggestions that the proclamation of neutrality was only a thin covering for a more friendly feeling for Germany, never have been accepted by the American Government. But knowledge of the imminent event of war with the U. S. has strengthened the German Foreign Office to Minister Eckhardt in Mexico City to do what he could to enlist Mexico as an ally in the case of developments in Mexico to be watched carefully.
President Carranza's recent decree providing a heavier export tax on oil and its derivatives has not been construed by the State Department as an intentional blow at Great Britain, but merely what the Mexican Government calls a measure to raise needed money.

Were Among the Prize Winners
The Boone County High School, Burlington, was awarded the following prizes at the K. E. A. meet in Louisville, last week: First on Business Letter and 2nd on Stencil Design, both by Miss Agnes Carver; first on First Floor Plans for School Building and 2nd on Farm Plot, both by Horace Cleveland; Second prize on tool chest was captured by Petersburg. The exhibit was larger than usual and the school to many parts of the State. The Burlington teachers are well pleased with the success of their school.

Engaging in the Poultry Business
John P. Dumeau has bought of Edgar C. Ryle the 11 acres of land adjoining the town of Burlington and the High School property, and will engage in the poultry business on rather an extensive scale. Dumeau's reputation for his attention to poultry business in which he embarks justifies his friends' predictions that he will make a success of the business. He will have land properly equipped for the poultry.

Selling Automobiles
Goode Motor Car Co., Covington, Ky., sold last week to Mr. W. H. Whitehead, a large Marion-Handley touring car; to Charles W. Pike Street, Covington, a Marion-Handley touring car; to Edward Bramlage an Inter-State 5-passenger touring car; to W. Willis, a Maxwell touring car. J. A. McDannold, a well known farm implement salesman, bought a five passenger Maxwell.

The Opera "Sylvia."
The Opera "Sylvia," will be given by the pupils of the local high school at Library Hall on the evening of May 11. This is one of the greatest things ever undertaken by the high school. If you fail to see it you will miss something worth while. Watch the Recorder for cast of characters, argument, etc.

John Barns Buys Small Farm
Thomas Rouse, of Mr. Heathly, Ohio, came over last week and negotiated a trade with John Barns, where by Mr. Barns became the owner of 41 acres of land heretofore the property of Mr. R. A. Land is about a mile northeast of Burlington, and on it is a neat cottage and all necessary out buildings.

Wind! Ranaway with a Buggy
While Mr. and Mrs. Frank Rouse were visiting the latter's parents, Mr. and Mrs. Jas. Hedges, over in the wind ran their way last week, the hill at the barn, where it was left in the lot. The vehicle was turned over twice and damaged considerably.

Will Handle More Wool This Year Than Heretofore
The wool poolers will be in consultation next Monday. The pool will handle more pounds of wool this year than ever before, and it will bring the record price to date.

Landscape Gardening
Rupert Rogers did considerable grading on the side of the street in front of his residence, and, having sowed the plot in grass seed, hopes to have a nice lawn.

An Error Corrected
Because of an error made in the report of the Farmers Bank of Petersburg published last week, the report is corrected and published again this week.

The Biggest Event of the Year
The biggest event of the year will take place in Burlington on the evening of May 11th. Watch the Recorder for particulars regarding it.

Measles Prevalent Hereabouts
Several cases of measles in the vicinity of Burlington the past week, but fortunately none of the patients approach the danger point.

For Sale—Four red yearling heifers and Holstein bull, Harry Lewis Turner, near Hopeful church.

DAIRY

WORK AGAINST CALF SCOURS
On Every Farm Measures Should Be Taken to Prevent This Disease—Many Animals Lost.

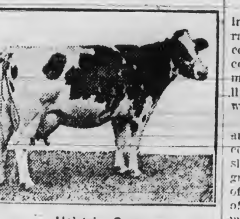

Thousands of calves are lost each year by what is known as scours, says H. H. Kildee, University of Minnesota. On every farm measures should be taken to guard against this disease, which results from a damaged digestive system.
Calves should have warm, clean, light and well-ventilated pens. Milk should be fed in regular amounts, at regular times, at a temperature of about 80 degrees Fahrenheit, from scrupulously clean pails. The foam which accumulates on the milk while it is being separated should never be fed. The time to feed the grain ration is immediately after the milk is fed, so that the calves will not suck each other's ears and thus take air into the stomach, which causes bloat and produces scours. It is well to have stanchions in one side of the pen so that the calves may be confined for a short time after being fed milk.
Each day during the winter, when the weather is favorable, the calves need to be turned out into a sheltered yard for exercise, which is necessary for their proper growth and health. It is also very important that the calves from a very early age, be given all the pure, fresh water they care to drink each day. The pens should be disinfected frequently. Quiklime is excellent to sprinkle on the floor each time it is cleaned and a frequent spraying with some standard cow dip solution will prove beneficial.

THINGS TO REMEMBER
A good grain mixture for calves is: Oats, 50 parts; bran, 20 parts; cornmeal, 10 parts; oil meal, 10 parts.
Remember to make the calf pen:
—Dry and clean; well-lighted; warm in winter; shaded in summer; free from vermin; convenient for feeding.
The dairy calf, when bred right and raised right becomes the best cow.

OLD COWS SOMETIMES EXCEL

Animal Should Be Kept Until She Fails to Give Good Profit for the Feed Consumed.

(By J. H. IRWIN.)
It is my experience that a milch cow remains valuable until about twelve years of age. My cattle are purebred Holsteins, and some have produced over 10,000 pounds of milk per year after they were twelve years old. We

Holstein Cow.

seldom keep them longer than that. All farmers that have purebred cows know their ages, and I find that the farmers in this vicinity that do not have purebred cows know the ages of their animals approximately. I have kept one or two cows until they showed signs of falling as producers of milk. This was indicated by the decrease in the milk flow, but not in the shortening of the period of lactation. My way of getting them ready for the butcher is to let them go dry, and they will fatten if in good physical condition. I think a cow should be kept as long as she gives a good profit for the feed consumed.

SWELL PRODUCTION OF HERD

Only Practical Way to Make Improvement Is by Raising Heifer Calves From Best Cows.

When the milk is sold for market milk or to a cheese factory, or a milk condenser, the problem is how to raise calves without the feed costing more than the value of the animal raised. At the same time it is a most serious mistake under these circumstances to depend upon buying cows rather than raising calves. The only practical way to improve the production of the herd is by raising heifer calves from the best cows.

FALL FRESHENING IN FAVOR

Heat and Flies of Summer Have Deteriorating Effect Upon Cows and Their Offspring.

He who will spend one of the long evenings thinking in a straight line, letting his mind revert but a few moments to recall the effect the heat and flies of last summer had upon his cows that freshened last spring, will make a vow that will profit him greatly in the future.

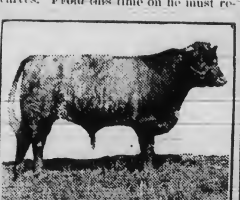

DAIRY

GIVE HERD BULL ATTENTION
From Birth He Should Be Given Best of Care and Feed to Make Maximum Development.

(By W. W. SWETT, Missouri Agricultural College.)

It is a well known and very true saying that "the sire is half the herd," yet this important "half" seldom receives the attention he deserves.
From birth, the bull should be given the best of care and feed in order that he may make the maximum growth and development. He should receive plenty of skim milk and grain and be treated as well if not even better than the heifer calves.

At the age of five to six months he must be separated from the other calves. From this time on he must re-

First Futurity Shorthorn.

ceive regular exercise and must be gently handled. When he is ten to twelve months of age he may be given light service—possibly one cow every three or four weeks. From the age of twelve to sixteen months this service may be increased to one cow per week.

A satisfactory feed for a mature bull is alfalfa or clover hay and a grain mixture of corn, with oats or bran. A bull must have plenty of exercise. He does not need to be housed in a warm barn but is kept in the best condition when given a dry but open shed with a paddock attached so that he can go in or out at will.
Every mature bull should have a ring in his nose. There is some difference of opinion in regard to debossing but it is always safer to handle a bull without horns.

DAIRY COWS RELISH SILAGE

In Feeding Test 17 Per Cent More Milk and 28 Per Cent More Butterfat Obtained.

Cows fed a ration composed largely of silage produced 17 per cent more milk and 28 per cent more butterfat than those given a ration consisting mainly of grain in a feeding test conducted for 121 days at the Ohio experimental station. The silage ration was also cheaper for milk production.

The cows gained nearly 8 per cent in milk yield when put on the silage ration. They produced butterfat at a cost of 13 cents a pound, while the cost of a pound from the cows fed mainly grain was 22 cents. There was little difference in the gains in live weight between the two lots.

In addition to 58 pounds of silage and 6.8 pounds of hay the cows lot received only four pounds of grain consisting of oilmeal and bran. The grain-fed lot received only 12 pounds of corn stover and hay but 13.5 pounds of a grain mixture of oilmeal, cornmeal and bran.

ESTIMATED VALUE OF COWS

Total Yearly Product of \$66.09 Given by New York College of Agriculture—Cost of Keep.

Estimates on the value of the average dairy cow's product in New York state, made by the college of agriculture, give a yearly total of \$66.09. Costs of maintaining her are estimated at \$61.85, not including the cost of labor. The difference, amounting to only \$4.24, would give to the man who cared for 20 cows a yearly wage of \$85, which is less than the lowest wage paid to ordinary farm labor.

SECURE BEST COW POSSIBLE

If One Cannot Get Good Animal, Then Take an Ordinary One—Get a Start Somehow.

Get a good dairy cow if possible. If one cannot get a good cow, then get an ordinary cow, one that is healthy, one that will breed, and then try to get her mated to a good bull. If one cannot buy a cow giving milk, then buy a heifer. If a heifer cannot be purchased, then buy a heifer calf. Get a start somehow.

DISEASE OF LITTLE CALVES

Keep Youngsters Away From Cold Drafts and Protect Them in Dry, Well-Bedded Place.

Pneumonia is a common disease of little calves. The cold nights that come so suddenly and unexpectedly are the chief causes.

Keep the little calves away from cold drafts and protect them in a dry, well-bedded place during the cold wet nights. Prevention is better than cure. Only a few recover.

WOMEN TEACHING IN FRANCE.

It is estimated that 15,000 women have entered the teaching profession in France since the beginning of the war, taking the places of men both in primary and advanced schools. It was a decided innovation, for men had almost uniformly been the teachers of France. The women are said, however, to be giving entire satisfaction in their new work. In the universities the entrance of the students into the war so reduced attendance that the classes could be provided for by the older members of the regular teaching staffs, and women have not been needed there. This is another field in which the war brings about a revolution, says Indianapolis Star. In France, England and Germany women have entered the industries and occupations heretofore monopolized by men to an extent not formerly dreamed of and have met the requirements. It appears now that they are doing professional work that is expected of women as a matter of course in the United States, but which in France means a decided social and educational departure. It is not to be expected that the women will all retire from these callings when the war is over, or that their retirement will be desired, except in certain heavy lines of manual labor. New ideas, new methods, new growth, will be one of the results of this change of customs—an outcome of the war not looked for.

Among the new industries developed in the United States on account of the European war is that of supplying hydroids for the trimming of women's hats. Hydroid is an animal growth originally found on the bottom of the Baltic. Dried and treated chemically it makes a fluffy decoration employed in the millinery trade. When the imported supply ceased, the bottom of Chesapeake bay was searched and found to yield hydroids which fishermen were glad to harvest and sell at the rate of two hundred and fifty dollars a ton. It isn't a great matter standing alone, perhaps; but as one of many new industries which have sprung up in this country since the beginning of the war it is not unworthy of note.

The Spanish capital, Madrid, is now the social center of Europe. Social activities in other capitals have necessarily been restricted or dropped practically altogether, because of the war. In Spain, however, many persons socially prominent in belligerent countries, feel that they may take part in social events which at home would be frowned upon. San Sebastian, the Spanish watering place, is crowded with French, English and Russians. The queen of Spain, formerly the Princess Victoria of Battenberg, is almost constantly hostess to many of the nobility of the fighting nations of both sides. The queen preserves neutrality so far as possible.

According to the figuring of the New York tax department in its 1917 estimate, the Grand Central station is the most valuable single property in the city. Its value is reckoned at \$21,500,000. The Equitable building and site covering the block between Nassau street, Broadway, Pine and Cedar streets is assessed at a value of \$20,000,000, and the Pennsylvania station is believed to be worth \$15,980,000, according to current values. The Metropolitan Life Insurance company building is taxed at \$12,500,000; B. Altman & Co.'s dry goods store is rated as the most valuable, at \$14,100,000, and the Waldorf-Astoria taxed at \$11,650,000, is the most valuable hotel.

Considering the number of husbands it has, this country is, after all, pretty well equipped with men amenable to discipline, accustomed to sudden blows and squalls, lured to frequent changes in the temperature, familiar with charging, able to live on bad cooking, and, without, thoroughly experienced in digging. For such as these war has been robbed of much of its terrors.

A correspondent speaking of the prisoners taken by the British in France tells of one German soldier of poor physique who went steadily for an hour and a half after capture and at the time of writing was still weeping. If they capture many more like him, they might utilize them in the agricultural districts for purposes of irrigation.

Actors who go through their parts while in the midst of great grief or suffering are lionized when the story comes out, but a paragraph can grind on all day while he cusses out his chills between jabs and not evoke one solitary yip of sympathy.

Incidentally, what has become of the old-fashioned man who used to smite himself on the chest when the argument grew warm and shout, "I'm a citizen and a taxpayer!"

The middleweight champion pugilist of France was killed while making a fight in an army airplane. It is not often that a pugilist dies a hero and a champion.

KEEP COLTS GROWING

Important Consideration in Producing Horses Profitably.

Good Horseman Endeavors to Reduce Worrying and Fretting of Young Animal to Minimum—Grain Must Be Supplied.

(By H. H. McCARTY, Indiana Experiment Station.)

To keep the cold growing without interruption during weaning time and afterward is a most important consideration in producing horses profitably. A good horseman aims to replace the milk that the colt has been accustomed to secure from its mother. He tries also to reduce the worrying and fretting of the colt to a minimum. To wean a colt appears to be a simple matter. It is simple as many do it; yet the very low degree of success that is shown on many farms by their unthrifty colts is evidence that there is something wrong or that there is something lacking. Often in a few weeks during weaning time the youngster changes from the growing, sleek, milk-fat colt to a stiff-haired and unthrifty, stunted individual. The colt, if properly cared for, need lose but little of his flesh, bloom and spirit.

Feed Some Grain.

Grain must be used as the milk is taken away. It is necessary that the colt have been taught to eat grain before weaning is attempted. Colts have always been preferred by horsemen for young colts. They are undoubtedly superior to any other single grain. The colt likes a mixture or a variety of grains and will thrive best on such a ration. He relishes corn, and it may well be fed as part of the grain ration. It may be said that corn contains a rather high percentage of fat. True, it does, and so does milk, which is as nearly ideal food as nature can make. Corn should not be fed alone, nor in too great quantities. Bran is a splendid feed and contains material for bone and muscle. A mixture of oats 60 per cent, corn 30 per cent, and bran 10 per cent makes a ration that will enable any colt to grow rapidly. A handful of oatmeal may be profitably added. Then he will be more likely to eat enough to almost make up for the lack of milk.

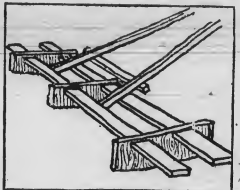

Provide Hay.

Hay should be provided in plenty. Doubtless alfalfa or clover is the most desirable for young growing colts. Both grain and hay should be of the very best quality. If it is at all possible to furnish succulent grass for the colt it should be done. This is a big factor in preventing any check in the growth of the youngster.

ROW MARKER IS CONVENIENT

Handy Device Perfected by Illinois Man to Trace Three Straight Lines—Easily Made.

A very handy marker that will trace three straight row lines at a time has been perfected in Illinois. It can be easily made by the farm carpenter who has a few tools. A single horse is hitched to it by the shafting. It may

A Row Marker.

be used in fields, in gardens and in truck patches and wherever straight rows are necessary. A study of the illustration will show how it is constructed. The three "sleds" should be placed equally distant and at the right space intervals to mark rows of the width that are wanted.

HOW TO PRUNE BLACKBERRIES

Better to Leave Some Varieties Until Blossoms Bud—Set Eldorado and Minnawaska in Fall.

In the cultivation of blackberries the preference is for low pruning, but some varieties show lack of uniformity in their manner of bearing fruit. At times most of it will be found close to the main stalk, and at other times it will be well out on the laterals. It is better to leave such varieties until the blossom buds show before pruning in order to gauge the amount of fruit which should be produced.

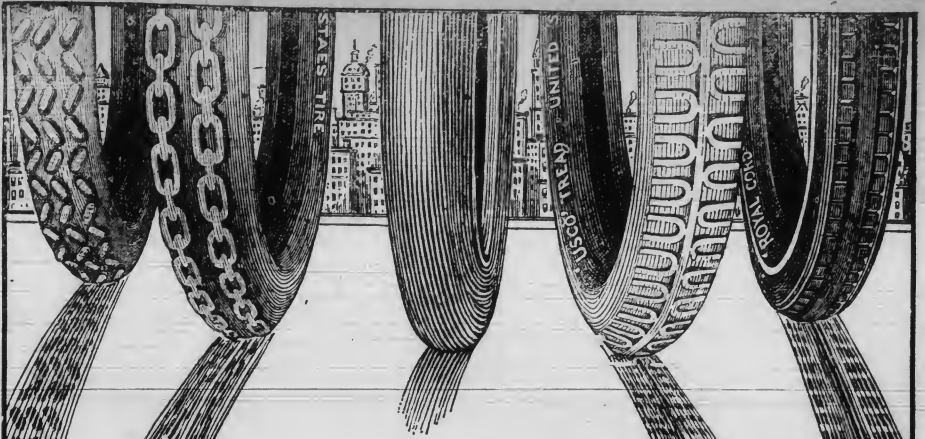

Wilson's Early sets fruit buds thickly near the base of the laterals, and should, consequently, be pruned closely on the side growth. Early harvest requires a longer pruning of the laterals. Eldorado and Minnawaska are good kinds. Plant in fall.

EFFICIENT WORK FOR HENS

They Must Be Furnished With Sanitary Quarters, Good Food and Keep Regular Hours.

Hens are much like people, after all. In order to do efficient work they must have sanitary quarters, good food, and keep regular hours.

Hens are easier to manage than people, though, because they always are glad to co-operate with you if you give them a chance.

Experience Is the Test of Tires

Every tire claims to be the lowest-cost-per-mile tire.

If you know the experience of any considerable number of other tire users,

—that would help you decide which tire makes good on the claim.

We don't know about other makes of tires, but we do know

—that motorists who have used United States Tires continue to use them;

—that more and more motorists who used other makes of tires are turning to United States Tires.

These two facts are proved by the amazing sales increases of United States Tires

—sales increases that are vastly greater than even the greater natural increase in the number of automobiles this year over last

—which shows where tire service is.

United States Tires Are Good Tires

United States Tubes and Tire Accessories Have All the Sterling Worth and Wear that Make United States Tires Supreme.

United States Tires are carried by the following Sales and Service Depots—who can tell you which of the five types of United States Tires exactly suits your needs.—EDDINS & BAKER, Burlington, Ky.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

NO CAUSE FOR A FOOD PANIC

The sober sense of the American public, sustained by the broken precedent of a hundred years, should reject the wild utterances of an official propaganda, conducted by men in search of dictatorial power, and go about their business undisturbed.

Today, on the seven million farms of America, the energies of fifty million men, women and children, are engaged in the fields, gardens, poultry yards, pastures and sheep folds, preparing with all the machinery they can control, to maintain the supply of food so abundant, that it will fill the overflowing storehouses of two continents.

Fortunately, America has not yet been afflicted with government control of crops, labor or prices. Fortunately, farm labor is not regulated at Washington, and it is no crime for the men, women and children on the farm to work twelve hours a day from seed time to harvest.

The instinct of the American farmer is sane. He will do all that a man can do to repair the waste of war, and to counteract the ill-effects of the proposed application of the military law to the conduct of farm operations.

He does not take counsel of his fears. He knows that the that overblows the wind shall not sow; and that that regard the clouds shall not reap. His preparation did not begin with the declaration of war; months ago he was turning up the seed for the year, strong in his belief in the continuity of nature's laws, and unmoved by the fears of disaster that haunt the minds of his self-appointed guardians. Bending his back to his burdens, he rejoices in his freedom and in his strength. As this work of transformation goes on, he is content, strained to respect the perfection of this world in which our senses converse. How wide; how rich; what invitation from every property, it gives to every faculty of man. In its fruitful soils; in its navigable sea; in its mountains of metal and stone; in its forests of all woods; in its chemical ingredients; in its powers and path—of light, heat attraction and life, it is well worth the pith and heart of great men to subdue it and enjoy it.

Only in this spirit of faith and courage has the farmer, seeking to subdue and enjoy the world described by Emerson, been able to meet, with a dwindling force, the increasing call for more food from our great cities and recent battlefields. If he is permitted to go on his way unchecked by regulation of the markets, he will equal his greatest achievements, and bring to confusion all the prophets of evil.

\$30,000,000 FOR HARD COAL MEN.

Price of the Fuel to be Raised Sixty Cents a Ton.

New York, April 26.—Coal men estimate that the voluntary wage increase granted to 175,000 miners in the anthracite fields will raise the retail price of hard coal an average of 60 cents a ton. The agreement, signed last night by representatives of the operators and the United Mine Workers of America, adds about \$30,000,000 a year to the miners' wages and is the largest increase awarded in the history of the anthracite fields. The advance averages 20 per cent virtually the same as that recently received by the 225,000 workers in the bituminous one field. The agreement takes major effect until April 1, 1918.

Called Amusement Stunts.
The rain last Saturday caused the postponement of the amusement stunts booked that afternoon and evening for Burlington. The Burlington and Lawrenceburg, Ind. High Schools were to engage in a game of base ball at 3 p. m., and that evening Miss Goodrich and pupils in music were advertised to give a recital, but both events were called off.

UNCLE SAM IS SERIOUS.

United States Going Into War as It Should Have Fought Alone.

(Toronto Mail and Empire)
Though the United States was not a party to this war until a few days ago, and has not yet struck a blow in it, the American people have fought bravely. They have learned its lessons without paying for tuition, and Mr. Lloyd George's advice that they should not repeat Britain's mistakes, is unavailing. They have no notion of imitating Britain's mistakes. No important American newspaper, for instance, believes in the voluntary system of recruiting an army. The pacifists and the pro-Germans alone oppose conscription. Nor is the United States making preparations for a war that is likely to be over in six months. It is planning for a long war. If the Americans are mistaken as regards the length of the war, they will not make the mistake on the wrong side. The way to make the war short is to prepare to fight for a long time. It is the way that it is long to prepare for a short fight. In these respects the people of the United States will not copy the errors of Great Britain.

Nor will they make the mistake Britain and Canada have made with regard to alien enemies. Men who are overpaid speaking disrespecfully about the American army or about the Government are hurried to jail; some have been summarily executed in the streets, and the volunteer executors have not even appeared in the Police Court. The U. S. is taking the war seriously. It has abandoned the notion that a couple of free-born Americans are the match for half a dozen Kaiser-ridden German soldiers. The Germans are recognized as a brave and obstinate fighters, and it is realized that the men who beat them must be at least as well trained and as willing to obey orders. It may be that in deference to a nationwide opinion and for sentimental reasons an American division, possibly under the nominal command of Colonel Roosevelt, will be sent to the front in the next few weeks; but this will not alter the determination of Uncle Sam to conquer upon this war. He might have to fight it alone and against the most formidable adversary that ever took the field.

Action of State

Board of Education

The State Board of Education, convinced of the imperative need of husbanding all the resources of the Commonwealth, especially that of labor on the farm and in the gardens, urged upon the teachers, school officials and the great army of pupils who have talent or capacity for services of any type, the patriotic duty of making their contribution in this hour of National Need. Since Kentucky is an Agricultural State and there is scarcity of help on the farms and in the cities, the code provides that directors and teachers may excuse the absence of pupils for urgent reasons, therefore, Resolved, That in the opinion of the State Board of Education during the present crisis the need is imperative that every one without stint render some service for the Commonwealth and Nation. That teachers and trustees organize every school district into an efficient force to aid in every possible way the Nation in its fight for righteousness and humanity.

Be it Further Resolved, That the pupils in the public schools above the age of twelve years, who are standing in such that there would be no question of their promotion or graduation and who may be religiously engaged in agriculture, shall have these facts considered in lieu only to the work of the term ending June, 1917. Teachers, pupils, trustees and all school officials are urged not only by precept but by example, to develop in their districts the highest degree of patriotism, so that everyone may be impelled to his bit in this time of stress from enlisting to go to the front to necessary service of raising food and to sustain not only our army but the population that must needs remain at home, thus enabling Kentucky to maintain its position in the Nation and being second to none in the discharge of her patriotic duty.

Be it Further Resolved, That the State Board of Education through its proper officers, conduct a careful survey of the industrial and agricultural schools of the State for the purpose of ascertaining the way in which they may contribute most efficiently to their equipment, machinery and products during the continuance of the present war.

Quaker Oats.

(Philadelphia Record)

A large part of diplomacy consists of an ability to say nothing at the right time.

You never can tell. Many a man sows his wild oats who goes to seed pretty tame.

It doesn't matter how hot weather to prove that even the base ball fan can't always raise the wind.

When a lot of gossip indulge in the any way, it proves that birds of a feather flock together.

No Maudie, dear; when a man reveals as a jewel, it doesn't necessarily mean that she is not in her way.

A poor excuse is better than none except in the case of the man who doesn't talk to his color blind.

Half jewel and greens are plant that grow.

THE LAZY MAN

One of the most attractive proposals in connection with the preparations for war is found in the declaration that the draft for man service of all kinds will be so soon that the lazy man, yea, even the loafer, shall be absorbed and made into an asset of force for his country.

When that assurance is accomplished one of the most annoying of the smaller social problems will have been solved. The family of considerable size contains at least one member who for lack of training, perhaps or other reason, has never become a contributing member to the community. His presence constitutes a burden upon those associated with him by ties of blood or bond of relationship. Going from the family to the local population, we find that a not inconsiderable proportion of our citizenship is made up of men and women either constitutionally lazy or drones thru habit. They are shirkers of the first variety. They accomplish nothing. In fact they make no attempt to do anything worth while.

Still they manage to subsist under fairly comfortable circumstances. Taking the masculine side as affording the best field for comment, consider the men who sit in the parlors, or adorn Government Square and the Esplanade, and who in considerable numbers are seen in every square of the busy district.

They are endeavoring to lose themselves from sight in the crowds of busy people.

They are floaters, drifting with the tide of human life. They are particular in view excepting to pass the time until the next meal.

They are put in a few more idle hours in saloons or libraries, often in the alleys, and finally go to bed under a roof which does not welcome them.

This type of citizen is more frequently supported by his wife.

In many instances the children of the family are compelled to combine their scanty earnings to keep the alleged head of the household alive.

If the noncontributor is a son, the family still intact, it is strange that the love of the mother, being the purest affection and sympathy known to humanity, goes in greater measure to the worthless one than to the other.

This is beyond understanding of the useful members of the sterner sex. They have to be content with the knowledge that the logic of woman's reason is always been, and always will be beyond the ken of man.

It is estimated that there are a sufficient number of worthless men in this city and Cincinnati is not an exception—to fill the league base ball park to capacity.

If men of this type are by which these men will be lifted from their environments, remade by the force of discipline into active, energetic, industrious units, the city will be the wealthier for the conversion.

The lazy part of any community forms an economic problem more urgent than first thought would suggest.

The lazy man is a product of civilization.

The organization of the State and its people for defense takes up and utilizes these useless forms of flesh, bones and blood, an unanswerable argument in favor of conservation for all time and all purposes will have been spoken.

Given a Fair Deal

Farmers Will Double Crops

The farmers of America can do the best of their crops this year; they can grow 10 times as much food as they have ever grown in any year before, and they don't need any advice to do this; they need a fair deal.

It is up to the U. S. Government whether the crops shall be large or small.

This is what the Government must do to get all this food—take over the distribution system.

Take over the packing plants, canneries, oil mills, warehouses, elevators and storage plants.

Take over the idle land held by speculating land holders, and distribute it among the hundreds of thousands of farmers who will make this land productive.

USE OF IDLE LAND URGED.
Loan the farmers money with which to buy seeds, equipment and labor.

If the government takes over the food distribution system, war housing channels, and sets the prices, it will end gambling in foods.

It should set a retail price. This price would permit the retailer fair margin of profit; it would give the farmers an amount equal to the cost of production, and a fair profit.

That would make the cost of living lower, and the government could make enough profit out of it to pay all the war debts.

The only persons who would be hurt would be the commission men, food gamblers, monopolists, including millers, packers and railroads.

GAMBLERS COULD FIGHT.
Then we could spare all these boards of trade collectors and gamblers for the army and navy. In the true sense they could help the country in private life they are the parasites.

Takes the meat packing industry from the clutches of the big barons of the meat business, the country will start raising live stock, and meat eaters will pay less than they have in decades.

It is a fact that the production of more to be seen production in America than anything else. If it is stopped you can depend upon it that the war will be a long one. A. C. Townley in Kentucky Post.

Why Pay High Prices for Your Shoes?

Our Shoes are known thruout Boone County for their Excellent Wearing Qualities, Stylish Appearance and Perfect Fit---and to sell at Extremely Low Prices.

Our Customers also Know What the Schanker Guarantee Means--They are Sure of Satisfaction.

Commissioner's Notice.
Boone Circuit Court.
James F. Cullom, &c., plaintiffs, vs. J. Notie.

Montgomery Anderson, Administrator of James S. Cullom, deceased, &c., defendants.

By order of the Boone Circuit Court, I will rent April 28th, 1917, the lands of Jas. A. Cullom, deceased, until January 1, 1918, for cash or note with good security. The note to contain 197 acres, 8 rods and 30 poles, and one tract contains 19 acres, 1 rod and 25 poles.

I will be on the 197 acre tract at 11 o'clock a. m., April 28th, 1917 to rent same.

CHAS. MAURER, Receiver Boone Circuit Court.

Three-five prisoners have been taken from the Edgelyville penitentiary to Pike county to work on the roads.

A farmer at Nevada recently sold a case of eggs for \$100, which was the amount his father paid the government for 50 acres of land on which he is living. The land is now worth \$250 an acre.

So large have been the crowds calling for potatoes in London, that in many of the poorer sections of the city have decided that in future they will not sell them to children to prevent injury to the children in the crowds.

The people of this country do not know when they are well off. A newspaper containing the latest news of the day is the most common thing in the country and it costs one cent or two cents. In Belgium it costs 10 cents to read a paper for thirty minutes.

Private Joseph W. Mc Cain, member of Company A, First Kentucky Cavalry, who was killed in Bedford, Ky., was fatally wounded and soon died as the result of the accidental discharge of a rifle in the hands of Private Raymond Richards, of Company B, at the Louisville armory last Sunday.

The passage of the conscription law by Congress has created considerable discussion in this country, all seeming to agree that it is the proper and the quickest way to organize an army such as the U. S. wants. Some are objecting their physical defects that they may not prolong an examination is their names come out of the wheel.

Strawberries in East Tennessee were injured by the cold weather the first of this month as the plants were not far enough advanced to be hurt. Some growers think the severe frosts will be beneficial to the plants as they think it will help to eradicate the weevil-an insect which has become troublesome at some of the commercial growing points.

It is estimated that about 20,000-30,000 pounds of Montana wool has already been contracted for at 30 cents per pound. Reports from Beaverhead country tell of one man's crop having been taken over by a speculator for 40 cents per pound. Recent prices are from 40 cents per pound upward. These prices are enormous when the same class of wool sold last year at 30 cents.

Well every day brings something new. A few years ago we had the cafeteria in the way of eating houses and today a town of a thousand has them. The latest however, is Groceries. This is a grocery store where the customer goes in and picks out what he wants and then walks up to the cashier and pays the bill. This saves clerk hire and a fellow is supposed to get more goods for a dollar. Iowa Falls has a couple of Groceries.

The great war is not far from Jerusalem. The British captured El Arish and the Egyptian army is now in Southern Palestine has not recently been mentioned in announcements of the British War Office, but it may safely be assumed that the army is within a few miles of the Palestinian capital. The general direction of the advance leads to the belief that Jerusalem is the prime objective of the undertaking.

The Springfield army rifle may be made especially useful in target warfare by the invention of two residents of Los Angeles which consists of a periscope device adapted to the rifle so that it may be aimed accurately by a marksman entirely concealed in a trench. The device was demonstrated recently at the Government rifle range, Beverly Hills, Cal., being tested with success at ranges of 200, 300 and 400 yards. At these distances, targets the size of a man's head were hit while the marksman's head was a foot below the top of the trench in which he fired. The device is described in the May Popular Mechanics Magazine.

The farmers of this nation have a most important part to do in producing food for our people, for our army and navy and for the armies of the countries fighting the common enemy.

It takes more food in time of war, and yet production naturally declines on account of the calling of men from the farms to the colors. This makes necessary a supreme effort on the part of every man, woman and child living on the farms.

While with reasonable certainty good prices may be expected for all farm crops, we have another and a higher motive for production. The limit, namely our patriotic duty to the honor of our flag at stake, but the very existence of the things our country has stood for from its foundation.

To show any weakness and to fail to make our full strength felt may endanger the full freedom of our nation and our people. There is no room in all America for the slacker in time like to the man who merely wants to make as many dollars as he can out of the circumstances. Our duty as farmers is to produce as abundantly as possible, avoid waste and extravagance, and when the call comes to furnish men to our country and the principles it stands for—Southern Agriculture.

MUST WATCH MEXICO.

Government Cannot Be Blind To the Ingratitude of Carranza. (New York Sun.)

The official recognition of Ignacio Bonillas as Mexican Ambassador at Washington does not signify that the United States Government is satisfied with the present dubious attitude of the Carranza Government. We have had an Ambassador in Mexico City for some months. The President could not refuse to receive Bonillas unless he intended to withdraw Fletcher, and there is no present reason for seeking relations with Mexico. But it is no secret that our Government is dissatisfied with Carranza, and has reason to doubt the friendship of the Mexicans. As this will doubtless tend to keep the strong guard on our border alert and compel the enforcement of the embargo on the shipment of arms and ammunition to Mexico, it is not an unmixed evil. Mexico must be watched. We need not heed alarmist stories from El Paso, but we cannot be blind to the ingratitude of Carranza, to his obviously insolent attitude toward an American President who has treated him and his country with so great tolerance. As the Washington correspondent of the Evening Post, a newspaper hitherto committed to a friendly attitude toward Mexico, said yesterday: "Every other nation on the face of the globe would have gone to war over this startling attack by Villa on an American town with the massacre of non-combatants. Indeed, the massacre at Santa Ysabel would have provoked many a nation to war. We must be vigilant now to guard against the payment of our well-intentioned policy with treachery. The Mexicans cannot understand kindness and tolerance. They attribute them to weakness and cowardice."

Thos. Ficklin Kilgore

Died June 5th, 1915

Thomas Ficklin Kilgore, of Mayville, was at the Mayville Hotel, operated by Dr. C. A. L. Revell, of Cincinnati, Ohio, for post-rat glands and gall stones. Then later he developed hardening of the arteries, that caused his mind to become unbalanced and this resulted in his death. Later he was taken to the Asylum at Lexington, Ky., died on the 16th of last January where he just had been admitted. He had been confined for nearly 2 years from next June. He was born at Fernside, Mason county, Ky., on the 14th of February, 1848, and it was 12 miles from Mayville. He was nearly 68 years old. He was a son of our late father, Jno. Ficklin Kilgore. He was buried at Germantown, Ky., beside his two dead sons in the cemetery. He left his wife lonely. She was a brother of Alice M. Goodridge and Harry Kilgore, both of Francesville, Ind. M. Kilgore, of Ft. Hancock, New Jersey. Dr. John C. Kilgore, of Harrison, Ohio, and Wm. H. Kilgore, of Covington, Ohio, were the last young and living persons in her sex in our family. There were five other sisters, all passed away. Mrs. Fannie, Anna, Mary Lucy and Cora. Our mother was a mother raised him until he grew to manhood. We four living brothers as well as Thomas and John were all born in the same brick house at Fernside, Mayville, Ky. John was born on the 22nd of November, 1877, and he died on the 19th of September, 1887. It will be sorry to hear that Dr. John Kilgore cannot stand or walk around the room for two years. He is a Homeopathist and surgeon. He will celebrate his anniversary birthday and will be 72 years old next November 9th. His third wife is still attending his wants all the time. W. H. K. (The article is published at the repeated and earnest solicitation of the writer—ED.)

The American Gunner.

Americans will rely upon the American gunner in this war. Germans will be surprised by his accuracy. The Spanish-American war was not a great war, but it served to prove the capability of the American behind the naval gun. Germans may turn to the history of the destruction of Corvera's fleet, if they would discover the fact. The news that the first periscope which came into view from the decks of the American steamers in the Pacific was clearly hit at 1,000 yards is inspiring news, but not astonishing. The reported hit is the sort of hit a keen-eyed American gunner well seasoned by target practice would make in actual warfare. That the American gunner will shoot as coolly and as straight at a German periscope as at a naval target, Americans can be sure in action is to be expected. Yankee brilliancy in action can be looked forward to as a matter of course. When our original freighters get into service there will be less risk in a unit of the supply ship armada than when such a German periscope as the Mongolian is exposed. In the meantime the German U-boat will face a new danger in the barred zone—the American gunner who has been accustomed to hitting the bullseye and is delighted to get a bullseye at the eye of the Prussian bully.—Ex.

First Negro Candidate

Lexington, April 26.—A. L. Britwell, a negro school teacher, is a candidate for the Republican nomination for Magistrate in Fayette county. Four hundred and thirty-two negro Magistrates in Kentucky. This is the first time one of the race has offered for the office here.

SEASON OF 1917.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

JIM WILKES,

2:17 1/2

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Threlkeld's Jim Wilkes; dam by Conner's Almont.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition: bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK, MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur. A lien will be retained on all colts until season money is paid. Money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS, J. G. RENAKER, C. H. TANNER, Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS, Bob Starlight and Jim, The fine young Jack Bob Starlight, will make the season at my stable at McVie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette. In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur. No business done on Sunday.

XEN-SCOTT, Grant, Ky., R. D.

The Fine Belgian Stallion,

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minnesota pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE. Prince is a handsome 8 year old black, with white star in forehead, weighs 1600 pounds, was foaled April 1898, owned by Joseph Moore, of Ottaway, Illinois. 1st sire: Voltair 62537, 2nd sire: Phobus 55092, 3d sire: Narcisse 21922, 4th sire: Paul Bert 31053, 5th sire: Fashion 46038, 6th dam: Lena 172226, 3d dam: Auction 19088, 4th dam: Pride of Harb 1941. B. J. & EDWARD MICHELS.

Bank Assessed 85 Per Cent. Frankfort, April 26.—The State Board of Valuation and Assessment today assessed the Banks and Trust Companies of this state at 85 per cent of the fair cash value of their capital stock, surplus and undivided profits. The board last year assessed these institutions at 100 per cent of the value of the capital stock and 85 per cent of the surplus and undivided profits.

Some of the people who enjoy their meals haven't the felicitous idea how many calories they are absorbing. Even should the warring powers consent to restore the map, they cannot restore the population.

Mentime there is nothing the matter with the human appetite.

We Can Make Immediate Deliveries.

This Truck, REPUBLIC MODEL F, is known the world over as the leader in its class. Model F is used in over 1000 lines of trade, from light service to general utility. It is a real truck and not a converted chassis. Model F gives you extra power strength—extra capacity for your excess loads. This is true money-saving economy from the start. Model F lasts. And it saves repair and upkeep expense with its long-stroke truck motor—nickel steel construction—deep channelled pressed steel frame—every supporting part a forging or pre-stressed steel—Republic Torbenon Internal Gear Drive—heat treated, drop forged I-Beam—unqualifiedly guaranteed not to wear out or break during the life of the truck. Gold Bond Warranty Certificate issued to every purchaser.

1 Ton Truck \$1095. 1500 Pound Truck \$ 750
3 Ton Truck \$1375. 3 Ton Truck \$2650

Hal McGregor.

Record (2) 2:26 1/2, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.
Hal McGregor (2) 2:26 1/2 is by Hal Dillard 2:01 1/2, 1st dam by Wildcat 2:17 1/2, 2nd dam by Oscar Williams 2:12 1/2, 3d dam by Ohio Volunteer 2:26 1/2.

The sire of Hal Dillard is Brown Hal 2:12 1/2 (world's record when money also the sire of Star Pointer 1:59 1/2, the first horse to beat 2:00.
Be not misled a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:03 1/2, Fannie Dillard 2:03 1/2, Hal B. 2:04 1/2, Hal C. 2:05 1/2, Hal Leaf 2:07 1/2, Hal Copper 2:07 1/2, Cinnamon 2:07 1/2, Dillard Online 2:07 1/2, Butter Bowl 2:08 1/2, Cambria Main 2:08 1/2, Roop Dillard 2:08 1/2, Ellen D. 2:10 1/2, Young Hal 2:10 1/2, total 46 standard times.

Sons of Hal Dillard sired Hal B. 2:01 1/2, Hal B., Jr. 2:02 1/2, Hal Raven 2:03 1/2, Holtzman 2:03 1/2, Hal R. 2:06 1/2, Hal McKinney 2:06 1/2, Edio Dillard 2:06 1/2, Haliee 2:07 1/2, Hal Grey 2:08 1/2, Hallock M. 2:09 1/2, Vera B. 2:07 1/2, Hal Grey 2:08 1/2, Hallock M. 2:09 1/2, Dillard S. 2:03 1/2, Hal J. 2:09 1/2, Jerry Dillard 2:09 1/2, Della H. 2:10 1/2, Dillard Onward 2:10 1/2, Helen B. 2:10 1/2.

Hal McGregor with only 70 days track work last year trotted one-eighth in 48 seconds, 2 in 31 seconds, and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training then.
Care will be taken to prevent accidents but I will not be responsible for any that may occur. Will farm a few good mares. W. B. ARNOLD, Petersburg, Ky., R. D. 1

THE FINE SADDLE HORSE

Harrison Prince No. 3340

Will make the present season at the stable of G. T. Gaines one mile from Burlington, Ky., on the Petersburg pike, at \$10 to insure a living colt. I will not be responsible for any accident that may occur.

Harrison Prince is a chestnut stallion, 10 hands high, 8 years old, has a large blaze face and white feet, and is a perfect type of a saddle horse with a fine finish and action, a champion in his class from a colt. His sire is Danny Jim, the well known show horse. For official pedigree call on the undersigned.

Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.

COULD HARDLY

STAND ALONE

Terrible Suffering From Headache, Sideache, Backache, and Weakness, Relieved by Cardui, Says This Texas Lady.

Gonzales, Tex.—Mrs. Minnie Phillips, of this place, writes: "Five years ago I was taken with a pain in my left side. It was right under my left rib. It would commence with an aching and extend up into my left shoulder and on down into my back. By that time the pain would be so severe I would have to take to bed, and suffered usually about three days. I suffered this way for three years, and got to be a mere skeleton and was so weak I could hardly stand alone. Was not able to go anywhere and had to let my house work go. I suffered awful with a pain in my back and I had the headache all the time. I just was unable to do a thing. My life was a misery, my stomach got in an awful condition, caused from taking so much medicine. I suffered so much pain I had just about given up all hopes of our getting anything to help me. One day a Birthday Almanac was thrown in my yard. After reading its testimonials I decided to try Cardui, and am so thankful that I did, for I began to improve when on the second bottle. I am now the well woman and feel about fine and it has been permanent for it has been two years since my awful bad health. I will always praise and recommend Cardui. Try Cardui today. 218

Established 1875

BURLINGTON, KENTUCKY, THURSDAY MAY 10, 1917.

\$1.50 Per Year

NO. 40

NO WASTE IN OIL.
Go back to the days when Pennsylvania crude was \$3 a barrel or higher in 1877 and before, and gasoline was a waste product. There was no market for it. Refiners were glad to get rid of it at almost any price, or even give it away. In some instances thousands of gallons were dumped into the streams as the storing of it was a menace to the works, and there was no future outlook for it. As much of the lighter product as possible was left in the kerosene, and the manufacturers sought uses for it in various ways. Conditions have reversed themselves. Gasoline is the most desirable product of petroleum. Instead of blending it with the lighter grades of kerosene, the latter is being cut to make more gasoline, and the gravity of the motive power fluid is being reduced until it has practically reached the gravity of light kerosene. What was a waste product has become an important article of commerce, says Oil City Derrick. A barrel of oil, which in past years lost a certain proportion in waste, is now utilized to the last pint. The barrel of crude petroleum has increased in intrinsic value because more of its component parts have been called for in the world's industrial growth, until now there is nothing lost. Petroleum illuminates and heats the homes of thousands; it cooks meals; it preserves canned foods; it enters into dozens of little household duties which are made easier by its use. It turns wheels in fast factories; it drives locomotives; speeds the automobiles; has made airplane and submarine practical; does farm chores; smooths the roads; destroys pests; is valuable in medicine; and attracts the highest scientific knowledge in its study. From the humblest of duties to the greatest, petroleum plays its part, and to this perfect utilization of all its products—due the higher prices which it commands.

Did you ever talk with a man who insisted upon doing all the talking; who kept right on despite all your efforts to get in a word edgewise? If you did, you had a most uncomfortable experience. He makes you feel that he talks right on only to crowd you out. You endeavor to insert a word, and he increases his utterance in power and emphasis, so you become quite convinced that, to use a common phrase, he is jumping on you with both feet. It is the most conspicuous conspiracy of ill-breeding that one meets with in society, says Ohio State Journal. The idea of a man shutting out another in a little friendly talk is worse than impolite; it is shameful. One hesitates to imitate the conversational monopolist, but it is the only way to meet him, if you have good lungs and a fund of patience. You won't need any brains in the contest, for all you contend with is noise and wind. N. B.—Remember, however, that conversation offers the widest field for courtesy.

A law forbidding the use of paper balloons on Independence day—or at any other time—would undoubtedly be a fire protection measure of great importance and effect. But it is not merely the children that would be grieved at such a deprivation. It has been noticed that groupings play the star part in the balloon launching while the children are merely innocent and envious bystanders. Sending up paper balloons for the children puts the same burden on father that taking the children to the circus does.

Some health experts are advising people by way of precaution against pneumonia to avoid crowds in which other people are coughing and sneezing. A step further towards prevention would be to advise the public generally to stop the pernicious activity of coughing and sneezing altogether.

Many people think that prayer is nothing but begging the Lord for something. You can pray very effectively by putting your hands to the plow and your shoulder to the wheel. The man who wants to pray for a corn crop will get results if he and the old gray mule will do their part.

A camera has been invented that will photograph an object no matter how fast it is moving. However, a camera like that is not needed to photograph a citizen with the toothache going to see his dentist.

Another type of optician is the man who is cheerfully waiting for the price of automobiles to get so low that he can afford to buy one.

One wonders where the censors get their axioms now that so many are acting in motion pictures.

PLANT SWEET POTATOES

Cost Less to Plant—Produce More Food Per Acre Than Irish Potatoes.

Washington, D. C.—Seed to plant an acre of Irish potatoes cost about \$10 this spring. Seed sweet potatoes will not cost more than \$4 per acre where vine cuttings are taken from early-set plants are used. The yield of sweet potatoes per acre is usually greater than that of Irish potatoes and as a food they are as nutritious. Sweet potatoes may be grown throughout the Southern States and, of course, in certain other sections. Specialists in the U. S. Department of Agriculture are urging an increased acreage of this crop where it can be easily grown. Sweet potatoes, it is pointed out, are the South's chief instrument for a quick and effective increase of the food supply. Seed is plentiful; the year's crop was the second largest ever produced. By means of vine cuttings it is possible to plant almost unlimited areas of this crop and at the same time conserve the present supply. That is, a farmer who wishes to plant 10 acres will bed seed enough—say 5 to 10 bushels—to get slips for one acre. Vine cuttings from the first of August will plant many more acres, plantings being possible until the first of August in the lower South. This system, now widely used in the South, enables the utilization of land from which early potatoes, cabbage and other truck crops have been taken. Sweet potatoes are not expensive to grow. The main limiting factor to the production of vast quantities by this plan is labor. Yields from fields set with vine cuttings are as large as from plants grown from slips. This method of the further advantage of preventing the transfer of diseases which are carried on the tubers.

The South doesn't need to learn how to grow sweet potatoes, the specialists point out. Farmers know how to produce large yields of this crop. But the farmer must be instructed with the necessity of increasing his acreage of this crop, and then, when harvest comes, to prevent the enormous loss from improper handling and storing. The best way to keep sweet potatoes is to store them in well ventilated storage houses, and throughout the winter should be made ready as soon as possible. In Farmers' Bulletin 748, "Storing and Marketing Sweet Potatoes," the instruction for building storage houses and for converting old and unoccupied buildings are given.

WAR LOANS

Of United States Would Pave Thirty-Five-Mile Path With Gold.

Try and visualize seven billions of dollars. It may be easier to express the amount of the proposed Government loan for war purposes as seven thousand millions of dollars. Or to write it so, \$7,000,000,000. The other day we went down into the vault of the New York Subtreasury where the largest single gold holdings in the world are located. Gold is stored up like cordwood in long corridors and another corridor, each weighing 30 lbs. and worth \$8,000. If this most precious of metals were to be placed end to end, the gold would extend seven miles. A billion (\$1,000,000,000) this sum of the loan might be translated into a golden pathway a foot and a half wide and about 35 miles long. The American bill of largest denomination is \$10,000. It would require 7,000,000 of these to cover the loan, bales upon bales of them. If an expert counter counted three hundred bills each second it would take him—the editor is calling for the copy, so I shall have to leave this calculation for the reader to make at his leisure.

There are a few simple comparisons, however, which help to give proportions and perspective to a \$7,000,000,000 requirement by the Government. In the first place, it is more than the first year of the United States of not quite \$1,000,000,000. It is over twice the cost of the four years of Civil war. It is four times as much money as Great Britain raised for the war. In August, 1914, and 40 per cent of the money went for herself and her Allies in the first year of the struggle. On the other hand, the loan is only one seventh the annual income of the U. S. and, about one third the value of our national wealth. If it had to be redeemed from the foreign trade of this country in 1916, there would still be a credit balance of one billion dollars. Finally, it is within about 10 per cent of what we have saved from this trade the excess of exports over imports, in the 31 months since war was declared—Review of Reviews.

There are many comic situations in the opportunity "841,121." Plenty of good laughs, you want to get in on the laughing could find in this affair.

UNITED STATES BATTLESHIP OKLAHOMA

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of May 10th, 1877

Norman and Scott, candidates for the Democratic nomination for State Senator, and Rouse, Conner, Terrill and Henderson, candidates for Representative spoke in Burlington last Monday.

The European war is progressing. No additional belligerent powers as yet.

Telegraphic communications have been established along the Southern railroad as far as Somerset.

Grasshoppers are destroying tobacco plants in some sections of the State.

B. F. Harrison, of Carrollton, was the first county clerk in the State to send a copy of the assessor's book for 1877 to the State Auditor.

The Times says hailstones as large as a hen's egg fell in Scott county one day last week.

Cumberland county has an oil well that affords seven barrels of oil a day.

So far the month of May has been very wet.

Warren Rogers, of the Bellevue neighborhood, died last Friday.

Col. J. Landrum, of Warsaw; Hub Smith, of Williamstown, and Col. Henry L. Giltner, of Carrollton, were in Burlington last Monday.

H. J. Foster has been invited to address the North Ky. Teachers Association which meets in Covington, June.

Dr. McKenzie has recovered sufficiently to resume his practice.

The Burlington Literary Society has become a thing of the past.

Willow Vale—We hear of a farmer who had 10 acres of corn cut down by the last cold snap. J. W. Kennedy has been buying tobacco. C. H. Parsons is hauling rock for a boiler wall on Gunpowder creek. Handsome monuments have been erected at the graves of Polly Garrison and Robt. Huey in Big Bone church cemetery.

Beaver—It has rained almost continuously the past week. The voters want the candidates for Senator and Representative to make a date for speaking here or there. Big Bone—John Shifflet, blacksmith, has moved to Beaver.

Waterloo—Elder John Underhill preached to a large congregation at the Universalist church near here last Sunday. Recent frosts injured the fruit and tobacco plants. R. L. Aylor, local merchant, is going into the bee business.

Plattsburg—Farm work moves on in spite of the cold east wind that has been blowing constantly this spring. Very few are done planting corn. Tobacco plants are backward, but there are millions of them. Prof. Tolin is teaching a 12 weeks school in the Adams district. Dr. Jarrell is very ill of rheumatism.

Petersburg—Rev. Bristow preached the funeral of Warren Rogers at his late residence, last Saturday, in the presence of a very large audience. John Norris, 86, fell on a hot stove and burned his hands severely one day last week. Rabbit Hash—Hon. Jas. L. Henderson, candidate for Representative, addressed a large crowd here last Saturday. He is for everything under the old dispensation. Dance at Mrs. Minerva Ryle's, last Saturday night. Farmers are busy planting corn. Last Saturday night between 11 and 12 o'clock some parties tried to enter H. J. Oliver's store. Dr. Cowen heard them and, armed with a single barrel pistol, the only weapon available, proceeded to investigate the noise, and when

BETTING ON ELECTIONS.

As a matter of morals, betting on elections, is quite as reprehensible as any other form of gambling, and it is, moreover, true that in many political campaigns efforts are made to influence the result by manipulating the betting odds. Just why it would make votes for one man to announce that the betting odds were in his favor we have never been able to make out unless it be that that fact has a tendency to so discourage the supporters of his opponent that they will not make the proper effort.

In any event few contested elections pass by without some betting, and with few exceptions, the general public, including the smaller number who bet, and the much larger number who do not bet, watch the odds with keen interest. Sometimes those who offer the odds are badly mistaken and pay for their error, as in the case of the Presidential election of last year. At the beginning of that campaign odds of 2 to 1 were offered on Hughes against Wilson, although the odds sank until practically even during the week before the election.

Men who discount the importance of the betting odds point to the mistakes odds during the greater part of last year's campaign, but it is a fact that all during the campaign the Wilson men were greatly perplexed and somewhat worried by the fact that the odds in Wall Street favored Hughes. Sensible Wilson men figured it out that some of this betting was for the purpose of influencing public sentiment, and yet they said to themselves that some money was being bet with odds on Hughes and that the men who offered the odds were students of such matters and presumably knew something about what they were doing.

Why Mr. Hughes was ever as much as a 2 to 1 favorite in Wall Street against President Wilson, the Evening Post was never able to make out. The most plausible explanation is that the men betting on Hughes figured it out, and as events proved, correctly. That Hughes would carry New York, New Jersey and the bulk of New England, having determined these facts to their satisfaction, they troubled themselves with none of the other States, but proceeded to offer odds on Hughes. In the last month of the campaign, betting became even or practically even, and this was about correct as far as odds go in so close an election. This is a Mayoralty year in Louisville, and the betting man is beginning to make himself heard. As a rule he is neither a Democrat nor a Republican, but his knowledge of the city and its play his superior knowledge of his own men will vote by betting his money on his judgment. It is the pleasure of attending his own funeral, which happened about a year ago, when it was reported he was run over by an N. Y. train near Paris and his kinfolk sent to the big grave and all arrived from far and near to find him enjoying the best of health. Some weeks later he was knocked down and run over by a train near Paris and he lay in his hospital there for quite awhile. He also has been a drowned several times, but he is not dead, but like the rest of us, must live, but like the clever fellow.

Has Had Some Fun.

The Mt. Sterling Gazette tells of the remarkably good time one Ernest Whigley, of the village of Montgomery county has had thus far.

"Pete Willoughby, who suffered three broken ribs and a broken arm while training horses in Mr. Sterling the other day, is doing as well as could be expected under the circumstances. He and James Down had gone to the stables where Pete accidentally slipped and fell into Mr. Down's horse's head, consequently the horse bit Mr. Willoughby in the leg. He is the only man on earth that ever had the pleasure of attending his own funeral, which happened about a year ago, when it was reported he was run over by an N. Y. train near Paris and his kinfolk sent to the big grave and all arrived from far and near to find him enjoying the best of health. Some weeks later he was knocked down and run over by a train near Paris and he lay in his hospital there for quite awhile. He also has been a drowned several times, but he is not dead, but like the rest of us, must live, but like the clever fellow.

FEEDING 1,200 HOGS DAILY PROFIT \$117

Henderson Farmer Estimates Animals Gain Two and One-Half Pounds a Day.

Henderson, Ky., April 30.—Preston Mann, a river bottom farmer, in this county, is now feeding 1,200 hogs, all of which will weigh over 200 pounds. He is feeding them 150 bushels of corn daily at a cost of \$2.75; one ton of bran at \$1 and a ton of tankage \$1, at a total cost of \$323. He estimates the hogs are gaining a half pound daily, which figures at 15 cents profit, is \$180 the cost in feeding of \$323, gives him a clear profit of \$117 daily. Mr. Mann's ratio of profit will run much higher than this, as he purchased most of the hogs last fall at prices ranging from 8 to 11 cents a pound.

Corn reached its highest level here Saturday, when a Waller Elevator Co. purchased 12,000 bushels from A. G. Crutchfield at \$1.50 a bushel delivered on the Ohio river bank near Alsey. This count the county is higher than four cents than any sold here this year.

The largest single crop of corn, 40,000 bushels, yet sold in this county is owned by Col. R. H. Soaper. Col. Soaper declares he will hold his crop until the first of June, believing corn will be selling around \$2 a bushel then. Col. Soaper now has a corn team at work planting 800 acres of corn.

CORN A SALVATION

A Good Food That Can Greatly Relieve Other Shortages.

As far as spring wheat, oats, barley and other small grains are concerned seed time is practically over. In the most northern sections it will be over inside of two weeks and in Canada inside of three weeks. Much still remains in which to plant corn, and acreage should be increased to the crop of at least 4,000,000, 600 bushels under the present conditions the problem would be settled. A large crop of corn would relieve the shortage of wheat, which now is practically impossible. With plenty of corn we shall be in no danger of starvation, or even serious discomfort, even if the wheat crop does not exceed that of last year. It is not only good food for man and beast, but it can be used to supply other necessities. Sugar is scarce and high in price and the tropical cane sugar crop has not met expectations. Glucose forms an excellent substitute for sugar in most of its uses, and if we have a corn crop this year we can produce an enormous tonnage. The popular prejudice which exists against glucose is a most defective one. The housewife uses the best cane sugar for preserving and other household operations and her family never shows the least reluctance to take it. Even when a person eats of loaf sugar he digests glucose and not cane sugar.

When cane sugar is cooked with acid fruit, such as apples, berries, peaches, cherries, etc., the combination of the heat and the fruit acid converts the cane sugar into glucose. When the bread and swallows the digestive juices change it into glucose. When bread, potatoes, starch is eaten the starch is converted into glucose just as the starch part of the corn is converted into glucose in the factory. If the corn country produces a large crop of corn that is sold at a moderate price we may be able to dispense with part of the wheat and the sugar we are accustomed to use. We may be able to eat without the fear of a shortage. Of the great food that we consume the only one that yet can be planted in practically unlimited quantities are corn and potatoes. Corn is high in price, but there is plenty of seed corn to be planted in the country as possible of it should be planted, even if the Government has to requisition it for that purpose. New York Commercial.

It Pays to Advertise

W. L. Kirkpatrick sold 25 pounds of wire fencing to Mr. Hamour to be used on his land on the ridge between Bromley and Connersville in Hamilton county, making a profit of \$1.00. The sale is the result of advertising in the Recorder. No one to keep you unless you let people know you have things.

JUST KEEP COOL

Period of Great Prosperity Predicted During War Period To All Classes.

Washington, May 3.—The United States is entering upon a period of unprecedented prosperity. Government leaders who are guiding the destinies of the nation in the present war crisis are convinced that if the American people will keep cool for a few weeks until the first shock of entrance into the war is past, and continue their business as usual, they will witness amazing industrial activity which will bring prosperity to all classes.

The colossal war financing program will enhance rather than mitigate this prosperity in the opinion of the government officials. The \$2,000,000,000 war bond announced by Secretary of Treasury McAdoo last night has been so arranged that a transfer of credit will be made from individuals subscribing to war bonds to the general government. Comparatively little of this money will be withdrawn at once from the banks and such as is withdrawn will be expended in this country for war supplies and so will immediately find its way back into the banks through business channels.

Secretary McAdoo has declared that it will be the policy of the government to permit fair profits on war contracts. He and the Federal Reserve Board, as well as other agencies of the government have made a careful canvass of the economic situation in the United States and have come to the conclusion that to radically curtail profits would cause trouble which would be more serious than anything. Consequently fair profits will not be frowned upon and this will mean, it is declared, good wages for all classes of workers. The circulation will be easy, nearly all branches of industry will be kept busy.

Applications of the Army and Navy will be placed in this country and men all of the supplies of the allies will be bought here so that the pouring into the channels of American business practically the whole of the \$12,000,000,000 liberty loan will have the proceeds of the future loans to come during the continuance of the war. The fact that heavy war taxes will not be expected to have any dampening effect on the industrial prosperity for these taxes will fall heaviest upon profits thereby making those best able to pay subject to the imposts.

Will Enter Military Academy

Edwin Duncan, son of Dr. and Mrs. E. W. Duncan, left last Friday for Washington, D. C., to take the examination required before entering the military academy at Annapolis. Mary, his sister, is a pupil of Thoburn High School and she would have graduated in the next few weeks. His appointment to Annapolis was secured by Congressman Rouse, who is always on the alert for something good for his people back home. Here is hoping Edwin will attain the goal for which he is striving.

Baby has a New Tooth

"The baby has a new tooth, but the old lady is laid up with a cold in her head," remarked a gentleman who had just attended the "What Do I Care?" was the reply. "Well," said the gentleman slowly, "the election you used to take me aside and ask me how my family was coming on, and I've been hunting you all over town to tell you, and that's the way I talk to you. But it don't make any difference, I've got for the other fellow anyhow."

Bad Weather Again

Miss Godshaw had very unfavorable weather last Thursday night for her recital, consequently the attendance was small, being limited to about fifty persons. It was greatly disappointing to both the teacher and her pupils, as they had taken much pains in preparing for the event, which was an affair much desired in the way of an entertainment.

Taken to a Hospital

John C. Sebree, who resides on Woodlee Sullivan, was taken to the Bellevue pike, was taken to a Cincinnati hospital one day the past week, to be operated on for dislocated skull bone. The decaying of the bone resulted from a blow Mr. Sebree received on his head many years ago. He had been suffering intensely before he was taken to the hospital.

Just a Suggestion

A suggestion as how to carry day by day, the high cost of living. Monday—Collectors. Tuesday—Breadless. Wednesday—Potatoes. Thursday—Meatless. Friday—Fishless. Saturday—Fruitless. Sunday—Chickenless.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equita-
ble Bank and Trust Co.'s building. He is also authorized to re-
ceive subscriptions and collect other accounts.

John Lane of Ludlow, spent last
Sunday here.

For Sale—Young cow and calf,
Mrs. Susan Senour, Walton, Ky.

Mrs. Fred Wayland and little
son spent the past week at Dry
Ridge.

Lost—Pocket knife, return to
Equitable Bank as it is treasured
as a keepsake.

Mrs. Susie W. son of Covington,
spent part of last week here with
her many friends.

Miss Eva Cram enjoyed a pleas-
ant visit to Mr. and Mrs. Chas. H.
Young at Potosi last week.

per Mr. and Mrs. Tomlin and
of from Mr. and Mrs. Tomlin and
from 40 to 50 city with friends.

These pri Fannie Gady, of Erlanger,
the same part of the week as the
year at of Mr. and Mrs. Harry
Gady.

Walter A. Kirtley Johnson, of
Walton, spent part of the past week
here the guest of her daughter,
Mrs. N. F. Pinner.

Jno. L. Vest spent part of the
week in Frankfort attending the
Court of Appeals having some cas-
es before that tribunal.

At the election of the school
trustees for this district last Sat-
urday, Mrs. Geo. F. Nicholson and
Dr. G. F. Holloway were elected.

Daniel W. Bedinger, who is em-
ployed on the Big Four Railroad
at Indianapolis, spent last Satur-
day and Sunday here with home
folks.

For Sale—Lot of fine brick tak-
en out of the inside wall at the
loose leaf warehouse, good as
new, cheap. Call at warehouse. J.
M. Arnold, agent.

Samuel C. Hicks, of Union, was
here Tuesday and sold a Ford
roadster to Chas. W. Miller, who
will use it in his business as trav-
eling salesman for a Cleveland
paint manufactory.

The Royal moving picture
theatre is putting in some new and
attractive features with the re-
sumption of the electric light and
will have shows Tuesday and Sat-
urday nights in the future.

There has been a movement to
increase the capital stock of the
Walton Loose Leaf Co. to make
some additions, but the matter
was deferred until later as the
work of improving was not ready
at present.

W. B. Johnson, auctioneer, pur-
chased the building and balance
of more stock from Samuel Lar-
caster of Beaver Lick last Satur-
day and will have the property on
the market again as soon as he
gets it overhauled.

Dr. and Mrs. C. C. Metcalfe and
daughter Fay, and Miss Georgia
Rouse returned Thursday night
from St. Petersburg, Fla., where
they spent the winter on account
of Dr. Metcalfe's health which is
much improved.

Harry W. Riley, of Union, can-
didate for Assessor of Boone Co.,
on the Democratic ticket, was here
the first of the week soliciting
the support of the voters. Mr.
Riley is well qualified for the of-
fice and would make a splendid
assessor.

In the great horse show at Phil-
adelphia, last week, "Lula Ed-
wards," the fine filly sold by W.
G. Gaines to Pennsylvania par-
ties, outclassed all of the beauti-
ful competitors and won the first
prize in every ring she was enter-
ed.

This filly was by High Vine
sire and was raised by Mr. Gaines
who is a successful fair season sold
for \$1,000.

To a and Mrs. L. F. Hubble of
felt that the Philani county, were
dom of their aunt Mrs. D. M.
Thiers and family last week. Mr.
for the lot of mineral land
on the Kentucky Springs, and will
make as part of the good road in
out of the property has been
abundantly increased in value, the
waste and being now reached by
the call on the
defend our
ciples it and
agricultural.

The public spirited citizens of
Kenton county between Independ-
ence and Bracht have arranged to
build a telephone line connecting
with the county seat.

The Piano Recital of the pupils
of Mrs. Mollie Mottier-Wallace will
be given at the school auditorium
Friday evening, May 18th.

The L. & N. Railroad Co. is re-
placing the old bridge on the
Dixie Highway north of town
with a fine new structure.

The Senior Class of the Walton
High School will give its class
play "Diamonds and Hearts" at the
school auditorium Monday eve-
ning, May 14th. Come out and give
them a good crowd; show your
school spirit.

Died—Laura Allison, the infant
daughter of Mr. and Mrs. John Al-
lison, of Gardnersville, Ill., died
at Covington last Friday, aged 11
months. The little one became
very ill a couple of weeks ago
and its grandparents, Dr. and Mrs.
B. K. Menefee had the child
brought to their home in Cov-
ington to be given skilled treat-
ment, believing its life could be
saved, and the most skilled phys-
icians of the city did everything
in their power, but without avail.
The remains were taken to Gard-
nersville for interment.

"The Civic Campaign of Applied
Christianity" being conducted at
the respective churches the past
two weeks by Rev. Roland J. Nich-
ols of Ohio, has been meeting with
most popular favor and the
churches each evening have been
filled to overflowing. Rev. Nich-
ols is a very fine speaker and a
most logical reasoner, and has a
captivating way of presenting his
arguments to his congregation
that wins their interest. He is
doing a great work and it will
leave a lasting impression. The
campaign is expected to close Fri-
day night.

The Walton Electric Light Com-
pany was able to begin re-light-
ing the town last Saturday but
the plant is not fully completed.
The night is better than under the
old plant and promises to give
splendid satisfaction. E. L. Kelley,
the proprietor, has been untiring
in his efforts to have the service
resumed at the earliest date pos-
sible and has had many obstacles
to overcome. The public spirited
citizens subscribed about \$1,500
toward helping him rebuild the
plant which necessitated an ex-
penditure of about \$4,000, and all has
been collected but about \$185 and
those who owe will please pay
this week as Mr. Kelley is obliged
to pay the balance on his machin-
ery. The list of donors will be
published next week to show that
all who have paid have been duly
credited.

The promoters of the loose
leaf tobacco warehouse at Sparta,
Gallatin county, met here last
Thursday at the office of Tomlin
& Vest and incorporated with a
capital stock of \$15,000, and with
the right to incur indebtedness to
the extent of \$50,000. The direc-
tors and officers elected are as
follows: President, W. L. Kirkpat-
rick, of Cincinnati; V-President,
Harry W. Carver, of Sparta; Sec-
retary and Treasurer, D. B. Wal-
lace, of Walton; Manager, Chas. B.
Carver. The other three direc-
tors are R. B. Brown, of Warsaw,
John A. Downard, of Covington,
and Harry C. Records of Sparta.

All of the stock was fully sub-
scribed, and a donation of \$1,
500 was made to the company by
the business men of Sparta to be
paid as soon as the warehouse is
completed. Arrangements are now
being made to have the house
built at the earliest date possible,
as the lumber delivery is one that
is very uncertain. It is soon as
the building site is purchased and
the plans of the building decided
upon the contract will be let for
the earliest completion. The loca-
tion is believed to be one of the
best in the state as it is in the
heart of one of the best barley to
be produced districts, and is

the distributing point for most
of On and Gallatin counties, and
has good railroad facilities.

Ben Lee Cleek, of Union neigh-
borhood, spent part of the past
week here in the interest of his
race for the Democratic nomina-
tion for Sheriff of Boone county,
the primary election to be held
August 4th. Mr. Cleek was a can-
didate for the nomination at the
former election and had very
strong support as he is an excel-
lent gentleman, well qualified for
the office, and being identified
with the farming interests he
feels that he has a good chance
to win this time.

Monday several young
men went to Cincinnati and Louis-
ville to make application for ad-
mission to the Officers' Reserve
Corps and if accepted would en-
list in the army for service. There
were so many applicants for this
particular branch of the service
that there was no opportunity for
the boys to get in. Those who
went to Louisville were Clifford
R. Rouse and Robert P. Coffman;
to Cincinnati, M. R. Mosher, Fred
Miller, J. Clifford Meyhugh, and
Claude Wayland.

Judge Thos. F. Curley, R. C.
Green and Mrs. D. M. Bagby were
guests to Burlington Monday,
probing a second will of the
late Dr. D. M. Bagby which was
recently found. One will had been
probated and the one recently
found was later dated and con-
tained some minor changes and it
was concluded to probate it also.

Monday evening a mass meet-
ing was called at the Walton
opera house to discuss the char-
acter of street that should be
built thru Walton connecting the
Dixie Highway. The meeting was
called to order by Judge J. G.
Tomlin, and Judge Thos. F. Curley
was elected chairman. M. D. Ross
of Newport, an attaché of the
State Good Roads Department,
and who built the road running
out from Covington to Erlanger,
made a very instructive talk and
spoke of the different types of
road, but recommended the build-
ing of the concrete road as the
most serviceable and economical
in the end, and L. R. Mackenzie,
of Indianapolis, representing the
Portland Cement Association made
a very interesting address and al-
so recommended the concrete road
which was estimated to cost about
\$2,000 per mile. John L. Vest,
Judge Chas. Strother, J. G. Tom-
lin and others made suggestive
talks. The question of whether
the road should issue sufficient
bonds, and take a tax at a
special election, was referred to a
committee consisting of Judge
Strother, Jno. L. Vest and Judge
Tomlin, and the matter is to be
held at the opera house next
Monday night. There was a large
attendance and all appeared to be
in favor of a concrete roadway.

Good Farms in Demand

There have been several good
sized real estate deals in this
part of the county this year, and
it is said others were avoided only
by the owners of the farms ad-
vancing their price as fast as
they were accepted until the would
be purchasers concluded they did
not want to sell at all.

Working on the Tax Books

A call at the Sheriff's office in
the court house, Tuesday, found
that official busy making up his
tax books preparatory to the col-
lection of the 1917 county and
State taxes which will be due in
a few days. This is the last year
Sheriff Cropper will do the col-
lecting stunt.

Jas. Mitchell is equipped with
a new hammerless shot gun and
will soon begin making trouble
with the squirrels.

An attempt to assassinate the
Kaiser failed Monday. Three shots
are said to have been fired at
him.

Teddy will have charge of Uncle
Sam's war preparations if he is
not watched.

A drought is raging. It had not
rained for 12 hours when this was
written.

Quigley & Beemon,
Limaburg, Ky.

The Fine Percheron Stallion,

PRINCE OLSEN

Will make the season at \$10 to insure
a living colt.

Prince Olsen is a beautiful black
and is a model in his class, and is
one of the best breeders in Ken-
tucky. He weighs 1,700 pounds,
holds a high head, and has short
coupling and good action. He has
taken a number of first premiums at
the fairs.

At the same time and place my two
fine big Jacks

BEN AND DEWEY
will make the season at \$10 to insure
a living colt. They are two of the
finest Jacks in Kentucky, and both
are excellent breeders.

Persons parting with mares forfeit
the insurance money. A lien is re-
served on the colt until the season is
paid.

In handling the above stock care
will be taken to prevent accidents,
but I will not be responsible for any
that may occur on the colt until the season is
paid.

JOE READNOUR, Walton, Ky.

Better than Edwin Anticipated

Since the item on the 1st page
of this paper, in regard to Edwin
Duncan, was put in type, the fol-
lowing telegram in regard to him
was received by his father, Dr. E.
W. Duncan, from Congressman A.
H. House:

"Have made arrangements to
give Edwin appointment as prin-
cipal to Annapolis."

When the young man left home
he expected nothing better than
alternate, and the turn in matters
have taken is very pleasing to
him, as it enables him to enter
the Military Academy at Annapo-
lis immediately upon passing the
required examination.

Be A Volunteer and

Trade at Home!

I have a nice line of AUTOMOBILE TIRES and IN-
NER TUBES in stock, and the Goodyear Tire is one of the
best tires on the market to day.

I carry, also, Spark Plugs, Patches, Boots, Wrenches,
Pliers and other parts for your car.

Local Happenings.

Growing corn is knee high in Texas.

County and State taxes will be due again in a few days.

Sunday was another of the same kind—cloudy with a cold wind prevailing.

Phil Lambert, of Florence, was a business visitor to Burlington last Saturday afternoon.

H. L. Haberle, of Constance, was a business caller at this office last Saturday afternoon.

Mrs. Fannie Adams, of Covington, was the guests of friends in Burlington, last Monday.

Conner for Sheriff, and Rogers, for Assessor were the only candidates in town Monday.

Miss Gwendolyn Goodridge entertained several of her young friends last Saturday night.

Rankin Revill was the guest of his parents, Mr. and Mrs. J. C. Revill, a day or two last week.

The tennis people got out their equipment, Monday afternoon, having waited as long as they could.

Rev. O. M. Huey, of Louisville, was the guest of his sister, Mrs. J. E. Gaines, a few days the past week.

Dr. H. H. Hays, of Bullittsville, was talking with Burlington friends a few hours one day last week.

The haymakers chorus will entertain you at Library Hall, May 11. Come early in order to get a good seat.

Kirk Sullivan, of Covington, was the guest of his parents, Mr. and Mrs. W. P. Sullivan last Sunday and Monday.

Mrs. H. W. Shearer, of Newport, spent from Saturday until Tuesday with her parents, Mr. and Mrs. E. A. Hall.

It is announced on reliable authority that the First Kentucky Regiment will be sent to France within three months.

W. L. Kirkpatrick's truck moved 60 tons of fertilizer handles, this spring by L. T. Cline, local dealer in that class of goods.

Edward Rice went back to the farm a few days last week to kill grubs and briars and incidentally acquire a better appetite.

Generally by this time of the year many sheep have been sheared, but the damp, cold weather has delayed that work also.

Some who attended court last Monday were wearing heavy over coats and felt very comfortable.

Mr. Stewart, of Patriot, Indiana, was the guest of his daughter, Miss Katie, and Mrs. Mary Hume, from Saturday until Sunday afternoon.

Mrs. B. B. Alphin, of Walton, came down Sunday afternoon to spend a few days with her sister-in-law, Mrs. Mary Hume, who is very ill.

Richard White attended court last Monday, apparently recovered from a recent spell of severe illness, but he says he feels rather weak yet.

There are 30 pupils in the Operetta "Sylvia," given by the Boone County High School at Library Hall, May 11th. Don't fail to see this great effort.

The wool pool in this county this year will handle about all the crop, as several of the large home buyers have pooled their purchases.

The music in the operetta "Sylvia," is beautiful. There are many solo parts. These are to be given by the best singers in the school. The chorus selections are good, also.

Attorney Benj. Riley, who went to the city last week to enlist in the service of his country did not meet the physical requirements, his vision being defective, consequently he was not received and is at home pursuing the even tenor of his way.

The probability is Oliver Jarrel, who has been local lineman for the Consolidated Telephone Company for several months will take a position in the garage of the B. B. Hume Automobile Co., Covington. He has been succeeded as lineman by Vernon Pope.

The Boone County Wool Growers will offer their wool for sale, Wednesday, May 16, 1917, at Emory Hotel, Cincinnati, at 10 o'clock p. m. The following were appointed a committee to sell the wool: J. H. Stephens, Geo. McLasson and L. T. Cline. L. T. Cline, Sec'y.

Hon. W. P. Cropper announces this week as a candidate for reelection as Boone county member of the next General Assembly. Mr. Cropper has served in two sessions of the legislature, consequently he is much better qualified to serve than the man who when he was first elected. With his experience as a legislator and ability as an elector he will take a man of considerable nerve to tackle him, as he has had the office but one term.

Will Organize a Red Cross

A Red Cross meeting will be held at Bullittsburg school house, Saturday afternoon, May 12 at two o'clock. Everyone most earnestly solicited to attend.

A Big Dog Hunt

Several of the flock masters in Bullittsburg neighborhood engaged in an all day dog hunt on Monday last week, and no sheep have been killed out there since.

Has Corn Four Inches High

Peter Hager, an East Bend farmer, has an acre of corn that is about four inches high. He planted it about two weeks ago, during the warm spell. Very little corn has been planted in that neighborhood.

Can Take the Hills Now

J. O. Griffith, of Beaver, who was the first man in Boone county to buy an automobile, has been in touch with the improvements in that class of vehicle until now he is defying the Big Bone and South Fork hills in a new six cylinder.

Farmers Deploing the Weather All the farmers in town Monday were deploring the weather conditions and talked discouragingly of crop prospects. A few mentioned neighbors who have tobacco plants that will be large enough to set out in a couple of weeks.

B. C. Whitlock Dead

Brack C. Whitlock, 71, died at his home in Home City, Ohio, last Saturday. He is survived by his wife, who is a sister of Mrs. Corine Riley, of Bullittsville, this county, and Mrs. L. H. Crisler, of Covington. He had been in business in Home City for many years. Funeral at Hebron last Monday.

Providence is Neutral

Providence is not doing much towards encouraging the farmers to increase their farm production this year, but one time there was a year without a summer and still the people came through without experiencing a famine, but the present conditions are different from those 100 years ago.

Dogs Slaughtering Sheep

One day last week dogs killed sheep for E. K. Stephens, of Bullittsville, to the value of \$120, and for Albert Willis, of the same neighborhood, to the value of \$87. Dogs raided Geo. Krejch's sheep a day or two after but were driven off before they killed any sheep. It is believed that the dogs that did the mischief have been killed. Dogs would better be kept tied for a while.

A Narrow Escape

One day last week after Leslie McMullen's daughter, who takes cream to the creamery, had driven up to the delivery door, a telephone wire dropped from a pole across the entrance to the premises, and when the young lady was leaving she did not notice it until it caught her buggy, which it turned over, throwing her out. Fortunately she was not hurt nor did the horse offer to run.

Red-Cross Auxiliary Organized Several of the ladies of Burlington and vicinity met at the Baptist church last Saturday afternoon and organized a Red Cross Auxiliary. Mrs. Edmund Gaines, who is well informed in the work of the Auxiliary was selected to conduct the organization. The Auxiliary starts with about 30 members.

The Auxiliary will meet at the residence of Mr. and Mrs. E. C. Riley at 3 p. m. Thursday, and a good speaker from Cincinnati will address the organization at 3 p. m. at the court house next Saturday. All are invited to attend.

Hit the Bull's Eye

W. C. C. Rouse, of Kidville, was in Burlington last Saturday afternoon, and called upon the Recorder to remind it of the weather predictions he made several weeks ago, and the Recorder had to acknowledge that he hit the bull's eye. Mr. Rouse is not only a pretty reliable weather prognosticator, but when it comes to the interpretation of the scriptures he is right at home, and while at this office last Saturday afternoon he solved, readily, several knotty propositions submitted to him, but when asked about the live lamb he took out of a mole hole in a level blue grass pasture, several years ago, he shakes his head, but avows that every circumstance he relates in regard to the incident is true.

A Fine Farm Sold

Geo. E. Rouse, of Florence, has sold his farm of a little less than 122 acres, between Burlington and Florence, on what is known as second Gunpowder creek. It is understood the purchaser is a local man, and the consideration \$20,000. The farm is situated on a hill, and is a fine farm, but nearly every foot of it can be cultivated and is the best farm on the land between Burlington and Florence, having been kept in a high state of cultivation for two or three generations. The residence is a handsome old time brick structure, newly located at a convenient distance from the pike, making a most inviting appearance. Mr. Rouse has always kept everything about the farm in first class condition and it has, for many years, attracted the attention of all strangers who passed that way and motivated an increasing country home.

Wants Bidders

The county clerk is advertising for bids this week for the construction of a pike from Burlington to Locust Grove school house and from J. J. Tanner's on the Burlington and Florence pike, to W. H. Rouse's gate over the Gunpowder creek. The first named road is 5 1/2 miles and the second, 3 1/2.

That East Bend Truck

An East Bend truck makes frequent trips to Cincinnati by way of Burlington. A pike from Burlington to Waterloo would give the East Bend country a much more direct route to the city than the old one.

Call and See Green

It will pay Boone county people who are in Rising Sun during the next several days, to call at Green's department store and assure rare bargains he is passing out.

Great May Sale

GOOD BYE, U-BOATS

New York, May 5.—W. L. Saunders, chairman of the Naval Consulting Board, announced here today that the board had forwarded to Washington plans for dealing with the submarine problem, which, it was believed, had solved the problem successfully.

Mr. Saunders, who has been chairman of the naval consulting board about two months, supplemented his announcement by saying that while the submarine problem cannot be considered in reality to have been solved until the U-boats have been destroyed, nevertheless numerous experiments had been made along the Atlantic coast with highly encouraging results, which led the board to feel confident that the first named road is 5 1/2 miles and the second, 3 1/2.

Recovering from an Operation

The little daughter of Mr. Price, who lives on W. A. Gaines' farm, was taken to a Cincinnati hospital about two weeks ago and operated on for appendicitis by Dr. B. W. Gaines. In the next week or so the child will return home directly recovered from the operation, which could not have been delayed longer.

Wants Bidders

The county clerk is advertising for bids this week for the construction of a pike from Burlington to Locust Grove school house and from J. J. Tanner's on the Burlington and Florence pike, to W. H. Rouse's gate over the Gunpowder creek. The first named road is 5 1/2 miles and the second, 3 1/2.

That East Bend Truck

An East Bend truck makes frequent trips to Cincinnati by way of Burlington. A pike from Burlington to Waterloo would give the East Bend country a much more direct route to the city than the old one.

Call and See Green

It will pay Boone county people who are in Rising Sun during the next several days, to call at Green's department store and assure rare bargains he is passing out.

Bought a Chevrolet

Esq. E. J. Aylor is the owner of a Chevrolet, having put it in commission last Monday. He bought of E. B. Hume of course.

CHURCH NOTES.

Prayer meeting Thursday night 7:30 at the Baptist church, Marshall Hall leader. Don't forget to come.

Remember the regular business meeting of the Baptist church Saturday afternoon.

Bro. DeMoisey will preach Sunday morning as usual.

Bro. Carter will preach the sermon to the High School graduates Sunday night.

QUAKER QUIPS.

Every man should do his bit, no matter how bitter.

Experience is a good teacher. It shows us what fools we used to be.

To touch a man's heart, sympathize with him. To touch his pocketbook, flatter him.

The pen may be mightier than the sword, but the fountain pen is apt to gush about it.

There is no reason why even the fellow who shoots off his mouth shouldn't aim high.

All things come to those who wait, but they will come sooner if you are too busy to wait for them.

A ball in the stock market can sometimes raise almost as much disturbance as one in a china shop—Philadelphia Record.

Sold Wheat at \$2.95 a Bushel James L. Riley sold a few days ago about 2,000 bushels of wheat at \$2.95 a bushel. Stephens Bros. sold 700 bushels, several weeks ago at \$2.95 a bushel, and Dr. R. H. Cline sold a lot about the same time at the same price.

Talk to the Tri-State Patron

In Your Neighborhood.

Let him explain his experience to you and the profit of selling direct to the

Tri-State Butter Company,

CINCINNATI, OHIO,

He will tell you that no shipper ever lost a dollar dealing with us, and his experience is that the TRI-STATE will make more money for the purchaser than any other creamery.

He does not worry about his shipment after he puts it on the train—no matter what train, day or night. For the TRI-STATE guarantees the shipment against loss or damage in transit, and our SPOT CASH pay checks permits no middleman's deduction or commissions.

You will find the TRI-STATE patron a man who appreciates the advantage and profit in choosing a Responsible, Safe and Permanent Creamery and sticking to it.

Tell him to order cans for you on 30 days trial or write direct to the

The Tri-State Butter Co.,

Cincinnati, Ohio.

We will gladly mail you cans prepaid. Over 20,000 cream patrons are selling to the TRI-STATE, THE LARGEST CREAMERY IN AMERICA buying direct from the producer.

ACROSS THE RIVER.

(Lawrenceburg Press.)

Warren Tebbis is out as a candidate for delegate to the Indiana constitutional convention.

Sergeant Krug and the detachment of six machine gun men, detailed here April 30 for guarding bridges, returned to Cincinnati Tuesday to join their company on a 30 day hike. Other soldiers were sent here to take their place.

Take Your County Paper

Commissioner's Notice.

Boone Circuit Court vs. Notice.

Montgomery Anderson, Administrator of James S. Cullum, deceased &c., defendants.

By order of the Boone Circuit Court, I will sell April 30th, the lands of Jas. S. Cullum, deceased, until January 1, 1918, for note with good security. To be sold contain 197 acres, 3 1/2 E, 30 poles, and one tract on 30 poles, 1 road and 30 poles.

I will be on the lot at 10 o'clock a. m., April 30th, 1917, same.

CHAS. MATTHEW, Registrar Boone Circuit Court

If you wish to know more about this sale, call on me at my office in New Jersey.

BIG PROFIT IN SHEEP GROW FINE EARLY SQUASHES

As Safe and Attractive as Any Other Line of Stock.

Nowhere is there an instance of decline in well-established husbandry based on production of meat and wool.

Raise sheep! This was the advice of F. R. Marshall of the bureau of animal industry, United States department of agriculture in an address before the members of the Kansas Sheep Breeders' association at the agricultural college in connection with farm and home work.

"It is now time for the live-stock farmer to make sheep raising one of his regular lines of production," said Mr. Marshall. "Putting aside the effects of war conditions, prospective values of lambs and wool render sheep raising fully as safe and attractive, to the man who will study and understand the business, as is the raising of cattle, horses or swine."

"Prior to 1914 such a statement as this would not have been justifiable."

Western Lambs on Soy Beans and Corn Pasture.

Assured meat values of the future, the need of greater economy in the use of farm labor, and the full utilization of pastures place sheep raising in an entirely new light.

"Some agricultural journals and other authorities have been inclined to question the safety of engaging in sheep raising and base their ideas upon statistical facts of decline in popularity of sheep in eastern states. Such statistical deductions are entirely misleading, as nowhere is there an instance in the United States of a decline in a well-established sheep husbandry based on the production of both meat and wool."

"The farm flocks that have disappeared in the past were raised primarily and almost entirely for wool production and beyond the fact that they were sheep had little in common with the kind of sheep that are now being placed upon American farms and which will be found in the near future on nearly all farms."

"An important feature in starting the sheep business is to quickly work into a flock of about 100 ewes, or as is recommended by the University of Illinois, a ewe for each two acres of the farm. The small flock which has heretofore been recommended for using weeds and waste feed, and incidentally as a small source of profit, is the flock that becomes diseased and, because of its insignificance in the farm business, is certain to be neglected."

CABBAGE REQUIRES RICH SOIL

Early Varieties Most Acceptable as They Come When Such Food Is Needed—Grow Quickly.

Cabbage is easily grown if the soil is rich enough, and the very early varieties are most acceptable, as they come at a time when such food is most needed. The style of head varies so much that every taste should be gratified. Round head or pointed head, flat head or drum head, stone head and sure head, all have their virtues.

Grow them quickly and feed the soil, and almost any of the standard varieties will give satisfaction. One year one head will seem to excel and another year this same variety will be a disappointment. Much depends on the soil and the season.

Cauliflower is almost as easily grown as cabbage, but more apt to be infested with worms, and for this reason is not a favorite with the ordinary gardener.

SPRING WORK WITH THE BEES

It is Duty of Beekeeper to Get Plenty of Bees in Time for Honey Flow for Success.

The duty of the beekeeper in the spring is to get plenty of bees in time for the honey flow. If this is not done his work is a failure. The population of the colony is reduced during the winter, especially where wintering conditions are not the best, and this must be corrected if the colony is to get the full honey crop. It is poor beekeeping to have weak colonies at the beginning of the honey flow from which the surplus crop is obtained.

Difficulty Experienced in North Where Season is Short—Wise to Start Under Glass in Pots.

In many localities it has been a difficult matter in recent years to grow fine squashes and have them fully ripened before frost came. This is especially true at the north where the season is short, and difficulty is experienced in getting the seed to grow when planted in the spring.

It is a wise plan to start pumpkins, cucumbers and squashes in flower pots under glass, so that the plants will have a good start and will be ready for blooming much sooner than those planted in the open ground.

A three or four-inch pot will hold from one to three seeds and the plants may be allowed to become nice size before being transplanted. The transplanting is easily done, and there should be no injury to the roots.

Simply turn the pot over and strike the edge on a box or board. The ball of earth holding the well-formed mass of roots will drop from the pot, and can be placed in the cavity made to receive it; the plants will scarcely show they were disturbed, and long before other squash or pumpkin vines are in bloom, the pot plants will have blossomed. They will not need any protection from pollen from other plants causing danger of mixing, which is so detrimental in recent years.

ELIMINATION OF ALL WASTE

Methods Which Have Been Discovered for Developing By-Products—Use Cull Potatoes.

Every farmer and fruit grower should secure a copy of the annual report for 1915 of Chief Chemist Aisberg of the department of agriculture, Washington, D. C., which tells, in a most interesting and instructive way, of the research work done during the past year and of the methods which have been discovered for making new uses of by-products and preventing waste which is the bane of American life.

Successful experiments were conducted in drying potatoes on a commercial scale for stock feed. In order to provide an outlet for cull potatoes, better methods were discovered for making potato starch, glucose and dextrine.

It was demonstrated that a number of valuable by-products can be obtained from the waste of canning factories. Oil, closely resembling the oil of bitter almonds, was found in cherry pits. The other waste products of the canning factories produced valuable sirups, jellies and alcohol.

What farmers need most these days is an outlet for surplus crops. The law of supply and demand usually takes care of the main crops.

SOY BEANS ARE LEGUMINOUS

Common Practice to Drill Them Together With Corn—Hogs Do Well on Such a Ration.

(By E. FENCE)

Like corn, the soy bean is a hot weather plant and does best where the season and soil are favorable to corn growing. The soil should be prepared the same as for corn, plowing deep and working down to a fine, firm seed-bed. It is a common practice to drill soybeans and corn together, hogging-off in the fall. This is a fine combination and hogs do well on such a ration. Three or four beans to the foot in a row is proper distance to sow when drilling with corn. When drilled alone it would be better to sow a little more thickly.

As a forage crop the soy beans are about equal to alfalfa in protein value and as palatable and digestible. They

Soy Bean Plant.

belong to the leguminous family such as clovers, vetches, cow peas, etc., having the power of extracting the most expensive plant food from the air and storing it in the soil.

When sowing in a field where they have never been grown, the seed or soil should be inoculated. This can be done by mixing soil from a field previously planted with soy beans and scattering it over the field you intend to sow, and harrow immediately, or mix with the seed and drill.

There are a number of varieties, early, medium and late. The medium will ripen in about 110 days. They are great soil builders and often yield two or three tons of hay and 20 to 30 bushels of seed per acre.

Quality Pays You —and Us

United States Tires are built with one supreme thought behind them—*quality*

—and quality pays you—and us.

We put not alone *good cotton* and *good rubber* into our tires;

—we use only the *super-quality* of both,

—plus design, construction, workmanship—*super-quality* all.

Motorists have recognized this super-quality standard of United States Tires

—by giving United States Tires not only amazingly large sales

—but equally amazing sales *increases*.

Quality pays you in service—and us in sales.

TAKEN THE HOME PAPER!

ANNOUNCEMENTS.

For Sheriff.

J. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLARK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Member Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY, of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE E. ROBERTS, of Bellevue precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

DEMOCRACY'S TASK

The millions fought and millions died; but when you asked them for what they perished upon their faces and scorned "ignorance" that provoked their question, President Wilson has discovered a happy phrase when he declared that the war is being fought for democracy. It was just like finding your collar button under the dresser for these European, they rushed pell-mell and embraced democracy, and they swayed their poor tired heads and bowed their halcyons in the name of Uncle Sam and democracy.

And so it has come to pass that the great nations of the world are in a league to make democracy safe and triumphant. Prussianism is the hateful word that best describes people who have forgotten their civilization, who have abandoned their honor and manhood, and who have lost respect for womanhood. Prussianism has unloosed hell on earth. Democracy has enlisted the purpose of rounding up and impounding in a corral this hell that has been running amuck. And the civilized nations are delighted to find that they are fighting with democracy, and they have accepted the phases of the United States, and have declared that in the end this war must finish Prussianism for all time.

The new copartnership of civilization has been cemented on real democratic soil. For Joffre, Viviani, and their parties from England and France, have accepted the help of the world's greatest democratic government. Our billions stand pledged henceforth for democracy, for liberty and for civilization. Uncle Sam has written a blank check and has handed it to his new European partners. Meanwhile Prussianism has battered its foot against a stone wall and it is doomed.

Democracy has taken up a big contract, and she must see it out to the finish. Then the fight of Democracy must continue through the long ages, until she has triumphed over the present foe. Strange doctrines come to America these days, and dangers lurk in the new theories about killing the interests that would promote money wars, control the press and give us conscription. The pity of it all is that in such trying times as these judgments frequently to hysteria and excitement.

Democracy must be kept safe against hate, greed, and progredence, the baser passions, that seek always to sway and control small groups that are placed in power. In cases like the present the people give carte blanche to their higher officials whenever a crisis is at hand.

Democracy has pulled its gun, and has declared that it wants peace and that in order to get it the tax must be knocked out of Prussianism. Democracy is no longer a national affair with us Americans; but it has become a world organization. It promises much for the future; and the people of the United States will do well at all stages of the struggle to look well to democracy, and to direct that she keep her eagle eye peeled lest a new Prussianism should spring up right here in our own household. There must be no false faces worn by this democracy that the world is fighting for.

And if Democracy comes out of the trenches, out of the cesspools of liquid fire, out of the savagery of the submarine; if she rights the wrongs of enslaving the persecuted Belgians; if she meets the vandalism in France; if she conquers these things expressed in these meek words, and still remains true to herself, then democracy and the spirit of brotherly love will be ready to go into partnership and declare regular peace dividends thru all eternity. Democracy will afford its

eral Washington, who in presenting his accounts to his nephews said that they were "not to unshave them for the purpose of shedding blood, except it be in self defense on defense of the country and its rights, and in the latter case to keep them unshaven and preferred falling with them in their hands rather than the relinquishment thereof."

Where Germany is Weak.

The German fighting machine is still in splendid fighting condition. There are no signs that this machine is wearing down. According to every indication it is still fully equal to all its tremendous labors. Danger is not in prospect from without the wall of trenches and naval guns. It is threatening from within. The ranks of the ragged, dispirited, tormented people, grown sullen in their misery.

A mass of pamphlets and loose leaves of the peace propaganda were distributed from hand to hand among the people. Some of these were drawn up in very daring terms. A number of them came to my hand through a young German Socialist.

The paragraph below conceals the use of the word "ultimately" in the blast of revolution:

"We are winning victories and bleeding to death. We are devastating even more of our neighbors' lands and dying of slow starvation. We are defying the anger of a world in arms and starving ruin in the face. The physical exhaustion of our people is exhausting; the financial power of our nation is exhausting; our great organizations for the work of peace are slowly disintegrating. We must have peace. If our Government cannot procure us peace what must we do?—World's Work."

In the last issue of his paper, the Owen County Democrat, State Senator J. C. Littrell says:

"The Kentucky Legislature has adjourned and we believe that when the new laws are put into effect every one will feel that we have a better taxing system than ever before. The state tax on real estate will be 40 cents per 100 instead of fifty cents. This tax on cash will be \$1.00 on each \$1,000 for state purposes only."

"Notes and other intangibles will be taxed for state purposes only."

"All liquors will pay a state tax of two cents per gallon which will produce a nice revenue."

"Cordials and soft drinks will pay a barrel tax."

"All real estate owners will be required to list their property at a fair cash value, and when they do the state rate will again be lowered."

"We will have three instead of five supervisors."

Those who desire cultivating both corn and tobacco this year will find the pitching of the latter crop will be demanding at the time before their corn is planted and the tobacco ground prepared.

Everybody is looking forward to next Saturday night when the opera will be given at the Library Hall. It being a new departure in local entertainment a large audience is anticipated.

Those who have contracts for road work in this county will be making the dirt fly in a few days. The weather this spring has delayed the class of work as well as all other.

The members of the local Red Cross Auxiliary are displaying considerable interest in their work and the membership has increased to about fifty.

Mrs. Jane Crigler, of Hebron neighborhood, has moved to Ludlow, to which postoffice she requests her Recorder sent henceforth.

Mrs. Mary Vaughan ran a rusty nail into one of her hands a few days since and the wound has given her considerable trouble.

A good ewe will produce \$300 worth of wool and \$10 worth of lamb this year. How many dollars is the ewe worth?

Prof. and Mrs. Mantz entertained his class at the Boone High School at a six o'clock dinner last Friday evening.

Wayne Phillips, the Post agent, has measles, but as he is getting along nicely he is glad that he took them.

Elmer Kirkpatrick and family spent last Sunday at Hebron with her mother, Mrs. Brenda Garnett.

Grass needs a good sun bath to give it the necessary nourishing properties.

Mrs. Mary Hume's condition has not changed any for the better recently.

Local politics and war talk divide time in this county now.

Celebrated His Birthday

Mr. Herman Craven, of Arcola, was pleasantly surprised on his recent birthday, when his relatives and surprised him by going to his home with well filled baskets. Those present were Mr. and Mrs. Herman Craven and son, Wilbur Lee, Mr. and Mrs. James Craven, Mr. and Mrs. David Houston, Mr. and Mrs. Walter Craven, Mr. and Mrs. Walter Craven, Mr. and Mrs. Elmer, Mr. and Mrs. Joe Schneider, Misses Harris, White, Letha and Dorothy, Bessie Craven, Keturah Craven, Mrs. Hume, Mr. and Mrs. Frank Craven, and Joe Will and George Schneider. All present spent a most delightful day, and wish Herman many more such anniversaries.

OWEN COUNTY.

(Owen News-Herald.)

"This is—of it," says John Cramer, "is that housecleaning and the war are both on us at the same time; but of the two, the worst by far is housecleaning."

Some of the high officials of the State have stated that every idle man in Kentucky should be put to work as there was no cause for idleness in these days of the scarcity of food stuff on account of the war. The taxpayers of the old commonwealth, who have visited Frankfort think as much.

If Dogwood Winter continues to increase it will decrease the supply of Spring and cause a greater demand for Summer, but the darned old fool weather man don't seem to understand his arithmetic well enough to give us an equal division of seasons.

Fruit will be plentiful. There is some peach and pear bloom, while apple bloom indicates immense stock. Most of the women folks will use honey in preserving fruit. It is better than that of sugar. There will be an increase of the supply of dried fruit.

The Northern Kentucky Graded School Tournament will be held at Owen this year. This is the first time Owen has undertaken to entertain the Tournament; other places having had it twice. Owen is the largest town in the Tournament and is perfectly able to entertain the Tournament, if the people of Owen will throw open their doors to the delegates. Owen students who have gone to other towns have been treated with great courtesy and have been entertained highly. We should treat delegates from other places with as much respect and extend to them a cordial welcome. The Tournament will be a big business event for Owen as well as social. It is time now for the people to become interested in the school and do all in their power to make the Tournament a success.

PENDLETON COUNTY.

(Falmouth Outlook.)

One of the largest lamb deals this season was made last week by the firm of Kearns, Caywood & Patterson, of Bourbon county, when 1,300 head of spring lambs were purchased at 11 and 12 cents. The deal was made with a number of Clark county farmers for delivery in June, July and August.

Grover C. Anderson, of Montgomery county, sold to Oscar M. Chandler of Boone county, the lambs from 700 to 1,000 ewes, at \$13.50. Deliveries to be made in June, July and August. Mr. Anderson sold to T. M. Greene, representing Leslie Combs, of Fayette county, 3,600 pounds of wool, at fifty-five cents.

A large acreage of potatoes have been planted in this county, and the officials already have the ground for the first time in their lives. "There is many a slip between the cup and the lip," so it is in raising a crop. There are many obstacles to combat between planting and digging time. Soldiers, hoe 'em well, and make two Murphys grow where only one grew before.

The people are assisting the food gamblers in every way possible. They are rushing to the stores and stocking up with a large supply of foodstuffs for future use. This is simply creating a unusual demand and forcing the prices still further towards the sky. This condition prevails all over the country, and the daily papers are the cause of it. The food barons are filling the daily press with veiled advertising to cause the people to buy and help them fleece the public. All this scare about shortage of the wheat and other crops is published to frighten you, Watch for the nigger in the woodpile.

As there is a pressing need for more food stuff during the war most people are planting larger gardens and raising many instances of back yards. A great many complaints have been made to the city officials that help cannot be obtained, even at a good price, and the officials already have their eyes on a few of the town ornaments who apparently "toil not, neither do they spin." Each person must do his part to increase his food production and if some fellows, both white and colored, won't work for the wages people are not afford to pay to put in gardens, then the officials will act and make them work for the city free. Citizens are requested to give the names of all who refuse to work to Chief Smith, Harrodsburg Herald.

Arcola, Ill., May 7.—The special train bearing General Joffre, Vice Premier Viviani and other members of the French mission eastward after a tour of the Middle West, was wrecked in the middle of a cornfield, midway between Arcola and Elison, Ill., at 7:30 o'clock tonight.

Several persons suffered slight bruises, but none of the members of the French party was injured. The cause of the wreck is not yet known. Railroad employees who made an examination of the wreck by lantern light expressed the opinion that the cars were derailed accidentally.

Charles Clore figures that corn planting will be finished just in time to allow the young people for 10 miles around and attend the big picnic he will give at Harrodsburg grounds the afternoon of the first Saturday in next month, June.

Mrs. W. L. Kirkpatrick, Mrs. O. P. Phillips and Mrs. Karl Rouse have been quite sick the past week with measles.

B. H. Stephens Dead

B. H. Stephens, of the Hathaway neighborhood, died at 7 o'clock last Friday night at his home near Big Bone church, having never regained consciousness after being stricken by paralysis the Saturday before.

Benjamin Hayden Stephens was born April 20th, 1836, and died May 4th, 1917, aged 81 years and 8 days, and was the last one of his family of Stephens, who only a few years ago composed a large per cent of the population of the East Bend neighborhood, everyone of whom was a first-class citizen.

Mr. Stephens was one the best informed men in this county, being a close and diligent reader, but on account of his retiring disposition he never made any display of his information.

He was united in marriage to Miss James Mary Mason, February 20th, 1862. To them were born six children, two boys and four girls, all of whom survive except the first born, which died in infancy.

Mr. Stephens was not a member of any church, but his remains were taken by undertaker C. Scott Chambers to the Big Bone Baptist church, where the pastor, Albert Maddox, conducted a brief service and laid to rest Sunday, after which the interment took place in the new cemetery near by, the grave closing over another of the county's good citizens.

School Examinations For 1917:

Graduates—Burlington and Walton, Friday and Saturday of this week.

White Teachers—Third Friday and Saturday in May, June and September.

Colored Teachers—Fourth Friday and Saturday in May, June and September.

State Examinations in June and September.

EDGAR C. RILEY, Sup't.

No Hunting Permitted

All persons are hereby notified that the birds of the undersigned are posted, and that hunting squirrels or any other kind of game is positively forbidden, and that the laws against trespass will be rigidly enforced against all persons who go upon said lands to hunt.

LOUVEET ROGERS,
ROBERT ROGERS.

Notice to Road Contractors.

Office of the Fiscal Court of Boone County.

Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock, noon, May 18th, 1917, when they will be publicly opened and read for the construction and improvement of the following county roads:

The East Ben road from Burlington to Locust Grove School House, a distance of 5.5 miles. The work to be done involves approximately: 5483 cubic yards earth excavation, 1008 cubic yards borrowed excavation.

1000 cubic yards crushed stone, measured loose, 58.5 cubic yards 1, 2, 4 concrete for culverts.

324 No. 10 reinforcing steel.

24 lineal feet 24 inch corrugated pipe—county to furnish pipe.

22 lineal feet 16 inch corrugated pipe—county to furnish pipe.

146 lineal feet 18 inch corrugated pipe—county to furnish pipe.

346 lineal feet 12 inch corrugated pipe—county to furnish pipe.

The road from the Burlington and Harrodsburg roads to J. T. Tanner's to top of hill near Gunpowder creek at W. H. Rouse's gate, a distance of 2.04 miles. The work proposed to be done involves approximately:

324 cubic yards crushed stone, measured loose.

2392 cubic yards earth excavation.

198 lineal feet 12 inch corrugated culvert pipe—county to furnish pipe.

22 lineal feet 15 inch corrugated culvert pipe—county to furnish pipe.

72 lineal feet 18 inch corrugated culvert pipe—county to furnish pipe.

22 cubic yards stone or bluffs masonry 1 acre clearing and grubbing.

Hathaway road, from Gunpowder creek to Waterloo and Rabbit Hash pike, 3.72 miles.

Bids will be accepted on this road in sections of one half (1/2) mile.

Plans and specifications may be seen at the office of the County Road Engineer.

Bids must be for work done in accordance with the plans and specifications approved by the Fiscal Court and the County Road Engineer, on file at the Road Engineer's Office in Burlington, Boone County.

The Fiscal Court of Boone County expressly reserves the right to reject any or all bids.

Each bid must be accompanied by cash or certified check for \$250.00, which check will be held until the execution of the contract.

Before the contract is awarded the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal for the faithful performance of the work in accordance with aforesaid plans and specifications.

All work to be done under the direction and supervision of the County Road Engineer.

By order of the Fiscal Court of Boone County.

W. B. ROGERS,
County Clerk of Boone County.

The new dwelling of Elmer Griffith is being pushed along rapidly by contractors William Ransler & Son, of Walton.

Several of our citizens attended the Sunday school convention at Jonesville, last Sunday a week, and report a good meeting.

Mrs. James Castleman of this place, passed away in South Dakota, her remains were shipped back to her old home, and her funeral preached by Rev. Radie, after which the remains were laid to rest in the Bethel cemetery to await the great resurrection.

UNION.

Principal of the Union Graded school, Mrs. M. P. H. McKee, enjoys the distinction of having served as secretary of the State High School Department and by unanimous consent chosen for the next session of the Kentucky Educational Association recently held at Louisville, Ky. Her interest in educational affairs and association with prominent educators throughout the State well qualifies her for such places.

The election of school trustees of Union Saturday was marked by a larger attendance than any one previously held at that place, resulting in the choice of Dr. H. C. Keeney and J. L. Frazier, Doctor Senour, who has ably served as chairman of the board retired and is succeeded by Dr. Keeney while Mr. Frazier is reelected. Much is to be said in commendation of the board of trustees for the service it has rendered and it is hoped by the patrons that the prosperity enjoyed during the past term by the school under Mrs. McKee will continue by her appointment as principal for the coming year. The Senior Class of Union High School makes the following announcement:

Baccalaureate Sermon Sunday May 13th, 8 p. m., at the Baptist church by L. Cochran Hunt, pastor Madison Ave., Presbyterian church Covington.

Class Day, Wednesday, May 16, 2:30 p. m., at school house when the following program will be rendered:

HOW KENTUCKY WOMEN CAN HELP KENTUCKY SOLDIERS

Beautiful Armory at Louisville, below, and Francis X. Bushmann and Beverly Bayne, above.

The First Kentucky needs a thousand recruits to fill its ranks to war strength. Once recruited, these men must be cared for at the front.

It is your regiment as well as ours. If its ranks are not filled, Kentucky will fall to do its duty in the country's hour of need. Kentucky has never failed before—it must not fail now.

Knowing that you feel in this matter as do the officers and men of the regiment, I am writing you in their name to ask that you help in the recruiting campaign the regiment is now making.

This campaign costs money. To raise it the regiment has enlisted the services of Francis X. Bushmann and Beverly Bayne, the famous movie stars. They will be in Louisville May 28th to lead the ball to be given that night at the First Kentucky Armory. At that ball will be chosen the girl who is to represent the State of Kentucky in the contest of Southern beauties to be held in New Orleans, June 1.

We all know that the most beautiful woman in the South lives somewhere in Kentucky. One purpose of the ball is to find her. The other is that the men of Kentucky shall be first on the firing line in France when the American expeditionary force is sent over. Will you help to realize both purposes?

The terms of the contest are as follows:

How To Win.

The two girls in each county in the state selling the most tickets to the First Kentucky Ball, May 28th, and priority receiving the greatest number of votes, will represent their respective counties at the MBE—Beauty Contest in "The Beauty Class" from which the Kentucky Beauty will be selected for the trip to New Orleans and for a professional motion picture tour in New York.

From the girls in the "Beauty Class" a Committee of Judges will select the most beautiful to represent the State of Kentucky in the Big Picture Production to be made in New Orleans June 2.

Send in orders for tickets, with cash or check or money order, made payable to The Treasurer, First Kentucky Infantry, Armory, Louisville, Ky., and tickets will be forwarded immediately and credit will be given the sender for amount turned in.

Price of tickets—Spectator ticket, \$1.00. Admission to the Dancing Floor, one person, \$2.00, for couple, \$3.00.

\$1.00 ticket entitles girls to 10 votes.

\$2.00 ticket entitles girls to 20 votes.

\$3.00 ticket entitles girls to 30 votes.

Address all inquiries to The Treasurer, First Kentucky Infantry, The Armory, Louisville, Kentucky.

WM. A. COLSTON,
Colonel, First Kentucky Infantry.

BIG BONE.

L. M. Miller and grandson, Chas. Miller, spent Friday in Covington on business.

The Ladies Missionary Society of the M. E. church was entertained Thursday by Mrs. L. R. Miller.

Mrs. Frank Ryle and two sons, of Vevay, and Misses Virginia and Hazel Botts, of near Rising Sun, visited relatives here several days the past week, and attended the commencement.

Indications are that Wilford Bullock will be engaged in the merchandise business at his old stand in Hebron again in a few weeks.

PROFESSORIAL HUMOR.
An eastern college professor has started out, or in, to have some fun of his own kind with the promoters of the daylight saving plan, and facetiously calls their attention to what he names oversight in the scheme as put before the public. He says that if the idea is to compel daylight to start an hour earlier by setting the clocks ahead 90 minutes, it is an oversight not to set the clocks back one hour in the evening and compel daylight to linger around one hour longer. Or, in case of great necessity, why not set the clock back two hours? Or, to prepare for a stress which may overtake us, why not set the clock forward two hours in the evening and make a net gain of four hours instead of one? As a supplementary suggestion the professor proposes that we abolish November and the greater part of December, and calling it all October, make that month extend from its present starting point to almost Christmas. He argues that if Julius Caesar could abolish months and weather in his time the scientists of the twentieth century, with superior knowledge, ought to be able to do much better, says Pittsburgh Dispatch. Hence his additional proposal that we get rid of March weather cruelties and uncertainties by abolishing the month and calling it all April from February to May.

Agriculture has made but little progress in recent years in Nicaragua, although it is the principal occupation of the people. As the country is tropical, fruits in abundance are produced. The east coast section of the country offers opportunities for raising limes, pineapples, grapefruit and bananas, but only the last named product is shipped to foreign markets. Ordinarily the country produces a sufficient quantity of corn and beans for its own consumption. The greater part of the food products consumed by the people of eastern Nicaragua is imported, but the western part of the country produces most of the food required by the inhabitants.

If you have not some growing plants in your living rooms put them in. They tone up a home, give it a kindly temper, inspire a love of nature and cultivate a taste for the beautiful. But more than this—they have a practical value. They create conditions of health. If they are air to breathe. They take in bad air and give out good. So the family flourishes if the plants flourish, says Ohio State Journal. Each plays into the other's hands. But the rent thing is in keeping company with nature, which is the finest association that comes into one's life. It is the stimulus of peace, joy, kindness and justice. The angels love a home with growing plants and flowers in it.

Is an art commission an asset or a liability to the city that has one? The question is suggested by the circumstance that New York would have a number of necessary new mail boxes were it not for her art commission, which refuses to let them be put up on the ground that they would not harmonize with the electric light poles to which they are proposed to be attached, says Milwaukee Wisconsin. Because they are not "a thing of beauty." It seems, the commission is determined they shall not have a chance to become "a joy forever."

Ambition is a splendid servant, but a dangerous master. Have an ambition, says Duluth Herald. You are not worth much and never will be worth much unless you have. Make it an ambition worth while, and never forget to leave the human duty of service to humanity. Possibly it is better to have had an ambition—certainly it is better to have a poor ambition—than no ambition at all. But an ambition, like an appetite, needs watching and controlling.

In these trying times it is well to recall this celebrated formula: "There are two things one may worry about—the things one can help and the things one cannot help. One need not worry about the things one can help, for one can remedy them, and one need not worry about the other things because neither effort nor worry can alter them."

The man who tells his wife everything may be regarded as a model husband, but the chances are when she has acquired his entire stock of information she doesn't know very much.

They tell us that spinach seed can no longer be imported from Holland on account of the war. Can't the war break up a bit and also keep the carrot seed out for awhile?

REVENUE LAW

By Which It Is Intended to Raise \$1,800,000,000 War Tax The Coming Year.

Following is a synopsis of the revenue law by which it is intended to raise one billion, eight hundred million dollars war tax the coming year:

On incomes, normal rate of 4 percent for individuals, with exemptions of \$2,000 for married persons and \$1,000 for unmarried, and graduated super-tax on incomes of more than \$5,000; 6 percent on corporation; increased taxes to be effective from January 1, 1917.

The taxes run from 1 to 33 percent on incomes ranging from \$5,000 to five hundred thousand.

The normal tax of individuals to be deducted and withheld at the source of income shall not apply to the two percent of normal tax until after Jan. 1, 1918.

On excess profits, 10 percent. On inheritances, new taxes by a graduated scale running from one-half to 15 percent, present inheritance taxes to remain. On imports, all existing tariff duties raised 10 percent and 10 percent duty imposed on articles now admitted free.

The first-class letter rate will be 3 cents per ounce or fraction thereof.

The postal card rate will be two cents.

The second-class mail rates will be advanced to 2 cents a pound for the first and second zones of the present parcel post system, 3 cents for the third and fourth, 4 cents for the fifth and sixth, 5 cents for the seventh and six cents for the eighth zone.

Newspapers and periodicals conducted without profit, such as religious periodicals, will pay a rate of one-half cent per pound uniformly, and newspapers distributed directly from the point of mailing will, as heretofore, pay a rate of only 1 cent a pound.

The tax on spirits, whisky and similar beverages has been increased to \$2.20 per gallon.

The tax on beer is \$2.75 per barrel.

The tax on rectifiers is 15 cents per gallon.

The tax on tobacco has been doubled.

The taxes on cigars have been advanced to a new schedule ranging from 50 cents to \$10 per thousand, according to retail value.

Levies by stamp taxes or other means on life insurance policies, pipe lines, electric power, telephone and telegraph messages, theaters, club dues, on manufacturers of automobiles, cosmetics, proprietary medicines, musical instruments, jewelry, moving picture films, chewing gum and pleasure boats; on newspapers 5 percent of advertising collection.

Admission tickets to all forms of theatricals, circus or hippodrome entertainments, including moving picture shows, will be taxed 10 percent of their cost.

Passenger tickets will be taxed 10 percent of their cost on all railway lines except commutation tickets, which will be taxed fifty cents each.

Freight will be taxed 3 percent of the freight rates.

Heat, light and telephone bills will be taxed 5 percent.

The documentary stamp taxes in vogue during the Spanish-American war will be re-enacted.

Telegraph messages and long-distance telephone messages, where the charge exceeds 5 cents per message, will be taxed 5 cents each.

Cosmetics, perfumery and all proprietary medicines will be taxed 5 percent.

Pipe lines will pay a tax of 5 percent of their valuation.

Automobiles will be taxed 5 percent at the point of manufacture, and this will be calculated at the manufacturer's price.

Musical instruments of value exceeding \$10 will be taxed 5 percent.

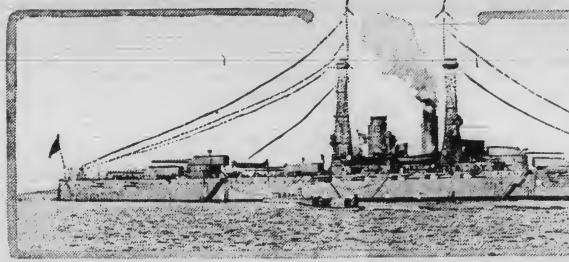

Jewelry will be taxed five percent ad valorem.

Pleasure boats will be taxed 5 percent.

TEUTONS LOYALTY TO U. S. SCORED.

Amsterdam, May 11. — German Americans are denounced in an article in the Krenz Zeitung, a leading German journal, just received here.

UNITED STATES BATTLESHIP NEW YORK

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of May 17th, 1877

Shade was desirable Monday.

Considerable corn rotted in the ground.

The weather has been very bad the most of this month.

At last term of the county court 46 settlements with guardians, &c., were confirmed and ordered recorded, and fifteen were filed.

The board of tax commissioners in session at the court house is composed of L. C. Norman, S. B. Brady, Joe H. Walton, Ben Stephens, J. H. Slater, John W. Berkshire, Wash Watts, J. J. Lillard, W. M. Rogers, Samuel Hudson.

N. S. Walton qualified as a justice of the peace with Jno. Rucker as bondsman.

Mrs. Bettie Riddell, of Williams town, is in Burlington, the guest of her daughter, Mrs. T. W. Finch.

Mrs. Nettie Phipps, of Nebraska, is the guest of her relatives in Burlington.

Mrs. F. Smith returned last week from a protracted visit with friends in Virginia.

Rabbit Hash.—Some are turning out their corn.—Some of our citizens are planning to attend the Carrollton fair which comes off this month. Miss Katie Pitts is talking of going to Hanover, Indiana.

Waterloo.—Farmers planted corn during the recent favorable weather.—S. B. Brady, L. P. Arnold and other officers of the association have appointed a committee to solicit funds for building Baptist church at Bellevue.

Oppose Use of Road Fund on New Pike.

Members of the Amsterdam-pike Improvement association turned out in force Thursday night at the home of R. E. Bellamy, secretary. Plans were discussed for the immediate organization of branches at Crescent Springs and at the western end of the highway.

Vice President Rembler was appointed chairman of a committee on extension of the association.

A report was given out that the Amsterdam-pike was to go into the hands of the state, and that the commissioners were using quite a large sum of the road and bridge fund along with the balance of the money raised by bond issue, on the Dixie Highway.

This caused a suspension of regular routine business turning to an indignation meeting.

The association decided to send a delegation to meet with the road commissioners and oppose the use of the road and bridge fund in the improvements on the Dixie Highway, as the voters of the county voted the bond issue for that purpose, and to convey the opinion of the association that it would be wrong to deprive the rest of the county of this fund which is said to be already in hand for the road repair needs of the county.

Building Poultry Houses

John P. Duncan is having some modern poultry houses erected on the land he bought of Edgar C. Fildes recently, and the town of Burlington on the east. Mr. Duncan is taking up the poultry business on a scale that will show what it is in the shortest possible time.

Badly Hurt

When Xen Scott attempted to remove the halter from a mule he was leading one day last week, the halter became fastened about one of his eyes, and the mule became frightened and dragged him a considerable distance before he was freed. Mr. Scott was badly bruised and cut in numerous places on his person, but was not dangerously hurt.

Will Hunger Come?

We may put it down as a self-evident fact that if the people of this country persist, during the coming year, in living on the same extravagant scale of former years, as a nation, will strike the rocks.

Experts in the Agricultural department have estimated that the actual waste of food in the United States is \$700,000,000 annually. This is in addition to the enormous consumption in excess of what is really needed to support life comfortably.

The International Institute of Agriculture sends this solemn warning from Rome: "The world's food crop is deficient and the situation is becoming alarming."

Now we are doing much talking as to the duty of raising bumper crops, of increasing our production in every way possible, which is perfectly right, but more than this is neglected. We must act as well as talk.

Heretofore the United States has always had a safe surplus of food stuffs from one harvest when the next was garnered. This very fact, possibly, had more to do with fostering our extravagance than anything else. We have felt that our resources were boundless and that we could never come to want.

Now, however, our surplus has vanished, and our place has been only gold, the most useless commodity in the world unless it can be exchanged for that which we need. And at last we must wake up and face the fact that we are up against a food shortage, and gold can not buy food where no food exists.

The solution of the food problem is not in needless extravagance and child in the country. It is useless to mince words for fear of hurting some one's feelings—extravagance and waste must cease. It is useless to undertake to solve ourselves with the prospect of a large increase in production. That of itself will not relieve the situation if extravagance continues. All must exert themselves to produce and save.

You, our farmer friend, because you have plenty and are raising plenty more, have no right to waste that plenty or to throw it up to every man, woman and child who needs it, and it is their right that they should be able to get it.

You, Mr. Rich Man, just because you have plenty of money to pay for it, have no right to waste that which others need, and of which your extravagance will deprive them.

Let us not be deceived. It is up to each one—rich, poor, high or low—to conserve the food supply. Food waste this year will be nothing less than a crime, and should be so recognized and treated.

A few months ago, when gold was flowing into our coffers, in yellow streams, we strutted and boasted of our boundless wealth. We compared ourselves to Miriam, that everything we touched turned to gold. And now we are in grave danger of finding ourselves with no gold—our gold is useless because we can not eat it.

Economy in any line is praiseworthy, but economy in food products is the highest type of patriotism, and the most disloyal of all is the man or woman who willfully wastes the nation's food.—Oldham Era.

ILLITERATE AND PRIMITIVE

Three-fourths of the 164,000,000 of our inhabitants are ignorant or engaged in agriculture. The bulk of the nation is peasant bred to the soil and for the most part illiterate. Even when they migrate to the cities they change but little.

The peasant of today plows with the same implements used by his remote ancestor. Only the newer districts that are being opened to agriculture are American farm machinery used, Siberia, for example, is still using the plow of America. The go-ahead peasants migrate to Asia, and electric-light towns are growing up there in true American fashion.

With the abolition of vodka, the peasant mind began to work, the part he has had to play in the war has aroused him still further.

Each revolutionary movement is the beginning of a greater development.

Building a Garage

Earl Barnett, of Lima, Pa., is building a garage. It is said to be the best equipped Ford in the county, calling back to mind the one that was destroyed according to his notion of what a Ford should be.

FOUR KILLED

By Youth Who Then Takes Own Life—Ax and Knife Used by Insane Man.

Elkton, Ky., May 16.—Chas. Milten, a prominent farmer of South Todd county, his wife, Mrs. Betty Milten, a son, Elmore Milten, aged 35 years, and Elmore's wife, Mrs. Annie Milten, aged 36, were slain at the Milten home this morning at 6:30 o'clock by Frank Milten, aged 33, another son, who then committed suicide after telephoning the coroner that all the members of the family had been murdered.

The murderer is supposed to have been suddenly stricken with insanity.

The coroner, upon receiving the message, rushed to the place of the crime and found a terrible scene of carnage.

The murders had been committed with an ax and a knife, and the heads of three of the victims had been split wide open, while Elmore Milten had been stabbed to death. Frank Milten, the slayer, had placed a rope around his neck, had thrown one end over the rafters of the back porch and then had fired a bullet through his heart. He was dead when the officers reached the scene.

The father, Charles Milten, was found on the porch near the body of Frank. The murderer had slipped up behind him and had struck him in the back of the head with the ax. He had then gone into the kitchen where his mother was preparing breakfast. Mrs. Milten's body lay on the floor near the stove, and she also had been hit from behind, with the same weapon that caused the death of her husband. The wife of Elmore Milten lay on the floor of her bedroom, and it was evident she had been slain while she was making up the bed.

Elmore Milten's body was found in the stable, and he had been stabbed to death.

The murderer left a note, dated Wednesday, which said:

"This act was done to avoid suffering on this earth. The executor will find it in my pocket."

"FRANK MILLEN."

Frank Milten, the slayer, bore the reputation of being an industrious, peaceable young man, and had worked on the farm with his father and brother until about a month ago, when he suddenly stopped working, declaring that he was feeling ill and was suffering from pains in his head. He consulted a physician, a cousin, in Elkton, and after some treatment seemed to feel better, resuming his labors several days ago.

At no time was he considered insane, however, and generally appeared to be of a genial disposition.

The Milten family was one of the best known and most prosperous in the section in which they lived, and their home life had always been regarded as ideal.

Frank Milten was one of the best in that section, and their farm one of the largest and most productive.

Pooled Wool Sold

Kenton co., wool growers who pooled their fleeces sold the pool to a Louisville firm at an average of 65 cents a pound. The pool contained about 500 fleeces and will be received on the 16th and 26th inst. Ten firms bid on the wool. The Boone county pool was to have been sold at the Emery Hotel, Cincinnati, yesterday.

It contained probably 800 fleeces of the fleeces that have heretofore topped the price.

He Fears the Weather

Chas. (Uncle) Hebron "Pole-nicker," is afraid the weather for very first Saturday afternoon in June will be so cool that those who attend the opening of the picnic season at Harvest Home will have to wear winter clothing and will leave at home their appetites for ice cream.

Improving His Residence

Dr. T. B. Eastman, of Florence, is remodeling his residence on Pike street, and having it modernized in several particulars, and when the work is completed he will have one of the country's best new homes.

PUBLIC ROADS

Why Maintenance of Roads Is Necessary by R. E. Toms, U. S. Senior Engineer.

In many parts of the U. S. the building of roads has been of such absorbing importance that there has been a general tendency to utilize all available funds for construction work, leaving the roads already built to shift for themselves. This is a wasteful and expensive policy and frequently serves to retard road construction.

The construction of any kind of a road presupposes establishing a repair and maintenance fund. A business man who invests in a house or expensive building expects to paint it occasionally, and mend its roof or make occasional minor repairs. When these things are necessary they are done; but they do not add to the value of the house. Its actual condition may be such that its value after the painting and repairing is still less than first cost. These charges for repair, plus the interest on the investment represented by the house, are properly considered to be a part of the annual rental.

There are two elements that enter into the investment in a road that make it different in aspect from the investment in a house or other commodity. One is the fact that the road is a permanent investment. No one expects to get its money out of the investment by selling. It becomes fixed capital of a peculiar kind, and it is not possible to sell it and get its value back.

The roads in many of our counties represent the investment of large sums of money obtained by issuance of long term bonds. Sound financing requires that the life of any utility shall equal or exceed the life of the investment. It is an absolute loss of fixed capital unrecoverable in any way, as the life of the road is a perpetual one. It is exposed to all sorts and conditions of weather and is subjected to heavy and rough use in its normal use. The result is a constant and often rapid wear and deterioration. To meet this we must be prepared to do such work as may become necessary at a variable annual charge.

The roads in many of our counties represent the investment of large sums of money obtained by issuance of long term bonds. WALTON DEPARTMENT.

D. B. WALLACE, Manager.
Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He also can be reached by telephone subscriptions and collect other accounts.

Daniel W. Bedinger of Indianapolis, spent Sunday here with friends and relatives.

Prof. Monty, John White and daughter, of Burlington, were visitors to friends here Saturday.

John E. Williams spent part of the week at Sparta and Louisville in relation to his tobacco business.

J. S. Cason of Florence neighborhood, spent Tuesday here in the interest of his race for County Assessor.

W. R. Rogers of Burlington, the efficient County Clerk, spent from Saturday until Monday here with relatives and friends.

Robert W. Jones, Buick agent, sold this week to John E. Williams of Verona neighborhood, an elegant Buick "Six" roadster.

Theo. F. Chambers enjoyed a very pleasant visit at Covington last week where he was the guest of his son Prof. C. Spencer Chambers.

Chas. L. Griffith has been spending most of the week at Dry Ridge taking the baths and treatment of a slight rheumatic attack.

Edwin M. Johnson who is employed as a guard at the State prison at Frankfort, spent part of last week here with relatives and friends.

N. W. Welsh was in Cincinnati a part of last week with his daughter Miss Edna having an operation performed on her nose for the removal of adenoids.

Rev. and Mrs. D. E. Bedinger and daughter who have been spending the winter at Orlando, Florida, will arrive here this week to spend the summer months in Kentucky.

Geo. Ryan who is employed as a fireman on a locomotive on the C. & O. Railroad running out from Covington, spent part of last week here with his father, Michael Ryan.

Rev. E. D. Manchester, of Highland services at the Salem Baptist church near town last Sunday, having a good sized congregation and preaching a very interesting sermon.

Mrs. Katie E. Rice, of Georgetown, and Miss Emma L. Hunt left Monday for New Orleans to attend the annual convention of the Southern Baptist Association expecting to be there two weeks.

W. Lee Johnson of London, spent Tuesday here with friends and relatives. He has a nice position with the Virginia-North Carolina Chemical company as night watchman at their big munition plant at Norwood.

W. Berry Johnson purchased this week from the estate of the late Mrs. Louisa Stephenson, the 44 acres of land and improvements, near Walton, at \$71 per acre, or about \$3,150. He secured immediate possession.

Prof. Ernest Franks of Grant county, who is principal of the High School at Sparta, spent Saturday here, and applied for the position of principal of the Walton graded school. There are thirty applicants for the position.

Rev. and Mrs. A. H. Hoveston and little son of New Liberty, Owen county, were the guests of Dr. and Mrs. G. F. Holloway a part of last week. Rev. Hoveston is the pastor of the New Liberty Baptist church and is an old time friend of Dr. Holloway.

The play "Hearts and Diamonds" given by the Senior Class of the Walton High School at the school auditorium Monday night was a success in every way the parts being well rendered and the public appreciation was shown by the large sized audience in attendance.

Dr. and Mrs. A. N. Jones left Tuesday evening for Jacksonville, Florida, where Dr. Jones goes to attend the annual session of the Railroad Surgeons of the Southern railroad. On their way home they will stop at Durham, North Carolina for a visit to their son Leslie Jones and wife.

The Civic Campaign of Applied Christianity closed last Friday night with a lecture "Who Pays the Freight" by Rev. Roland A. Nichols of Hiram, Ohio, who conducted the civic campaign. Much good was accomplished by the work and the ideas advanced will do much for the moral uplift of Walton.

Mr. and Mrs. John W. Sleet and little son of Crittenden, who recently returned from Fla., were visitors here Monday. Mr. Sleet who is afflicted with asthma states that he never had an attack of the disease while in Fla. and since his return has had several attacks, indicating that the climate is not very congenial to asthmatic patients.

The Commencement of the Walton graded school takes place next Thursday, May 24th, at the school auditorium. The graduates are as follows: Wendell Rouse, Carpenter, Isaac Dickey, Emma Jane Houston, Marie Menefee. The baccalaureate sermon will be delivered at the Walton Baptist church by Rev. Ollis Hamilton.

Fifty more recruits to the army arrived here last week from Louisville and have gone into camp at the old guard bridge, value, er, but so far there is no attempt to do any two front property. The publisher's garage at Bank Lick avenue (value out) as the work of Mr. Benson says, and the finished must any portion an (if a tube if he needed it).

Private Small, one of the soldiers on guard at the L. & N. railroad bridge near town, accidentally shot himself in the foot on last Friday night and one of his toes was shot off. He thought he saw someone lurking under the bridge and in investigating his foot slipped causing his gun to be discharged with the result as above indicated. Dr. G. F. Rankins was called and gave the young man the necessary attention and he was taken to Louisville that night for treatment in the hospital. Young Small resides in Louisville and was one of the recent recruits sent here for guard duty.

The Hamilton County Dixie Highway Council, Cincinnati, expected to have about twenty automobiles in the parade from Cincinnati Friday morning so as to be able to be at Berea by five o'clock that day when the first meeting of the Dixie Highway Association is to be held, and Richmond by eight o'clock when the big meeting is to be held.

At which Gov. Stanley and Public Roads Commissioner Rodman Wiley have promised to be present. The annual meeting of the directors of the Dixie Highway Association is to be held at Cincinnati, Monday, May 21. All members of the association are invited to attend the meetings at Berea and Richmond.

Governor A. O. Stanley recently called a meeting of the bankers of Kentucky at Louisville where he made a stirring patriotic address urging the bankers to do everything in their power to assist the farming class to raise all the food stuff possible to meet the exigencies brought about by the war conditions and the possibility of a famine should not a proper action be taken.

Food production, and the following address was promulgated by the Bankers, being issued in circular form and published in the newspapers. The address is as follows:

My Dear Sir:

Our country and mine is now actively engaged in the greatest war the world has ever known. There can be no doubt that this country's best able to maintain their position in the world as victors in the end. We and our allies, must, for the good of humanity, win this conflict.

The farmers of the U. S. must furnish the food supplies for ourselves and our allies. It will be not only profitable but patriotic to do so.

1. The bank desires to do its part in helping you in this great undertaking. We are willing to extend to you any amount of credit that you may require, and to purchase more stock tools, seeds or for the hire of additional labor. If you know of any worthy man who needs credit of this sort, kindly let us hear of it.

2. There will be a large crop of vegetables and fruits, none of which should go to waste, but should be canned or dried, for winter use and for sale on the market. There will be a great demand for all the excess that can be produced. The women on the farm are especially urged to can all vegetables and fruits they possibly can.

We believe there will be some difficulty in procuring cans and jars unless steps are taken now to secure them. You should let your merchant know at once, the number that you will need in order that he can get an adequate supply on hand. This bank will do its part in helping secure a sufficient number of these containers for your territory this bank has connection with.

3. In the opinion of the best experts there is every indication that this war will not end quickly but will be long. Farmers should not draw out their immature animals but should make them as large as possible.

Breeding stock should be kept. It will be needed more than at any other time in the history of our country.

Very Truly Yours,
THE EQUIABLE BANK & TRUST COMPANY.

Furnish Underhill Dead
Furnish Underhill, who died of tuberculosis at the home of his father, over in Kenton county, Monday, was buried here yesterday afternoon in the family lot in the Odd Fellows cemetery. He was a grandson of Mrs. Wm. C. Hughes and a brother of Mrs. Wm. C. Hughes and a most amiable and honorable young man.

Messrs. William Cyprian and R. Macklin, of the John R. Cyprian company, Covington, were callers at this office yesterday. They were discussing the signs of the RECORDER several weeks ago. Every farmer should have one of it and when he sees them to it is to send in his name.

Land for planting in corn is apparently a very nicely, and good seed bed, which in some measure, will compensate for the late season.

The last examination of pupils for common school graduation was a record breaker in numbers. The number who passed has not been reported.
